## **Summary Form for Electronic Document Submittal**

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #:			
Project Title: Jame	es Irrigation District Solar Project #1		
Lead Agency: Jame	es Irrigation District		
Contact Name: Mar	nny Amorelli, General Manager		
Email: mamorelli@j	amesid.org	Phone Number: (559) 693-4356	
Project Location:		Fresno	
Troject Ecoditori	City	County	
Project Description	(Proposed actions, location, and/or consequences).		
The proposed project involves the installation of a 3.5-megawatt (MW) solar array with single-axis tracking system, including 4.5 MW of direct current photovoltaic (PV) modules, steel support structures, 3.5 MW alternating current electrical inverters, cabling, and other system components. The project also includes two main service boards and two step-up transformers as well as metering facilities, conductors, and safety equipment for interconnection to Pacific Gas and Electric's (PG&E) distribution system via a new primary meter installed within the project site. The electricity generated by the proposed project would offset JID's aggregated electricity usage for the canal and well pumps across JID-owned parcels. The solar power generated on the project site would be used to generate bill credits for JID's meters in the Renewable Energy Self-Generation Bill Credit Transfer Program (RES-BCT) arrangement to offset their PG&E energy generation charges. The project's interconnection with PG&E would not require off-site construction because an existing PG&E generation tie line is located along the western boundary of the project site.			
Identify the project's	s significant or potentially significant effects and briefly	describe any proposed mitigation measures that	

would reduce or avoid that effect.

The project would result in potentially significant effects to biological, cultural, and tribal cultural resources. However, implementation of the following mitigation measures was determined in the IS-MND to reduce these project effects to less-than-significant levels:

- BIO-1 (Avoidance and Minimization of Impacts to Swainson's Hawk, Other Raptors and Nesting Birds)
- · CR-1 (Unanticipated Archaeological Resources)
- TCR-1 (Unanticipated Discovery of Tribal Cultural Resources)

If ap	plicable, describe any of the project's areas of controversy known to the Lead Agency, including the public.	ng issues raised by
ager	re are no known areas of controversy associated with the project.	
Prov	ide a list of the responsible or trustee agencies for the project.
