INITIAL STUDY/MITIGATED NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Jaques ETAL/Quartaroli & Associates, Inc.

PROJECT TITLE/FILE NUMBER(S): PA-2100149 (SA)

PROJECT DESCRIPTION: This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 14-acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The business is proposed to operate Monday through Friday, 7:00 A.M. to 5:00 P.M., with 5-10 employees. A request to modify the project area surfacing has been submitted with this application. The project site is not under a Williamson Act Contract. (Use Types: Farm Services, Equipment Sales and Repair-Farm Machinery)

The project site is located on the northeast corner of West State Route 4 Highway and John Turk Road, Stockton.

ASSESSOR PARCEL NO.: 162-130-05

ACRES: 14.09-acres

GENERAL PLAN: A/G

ZONING: AG-80

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S):

A farm services and farm equipment repair facility with 5,240 square feet of buildings and approximately 14-acres of outdoor storage area at total buildout.

SURROUNDING LAND USES:

NORTH: City of Stockton/agricultural/Burns Cutoff

SOUTH: Agricultural/French Camp Slough/State Route 4 Highway

EAST: Agricultural/San Joaquin River

WEST: Agricultural

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff (note date); staff knowledge or experience; and independent environmental studies submitted to the County as part of the project application. Copies of these reports can be found by contacting the Community Development Department.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

<u>No</u>

1 - 245 (R)() 1 - 1,711 (1)

GENERAL CONSIDERATIONS:

1.	Does it appear that any environmental feature of the project will generate significant public concern or controv Yes No	ersy?
	Nature of concern(s): Enter concern(s).	
2.	Will the project require approval or permits by agencies other than the County? ☐ Yes ☐ No	
	Agency name(s): Enter agency name(s).	
3.	Is the project within the Sphere of Influence, or within two miles, of any city? Yes No	
	City: Stockton	

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

			ould be potentially affected by this probability by the checklist on the following pa		t, involving at least one impact that is	
	Aesthetics		Agriculture and Forestry Resource	s	Air Quality	
	Biological Resources		Cultural Resources		Energy	
	Geology / Soils		Greenhouse Gas Emissions		Hazards & Hazardous Materials	
	Hydrology / Water Quality		Land Use / Planning		Mineral Resources	
	Noise		Population / Housing		Public Services	
	Recreation		Transportation		Tribal Cultural Resources	
	Utilities / Service Systems		Wildfire		Mandatory Findings of Significance	
DETE	ERMINATION: (To be completed by	the	Lead Agency) On the basis of this i	nitial	evaluation:	
	find that the proposed project CDECLARATION will be prepared.	OUL	D NOT have a significant effect	on t	he environment, and a NEGATIVE	
е		ns in	the project have been made by o		conment, there will not be a significant reed to by the project proponent. A	
	find that the proposed project MAY REPORT is required.	have	e a significant effect on the environr	nent,	and an ENVIRONMENTAL IMPACT	
ir a d	npact on the environment, but at le pplicable legal standards, and 2)	ast o has	ne effect 1) has been adequately an been addressed by mitigation me	alyze asure	etentially significant unless mitigated" ed in an earlier document pursuant to es based on the earlier analysis as ed, but it must analyze only the effects	
s a C	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Jigilia	ignature: Giuseppe Sanfilippo Date Associate Planner					

EVALUATION OF ENVIRONMENTAL IMPACTS:

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be crossreferenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
Ex	<u>AESTHETICS.</u> cept as provided in Public Resources Code Section 21099, uld the project:					
	Have a substantial adverse effect on a scenic vista?				\boxtimes	
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				\boxtimes	
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?				\boxtimes	
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			\boxtimes		

This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 14-acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The business is proposed to operate Monday through Friday, 7:00 A.M. to 5:00 P.M., with 5-10 employees. A request to modify the project area surfacing has been submitted with this application. The site will be required to meet Development Title Standards for lighting, and will be conditioned to confine all light rays to the project site. The lighting design shall not spill over onto public rights of way or adjacent parcels. The project site is not located along a designated scenic route pursuant to 2035 General Plan Figure 12-2, and the surrounding area is agricultural, with scattered residential uses. As a result, the proposed project is not anticipated to have an impact on aesthetics.

