#### INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Sing, Manjit

PROJECT TITLE/FILE NUMBER(S): PA-2000045

PROJECT DESCRIPTION: A Site Approval application to include:

- The expansion of an existing non-conforming single family dwelling including a 290 Square Foot patio,
- The conversion of a 5,000 square foot private truck and trailer repair shop to a public truck and trailer repair shop,
- The establishment of a truck driving school with a maximum of 3 box trucks,
- The construction of a 1,500 gallon fuel tank,
- And, a truck and trailer parking and storage facility for a maximum of 30 trucks with trailers and 41 trailers, to be constructed in two (2) phases over five (5) years.

Phase 1 will include the expansion to the existing non-conforming single family residence, conversion of the repair show, establishment of the truck driving school with up to 3 box trucks, and parking for 5 trucks with trailers.

Phase 2 will include parking for 25 trucks with trailers, 41 trailers, and the construction of a 1,500 gallon fuel tank with permits to be issued within 5 years of approval. The project proposes utilizing an existing on-site septic, existing on-site well, and existing on-site retention pond.

The project site is located on the west side of West Eleventh Street, 1,718 feet south of South Bird Road, Tracy.

ASSESSORS PARCEL NO(S).: 250-110-14

**ACRES: 8.11** 

**GENERAL PLAN: I/L (Limited Industrial)** 

**ZONING: I-W (Warehouse)** 

#### POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S):

A single family residence, a warehouse totaling 7,300 square feet, a 5,000 square foot truck repair facility, a truck driving school, a 1,500 gallon fuel tank for a truck parking facility established with PA-1700153 (SA) and BP-1803270, and a tow yard for up to 11 automobiles approved with PA-2100286 (UP).

#### **SURROUNDING LAND USES:**

NORTH: Industrial / Highway 205 / Tom Paine Slough / Agricultural / Residential / Banta

**SOUTH:** Industrial / Agricultural

EAST: Industrial / Interstate 5 / Public Facilities

WEST: Agriculture / City of Tracy

#### REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and

other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff (note date); staff knowledge or experience; and independent environmental studies submitted to the County as part of the project application (Enter report name, date, and consultant.). Copies of these reports can be found by contacting the Community Development Department.

# TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

No

GENERAL	CONSIDER	ATIONS:
---------	----------	---------

GE	GENERAL CONSIDERATIONS:								
1.	Does it appear that any environmental feature of the project will generate significant public concern or controversy?								
	Yes X No								
	Nature of concern(s): Enter concern(s).								
2.	Will the project require approval or permits by agencies other than the County?								
	Yes X No								
	Agency name(s): Enter agency name(s).								
3.	Is the project within the Sphere of Influence, or within two miles, of any city?								
	X Yes No								
	City: Tracy								

# **ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

			indicated by the checklist on the follow		pages.			
	Aesthetics		Agriculture and Forestry Resources		Air Quality			
	Biological Resources		Cultural Resources		Energy			
	Geology / Soils		Greenhouse Gas Emissions		Hazards & Hazardous Materials			
	Hydrology / Water Quality		Land Use / Planning		Mineral Resources			
	Noise		Population / Housing		Public Services			
	Recreation		Transportation		Tribal Cultural Resources			
	Utilities / Service Systems		Wildfire		Mandatory Findings of Significance			
DET	ERMINATION: (To be comple	ted b	y the Lead Agency) On the basis of th	nis ir	nitial evaluation:			
	I find that the proposed propo			fect	on the environment, and a <b>NEGATIVE</b>			
X	significant effect in this ca	se b		bee	on the environment, there will not be a n made by or agreed to by the project			
	I find that the proposed pr IMPACT REPORT is require		t MAY have a significant effect on th	ie er	nvironment, and an <b>ENVIRONMENTAL</b>			
	I find that the proposed project <u>MAY</u> have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An <u>ENVIRONMENTAL IMPACT REPORT</u> is required, but it must analyze only the effects that remain to be addressed.							
	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier <u>EIR</u> or <u>NEGATIVE DECLARATION</u> pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier <u>EIR</u> or <u>NEGATIVE DECLARATION</u> , including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

