INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Howard Land Company LP/Devcon Construction, Inc.

PROJECT TITLE/FILE NUMBER(S): PA-2100271 (SA)

PROJECT DESCRIPTION: A Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The training facility will operate Monday through Friday during regular business hours (8am-5pm) and will include 40 employees. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The proposed building will consist of four shops (including two roll-up doors), four training facility areas, three offices, one storage area, one meeting room, one breakroom, and restroom facilities. The project site contains an existing truck sales facility, which is not a part of this application. The applicant proposes to utilize existing public water service from the City of Stockton, proposes a new septic system for sewer service, and will use an existing on-site retention pond for storm drainage. The project site is not under a Williamson Act contract. (Educational Services-Commercial)

The project site is located on the south side of East Transportation Court, on the east side of South Harlan Road, 2,900 feet north of Roth Road, French Camp.

ASSESSOR PARCEL NO.: 193-270-22

ACRES: 8.27-ac

GENERAL PLAN: I/G

ZONING: I-G

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S): An existing truck sales facility, and a 12,362 truck service training center.

SURROUNDING LAND USES:

NORTH: City of Stockton/ Industrial/Commercial/Agricultural with Scattered Residences

SOUTH: Industrial/City of Lathrop

EAST: Agricultural with scattered residences

WEST: Interstate 5/Agricultural with scattered residences

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff. Copies of these reports can be found by contacting the Community Development Department.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

GENERAL CONSIDERATIONS:

| 1. | Does it appear that any environmental feature of the project will generate significant public concern or controversy? Yes No |
|----|---|
| | Nature of concern(s): Enter concern(s). |
| 2. | Will the project require approval or permits by agencies other than the County? Yes No |
| | Agency name(s): Enter agency name(s). |
| 3. | Is the project within the Sphere of Influence, or within two miles, of any city? Yes No |
| | City: Stockton, Lathrop |

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

| | | | ould be potentially affected by this pr by the checklist on the following pa | | t, involving at least one impact that is | | |
|-------------|--|--------------|---|----------------|--|--|--|
| | Aesthetics | | Agriculture and Forestry Resources | s | Air Quality | | |
| | Biological Resources | | Cultural Resources | | Energy | | |

EVALUATION OF ENVIRONMENTAL IMPACTS:

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be crossreferenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

| | ESTHETICS. | | | | | |
| | cept as provided in Public Resources Code Section 21099, | | | | | |
| | uld the project: Have a substantial adverse effect on a scenic vista? | _ | _ | _ | | _ |
| aj | Trave a substantial adverse effect off a scenic vista: | | | | \times | |
| b) | Substantially damage scenic resources, including, but not | | | | | |
| • | limited to, trees, rock outcroppings, and historic buildings | | | | \boxtimes | |
| | within a state scenic highway? | | Ш | | | Ш |
| c) | In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? | | | | \boxtimes | |
| d) | Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? | | | \boxtimes | | |

a-d) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The project site is on a 8.37-acre parcel with an existing truck sales facility. The existing uses will remain in operation in addition to this application's proposed use as standalone uses. The project site is not located along a designated scenic route pursuant to 2035 General Plan Figure 12-2, and the surrounding area is a mixture of industrial, commercial, agricultural, and residential uses. As a result, the proposed project is not anticipated to have an impact on aesthetics.

| In consignation of the consistency of | AGRICULTURE AND FORESTRY RESOURCES. determining whether impacts to agricultural resources are nificant environmental effects, lead agencies may refer to California Agricultural Land Evaluation and Site sessment Model (1997) prepared by the California Dept. of inservation as an optional model to use in assessing eacts on agriculture and farmland. In determining whether eacts to forest resources, including timberland, are inficant environmental effects, lead agencies may refer to ormation compiled by the California Department of Forestry define Protection regarding the state's inventory of forest definition, including the Forest and Range Assessment Project and Forest Legacy Assessment project; and forest carbon assurement methodology provided in Forest Protocols opted by the California Air Resources Board Would the eject: | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|---|---|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| a) | | | | | \boxtimes | |
| b) | Conflict with existing zoning for agricultural use, or a Williamson Act contract? | | | | \boxtimes | |
| c) | Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section $12220(g)$), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section $51104(g)$)? | | | | \boxtimes | |
| d) | Result in the loss of forest land or conversion of forest land to non-forest use? | | | | | |
| e) | Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? | | | | \boxtimes | |

a-e) A Site Approval application to establish the use of a mechanic-training facility. The proposed business intends to train truck mechanics and truck collision body repair technicians to be certified repair technicians. The current zoning for the property is I-G (General Industrial). The proposed project will not affect any agricultural uses, nor will it affect existing Williamson Act contracts. Therefore, the proposed application will have no impact on agriculture and forestry resources.