In casing significant and the me	AGRICULTURE AND FORESTRY RESOURCES. determining whether impacts to agricultural resources are nificant environmental effects, lead agencies may refer to a California Agricultural Land Evaluation and Site sessment Model (1997) prepared by the California Dept. of inservation as an optional model to use in assessing pacts on agriculture and farmland. In determining whether bacts to forest resources, including timberland, are nificant environmental effects, lead agencies may refer to ormation compiled by the California Department of Forestry define Protection regarding the state's inventory of forest difficulting the Forest and Range Assessment Project and a Forest Legacy Assessment project; and forest carbon assurement methodology provided in Forest Protocols opted by the California Air Resources Board Would the oject:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?				\boxtimes	
b)	Conflict with existing zoning for agricultural use, or a Williamson Act contract?				\boxtimes	
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				\boxtimes	
d)	Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes	
e)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				\boxtimes	

a-e) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 14-acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The project site is designated L (Farmland of Local Importance), and is currently fallow. The proposed project will not affect any agricultural uses, nor will it affect existing Williamson Act contracts. Therefore, the proposed application will have no impact on agriculture and forestry resources.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wh app dis	AIR QUALITY. here available, the significance criteria established by the plicable air quality management or air pollution control trict may be relied upon to make the following terminations. Would the project:	·		·	·	
a)	Conflict with or obstruct implementation of the applicable air quality plan?				\boxtimes	
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			\boxtimes		
c)	Expose sensitive receptors to substantial pollutant concentrations?			\boxtimes		
d)	Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?			\boxtimes

Impact Discussion:

a-d) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 14-acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) has been established by the State in an effort to control and minimize air pollution. The applicant will be required to meet existing requirements for emissions and dust control as established by SJVAPCD. The project was referred to the SJVAPCD for review. As a Condition of Approval, the project will be subject to the District's rules and regulations. As a result, any impacts to air quality will be reduced to less-than-significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	BIOLOGICAL RESOURCES:	parat	moorporatoa	mpaot	ттрас	. T HOI EII C
	ould the project:					
a)	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		\boxtimes			
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				\boxtimes	
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?		ı		\boxtimes	
d)	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?					
e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				\boxtimes	
f)	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				\boxtimes	

a-f) The Natural Diversity Database lists the Swainson's hawk (Buteo swainsoni), burrowing owl (Athene cunicularia), and the Delta tule pea (Lathyrus Jesponii var. jesponii) as rare, endangered, or threatened species located on or near the project area. Referrals have been sent to the San Joaquin Council of Governments (SJCOG) for review. SJCOG has determined that the applicant may participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), and the applicant has confirmed participation. As a result, the proposed project is consistent with the SJMSCP, as amended, as reflected in the conditions of project approval for this proposal. Pursuant to the *Final EIR/EIS for San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP)*, dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The t Prior EIR
<u>V.</u>	CULTURAL RESOURCES.		,			
Wc	ould the project:					
a)	Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5?			\boxtimes		
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?			\boxtimes		
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?			\boxtimes		

a–c) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 14-acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. No impact on cultural resources is anticipated. Should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The Prior EIR
Wc	ENERGY. ould the project: Result in a potentially significant environmental impact due	,				
	to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?				\boxtimes	
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?				\boxtimes	