#### **EVALUATION OF ENVIRONMENTAL IMPACTS:**

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) the significance criteria or threshold, if any, used to evaluate each question; and
  - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

IS	0	ш	9	,
		u	o	

I. A	AESTHETICS.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
Ex	cept as provided in Public Resources Code Section 099, would the project:					
a)	Have a substantial adverse effect on a scenic vista?				X	
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X	
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?				X	
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				X	

a-d) This project is a Site Approval application for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop. the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. The facility does not propose any new buildings but includes the installation of an 1,500 gallon fuel tank. The fuel tank will be required to meet all building setbacks and Development Title requirements. This project will be conditioned with requirements for landscaping along roadways bordering the project parcel, and screening will be required for all outdoor storage areas. The project site is not located along a designated scenic route pursuant to 2035 General Plan Figure 12-2, and the surrounding area is a mixture of industrial, commercial, and residential uses. As a result, the proposed project is not anticipated to have an impact on aesthetics.

#### II. AGRICULTURE AND FORESTRY RESOURCES.

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land. including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. -- Would the project: a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use? b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? c) Conflict with existing zoning for, or cause rezoning

# c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

- d) Result in the loss of forest land or conversion of forest land to non-forest use?
- e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

	X	
	×	
	X	
	X	

#### **Impact Discussion:**

a-e) The proposed Site Approval application is for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop. the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years The current zoning for the property is I-W (Warehouse) and is located within an existing industrial corridor. The proposed project will not affect any agricultural uses, nor will it affect existing Williamson Act contracts. Therefore, the proposed application will have no impact on agriculture and forestry resources.

<u>III.</u>	AIR QUALITY.	Potentially Significant Impact	Less I nan Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
the cor	here available, the significance criteria established by applicable air quality management or air pollution atrol district may be relied upon to make the following perminations. Would the project:					
a)	Conflict with or obstruct implementation of the applicable air quality plan?				X	
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?				X	
c)	Expose sensitive receptors to substantial pollutant concentrations?				X	
d)	Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?			×		

d. The proposed project is a Site Approval application for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop. the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. The San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) has been established by the State in an effort to control and minimize air pollution. The applicant will be required to meet existing requirements for emissions and dust control as established by SJVAPCD. The project was referred to the SJVAPCD for review. The project will be subject to the District's rule and regulations. As a result, any impacts to air quality are anticipated to be reduced to less-than-significant.

IV.	BIOLOGICAL RESOURCES.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wc	ould the project:					
a)	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			×		
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				X	
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				×	
d)	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				×	
e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				×	
f)	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X	

a) The California Department of Fish and Wildlife Natural Diversity Database lists Swainson's hawk (Buteo swainsoni), round-leaved filaree (*California macrophyllm*) and Suisun marsh aster (*Aster lentus*) as rare, endangered, or threatened species or habitat located on or near the site for the proposed project. Referrals have been sent to the San Joaquin Council of Governments (SJCOG), the agency responsible for verifying the correct implementation of the *San Joaquin County Multi-Species Habitat Conservation and Open Space Plan* (SJMSCP), which provides compensation for the conversion of Open Space to non-Open Space uses which affect the plant, fish and wildlife species covered by the Plan. Pursuant to the Final EIR/EIS for SJMSCP, dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant. Additionally, the project site is not within a riparian area depicted in the General Plan, is approximately 2,030 feet from the Stockton Diverting Canal waterway, and is not within a wetland area.

SJCOG responded in a letter dated April 16, 2020, that the project site is subject to the SJMSCP. The applicant has confirmed that they will participate in SJMSCP. With the applicant's participation, the proposed project is consistent with the SJMSCP and any impacts to biological resources resulting from the proposed project will be reduced to a level of less-than-significant.