|------------------|--|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| Wh app dis | AIR QUALITY. here available, the significance criteria established by the plicable air quality management or air pollution control trict may be relied upon to make the following herminations. Would the project: | | | | | |
| a) | Conflict with or obstruct implementation of the applicable air quality plan? | | | | \boxtimes | |
| b) | Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? | | | \boxtimes | | |
| c) | Expose sensitive receptors to substantial pollutant concentrations? | | | \boxtimes | | |
| d) | Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people? | | | \boxtimes | | |

a-d) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The project was referred to the San Joaquin Valley Air Pollution Control District (SJVAPCD) on March 3, 2022.

The SJVAPCD reviewed the project and stated the project's specific annual emissions of criteria pollutants from construction and operation are not expected to exceed any of the following District significance thresholds: 100 tons per year of carbon monoxide (CO), 10 tons per year of oxides of nitrogen (NOx), 10 tons per year of reactive organic gases (ROG), 27 tons per year of oxides of sulfur (SOx), 15 tons per year of particulate matter of 10 microns or less in size (PM10), or 15 tons per year of particulate matter of 2.5 microns or less in size (PM2.5). The SJVAPCD also stated the proposed Project is subject to District Rule 9510 because it will receive a project-level discretionary approval from a public agency and will equal or exceed 9,000 square feet of educational space. The applicant will be required to meet existing requirements for emissions and dust control as established by SJVAPCD. The SJVAPCD also recommends that demonstration of compliance with District Rule 9510, before issuance of the first building permit, be made a condition of Project approval. The applicant has submitted an Air Impact Assessment application to comply with District Rule 9510, and it has been approved by the APCD. As a Condition of Approval, the project will be subject to any applicable SJVAPCD rules and regulations. As a result, any impacts to air quality will be reduced to less-than-significant.

| IV. | BIOLOGICAL RESOURCES: | mpaot | moorporatou | mpaot | | |
| | Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | | | \boxtimes | | |
| b) | Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? | | | | \boxtimes | |
| c) | Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | | | | \boxtimes | |
| d) | Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? | | | | \boxtimes | |
| e) | Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? | | | | | |
| f) | Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | | | | | |

a-f) The Natural Diversity Database identifies the Suisun Marsh aster (Aster lentus), burrowing owl (Athene Cunicularia), Tricolored blackbird (Agelaius Tricolor), and the Swainson's Hawk (Buteo Swainsoni) as rare, endangered, or threatened species located on or near the project area. Referrals have been sent to the San Joaquin Council of Governments (SJCOG) for review. SJCOG has determined that the applicant may participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), and the applicant has confirmed participation. As a result, the proposed project is consistent with the SJMSCP, as amended, as reflected in the conditions of project approval for this proposal. Pursuant to the Final EIR/EIS for San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

|-----------|---|--------------------------------------|--|------------------------------------|---------------------------------|
| <u>V.</u> | CULTURAL RESOURCES. | | | | |
| | ould the project: | | | | |
| a) | Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5? | | | \boxtimes | |
| b) | Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5? | | | \boxtimes | |
| c) | Disturb any human remains, including those interred outside of dedicated cemeteries? | | | \boxtimes | |

a–c) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. No impact on cultural resources is anticipated. Should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

|-----|---|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| VI. | ENERGY. | | | • | • | |
| Wo | ould the project: | | | | | |
| a) | Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation? | | | | \boxtimes | |
| b) | Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | | | | \boxtimes | |