(a,b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

\ /II	O.F.	COLOGY AND COLIC	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
		OLOGY AND SOILS. the project:					
	Dire	ectly or indirectly cause potential substantial adverse ects, including the risk of loss, injury, or death involving:			\boxtimes		
	i)	Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			\boxtimes		
	ii)	Strong seismic ground shaking?			\boxtimes		
	iii)	Seismic-related ground failure, including liquefaction?			\boxtimes		
	iv)	Landslides?			\boxtimes		
b)	Res	sult in substantial soil erosion or the loss of topsoil?			\boxtimes		
c)	woi pot	located on a geologic unit or soil that is unstable, or that uld become unstable as a result of the project, and rentially result in on- or off-site landslide, lateral reading, subsidence, liquefaction or collapse?			\boxtimes		
d)		located on expansive soil and create direct or indirect as to life or property?			\boxtimes		
e)	sep whe	ve soils incapable of adequately supporting the use of otic tanks or alternative waste water disposal systems ere sewers are not available for the disposal of waste ter?			\boxtimes		
f)		ectly or indirectly destroy a unique paleontological ource or site or unique geologic feature?				\boxtimes	

a-f) The Soil Survey of San Joaquin County classifies the soil on the parcel as *Egbert mucky clay loam, 0 to 2 percent slopes;* and *Merritt silty clay loam, partially drained, 0 to 2 percent slopes.*

Egbert mucky clay loam's permeability is slow and available water capacity is very high. This unit is suited for irrigated row and field crops. Egbert mucky clay loam has a storie index rating of 58 and a land capability of IVw-2 nonirrigated and IIw-2 irrigated.

Merritt silty clay loam, partially drained, 0 to 2 percent slopes has very slow permeability and available water capacity is very low. This unit is suited for irrigated pasture. Merritt silty clay loam, partially drained, has a storie index rating of 68 and a land capability of IVw-2 nonirrigated and IIw-2 irrigated.

The proposed the project is not anticipated to cause seismic effects, erosion, safety effects, or impact water and geologic features. The proposed project will not cause the risk of injury or death as a result of a rupture of a known earthquake fault, seismic activity, or landslides because there are no fault lines in the project vicinity. The proposed project will not result in substantial soil erosion or the loss of topsoil. The proposed project will not destroy a unique paleontological resource or site or unique geological feature. The proposed project is not located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.

c) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			\boxtimes		

Laca Their

Impact Discussion:

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the underlying project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO_2) and, to a lesser extent, other GHG pollutants, such as methane (CH_4) and nitrous oxide (N_2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO_2 equivalents $(MTCO_2e/yr)$.

As noted previously, the underlying project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy - Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. 11 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energyefficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

¹¹ San Joaquin Valley Air Pollution Control District. Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. December 17, 2009 San Joaquin Valley Air Pollution Control District. District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. 		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
	HAZARDS AND HAZARDOUS MATERIALS.	mpaot	moorporated	mpaot	тпрао	t i noi Ent
a)	ould the project: Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			\boxtimes		
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			\boxtimes		
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			\boxtimes		
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?					
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?					
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			\boxtimes		
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?			\boxtimes		

a-g) The proposed application would not result in, create or induce hazards and associated risks to the public. Construction activities for the project typically involve the use of toxic or hazardous materials such as paint, fuels, and solvents. Construction activities would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. No significant impacts are anticipated related to the transport, use, or storage of hazardous materials during construction activities are anticipated, and all hazardous materials will be regulated by the Environmental Health Department.

			Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The Prior EIR
		PROLOGY AND WATER QUALITY.					
	Vio req	the project: plate any water quality standards or waste discharge juirements or otherwise substantially degrade surface or bund water quality?				\boxtimes	
b)	suk pro	bstantially decrease groundwater supplies or interfere estantially with groundwater recharge such that the bject may impede sustainable groundwater inagement of the basin?				\boxtimes	
c)	or a	bstantially alter the existing drainage pattern of the site area, including through the alteration of the course of a eam or river or through the addition of impervious faces, in a manner which would:				\boxtimes	
	i)	result in substantial erosion or siltation on- or off-site;				\boxtimes	
	ii)	substantially increase the rate or amount of surface runoff in a manner which would result in flooding onor off-site;				\boxtimes	
	iii)	create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or				\boxtimes	
	iv)	impede or redirect flood flows?					
d)		flood hazard, tsunami, or seiche zones, risk release of lutants due to project inundation?			\boxtimes		
e)		nflict with or obstruct implementation of a water quality ntrol plan or sustainable groundwater management n?			\boxtimes		

a-e) The project site is located in the Flood Zone AE. A referral has been sent to the Department of Public Works, Flood Control Division for review. If approved, any new developments will have to comply with Development Title Section 9-1605 regarding flood hazards.