- b-c) The project site is not located in a riparian habitat as there is no river, stream or other waterway on the site, nor is it within an identified protected wetland, therefore the project will have no impact on riparian habitat or wetlands.
  - d) The project's impact on resident or migratory wildlife corridors will be reduced to less than significant because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.
  - e) The projects impact on protected biological resources will be reduced to less than significant because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.
    - The project site is not expected to interfere with local policies protecting biological resources because the applicant will be required to comply with the County's policy regarding Native Oak Trees, Heritage Oak Trees, or Historical Trees. If any such trees exist on the property, the project will be conditioned to protect and/or provide for replacement of the trees. In this way, any impact to protected biological resources will be reduced to less than significant.
  - f) The project will not conflict with the provisions of an adopted Habitat Conservation Plan, natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan, because the project applicant will participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

9

<u>V. (</u>	CULTURAL RESOURCES.	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	Analyzed In The Prior EIR
Wc	ould the project:				
a)	Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5?			×	
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?			×	
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?			×	

a-c)The proposed project is for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop. the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. As a result, no impact on cultural resources is anticipated. Should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

VI.	ENERGY.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
Wc	ould the project:					
a)	Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?				X	
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?				×	

a-b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

			Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VII.	GE	OLOGY AND SOILS.					
Wc	ould t	the project:					
a)	adv	ectly or indirectly cause potential substantial verse effects, including the risk of loss, injury, or ath involving:			X		
	i)	Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			×		
	ii)	Strong seismic ground shaking?			×		
	iii)	Seismic-related ground failure, including liquefaction?			×		
	iv)	Landslides?			×		
b)		sult in substantial soil erosion or the loss of soil?			×		
c)	or f pro land	located on a geologic unit or soil that is unstable, that would become unstable as a result of the ject, and potentially result in on- or off-site dslide, lateral spreading, subsidence, liquefaction collapse?			×		
d)		located on expansive soil and create direct or irect risks to life or property?			×		
e)	use dis	ve soils incapable of adequately supporting the e of septic tanks or alternative waste water posal systems where sewers are not available for disposal of waste water?			×		
f)	pal	ectly or indirectly destroy a unique eontological resource or site or unique geologic ture?			×		

- a) The geology of San Joaquin County is composed of high organic alluvium, which is susceptible to earthquake movement. The project will have to comply with the California Building Code (CBC) which includes provisions for soils reports for grading and foundations as well as design criteria for seismic loading and other geologic hazards based on fault and seismic hazard mapping. All recommendations from a soils report must be incorporated into the construction plans. Therefore, impacts to seismic-related (or other) landslide hazards will be less than significant.
- b) The project will not result in substantial soil erosion or the loss of topsoil because the project will require a grading permit as the site will be paved and landscape. Therefore, the grading will be done under permit and inspection by the San Joaquin County Community Development Department's Building Division. As a result, impacts to soil erosion or loss of topsoil will be less than significant.

- c-d) The project site is relatively flat terrain where landslides have not historically been an issue. A soils report will be required for grading and foundations and all recommendations from a soils report must be incorporated into the construction plans. Therefore, any risks resulting from being located on an unstable unit will be reduced to less than significant.
  - e) The project will be served by an onsite septic tank or alternative waste water disposal system for the disposal of waste water. The Environmental Health Department is requiring a soil suitability/nitrate loading study to determine the appropriate system and design prior to issuance of building permit(s). The sewage disposal system shall comply with the onsite wastewater treatment systems standards of San Joaquin County prior to approval. A percolation test that meets absorption rates of the manual of septic tank practice or E.P.A. Design Manual for onsite wastewater treatment and disposal system is required for each parcel. With these standards in place, only soils capable of adequately supporting the use of septic tanks will be approved for the septic system.

VIII. GREENHOUSE GAS EMISSIONS.	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	Analyzed In The Prior EIR
Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			×	
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			×	

Laca Then

#### Impact Discussion:

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the proposed project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO<sub>2</sub>) and, to a lesser extent, other GHG pollutants, such as methane (CH<sub>4</sub>) and nitrous oxide (N<sub>2</sub>O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO<sub>2</sub> equivalents (MTCO<sub>2</sub>e/yr).

As noted previously, the proposed project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy - Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. 11 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energyefficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change. As such, the analysis herein is limited to discussion of long-term operational GHG emissions.

<sup>11</sup> San Joaquin Valley Air Pollution Control District. Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. December 17, 2009. San Joaquin Valley Air Pollution Control District. District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency.

