Subject: 155 Dry Creek Road Project Area Update - Request for Response

Good Morning,

It has come to our attention the site acreage previously provided to you (3.53 acres) does not include the area along Dry Creek Road that will accommodate the Project's frontage improvements (0.17 acres).

To correct the technical studies and City's record, please reply to this email acknowleding the total project area of 3.70 acres and indicating no changes to your technical studies as a result. Thank you,

Karen

Karen Massey

1.0 EXECUTIVE SUMMARY

Pursuant to the request and assignment of Burbank Housing Development Corp, Harris and Lee Environmental Sciences, LLC (HLENV) has performed a Phase 1 Environmental Site Assessment on the property identified as 155 Dry Creek Road, Healdsburg, CA 95448, Sonoma County Assessor's Parcel Number 089-071-002 ("Subject Property"), which is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg.

The purpose of this All Appropriate Inquiry, Environmental Site Assessment Phase 1 Investigation is to provide information as to the Recognized Environmental Conditions on or near the Subject Property noted above. Recognized Environmental Conditions are defined with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. This Environmental Site Assessment follows the guidelines established by the American Society for Testing and Materials (ASTM) in the document entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and designated E1527-13. As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser protection as noted in CERCLA and the California Health and Safety Code; that is the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 U.S.C. 9601(35)(B).

The Scope of Service for this Phase I Environmental Site Assessment consists of four overall tasks:

Task I: Research and review of regulatory information

Task II: A site reconnaissance of subject and nearby property

Task III: Interviews of persons with knowledge of subject and surrounding property

Task IV: Preparation of the final Environmental Site Assessment report

Site Description and Current Use

The Subject Property is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg. It is approximately 0.15 miles east of U.S. Highway 101, 1.29 miles west of the Russian River and 1.16 miles north of the City Center of Healdsburg.

The Subject Property is an irregular shaped parcel of real estate that is 3.53 acres in area. The Subject Property is an undeveloped lot covered in native grasses, bushes and trees. There is a creek on the western side of the property. The southern portion of the property has a tilled area covered in gravel that is enclosed in a chain link fence. Current use of the Subject Property is an undeveloped lot with no structures.

The general characteristic of the property's vicinity is mixed with multiple hotels, grocery stores, undeveloped land and Highway 101 and vineyards to the west.

Historical Use of Subject Property

The Subject Property was undeveloped land on the west side, with agricultural farmland on the east side and a small structure on the southern portion of the property as far back as at least 1942. By 1974, the Subject Property was tilled land and had no structures. The Subject Property has remained undeveloped land with no structures since 1974. The Subject Property is currently undeveloped land covered in native grasses, bushes, and trees with a drainage channel in the middle of the property that runs from east to west.

Adjoining Properties Use

North: Undeveloped lot; warehouse

> East: Railroad track; public use path; Big John's Market

South: Dry Creek Road; Hotel TrioWest: Plank Coffee and Foss Creek

Standard and Additional Environmental Records Search

The Standard and Additional Environmental Records Search did not disclose issues on the Subject Property or any of the properties within the standard ASTM search radius of 1-mile that appeared to pose a Recognized Environmental Condition for the Subject Property.

Detailed discussions of specific listings are included in Section 5.1.

Physical Setting

The elevation of the Subject Property is at 129 feet above sea level with the general topographic gradient towards the southeast. Soils consist of well drained soils with moderate infiltration rates. The property is within the 500-year and outside the 100-year flood zones. The predominant regional groundwater flow direction is probably southwest with some variations.

ASTM Non-Scope Considerations

See Section 14 for discussion of ASTM Non-Scope Considerations for Asbestos Containing Construction Materials, Lead-Based Paint, Radon and Mold.

Special Terms and Conditions

No Special Terms or Conditions were requested by the Consultant and/or Client.

Recognized Environmental Conditions

In the course of performing this All Appropriate Inquiry-Environmental Site Assessment, Phase 1 Investigation evidence of Recognized Environmental Conditions was not identified on the Subject Property.

Recognized Environmental Conditions

No Recognized Environmental Conditions were identified in connection with the Subject Property.

Controlled Recognized Environmental Conditions

No Controlled Recognized Environmental Conditions were identified in connection with the Subject Property.

Vapor Encroachment Conditions

No Vapor Encroachment Conditions were identified in connection with the Subject Property.

Historical Recognized Environmental Conditions

No Historical Recognized Environmental Conditions were identified in connection with the Subject Property.

Activity and Use Limitations

No Activity and Use Limitations were identified in connection with the Subject Property.

De Minimis Conditions

The following de minimis condition was found for the Subject Property:

• The east side of the Subject Property was agricultural farmland from at least 1942 until the early 1970's. Pesticides and herbicides were often used on agricultural farmland during this time. Given the Subject Property was tilled in the early 1970's and has been undeveloped land for approximately fifty (50) years, the potential historical usage of pesticides and herbicides on the eastern side of the property constitutes a de minimus condition on the Subject Property.

Data Gaps

No data gaps were identified at the Subject Property.

Summary of Findings

- The Subject Property was undeveloped land on the west side, with agricultural farmland on the east side and a small structure on the southern portion of the property as far back as at least 1942.
- By 1974, the Subject Property was tilled land and had no structures.
- The Subject Property has remained undeveloped land with no structures since 1974.
- The Subject Property is currently undeveloped land covered in native grasses, bushes, and trees with a drainage channel in the middle of the property that runs from east to west.
- There is a fenced in area on the south side of the property. Inside the fence is a corrugated steel shed.
- The southern portion of the property is gravel and provides access to the Subject Property.