The project site is located approximately 0.25-miles west of the San Joaquin River, and approximately 1.0 miles northwest French Camp Slough. The proposed project will not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality, conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.

The project will not substantially decrease groundwater supplies or interfere substantially with groundwater recharge because the nature of operations means very little water will be used. The project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site; substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or impede or redirect flood flows. Additionally, the proposed project would not risk release of pollutants in flood hazard, tsunami, or seiche zones.

	LAND USE AND PLANNING. build the project:	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
a)	Physically divide an established community?				\boxtimes	
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			\boxtimes		

a,b) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations, and may be a conditionally permitted use in the AG-40 (General Agriculture, 40-acre minimum) zone subject to an approved Site Approval application. The project site is surrounded primarily by agricultural uses. Therefore, the project will not physically divide an established community and is consistent with surrounding land uses.

The zoning and the General Plan designation for the project site will remain the same if the project is approved. Additionally, the proposed project will have a less than significant impact to surrounding parcels and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to non-agricultural uses, as the proposed project is of an industrial nature on an industrially-zoned parcel. Therefore, this project is not a growth-inducing action.

The project site is located in the 100-year AE flood designation. A referral has been sent to the Department of Public Works, Flood Control Division for comments. If approved any new development will have to comply with Development Title Section 9-1605 regarding flood hazards. A referral has also been sent to the Central Valley Regional Water Quality Control Board for review.

The project site is located within the Primary Zone of the San Joaquin Delta. In addition to General Plan requirements in order to approve a project located within the Primary Zone, the project must meet the requirements of both the Delta Protection Commission Land Use and Resource Management Plan and the Delta Stewardship Council Delta Plan.

The following are findings for the Delta Protection Commission Land Use and Resource Management Plan, which can be made in the affirmative.

- 1. The Development will not result in wetland or riparian loss.
 - This Finding can be made because the project will not result in a loss of riparian habitat on or near the project site. The applicant will participate in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP) or provide alternative mitigation in an amount and kind equal to that provided in the SJMSCP.
- 2. The Development will not result in the degradation of water quality.
 - This Finding can be made because the project will meet the requirements of the Environmental Health Department and the Regional Water Quality Control Board.
- 3. The Development will not result in increased non-point source pollution or soil erosion, including subsidence or sedimentation
 - This Finding can be made because the expansion of the existing pond will be not result in an increased non-point source pollution. There will be no runoff into streams or waterways. The site is level and not subject to erosion. All runoff must remain on site.

- 4. The Development will not result in degradation or reduction of Pacific Flyway habitat.
 - This Finding can be made because the project will not significantly reduce Pacific Flyway habitat.
 The applicant has confirmed participation in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP)
- 5. The Development will not result in reduced public access, provided that access does not infringe upon private property rights.
 - This Finding can be made because all ground disturbance will be on private land and will not result in reduced public access.
- 6. The Development will not expose the public to increased flood hazards.
 - This Finding can be made because all grading will meet the requirements of the Flood Control Division of the Public Works Department.
- 7. The Development will not adversely impact agricultural lands or increase the potential for vandalism, trespass, or creation of public or private nuisances on public or private land.
 - This Finding can be made because this project is an agricultural use to increase the agricultural viability of the parcel in an agricultural zone. There are very few houses in the vicinity and no public access will be permitted to the site. The equipment area will be locked when employees are not present or on-site therefore decreasing the potential for vandalism, trespassing, or the creation of public or private nuisances.
- 8. The Development will not result in the degradation or impairment of levee integrity.
 - This Finding can be made because the project is not near an existing or proposed levee and no
 portion of the construction activities will require any changes to levees.
- 9. The Development will not adversely impact navigation.
 - This Finding can be made because the project will not impact water navigation because no bridges or waterways will need to be crossed. All site work will be performed on the project applicant's property and not within navigable waters.
- 10. The development will not result in any increased requirements or restrictions upon agricultural practices in the primary zone.
 - This Finding can be made because the proposed agricultural excavation project is an agricultural
 use and will increase the agricultural viability of the parcel by removing the sand. The surrounding
 uses are also agricultural and the project will not affect adjacent agricultural uses.