<u>IX.</u>	HAZARDS AND HAZARDOUS MATERIALS.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wc	ould the project:					
a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			×		
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X		
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			×		
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			×		
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?			×		
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			×		
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?			×		

a-g) The proposed application would not result in, create or induce hazards and associated risks to the public. Construction activities for the project typically involve the use of toxic or hazardous materials such as paint, fuels, and solvents. Construction activities would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. No significant impacts are anticipated related to the transport, use, or storage of hazardous materials during construction activities are anticipated.

The project site does not fall within the Airport Influence Area the comprehensive Airport Land Use Plan boundaries for the Tracy Municipal Airport. The project site is located approximately 4.9 miles northeast of the nearest runway. As a result, there will be no impact to airport flight paths.

<u>X.</u>	HYD	ROLOGY AND WATER QUALITY.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
Wc	uld <sup>·</sup>	the project:					
a)	dis	late any water quality standards or waste charge requirements or otherwise substantially grade surface or ground water quality?				X	
b)	inte suc	ostantially decrease groundwater supplies or erfere substantially with groundwater recharge the that the project may impede sustainable undwater management of the basin?				×	
c)	the the add	ostantially alter the existing drainage pattern of site or area, including through the alteration of course of a stream or river or through the dition of impervious surfaces, in a manner which uld:				X	
	i)	result in substantial erosion or siltation on- or off- site;				X	
	ii)	substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;				X	
	iii)	create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or				X	
	iv)	impede or redirect flood flows?				X	
d)		flood hazard, tsunami, or seiche zones, risk ease of pollutants due to project inundation?			X		
e)	qua	nflict with or obstruct implementation of a water ality control plan or sustainable groundwater inagement plan?			×		

- a-b) The proposed project's impact on hydrology and water is expected to be less than significant. The project will be served by the existing onsite well and septic system. The existing services were constructed under permit, and construction of any new individual domestic water well will require permit and inspection by the Environmental Health Department. The sewage disposal system must comply with the onsite wastewater treatment systems standards of San Joaquin County. Therefore, the proposed project's impact on these resources will be less than significant.
  - c) The proposed project does not propose any substantial alteration to a drainage pattern, stream or river. All necessary drainage improvements onsite will be required as conditions of the construction of the project. The project will not result in substantial soil erosion because the site will be paved and landscaped subject to building code requirements.
  - d) Development Title Section 9-1135.2 requires all development projects to provide drainage facilities within and downstream from the development project. Storm water runoff shall be conveyed into a terminal drain or may be

retained in a retention basin. The Department of Public Works requires that drainage facilities be provided in accordance with the San Joaquin County Development Standards. The proposed project plans call for storm water to be retained on-site. The Department of Public Works will review the specific calculations for the proposed on-site retention.

<u>XI.</u>	LAND USE AND PLANNING.	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
٧Vc	ould the project:					
a)	Physically divide an established community?				X	
0)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			×		

- a) The construction and operation of the proposed truck and trailer parking and storage facility will not physically divide an established community. The project is an orderly extension of the industrial development that is established within the industrial corridor in the unincorporated community of Tracy and the project is an industrial use adjacent to properties zoned for industrial use. The expansion of the non-conforming single family residence may be conditionally permitted pursuant to DT 9-235.3(2) Nonconforming Use: If the nonconforming use is conducted wholly are partially within a structure, the structure devoted to the nonconforming use may be enlarged, extended, or remodeled, subject to Site Approval. Therefore, the project's impact on an established community would be less than significant.
- b) The proposed project is a Site Approval application for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop, the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. The project is not a growth-inducing action nor is it in conflict with any existing or planned uses. The project will not set a significant land use precedent in the area. There are no applicable Master Plans, Special Purpose Plans, or Specific Plans in the vicinity.