• There is a reclaimed water pipeline that runs through the property.

Conclusions

Harris and Lee Environmental Sciences, LLC has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of the Subject Property designated as Sonoma County Assessor's Parcel Number 089-071-002 with the physical address of 155 Dry Creek Road, Healdsburg, CA 95448. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the property.

Opinion

It is our opinion that the information reviewed in this investigation supports the findings, conclusions, and recommendations of this Phase I ESA report.

Harris and Lee Environmental Sciences, LLC reminds the client that it is always prudent to maintain care in handling chemicals and any hazardous materials in any building or any property. It is pertinent to be reminded that the building / property owner is ultimately responsible for the environmental compliance that occurs in any building or on any property. Thus, if a tenant is not in compliance, the owner, who has nothing to do with the tenant's operations, can be held responsible.

Recommendations

Harris and Lee Environmental Sciences, LLC recommends that no further environmental investigation is warranted on the Subject Property given the findings of this Phase I Environmental Site Assessment.

This report is governed by the Limitations set forth in Sections 2.4 and 2.5 of this report. This Executive Summary is not to be used without the accompaniment of the entire report.

2.0 INTRODUCTION

2.1 Purpose

Pursuant to the request and assignment of Burbank Housing Development Corp, Harris and Lee Environmental Sciences, LLC (HLENV) has performed a Phase 1 Environmental Site Assessment on the property identified as 155 Dry Creek Road, Healdsburg, CA 95448, Sonoma County Assessor's Parcel Number 089-071-002 ("Subject Property"), which is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg.

The purpose of this All Appropriate Inquiry, Environmental Site Assessment Phase 1 Investigation is to provide information as to the Recognized Environmental Conditions on or near the Subject Property noted above. Recognized Environmental Conditions are defined with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. This Environmental Site Assessment follows the guidelines established by the American Society for Testing and Materials (ASTM) in the document entitled "Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process" and designated E-1527-13. As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser protection as noted in CERCLA and the California Health and Safety Code; that is the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 U.S. C. 9601(35)(B).

2.2 Definition of Terms

This section provides definitions and descriptions of terms used in this report.

Activity and Use Limitations - legal or physical restrictions or limitations on the use of, or access to, a site or facility:(1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Controlled Recognized Environmental Condition - a Recognized Environmental Condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De Minimis Condition - a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not Recognized Environmental Conditions nor controlled Recognized Environmental Conditions.

Data Gap - a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

Historical Recognized Environmental Condition - a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Recognized Environmental Condition – "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions." (ASTM E1527-13)

Pursuant to the ASTM E-1527-13 Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process, Recognized Environmental Conditions do not include Controlled Substances, Asbestos Containing Materials, Lead-based paint, Mold, Radon or other non-CERCLA related conditions.

Vapor Encroachment Condition - the presence or likely presence of chemical vapors in the sub-surface of the Subject Property caused by the release of vapors from contaminated soil or groundwater either on or near the Subject Property. A vapor encroachment condition may be considered a Recognized Environmental Condition or a de minimis condition.

2.3 Scope of Services

The Scope of Services for this All Appropriate Inquiry, Environmental Site Assessment Phase 1 Investigation consists of four overall tasks:

Task I: Research and review of regulatory information

Task II: A site reconnaissance of subject and nearby properties

Task III: Interviews of persons with knowledge of subject and surrounding property

Task IV: Preparation of the final Environmental Site Assessment report

The Scope of Services for this All Appropriate Inquiry, Environmental Site Assessment, Phase 1 Investigation follows the Standard Practice for Environmental Site Assessments designated as E-1527-13 of the ASTM. Accordingly, the All Appropriate Inquiry, Environmental Site Assessment, Phase 1 Investigation is targeted towards the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC 9601(35)(B) is applied. However, an evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that identified in this assessment.

The Scope of Services includes observations for Recognized Environmental Conditions, as well as review of information that can be obtained from regulatory files that is reasonably ascertainable within reasonable time and cost constraints. Accordingly, it cannot be guaranteed that all files are examined or that every contingency is investigated. These limitations are in conformance with the stated guidelines of ASTM E1527-13.

The Records Review includes review of files for the Subject Property available at state, county and local offices or websites, as listed in Section 5.1 of this report. Records were reviewed for adjacent properties, as appropriate, as required by ASTM E1527-13. In some cases, the status of a site is determined from telephone interviews of staff persons of these offices.

The potential for contaminated vapor migration, as well as soil and groundwater contamination, on the Subject Property is considered during evaluation of potentially relevant releases, as required by ASTM 1527-13. Releases reported with a contaminated groundwater plume within a critical distance from the Subject site were reviewed to evaluate if the reported release could constitute a potential vapor encroachment condition to the Subject Property. The critical distance between the Subject Property and a contaminated plume is defined by ASTM E2600-15 as 30 feet for dissolved petroleum hydrocarbons, and 100 feet for free-product petroleum hydrocarbons and non-petroleum chemicals of concern.

The site reconnaissance consists of the Subject Property and the identification of nearby properties. Interviews are conducted of persons associated with the Subject Property and reasonably available at the time of the site reconnaissance, and on occasion, by telephone when such interviews are possible. The report follows the Standard Practice of ASTM E-1527-13.