The project, although not statutory exempt from regulation does not meet the definition of a Covered Action under the Delta Stewardship Council Delta Plan because all four of the following Screening Criteria do not apply, specifically Screening Criteria Number 4:

The plan, program, or project:

1. Is "...a plan, program, or project as defined pursuant to Public Resources Code Section 21065."

This Screening Criteria can be met. The proposed project is an activity defined under Public Resources Code Section 21065. The application will require approval from the San Joaquin County Community Development Department and a component of the project is grading and excavation, which will result in a direct or indirect physical change in the environment.

2. Will occur, in whole or in part, within the boundaries of the Delta or Suisun Marsh.

This Screening Criteria can be met. The location of the project site is within the boundaries of the Delta Primary Zone as defined in the Delta Plan.

3. Will be carried out, approved, or funded by the State or a local public agency.

This Screening Criteria can be met. The proposed project will require approval from the San Joaquin County Community Development Department and will be subject to a comprehensive set of Conditions of Approval to ensure compliance with all development standards.

4. Will have a significant impact on the achievement of one or both of the coequal goals or the implementation of a government-sponsored flood control program to reduce risks to people, property, and State interests in the Delta;

This Screening Criteria cannot be met. The project will have no effect on the implementation on a government-sponsored flood control program. Moreover, it will not have a significant negative impact on the Delta ecosystem or the reliability of the water supply. This project is for the rental, sales & service of irrigation pipe, irrigation pumps, irrigation filters and parts for repairs of the same. This project is an ancillary agricultural use which provides necessary irrigation support to agricultural operations throughout the Delta Region. Using irrigation pipelines and pumps to convey irrigation water to crops conserves a tremendous amount of the limited irrigation water supply, which would otherwise be lost to evaporation and ground leaching if conveyed through open ditches. Utilizing irrigation pipes & pumps enhances the Delta ecosystem, proving a more reliable water supply by conserving agricultural irrigation water, which benefits, protects and enhances the unique cultural, recreational and agricultural values of the Delta through conservation and responsible use of the Delta's natural resources. The project will not have a significant impact on the achievement of the coequal goals because it is utilizing a property for a conditionally permitted use.

Because all four Screening Criteria cannot be met, the project, for the purposes of the Delta Plan, it does not meet the definition of a Covered Action. Referrals have been sent to the Delta Protection Commission and Delta Stewardship Council for review.

The proposed project does not conflict with any existing or planned uses, Master Plan, Specific Plan, or Special Purpose Plan, and any other applicable plan adopted by the County. Referrals have been sent to the San Joaquin Farm Bureau and Department of Conservation for review.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
XII.	MINERAL RESOURCES.				•	
Wo	uld the project:					
a)	Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state?				\boxtimes	
,	Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				\boxtimes	

a, b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. The project site is not classified as a mineral resource zone, and there is currently no mining activity in the area. The surrounding area is primarily developed with agricultural uses, and the City of Stockton is directly adjacent to the north. Therefore, the proposed project applications will have less than a significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

VIII	L NOIDE	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	l. NOISE. ould the project result in:					
	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			\boxtimes		
b)	Generation of excessive groundborne vibration or groundborne noise levels?			\boxtimes		
c)	For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			\boxtimes		

