## **Project Description for the Vidal Energy Project**

**PROJECT TITLE:** Vidal Energy Project

PROJECT APPLICANT: CDH Vidal, LLC

**PROJECT LOCATION:** Approximately 2.5 miles southeast of Vidal, in an unincorporated area of the County of San Bernardino that is east of U.S. Route 95, north of the Riverside County border, and west of the Colorado River.

## PROJECT DESCRIPTION

CDH Vidal LLC (CORE) plans to construct and operate the Vidal Energy Project (Project), a solar photovoltaic (PV) electricity generation and energy storage facility that would produce up to 160 megawatts (MW) of solar power and include up to 640 megawatt hours (MWh) of energy storage capacity rate in a battery energy storage system (BESS) on up to approximately 1,090 acres of land. The Project would be supported by the existing, adjacent Western Area Power Administration (WAPA) 161-kilovolt (kV) overhead transmission corridor. The Project would include the construction of one on-site substation facility, which would collect and convert the power generated on-site for transmission in an overhead or underground line to the WAPA transmission system and interconnection location. The Project's permanent facilities would include PV panels, BESS, fencing, service roads, a power collection system, communication cables, overhead and underground transmission lines, electrical switchyards, a Project substation, and operations and maintenance (O&M) facilities.
