Project Title: Wallace Rock Slope Protection Project (Lake or Streambed Alteration Agreement, EPIMS-SHA-19638-R1I)

Project Location (include county): The project is located at the southside of Sacramento River, a Class I anadromous tributary to the Pacific Ocean, in the County of Shasta, State of California; Latitude 40.47020N, Longitude -122.290578W; Street address 3529 Riverside Drive, Anderson, CA, 96007. Assessor's Parcel Number (APN) 201-410-011-000.

Project Description: The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement, EPIMS-SHA-19638-R1I, pursuant to Section 1602 of the Fish and Game Code to Steven C. Wallace.

The project is limited to the demolition of an existing, failing retaining wall and the installation of approximately 128 linear feet of ¼-ton rip-rap rock slope protection (RSP) to stabilize a steep riverine embankment on a residential parcel. Approximately 2.18 cubic yards of rock per lineal foot in total will be placed, approximately 1,712 square feet of which will be placed below the ordinary high-water mark (OHWM). Prior to the placement of rip-rap, the embankment will be re-graded and material excavated to achieve a 1:1 slope. Approximately 1,250 square feet of vegetation, including grasses and blackberry, will be removed over the course of project activities. No trees will be removed.

Public Agency Approving Project: CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

Person or Public Agency Carrying Out Project: Steven C. Wallace

Exempt Status:	
	Statuto

Statutory Exemption.
Categorical Exemption. Type – Class 2 (Replacement or Reconstruction), Class 4 (Minor Alterations t
Land); California Code of Regulations, title 14, sections 15302 and 15304

Reasons why project is exempt: The project is limited to the replacement of an existing retention wall with new rip-rap RSP, and will consist of limited soil excavation and vegetation removal. No impact to sensitive species, waters of the state, or mature trees will occur.