The Scope of Services for this All Appropriate Inquiry, Environmental Site Assessment, Phase 1 Investigation does not include analysis of Controlled Substances (CS) or Asbestos Containing Materials (ACM). Neither does the Scope of Services include analysis of the building constituents for Lead based paint or other non-CERCLA related conditions. If there is suspicion that these substances or conditions may be present, professionals licensed to assess their presence should be contacted. Harris and Lee Environmental Sciences, LLC can assist, if requested.

2.4 Significant Assumptions

The All Appropriate Inquiry, Environmental Site Assessment, Phase 1 Investigation is intended to assess the environmental conditions of a specific parcel of commercial real estate. It is intended to constitute all appropriate inquiry for purposes of the CERCLA liability, i.e., innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability. This Phase 1 is intended to reflect a commercially prudent and reasonable inquiry designed to identify Recognized Environmental Conditions in connection with a property.

2.5 Limitations and Exceptions

The Scope of Services performed to complete this All Appropriate Inquiry, Environmental Site Assessment, Phase 1 Investigation was limited in nature. While we consider work of this type to be valuable in the preliminary evaluation of potential hazardous materials or waste at the site, we also must alert the Client that this study may not reveal hazardous materials releases that have occurred. Also, the site conditions can change with time, and our assessment was not intended to predict future site conditions. Because of the limited nature of this assessment, this report is not a risk assessment and the Scope of Services does not include a determination of the extent of business environmental risk nor the public health impact of, known or suspected hazardous materials or wastes. This assessment does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on liability protections under CERCLA. Furthermore, this assessment does not address requirements of state or local laws or federal laws other than the all appropriate inquiry provisions of the landowner liability protections. Client(s) are cautioned that federal, state and local laws may impose environmental assessment obligations that are beyond the scope of the all appropriate inquiry provisions of this assessment.

This service has been performed in accordance with generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No other guarantees or warranties, expressed or implied, are provided.

It is understood by the parties hereto that the Client who has requested this assessment will use the assessment (in addition to other information) to provide information to a lender, investors in the property, for the purposes of refinancing or purchasing said

property or to satisfy regulatory agency requirements. Consultant intends no other use or disclosure. Client agrees to hold Consultant harmless for any inverse condemnation or devaluation of said property that may result if the Consultant's report or information generated is used for other purposes. Also, this report is issued with the understanding that it is to be used only in its entirety.

2.6 Special Terms and Conditions

No Special Terms or Conditions were requested by the Consultant and/or Client.

2.7 User Reliance

Only the following parties may rely upon this report:

- City of Healdsburg listed current owner
- Burbank Housing Development Corporation
- Any financing institution(s) providing financing for the purchase and/or redevelopment of the property
- Any pertinent regulatory agencies

No other person or entity may rely upon the report without written consent of Harris and Lee Environmental Sciences, LLC.

2.8 Involved Parties

The following are the parties involved in this proposed transaction on the property identified as Sonoma County Assessor's Parcel Number 089-071-002:

- City of Healdsburg listed current owner
- Burbank Housing Development Corporation

2.9 Purpose of Report

This report was undertaken for the following purpose:

Property development or redevelopment

3.0 SITE DESCRIPTION

3.1 Site Locations and Description

Exhibit A is a vicinity map of the general area of the Subject Property. Exhibit B presents an Assessor's Parcel Map for the Subject Property having Sonoma County Assessor's Parcel Number 089-071-002. The legal description of the Subject Property may be found in the title report, which is not included in this report.

Using the Earth's Grid System, the coordinates of the Subject Property location are:

Latitude: North 38.6271040 - 38°37'37.57" Longitude: West 122.8748340 - 122°52'29.40"

Elevation: 129 feet above sea level

Table: Subject Property Information

Street Address	APN	Recorded Owner	Size (Acres)	Structure- Year built/ Square. ft./ # of floors	Use	Zone
155 Dry Creek Road, Healdsburg, CA 95448	089-071- 002	City of Healdsburg	3.53		Undeveloped lot	MU

3.2 Site and Vicinity General Characteristics

The Subject Property is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg. It is approximately 0.15 miles east of U.S. Highway 101, 1.29 miles west of the Russian River and 1.16 miles north of the City Center of Healdsburg.

The Subject Property is an irregular shaped parcel of real estate that is 3.53 acres in area. The Subject Property is an undeveloped lot covered in native grasses, bushes and trees. There is a creek on the western side of the property. The southern portion of the property has a tilled area covered in gravel that is enclosed in a chain link fence. Current use of the Subject Property is an undeveloped lot with no structures.

The general characteristic of the property's vicinity is mixed with multiple hotels, grocery stores, undeveloped land and Highway 101 and vineyards to the west.

3.3 Current Use of the Property

Current use of the Subject Property is an undeveloped lot covered in native vegetation and trees.

3.4 Land Use Designation

The Subject Property's zoning designation is MU. MU stands for Mixed-Use District.

3.5 Descriptions of Current Improvements

3.5.1 Structures

No structures are located on the Subject Property.

3.5.2 Roads

The Subject Property is bounded by Dry Creek Road to the south. Access to the property is via Dry Creek Road.

3.5.3 Sewage Disposal

Municipal sewage services are available to the property.

3.5.4 Water Supply

Municipal water services are available to the property.

3.5.5 Heating and cooling systems

No structures were on the Subject Property thus no HVAC systems

3.5.6 Utilities

Via City of Healdsburg Electric Water & Wastewater Department, electricity and gas service is available to the Subject Property.

