Present Land Use/Zoning/General Plan Designation:

Agricultural Exclusive (AE)/Agriculture Exclusive, 60-acre minimum lot size, with Transitional Agricultural Lands combining zone (AE-60/T)

Project Description: *(please use a separate page if necessary)*

LCSD proposes to construct two new water storage tanks to replace the existing water storage tank and to meet current and future water storage needs for the community. The new tanks would comply with current seismic and structural codes and provide LCSD with a more secure source of water storage for the foreseeable future. LCSD would construct approximately 1,400 feet of new below-ground 12-inch diameter PVC water main to connect the new water tanks to the existing pressure distribution system. The new water main would be installed along the south side of Loleta Drive within the County right-of-way where it would tie into the existing pressure distribution system near the Loleta Fireman's Pavilion. LCSD would demolish the existing water tank and remove all aboveground piping and appurtenances. LCSD would remove the two exposed portions of the existing water main between the redwood tank and the distribution system, which the project will make defunct, and the remainder of the water main would be capped and abandoned in place below ground. Regarding operations, the proposed project would alter the location of LCSD's water storage and conveyance infrastructure but would not change the type of ongoing operations.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