(a,b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

| | ii) Strong seismic ground shaking? | | | \boxtimes | | |
| | iii) Seismic-related ground failure, including liquefaction? | · 🗆 | | \boxtimes | | |
| | iv) Landslides? | | | \boxtimes | | |
| b) | Result in substantial soil erosion or the loss of topsoil? | | | \boxtimes | | |
| c) | Be located on a geologic unit or soil that is unstable, or the would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? | d | | \boxtimes | | |
| d) | Be located on expansive soil and create direct or indirect risks to life or property? | et 🗌 | | \boxtimes | | |
| e) | Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal system where sewers are not available for the disposal of waste water? | s _ | | \boxtimes | | |
| f) | Directly or indirectly destroy a unique paleontologica resource or site or unique geologic feature? | al 🔲 | | | \boxtimes | |

a-f) The proposed the project is not anticipated to cause seismic effects, erosion, safety effects, or impact water and geologic features. The proposed project will not cause the risk of injury or death as a result of a rupture of a known earthquake fault, seismic activity, or landslides because there are no fault lines in the project vicinity. The proposed project will not result in substantial soil erosion or the loss of topsoil. The proposed project will not destroy a unique paleontological resource or site or unique geological feature. The proposed project is not located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.

| b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases? | | | \boxtimes | | |

L - - - Tl- - -

Impact Discussion:

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the underlying project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO_2) and, to a lesser extent, other GHG pollutants, such as methane (CH_4) and nitrous oxide (N_2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO_2 equivalents $(MTCO_2e/yr)$.

As noted previously, the underlying project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy - Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. 11 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energyefficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

¹¹ San Joaquin Valley Air Pollution Control District. Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. December 17, 2009. San Joaquin Valley Air Pollution Control District. District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. December 17, 2009.

|-----|--|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| IX. | HAZARDS AND HAZARDOUS MATERIALS. | | moorporatou | | | |
| | ould the project: | | | | | |
| a) | Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | | | \boxtimes | | |
| b) | Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | | | \boxtimes | | |
| c) | Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? | | | \boxtimes | | |
| d) | Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | | | \boxtimes | | |
| e) | For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? | | | \boxtimes | | |
| f) | Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? | | | \boxtimes | | |
| g) | Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands? | | | \boxtimes | | |

a-g) The proposed application would not result in, create, or induce hazards and associated risks to the public. Construction activities for the project typically involve the use of toxic or hazardous materials such as paint, fuels, and solvents. Construction activities would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. No significant impacts are anticipated related to the transport, use, or storage of hazardous materials during construction activities are anticipated.

The project site falls within Zone 8 of the Airport Influence Area the comprehensive Airport Land Use Plan boundaries for the Stockton Metropolitan Airport. The project site is located approximately 2.5 miles southwest of the nearest runway. The project shall abide by the applicable Airport Land Use Plan for the Stockton Metropolitan Airport. A referral was sent to the Airport Land Use Commission and the Stockton Metropolitan Airport on March 3, 2022 for review. As a Condition of Approval, the project will be subject to the Airport Land Use Commission's rules and regulations. As a result, impacts to airport flight paths will be reduced to less than significant.

| | | PROLOGY AND WATER QUALITY. | | | | | |
| | Vic req | the project: blate any water quality standards or waste discharge quirements or otherwise substantially degrade surface or bund water quality? | | | | \boxtimes | |
| b) | suk pro | bstantially decrease groundwater supplies or interfere ostantially with groundwater recharge such that the oject may impede sustainable groundwater inagement of the basin? | | | | \boxtimes | |
| c) | or a | bstantially alter the existing drainage pattern of the site area, including through the alteration of the course of a eam or river or through the addition of impervious faces, in a manner which would: | | | | \boxtimes | |
| | i) | result in substantial erosion or siltation on- or off-site; | | | | \boxtimes | |
| | ii) | substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; | | | | \boxtimes | |
| | iii) | create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or | _ <u>-</u> | | | \boxtimes | |
| | iv) | impede or redirect flood flows? | | | | | |
| d) | | flood hazard, tsunami, or seiche zones, risk release of llutants due to project inundation? | | | \boxtimes | | |
| e) | | inflict with or obstruct implementation of a water quality ntrol plan or sustainable groundwater management in? | | | \boxtimes | | |

a-e) The project site is located in the Flood Zone X, 0.2 percent annual chance of flood designations. A referral has been sent to the Department of Public Works, Flood Control Division for comments. If approved, any new developments will have to comply with Development Title Section 9-1605 regarding flood hazards.

The project site is located approximately 2.1 miles south of French Camp Slough, and approximately 2.2 miles east of the San Joaquin River. The proposed project will not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality, conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.