3.6 Current Uses of the Adjoining Properties

According to the 40 CFR 312.10, "adjoining properties are defined as any real property or properties the border of which is (are) shared in part or in whole with that of the Subject Property, or that would be shared in part or in whole with that of the Subject Property but for a street, road, or other public thoroughfare separating the properties."

North: Undeveloped lot; warehouse

East: Railroad track; public use path; Big John's Market

South: Dry Creek Road; Hotel TrioWest: Plank Coffee and Foss Creek

4.0 USER PROVIDED INFORMATION

The purpose of this section is to identify general tasks that will help identify the possibility of Recognized Environmental Conditions in connection with the Subject Property. The general tasks are 1) Searches for Environmental Liens; 2) Valuation Reduction for Environmental Issues; and 3) Assessments of Specialized Knowledge. These tasks do not require technical expertise and Environmental Professionals do not normally perform these tasks. These tasks are the responsibility of the client. However, the results of these tasks must be made available for the Environmental Professionals to review; if none are provided they will be identified as "data gaps". The Environmental Professional(s) are required to review these items in order to formulate an opinion regarding the obviousness

of the presence or likely presence of contamination at the property or identify them as missing "data gaps."

4.1 Searches for Environmental Liens

Searches for environmental cleanup liens against the Subject Property that are filed or recorded under federal, tribal, state or local law as required under 40 CFR Part 312 Section 312.25.

40 CFR Part 312 Section 312.25(b) states: "All information collected regarding the existence of such environmental cleanup liens associated with the property must be provided to the environmental professional."

Preliminary Title Report

Old Republic Title Company, 226 Airport Parkway, Suite 200, San Jose, California, provided a contemporary preliminary title report. The report Order Number is 0616020517 and is dated May 31, 2021.

The preliminary title report did not identify any environmental liens in connection with the Subject Property.

4.2 Valuation Reduction for Environmental Issues

An assessment of the relationship of the purchase price to the fair market value of the Subject Property, assuming there is no contamination of the property, is required under 40 CFR Part 312 Section 312.29 to maintain the innocent landowner defense. The sections from the federal document are reproduced (with edits for clarity) following:

- (a) Persons to whom this part is applicable must consider whether the purchase price of the Subject Property reasonably reflects the fair market value of the property, assuming there is no contamination of the property;
- (b) Persons who conclude that the purchase price of the Subject Property does not reasonably reflect the fair market value of that property, if the property were not contaminated, should consider whether or not the differential in purchase price and fair market value is due to the presence of releases or threatened releases of hazardous substances.

An appraisal of the Subject Property was not available for review; however, anecdotal information gained during interviews indicates that there is no value reduction for environmental reasons.

4.3 Assessments of Specialized Knowledge

Assessments of any specialized knowledge or experience on the part of the purchaser or landowner is required by 40 CFR Part 312 Section 312.28 to maintain the innocent landowner defense. The sections from the federal document are reproduced (with edits for clarity) following:

- (a) Persons to whom this part is applicable must take into account, their specialized knowledge of the Subject Property, the area surrounding the Subject Property, the conditions of adjoining properties, and any other experience relevant to the inquiry, for the purpose of identifying conditions indicative of releases or threatened releases at the Subject Property.
- (b) All appropriate inquiries are not complete unless the results of the inquiries take into account the relevant and applicable specialized knowledge and experience of the persons responsible for undertaking the inquiry.

No specialized knowledge relating to the Subject Property was obtained via interviews of persons with knowledge of the status and history of the property.

5.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify Recognized Environmental Conditions in connection with the Subject Property. This is one of the Criteria required under the All Appropriate Inquiry, Environmental Site Assessment Phase 1 Investigation.

5.1 Standard and Additional Environmental Record Sources

The Standard Environmental Record Sources and the Additional Environmental Record Sources were obtained through a computer data bank search company, Environmental Data Resources of Milford, Connecticut. Computer data bank searches for active sites can be useful in locating sites that may have the potential to adversely impact the subject site. It is important to keep in mind that computer database searches provide general overview data and may not be precise in the data that is presented. Consequently, an investigator needs additional familiarity with active sites to properly interpret the data that is provided.

The Environmental Radius Report is included in Exhibit F. This report accessed a large number of active federal, state and local databases—some are Standard Environmental Record Sources (Section 8.2.1 ASTM E-1527-13) and others are Additional Environmental Record Sources that provide additional data and supplement the Standard Environmental Record Sources. A comprehensive listing of government records searched is listed in the Radius Report and is not repeated in the text.

EDR Database Search

Subject Property: The Subject Property does not appear on standard record sources or additional environmental record sources searched and reported upon in the Radius Report.¹

Neighboring Properties: Summary of relevant findings of the database search within the minimum radius search distance of the property as specified by ASTM E-1527-13, Section 8.2.1 are summarized in the Table below.

U.S. Federal Databases					
Database	ASTM Criteria Search Distance (miles)	Number of Properties within the Search Distance

Note 1: The following databases are part of Envirostor under DTSC; they are not listed individually: Cal-Sites (State equivalent to NPL is AWP, BE), Hist. Cal-Sites, Response, Institutional & Engineering Controls, VCP and Brownfield sites.

Note 2: The following databases are discussed only if the listed sites are on the property or on adjoining properties: UST, AST, and Notify 65.