Loos Thon

Impact Discussion:

a-c) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 9.5 acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The nearest single family residence is located approximately 1,400 feet east of the project site. Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part II states that the maximum sound level for stationary noise sources during the daytime is 70 dB and 65dB for nighttime. This applies to outdoor activity areas of the receiving use, or applies at the lot line if no activity area is known. Additionally, noise from construction activities are exempt from noise standards provided the construction occurs no earlier than 6:00 A.M. and no later than 9:00 P.M. The proposed project would be subject to these Development Title standards. Therefore, noise impacts from the proposed project are expected to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
<u> </u>	<u>/. POPULATION AND HOUSING.</u>	·			•	
Wc	ould the project:					
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			\boxtimes		
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?			\boxtimes		

a-b) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 9.5 acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. The project does not propose housing within the project boundary. Therefore, the project will not induce substantial unplanned population growth in the area. The proposed project will not result in displacement of the population and affect the amount of proposed or existing housing in the vicinity. Therefore, the project's impact on population and housing will be less than significant.

,	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	Analyzed In The t Prior EIR
XV. PUBLIC SERVICES. a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:			\boxtimes	
Fire protection?			\boxtimes	
Police protection?			\boxtimes	
Schools?			\boxtimes	
Parks?			\boxtimes	
Other public facilities?			\boxtimes	

a) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 9.5 acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. Existing law enforcement protection is provided by the San Joaquin County Sheriff's Department, and the existing school services are provided by the Tracy Unified School District. No parks are impacted as a result of this project. Impacts to public services are also anticipated to be less than significant.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XVI. RECREATION. a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				\boxtimes	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				\boxtimes	

a-b) The proposed project will not substantially increase the use of existing neighborhood and regional parks because no increase in housing or people is associated with this application. Additionally, the project does not include recreation facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment. No impacts to recreation opportunities are anticipated.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	II. TRANSPORTATION.		,			
	ould the project:					
a)	Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?			\boxtimes		
b)	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?				\boxtimes	
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			\boxtimes		
d)	Result in inadequate emergency access?				\boxtimes	

a-d) The project was referred to the Department of Public Works on August 3, 2021 for review. Because the project is screened out based on square footage pursuant to the Department of Public Works Vehicle Miles Traveled (VMT) screening tool, it was determined that this project will generate less than 110 automobile trips per day and, therefore, is considered a small project according to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018. According to this OPR guidance, a small project that generates or attracts "fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact" with regards to VMT. Therefore, this project is anticipated to have a less than significant impact on traffic.

			Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XV a)	Wo the Pul fea def sac	RIBAL CULTURAL RESOURCES. Sould the project cause a substantial adverse change in significance of a tribal cultural resource, defined in colic Resources Code section 21074 as either a site, ture, place, cultural landscape that is geographically ined in terms of the size and scope of the landscape, cred place, or object with cultural value to a California tive American tribe, and that is:					
	i)	Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or				\boxtimes	
	ii)	A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.				\boxtimes	

a) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 9.5 acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. A referral was sent to the United Auburn Indian Community (UAIC), North Valley Yokuts Tribe, and the Buena Vista Rancheria for review.

If any suspected Tribal Cultural Resources (TCR) are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find. A Tribal Representative from culturally affiliated tribes shall be immediately notified and shall determine if the find is a TCR pursuant to Public Resources Code Section 21074. The Tribal Representative will make recommendations regarding the treatment of the discovery. Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of CEQA, including AB 52, has been satisfied. The contractor shall implement any measures deemed by the lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including but not limited to, facilitating the appropriate tribal treatment of the find, as necessary.