The project will not substantially decrease groundwater supplies or interfere substantially with groundwater recharge because operations are unmanned and very little water will be used. The project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site; substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or impede or redirect flood flows. Additionally, the proposed project would not risk release of pollutants in flood hazard, tsunami, or seiche zones.

|----|---|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| _ | LAND USE AND PLANNING. build the project: | | | | | |
| | Physically divide an established community? | | | | \boxtimes | |
| b) | Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | | | \boxtimes | | |

a,b) A truck repair school is classified under the Educational Services-Commercial use type, and may be a conditionally permitted use in the I-G (General Industrial) zone subject to an approved Site Approval application. The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The project site is surrounded by industrial, residential, commercial, and agricultural uses. Therefore, the project will not physically divide an established community and is consistent with surrounding land uses.

The zoning and the General Plan for the project site will remain the same if the project is approved. Additionally, the proposed project will have a less than significant impact to surrounding parcels and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to non-agricultural uses. Therefore, this project is not a growth-inducing action.

The proposed project will not be a conflict with any existing or planned uses or set a significant land use precedent. The proposed project is not in conflict with any Master Plans, Specific Plans, or Special Purpose Plans, or any other applicable plan adopted by the County.

|------|---|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| XII. | MINERAL RESOURCES. | | • | • | | |
| | ould the project: | | | | | |
| a) | Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state? | | | \boxtimes | | |
| b) | Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | | | \boxtimes | | |

a, b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. Although the project site is in an area designated MRZ-1, there is currently no mining activity in the area, and the surrounding area is developed with residential, industrial, and commercial uses. Therefore, the proposed project applications will have less than a significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

|----|--|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| | . NOISE. | · | , , , | • | · | |
| | uld the project result in: | | | | | |
| a) | Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | | | \boxtimes | | |
| b) | Generation of excessive groundborne vibration or groundborne noise levels? | | | \boxtimes | | |
| c) | For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | | | \boxtimes | | |

a-c) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The nearest single family residence is located approximately 1,200 feet east of the project site. Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part II states that the maximum sound level for stationary noise sources during the daytime is 70 dB and 65dB for nighttime. This applies to outdoor activity areas of the receiving use, or applies at the lot line if no activity area is known. Additionally, noise from construction activities are exempt from noise standards provided the construction occurs no earlier than 6:00 A.M. and no later than 9:00 P.M. The proposed project would be subject to these Development Title standards. Therefore, noise impacts from the proposed project are expected to be less than significant.

| <u> XIV</u> | /. POPULATION AND HOUSING. | | | | | |
| Wo | ould the project: | | | | | |
| a) | Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? | | | \boxtimes | | |
| b) | Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | | | \boxtimes | | |

a-b) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The project does not propose housing within the project boundary. Therefore, the project will not induce substantial unplanned population growth in the area. The proposed project will not result in displacement of the population and affect the amount of proposed or existing housing in the vicinity. Therefore, the project's impact on population and housing will be less than significant.

| XV. PUBLIC SERVICES. a) Would the project result in substantial adverse physical impacts associated with the provision of new or physical altered governmental facilities, need for new or physical altered governmental facilities, the construction of which coul cause significant environmental impacts, in order to maintai acceptable service ratios, response times or other performance objectives for any of the public services: | y y d | | | | |
| Fire protection? | | | \boxtimes | | |
| Police protection? | | | \boxtimes | | |
| Schools? | | | \boxtimes | | |
| Parks? | | | \boxtimes | | |
| Other public facilities? | | | \boxtimes | | |

a) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The French Camp-McKinley Fire District provides the existing fire protection. Existing law enforcement protection is provided by the San Joaquin County Sheriff's Department, and the existing school services are provided by the Manteca Unified School District with the nearest school located approximately 1.95-miles north of the project site. No parks are impacted as a result of this project. Impacts to public services are also anticipated to be less than significant.

| | Potentially Significant Impact | Less Than Significant with Mitigation Incorporated | Less Than Significant Impact | No Impact | Analyzed In The Prior EIR |
|---|--------------------------------------|--|------------------------------------|--------------|---------------------------------|
| XVI. RECREATION. | | | | | |
| a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | | | | \boxtimes | |
| b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? | | | | \boxtimes | |

a-b) The proposed project will not substantially increase the use of existing neighborhood and regional parks because no increase in housing or people is associated with this application. Additionally, the project does not include recreation facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment. No impacts to recreation opportunities are anticipated.