Note 3: The following databases are old and are not updated; unless the sites listed are on the Subject Property or adjoining properties, they are not discussed; the databases include: CA FID; HIST UST; & SWEEPS.

There are numerous sites listed within the standard ASTM search distance of 1-mile of the Subject Property. A brief review of the listed sites reveals that they are not likely threats for the Subject Property due to one or more of the following reasons: listing database not relevant, sufficient distance from Subject Property, location relative to site topography and ground water flow direction, and the status of the listed site (e.g., closed, contamination characterized, contamination under remediation, etc.)

The Environmental Radius Report is attached to this report. A summary of those sites in the report considered pertinent for the Subject Property is presented below in Section 5.4.

Other Environmental Record Sources

To enhance and supplement the Environmental Radius Report data bank searches for active sites, local records and / or additional state or tribal records were independently searched through their various websites. These records are reasonably ascertainable, and are sufficiently useful, accurate and complete in light of the objective of the records review. Other Environmental Record Sources contacted for information pertaining to the subject and nearby properties were as follows:

- U.S. EPA ((http://www.epa.gov/)
- California Environmental Protection Agency, Department of Toxic Substances Control (https://siteportal.calepa.ca.gov/nsite/ and http://www.envirostor.dtsc.ca.gov/public/)
- County of Sonoma all departments (http://www.co.Sonoma.ca.us/)
- California State Water Resources Control Board (http://geotracker.swrcb.ca.gov/)
- California Environmental Protection Agency, California Environmental Reporting System (CERS) website (https://cers.calepa.ca.gov/)

California Environmental Protection Agency, California Regulated Site Portal (https://siteportal.calepa.ca.gov/)

Any information obtained from these sources is documented in appropriate sections of this report.

Environmental File Review - Unified Program

The Unified Program is the consolidation of six state environmental programs into one program under the authority of a Certified Unified Program Agency. These can be a county, city or JPA (Joint Powers Authority). This program was established under the amendments to the California Health and Safety Code made by SB 1082 in 1994. The six programs are the Hazardous Materials Business Plan/Emergency Response Plan, Hazardous Waste, Tiered Permitting, Underground Storage Tanks, Aboveground Storage Tanks (SPCC only) and the Uniform Fire Code Hazardous Materials Management Plan.

A CUPA or Certified Unified Program Agency is a local agency that has been certified by Cal EPA to implement the six state environmental programs within the local agency's jurisdiction.

The Healdsburg/Sebastopol JPA is the designated local agency for the Subject Property.

No additional records of environmental significance were found for the Subject Property.

5.2 Physical Setting

5.2.1 Topography

Exhibit C is the U. S. Department of Interior, Geological Survey Quadrangle 7.5-Minute Series topographic map. The Subject Property lies at an elevation of approximately 129 feet above mean sea level. The general topographic gradient at the Subject Property is generally southeast. Surface topography may be indicative of the direction of surficial groundwater flow.

5.2.2 Flood Insurance Rate Map

According to FEMA Flood Panel Maps, the Subject Property is within the 500-year flood zone and outside the 100-year flood zone.

5.2.3 Geologic and Hydrogeologic Setting

Soil Conditions

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United

States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

	Table: Soil types found near Subject Property				
Soil series Texture		Texture	Hydrologic Group	Drainage Class	
,	ZAMORA	, ,	Class B - Moderate infiltration rates Deep and moderately deep Soil Surface Texture silty clay loam.		

Groundwater Flow Direction

EDR GeoCheck-Physical Setting Source Summary provides the following site-specific hydrogeologic data.

Search Radius: 1.25 miles Status: not found

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Several sites with groundwater flow directions were identified within a radius of one mile of the Subject Property. The groundwater flow directions are reported to be southwest.

5.3 Results of Site History and Land Use Review

The objective of consulting historical sources is to develop a history of the previous uses of the Subject Property and surrounding area in order to identify the likelihood of past uses having led to Recognized Environmental Conditions. All obvious uses of the property must be identified from the present back to the property's first developed use or back to 1940, whichever is earlier (§ 8.3.2 ASTM 1527-13). The Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-13) requires a review of reasonably ascertainable standard historical sources. Reasonably ascertainable is defined by ASTM as information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable. The following standard historical sources for the Subject Property were reviewed: Sanborn Fire Insurance Maps, City Directories, County Records Review, personal interviews, historical aerial photographs and previous environmental investigations.

5.3.1 Sanborn Fire Insurance Maps

Environmental Data Resources of Connecticut investigated the historical Sanborn Fire Insurance Maps. The inquiry Number is 6733794.3.

No coverage was reported.

The report is attached to this Environmental Site Assessment as a component of Exhibit F.

5.3.2 Historical Topographic Maps

Environmental Data Resources of Connecticut performed a search for historical topographic maps. The topographic maps are presented in the EDR report number 6733794. The report is reproduced in Exhibit E of this report.

The historical topographic maps report did not reveal any significant potential liability resulting from past activities.

5.3.3 Aerial Photographs

Environmental Data Resources of Connecticut performed a search for historical aerial photographs. The photographs are presented in the EDR report number 6733794. The report is reproduced in Exhibit E of this report. A synopsis of the aerial photography is presented in the Table below.

Table: De	escription of the Subject Property	y from aerial photographs
DATE	ON SITE DESCRIPTION	OFFSITE DESCRIPTION

West: Immediately west are commercial structures. West of the structures is Highway 101 that runs from north to south. West of the highway is undeveloped land.			