Additionally, should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

As a result of the mitigation and existing Health and Safety Code regulations, any impact to tribal cultural resources is anticipated to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	<u>(. UTILITIES AND SERVICE SYSTEMS.</u> build the project:					
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?				\boxtimes	
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			\boxtimes		
c)	Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			\boxtimes		
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?				\boxtimes	
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?				\boxtimes	

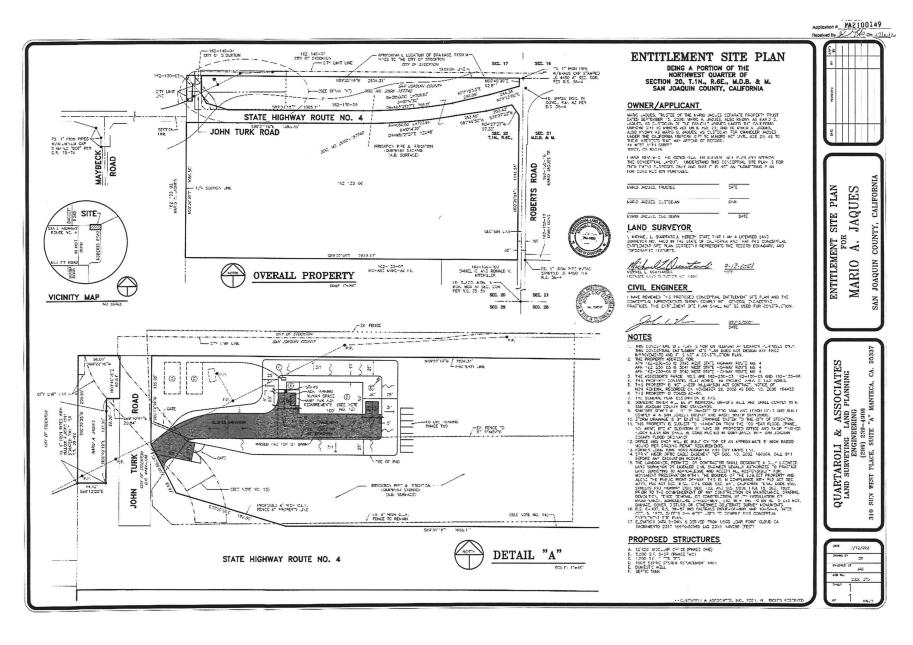

a-e) The project site will be required to keep all storm drainage on-site, and the project proposes on on-site stormwater retention pond. The Department of Public Works will determine the appropriate size of the proposed stormwater pond. Any on-site well and septic system will be required to be constructed under permit by the Environmental Health Department. Therefore, the impact on public services will be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	DFIRE. d in or near state responsibility areas or lands d as very high fire hazard severity zones, would the					
	stantially impair an adopted emergency response or emergency evacuation plan?				\boxtimes	
exac occu	to slope, prevailing winds, and other factors, cerbate wildfire risks, and thereby expose project pants to pollutant concentrations from a wildfire or uncontrolled spread of a wildfire?				\boxtimes	
infra wate exac	uire the installation or maintenance of associated structure (such as roads, fuel breaks, emergency er sources, power lines or other utilities) that may be the terminal temporary or bing impacts to the environment?				\boxtimes	
dowr resul	ose people or structures to significant risks, including inslope or downstream flooding or landslides, as a lit of runoff, post-fire slope instability, or drainage inges?				\boxtimes	

a-d) This project is a Site Approval application for a farm services business to provide irrigation pipes and equipment to agricultural operations be completed in two (2) phases over five (5) years. Phase 1 includes the construction of a 240 square foot modular office, and grading for an approximately 9.5 acre outdoor irrigation pipe storage area. Phase 2 includes the construction of a 5,000 square foot building to be used as a shop. Pursuant to the San Joaquin Fire Severity Zone map, the project site is located in an area with non-wildland/non-urban fire zone designation.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XXI. MANDATORY FINDINGS OF SIGNIFICANCE a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				\boxtimes	* }
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				\boxtimes	
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				\boxtimes	

a-c). The proposed application does not have the potential to degrade the environment or eliminate a plant or animal community. The project would not result in significant cumulative impacts or cause substantial adverse effects on human beings, either directly or indirectly.

29