<u>XII</u>	. MINERAL RESOURCES.	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
Wc	ould the project:					
a)	Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state?				×	
b)	Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X	

Loop Thon

# Impact Discussion:

a, b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. Although the project site is in an area designated MRZ-1, there is currently no mining activity in the area, and the surrounding area is developed with industrial, and agricultural uses. Therefore, the proposed project applications will have less than a significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	Analyzed In The Prior EIR
<u>XII</u>	I. NOISE.				
Wc	ould the project result in:				
a)	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			×	
b)	Generation of excessive groundborne vibration or groundborne noise levels?			X	
c)	For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			×	

c. The nearest conforming single family residence is located approximately 1,550 feet east of the project site, on the south side of West Eleventh Street. Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part I states that the maximum sound level for transportation noise is 65dB. This applies to outdoor activity areas of the receiving use, or applies at the lot line if no activity area is known. The proposed project would be subject to these Development Title standards. The primary noise source would be transportation noise from a truck parking and storage facility with surrounding Industrial uses. Therefore, noise impacts from the proposed project are expected to be less than significant.

XIV	/. POPULATION AND HOUSING.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
Wo	ould the project:					
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				×	
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X	

a-c) The proposed project will not induce substantial population growth in the area either directly or indirectly because the project site is in an industrial zone and surrounding properties are zoned agricultural and industrial. The proposed project would not displace substantial numbers of people or existing housing, necessitating the construction of replacement housing elsewhere. Therefore, the project will have no impact on population and housing.

Potentially Less Than Less Than Analyzed Significant Mitigation Significant No In The Impact Incorporated Impact Impact Prior EIR

#### XV. PUBLIC SERVICES.

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

Fire protection?		X	
Police protection?		X	
Schools?		X	
Parks?		X	
Other public facilities?		X	

#### Impact Discussion:

a) The proposed project is a Site Approval application for a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop, the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. A response letter dated April 08, 2020 was received South San Joaquin County Fire Authority but was not received from Banta Elementary School District. The project site is served by the San Joaquin County Sheriff's Office. The office was provided with the project proposal and invited to respond with any concerns or conditions. A response was not received from that office. As proposed, the project is not anticipated to result in a need for a substantial change to public services.

XVI. RECREATION.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				×	

a-b)This project will not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated, because the project will not generate any new residential units and the impacts to parks generated by the employees of this project will be minimal. This project does not include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment, because the type of project proposed, a retail store, will not result in an increased demand for recreational facilities. Therefore, the project will have no impact on recreation facilities.

ΧV	II. TRANSPORTATION.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
VVO	uld the project:					
a)	Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?			X		
b)	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?				X	
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X		
d)	Result in inadequate emergency access?			×		
1	and Discussions					

L - - - Th - --

#### **Impact Discussion:**

a) The proposed project will not conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, etc., because the conditions of approval include conditions to mitigate any conflict. The proposed truck and trailer parking facility is located on the north side of West Eleventh Street, and will be accessible eight (8) hours per day, five (5) days a week, with 4 employees. A referral was sent to the San Joaquin County Department of Public Works on March 24, 2020. The Department responded in a letter dated May 19, 2020 that a Technical Memorandum will be from a registered traffic engineer certifying that the propose development will not degrade the level of service along the adjacent roadways and/or intersections to unacceptable conditions is required before the Department could support or deem complete the application.

The applicant submitted the required Technical Memorandum to the Department of Public Works. The Technical Memorandum included additional recommendations to reduce traffic impacts such as including a 200-foot deceleration entrance taper and a 200-foot acceleration exit taper in the French Camp Road driveway design in order to facilitate safe movements on and off the site. The Technical Memorandum also included the recommendation to remove the trees along the French Camp Road and El Dorado Street intersection to meet the required 450-foot site distance requirement. The Department determined that the proposed project would not have a significant impact on traffic and submitted a letter with revised recommendations, including the above recommendations, dated May 13, 2019. These Conditions will be added to the project's Conditions of Approval and any impacts to the circulation system, including transit, roadways, etc. from the project will be less than significant.