5.3.4 City Directory

Environmental Data Resources of Connecticut investigated historical City Directory; this report is documented in the City Directory Abstract Report with Inquiry Number 6733794. It is included in this report as a component of Exhibit F.

Business directories including city, cross-reference and telephone directories were reviewed, if available, at approximately five-year intervals for the years spanning 1973 through 2017. (These years are not necessarily inclusive.)

The Subject Property was not listed.

The lack of listings is consistent with an undeveloped lot with no structures. The lack of listings does not indicate an issue of environmental concern.

Adjacent Property listings were a mix of commercial and residential listings. Some of these listings may be for businesses that regularly generate and/or handle hazardous wastes. These sites do not indicate issues of environmental concern unless a record of contamination (such as listings in regulatory records) is found. Any such sites are discussed in Section 5.1.

5.3.5 Local Records Review

Historical Permit records for the Subject Property were researched at the Healdsburg Building Department. This review included the Building and Zoning Records.

No Permit history of environmental impact related to the Subject Property at Sonoma County Assessor's Parcel Number 089-071-002 was found.

5.3.6 Synopsis of Previous and Current Environmental Investigations

No previous or current environmental investigations prior to this report were identified.

5.4 Discussion of Records Review

Subject Property

Based on the review of the database report and other records review, there are no issues that constitute a Recognized Environmental Condition for the Subject Property. This opinion is based on current and available information.

Surrounding Properties

Sites considered potentially relevant to environmental conditions on the Subject Property based on the records review are discussed below. Sites not mentioned are judged insignificant for the Subject Property. In some cases, rather than engage in an exhaustive discussion of the various sites, these are grouped together in a summary discussion.

Sites warranting further discussion are as follows:

AMF Tuboscope Inc/Engelke Property is listed on the HIST UST, Cortese, HIST CORTESE, CERS and LUST (Leaking Underground Storage Tank) databases (Global ID T0609700522). This site is located at 110/114 Dry Creek Road across the street from the Subject Property on the southern side. Regulatory records indicate a case was opened on January 5, 1998, when two (2) 12,000-gallon rail cars that contained road tar were discovered buried at the site. The site is currently status Completed – Case Closed as of September 5, 2006. The impacts did not impact the groundwater in the area. Given groundwater was not impacted and contamination did not extend off of the site, this site is unlikely to adversely impact the Subject Property.

Zimmerman Trucking is listed on the Cortese, HIST CORTESE, CERS and LUST (Leaking Underground Storage Tank) databases (Global ID T0609700299). This site is located at 1409 Grove Street across the street from the Subject Property on the western side. Regulatory records indicate the site currently operates as a cardlock fueling facility. A case was opened January 1, 1991, for contamination from diesel in the soil and groundwater when diesel USTs were removed from the site. The site is currently status Completed – Case Closed as of May 3, 2013. At the time of closure, any residual contamination to the soil and groundwater were limited to the property and did not extend off site. Given the case is closed and any residual contamination does not extend off-site, this site is unlikely to adversely impact the Subject Property.

Former Texaco/Jerry's Exxon is listed on the EDR Historical Auto, CERS HAZ Waste, CERS Tanks, UST, SWEEPS UST, HIST UST, FINDS, ECHO, CERS and

LUST (Leaking Underground Storage Tank) databases (Global ID T0609700161). This site is located at 186 Dry Creek Road approximately 278 feet south-west of the Subject Property. Regulatory records indicate a case was opened on September 1, 1988, for an extensive release of gasoline to the soil and groundwater. The site is currently status Open – Remediation as of March 9, 2009. Groundwater monitoring wells for this site are located along the southern perimeter of the Subject Property. These wells are no longer sampled because the groundwater in this area is non-detect for contamination. The closest monitoring well located south-west of the Subject Property was non-detect for contamination as of May 2021. Given contamination from this site does not appear to have migrated to the Subject Property, this site is unlikely to adversely impact the Subject Property.

Vintage II Station is listed on the Cortese, HIST CORTESE, CERS and LUST (Leaking Underground Storage Tank) databases (Global ID T0609700124). This site is located at 1281 Healdsburg Avenue approximately 429 feet south-east of the Subject Property. Regulatory records indicate the site has operated as a gasoline station for at least forty (40) years. A case was opened on January 1, 1988, when USTs were removed and replaced and contamination was discovered in the soil and groundwater from gasoline. The site is currently status Open – Remediation as of January 7, 2008. Groundwater in the area has been measured to flow generally to the south placing this site downgradient relative to the Subject Property. Given the downgradient location and distance from the Subject Property, this site is unlikely to adversely impact the Subject Property.

Based on the review of the open and active surrounding properties listed on the database report and other records review, there are none that constitute a Recognized Environmental Condition for the Subject Property. This opinion is based on current and available information.

6.0 SITE RECONNAISSANCE

On November 10, 2021, an environmental professional performed a site reconnaissance of the Subject Property and nearby properties. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying Recognized Environmental Conditions in connection with the property. It is not an environmental compliance audit; this process does not determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

Photo-documentation of the property is presented in Exhibit D of this report.

6.1 Methodology and Limiting Conditions

The method used in conducting the site reconnaissance consisted of walking the perimeter of the Subject Property and inspecting as closely as possible the features of

the property. Visual observations of nearby properties were performed in an effort to identify conditions that potentially could negatively impact the subject site.