1 --- Th---

Impact Discussion:

a-d) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. The project will be completed in one phase and will include the construction of a 12,362 square foot single-story, metal frame building. The project was referred to the Department of Public Works on March 3, 2022 for review. The project site lies within the screened area for work and residential, as designated by the San Joaquin County Department of Public Works VMT screening tool. and the Department of Public Works determined that this project will generate less than 110 automobile trips per day and, therefore, is considered a small project according to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018. According to this OPR guidance, a small project that generates or attracts "fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact" with regards to VMT. Therefore, this project is anticipated to have a less than significant impact on traffic.

The project site falls within Zone 8 of the Airport Influence Area the comprehensive Airport Land Use Plan boundaries for the Stockton Metropolitan Airport. The project site is located approximately 2.5 miles southwest of the nearest runway. The project shall abide by the applicable Airport Land Use Plan for the Stockton Metropolitan Airport. A referral was sent to the Airport Land Use Commission and the Stockton Metropolitan Airport on November 16, 2018 for review. As a Condition of Approval, the project will be subject to the Airport Land Use Commission's rules and regulations. As a result, impacts to airport flight paths will be reduced to less than significant.

| XV a) | Wo the Pul fea def sac | RIBAL CULTURAL RESOURCES. Fould the project cause a substantial adverse change in significance of a tribal cultural resource, defined in blic Resources Code section 21074 as either a site, ture, place, cultural landscape that is geographically fined in terms of the size and scope of the landscape, bred place, or object with cultural value to a California tive American tribe, and that is: | | | | | |
| | i) | Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or | | | | \boxtimes | |
| | ii) | A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. | | | | \boxtimes | |

Loce Than

Impact Discussion:

a) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. A referral was sent to the United Auburn Indian Community (UAIC), North Valley Yokuts Tribe, and the Buena Vista Rancheria for review. The UAIC submitted a response dated March 3, 2022.

If any suspected Tribal Cultural Resources (TCR) are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find. A Tribal Representative from culturally affiliated tribes shall be immediately notified and shall determine if the find is a TCR pursuant to Public Resources Code Section 21074. The Tribal Representative will make recommendations regarding the treatment of the discovery. Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of CEQA, including AB 52, has been satisfied. The contractor shall implement any measures deemed by the lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including but not limited to, facilitating the appropriate tribal treatment of the find, as necessary. This has been incorporated into the project's Conditions of Approval.

Additionally, should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

As a result of the Condition and existing Health and Safety Code regulations, any impact to tribal cultural resources is anticipated to be less than significant.

|-----|--|--------------------------------------|---|------------------------------------|--------------|---------------------------------|
| | ould the project: | | | | | |
| a) | Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? | | | | \boxtimes | |
| b) | Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? | | | \boxtimes | | |
| c) | Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? | | | \boxtimes | | |
| d) | Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? | | | | \boxtimes | |
| e) | Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? | | | | \boxtimes | |

a-e) This project site is currently served by the City of Stockton for public water service, and the applicant has provided a Will-Serve letter. The project will be served by an on-site septic system for wastewater, which will be subject to review by the Environmental Health Department for feasibility. The project site will be required to keep all storm drainage on site, and the Department of Public Works will determine the appropriate size of the proposed storm drainage retention pond. Therefore, the impact on public services will be less than significant.

| If cla pro | . WILDFIRE. located in or near state responsibility areas or lands ssified as very high fire hazard severity zones, would the pject: | | | | | |
| a) | Substantially impair an adopted emergency response plan or emergency evacuation plan? | | | | \boxtimes | |
| b) | Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | | | | \boxtimes | |
| c) | Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | | | | \boxtimes | |
| d) | Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? | | | | \boxtimes | |

a-d) The proposed project is a Site Approval application to establish the use of a mechanic-training facility. The proposed business will provide training for truck mechanics and truck collision body repair technicians to be certified repair technicians. Pursuant to the San Joaquin Fire Severity Zone map, the project site is located in an area with non-wildland/non-urban fire zone designation.

The project site is accessed by East Transportation Court, approximately 370 feet east of South Harlan Road. Due to the proximity of the project site to a County maintained road, the project will not require the installation or maintenance of additional infrastructure to mitigate fire risk or may result in impacts to the environment. As a result, the proposed project will have a less than significant impact on potential wildfire hazards.

| XXI. MANDATORY FINDINGS OF SIGNIFICANCE a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory? | | | | \boxtimes | |
| b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)? | | | | \boxtimes | |
| c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | | | | \boxtimes | |

a-c). The proposed application does not have the potential to degrade the environment or eliminate a plant or animal community. The project would not result in significant cumulative impacts or cause substantial adverse effects on human beings, either directly or indirectly.