- b) The proposed project Site Approval application for an addition to an existing non-conforming single family residence, a truck driving school, and a truck and trailer parking and storage facility. According to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018, an agency can utilize Map-Based Screening to "illustrate areas that are currently below threshold VMT" for non-retail projects. If a project is located in such an area, it "would likely result in a similar level of VMT" and allow the project to be screened out from needing further VMT analysis. As this project is located in a Traffic Analysis Zone (TAZ) that has been analyzed and determined to be 15% or more below the County's unincorporated VMT baseline, it is considered to cause a less-than-significant transportation impact.
- c) The Department of Public Works includes in its conditions, the requirement that the West Eleventh Street driveway design shall be improved in accordance with the requirements of San Joaquin County Improvements Standards Drawing No. R-17 [return raddi for truck-trailer egress shall be designed to prevent encroachment onto opposing lanes of traffic] (Development Title Section 9-1145.5). With these conditions from the Department of Public Works, any hazards from curves or intersections will be reduced to less than significant.
- d) The proposed project has adequate access from West Eleventh Street that provides for adequate access for emergency PA-2000045 (SA) Initial Study

equipment. The Department of Public Works, in its conditions, requires that the driveway approach be improved in accordance with the requirements of San Joaquin County Improvement Standards Drawing No. R-17 [including return radii to accommodate truck-trailer movements for trucks exiting the site so as not to encroach on opposing lanes of traffic]. Pursuant to Development Title Section 9-1015.5(h)(1), access driveways shall have a width of no less than twenty-five (25) feet for two-way aisles and sixteen (16) feet for one-way aisles, except that in no case shall driveways designated as fire department access be less than twenty (20) feet wide. With these required improvements, the project's impact on emergency access is expected to be less than significant.

<u>xv</u>	III. T	RIBAL CULTURAL RESOURCES.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
a)	chares 210 land the or o	uld the project cause a substantial adverse ange in the significance of a tribal cultural ource, defined in Public Resources Code section 174 as either a site, feature, place, cultural discape that is geographically defined in terms of size and scope of the landscape, sacred place, object with cultural value to a California Native erican tribe, and that is:					
	i)	Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or				×	
	ii)	A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.				X	

a) This project is located in the unincorporated community of Tracy, 0.30 miles south of South Bird Road.

The project proposes a 290 square foot patio addition to an existing non-conforming single family residence, a truck driving school with a maximum of 3 box trucks, the conversion of a 5,000 square foot private repair shop to a public repair shop, the construction of a 1,500 gallon fuel tank, and a truck and trailer parking and storage facility for a maximum of 30 trucks and 71 trailers to be constructed in two (2) phases over five (5) years. A referral was sent to the United Auburn Indian Community (UAIC), North Valley Yokuts Tribe, the California Valley Miwok Tribe, and the Buena Vista Rancheria for review. The UAIC sent a response letter dated April 02, 2021, which stated that the project area isnot is in a culturally sensitive and does not have the potential for the presence of Tribal Cultural Resources (TCR).

If any suspected Tribal Cultural Resources (TCR) are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find. A Tribal Representative from culturally affiliated tribes shall be immediately notified and shall determine if the find is a TCR pursuant to Public Resources Code Section 21074. The Tribal Representative will make recommendations regarding the treatment of the discovery. Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of CEQA, including AB 52, has been satisfied. The contractor shall implement any measures deemed by the lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including but not limited to, facilitating the appropriate tribal treatment of the find, as necessary.

These mitigation measures were agreed upon by consulting tribes and the lead agency. This requirement has been incorporated into the Conditions of Approval.

Additionally, should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health

and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

As a result of the mitigation and existing Health and Safety Code regulations, any impact to tribal cultural resources is anticipated to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR	
XIX.	UTILITIES AND SERVICE SYSTEMS.	puot	moorporatou	past	past		
Wou	uld the project:						
·	Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			×			
·	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X			
ŕ	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			×			
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			×			
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			×			
lmp	act Discussion:						
a)	The project will utilize an onsite well and a private set the project will not require new public facilities. A inspection by the Environmental Health Department	replacement	septic system wi	ll be installe	d under	permit and	
b)	The project will utilize an existing individual domestic	c water well.					
c)	The project will utilize an onsite sewage disposal system constructed under permit from the Environmental Health Department and subject to the onsite wastewater treatment system regulations that will comply with the standards of San Joaquin County.						
d-e	The project is a Site Approval application for a 290 residence, a truck driving school, and a truck and translicipated to generate solid waste in excess of Star	ailer parking a	nd storage facility.				