6.2 General Site Setting

The Subject Property is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg. It is approximately 0.15 miles east of U.S. Highway 101, 1.29 miles west of the Russian River and 1.16 miles north of the City Center of Healdsburg.

The general characteristic of the property's vicinity is mixed with multiple hotels, grocery stores, undeveloped land and Highway 101 and vineyards to the west.

6.3 Subject Property

The Subject Property is an irregular shaped parcel of real estate that is 3.53 acres in area. The property is an undeveloped lot covered in native grasses, bushes and trees. There is a creek on the western side of the property. The center of the property is covered in mud and grasses. There are trees along the western and eastern portions of the property. The southern portion of the property has a tilled area covered in gravel that is enclosed in a chain link fence.

The property is accessed by a gravel driveway from the southern side off of Dry Creek Road.

There is a water pump and a reclaimed water pipeline along the eastern side of the property.

There is a small pile of trash in the center of the property, but no other trash or debris.

There are no hazardous materials located on the property.

There are no underground or aboveground storage tanks located on the property.

In the course of the inspection no indications of Recognized Environmental Conditions were observed.

Summary of Site Features

Feature	Observed	Not Observed	Comments
Aboveground storage tanks (ASTs)		✓	
Water Wells	✓		There is a water pump for reclaimed water that runs through the property.
Drains or sumps		√	

In the second se			
Drums		✓	
Hazardous substances and/or petroleum products		✓	
Odors		✓	
Pits, ponds or lagoons	√		Creeks bordered the property on the west side. A drainage channel runs through the center of the property from east to west.
Pools of liquid		✓	
Septic system		✓	
Solid waste		✓	
Stained or corroded soil and/or pavement		√	
Stressed vegetation		✓	
Transformers		✓	
Un-natural fill areas		✓	
Underground storage tanks (USTs)		✓	
Wastewater or stormwater	✓		Puddles were present on the property from the recent storm.

6.4 Adjacent Properties

> **North:** Undeveloped lot; warehouse

East: Railroad track; public use path; Big John's Market

South: Dry Creek Road; Hotel TrioWest: Plank Coffee and Foss Creek

7.0 INTERVIEWS

7.1 Interviews with Past and Present Owners, Operators, and Occupants

A representative from the City of Healdsburg, Mr. Stephen Sotomayor, was interviewed in the course of this assessment on November 16, 2021.

- The Subject Property is an undeveloped lot covered in native grasses and trees.
- There is a fenced in area on the southern portion of the property and gravel leading into the property.
- They are not aware of any environmental issues with the property.
- There is a reclaimed water pipeline running through portions of the site.
- The property was annexed in 1983 and does not have any evidence of structures.

7.2 Interviews with Local Government Officials

Local government officials were interviewed for this report as described in Section 5. Any document reviews included oral interviews with agency staff to confirm that no information was available other than provided documents.

7.3 Interviews with Others

Various individuals encountered while conducting the site reconnaissance of the site were interviewed. These brief interviews were conducted in a casual conversational manner in an attempt to determine if there are any historical factors that would indicate an impact on the property.

8.0 VAPOR ENCROACHMENT SCREENING

This section presents a Vapor Encroachment Screening (VES) of the Subject Property to determine whether a Vapor Encroachment Condition (VEC) is present or likely to be present on the Subject Property. The VES was performed in conjunction with this Phase I ESA for the Subject Property in general accordance with Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions adopted by ASTM International in Method E2600-15.

The VES process as described in ASTM Standard E2600-15 is a two-tiered screening process. Tier 1 VES focuses on known or suspected contaminated properties located within the area of concern (AOC). The ASTM Standard E2600-15 defines the AOC for petroleum release sites as the area within one-tenth mile (528 feet) around the Subject Property. For non-petroleum release sites (for example, solvent release sites), the AOC is defined as the area within one-third mile (1,760 feet) around the Subject Property. In accordance with the Tier 1 VES process, a search distance test was performed to determine whether known or suspected contaminated properties are located within the AOC.

Tier 2 VES uses a plume test and critical distance determination to evaluate whether vapors from the contaminated property might migrate and encroach on the Subject Property. The critical distance between the Subject Property and a contaminated plume is defined by E2600-15 as 30 feet for dissolved petroleum hydrocarbons, and 100 feet for free-product petroleum hydrocarbons and non-petroleum chemicals of concern ("COC"). Contaminated groundwater plumes within these distances may constitute a VEC to the Subject Property.

Summary

No evidence was found for a present or likely to be present Vapor Encroachment Condition on the Subject Property.

9.0 FINDINGS

Site Description and Current Use

The Subject Property is located in the incorporated area of Sonoma County, CA, within the City Limits of Healdsburg. It is approximately 0.15 miles east of U.S. Highway 101, 1.29 miles west of the Russian River and 1.16 miles north of the City Center of Healdsburg.

The Subject Property is an irregular shaped parcel of real estate that is 3.53 acres in area. The Subject Property is an undeveloped lot covered in native grasses, bushes and trees. There is a creek on the western side of the property. The southern portion of the property has a tilled area covered in gravel that is enclosed in a chain link fence. Current use of the Subject Property is an undeveloped lot with no structures.

The general characteristic of the property's vicinity is mixed with multiple hotels, grocery stores, undeveloped land and Highway 101 and vineyards to the west.