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact		Analyzed In The Prior EIR
XX	. WILDFIRE.					
cla	ocated in or near state responsibility areas or lands ssified as very high fire hazard severity zones, would a project:					
a)	Substantially impair an adopted emergency response plan or emergency evacuation plan?				X	
b)	Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?				X	
c)	Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				×	
d)	Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				×	

a-d) The project location is in the unincorporated community of Tracy, CA, and the project parcel is not identified as a Community at Risk from Wildfire by Cal Fire's "Fire Risk Assessment Program". Communities at Risk from Wildfire are those places within 1.5 miles of areas of High or Very High wildfire threat as determined from CDF-FRAP fuels and hazard data. However, the South San Joaquin County Fire Authority has required an on-site fire suppression water supply for this project due to the nature of the use. Therefore, the impact of wildfires on the project are expected to be less than significant.

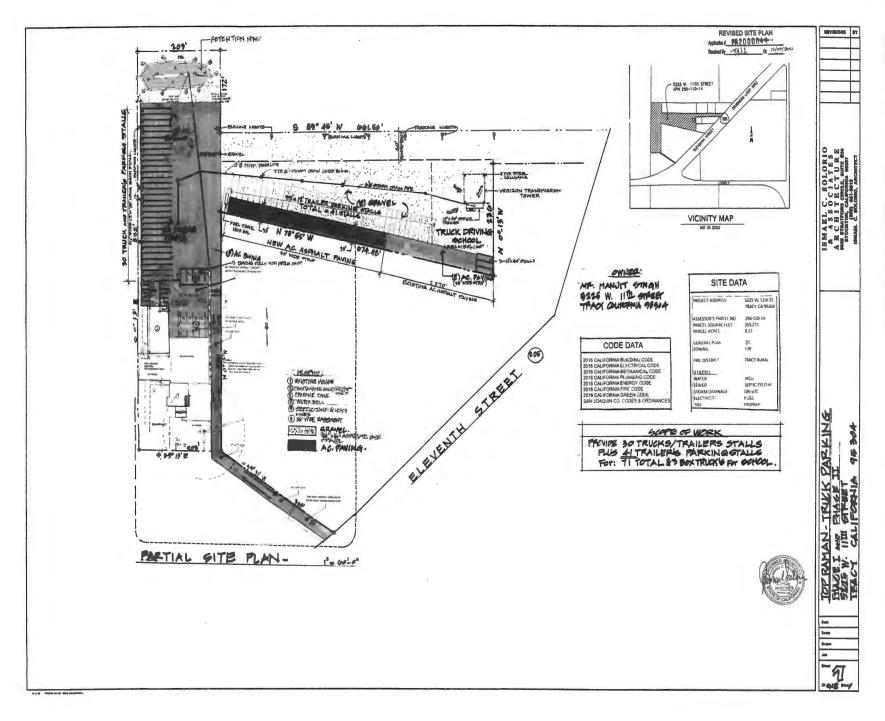

XXI. MANDATORY FINDINGS OF SIGNIFICANCE.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?		X			
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?			×		
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			×		
Impact Discussion:					
a) The proposed project does not appear to have the po	ntential to sign	nificantly degrade t	the overall or	iality of	the region's

a) The proposed project does not appear to have the potential to significantly degrade the overall quality of the region's environment, or substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory. There are no identified historic or prehistoric resources identified on this site. No archaeological or paleontological resources have been identified in the project area.

The applicant has confirmed that he will participate in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), which provides compensation for the conversion of Open Space to non-Open Space uses which affect the plant, fish and wildlife species covered by the Plan. With the applicant's participation, the proposed project is consistent with the SJMSCP and any impacts to biological resources resulting from the proposed project will be reduced to a level of less-than-significant

- b) The project is not expected to have cumulatively considerable impacts. Less than significant impacts to air quality, biological resources, traffic, and hydrology have been identified. Any potential impacts will be adequately addressed through conditions of approval and compliance with existing laws and regulations.
- c) The project does not have environmental effects which will cause substantial adverse effects on human beings.