Historical Use of Subject Property

The Subject Property was undeveloped land on the west side, with agricultural farmland on the east side and a small structure on the southern portion of the property as far back as at least 1942. By 1974, the Subject Property was tilled land and had no structures. The Subject Property has remained undeveloped land with no structures since 1974. The Subject Property is currently undeveloped land covered in native grasses, bushes, and trees with a drainage channel in the middle of the property that runs from east to west.

Adjoining Properties Use

> North: Undeveloped lot; warehouse

East: Railroad track; public use path; Big John's Market

South: Dry Creek Road; Hotel TrioWest: Plank Coffee and Foss Creek

Land Use Designations

The Subject Property's zoning designation is MU. MU stands for Mixed-Use District.

Standard and Additional Environmental Records Search

The Standard and Additional Environmental Records Search did not disclose issues on the Subject Property or any of the properties within the standard ASTM search radius of 1-mile that appeared to pose a Recognized Environmental Condition for the Subject Property.

Detailed discussions of specific listings are included in Section 5.1.

Physical Setting

The elevation of the Subject Property is at 129 feet above sea level with the general topographic gradient towards the southeast. Soils consist of well drained soils with

moderate infiltration rates. The property is within the 500-year and outside the 100-year flood zones. The predominant regional groundwater flow direction is probably southwest with some variations.

Recognized Environmental Conditions

In the course of performing this All Appropriate Inquiry-Environmental Site Assessment, Phase 1 Investigation evidence of Recognized Environmental Conditions was not identified on the Subject Property.

Recognized Environmental Conditions

No Recognized Environmental Conditions were identified in connection with the Subject Property.

Controlled Recognized Environmental Conditions

No Controlled Recognized Environmental Conditions were identified in connection with the Subject Property.

Vapor Encroachment Conditions

No Vapor Encroachment Conditions were identified in connection with the Subject Property.

Historical Recognized Environmental Conditions

No Historical Recognized Environmental Conditions were identified in connection with the Subject Property.

Activity and Use Limitations

No Activity and Use Limitations were identified in connection with the Subject Property.

De Minimis Conditions

The following de minimis condition was found for the Subject Property:

• The east side of the Subject Property was agricultural farmland from at least 1942 until the early 1970's. Pesticides and herbicides were often used on agricultural farmland during this time. Given the Subject Property was tilled in the early 1970's and has been undeveloped land for approximately fifty (50) years, the potential historical usage of pesticides and herbicides on the eastern side of the property constitutes a de minimus condition on the Subject Property.

Data Gaps

No data gaps were identified at the Subject Property.

10.0 CONCLUSIONS

Harris and Lee Environmental Sciences, LLC has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of the Subject Property designated as Sonoma County Assessor's Parcel Number 089-

071-002 with the physical address of 155 Dry Creek Road, Healdsburg, CA 95448. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the property.

11.0 OPINION

It is our opinion that the information reviewed in this investigation supports the findings, conclusions, and recommendations of this Phase I ESA report.

Harris and Lee Environmental Sciences, LLC reminds the client that it is always prudent to maintain care in handling chemicals and any hazardous materials in any building or any property. It is pertinent to be reminded that the building / property owner is ultimately responsible for the environmental compliance that occurs in any building or on any property. Thus, if a tenant is not in compliance, the owner, who has nothing to do with the tenant's operations, can be held responsible.

12.0 RECOMMENDATIONS

Harris and Lee Environmental Sciences, LLC recommends that no further environmental investigation is warranted on the Subject Property given the findings of this Phase I Environmental Site Assessment.

13.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

14.0 DEVIATIONS

There are no deviations in the preparation of this Environmental Site Assessment from the Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process (ASTM Designation: E-1527-13).

15.0 NON-SCOPE SERVICES

No additional services beyond the All Appropriate Inquiry, Environmental Site Assessment Phase 1 Investigation ASTM E-1527-13 Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process were

added to this report. The following general statements and observations are provided for ASTM Non-Scope considerations.

15.1 Asbestos Containing Construction Materials

An asbestos survey was not conducted at the property as part of this assessment. However, no structures are located on the Subject Property.

Asbestos containing construction materials was banned in 1979. Any building built prior to this time may have been utilized asbestos in its construction. No obvious evidence of friable suspect asbestos containing materials was observed within easily accessible areas of the structure. To confirm if any asbestos materials are contained within the structure on the subject site, an asbestos survey should be performed by an AHERA trained asbestos professional. If the property building is slated for renovation or demolition, an asbestos inspection is required, pursuant to the National Emission Standards for Hazardous Air Pollutant (NESHAPs).

15.2 Lead-Based Paint

A lead-based paint survey was not conducted at the property as a part of this assessment. However, no structures are located on the Subject Property.

The use of lead-based paint was banned in 1978. Any building built prior to this time may have been utilized lead-based paint. Visual observations of the painted surfaces of the subject site structure appeared to be in fair condition with no obvious signs of chipping, cracking, and/or significant health risk concerns.

15.3 Radon

Radon sampling was not conducted at the property as a part of this assessment. According to the United States EPA, the radon zone level for this area is

Zone 3 - Below 2.0 pCi/L

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings. Concentrations at, or above, 4 pCi/l are considered to be of concern per the EPA.

15.4 Mold

A mold survey was not conducted at the property as a part of this assessment.

PROFESSIONAL PROFILE

Robert S. Harris

TITLE: LLC

Partner/Senior Scientist: Harris and Lee Environmental Sciences

Partner: Lee Seeley & Harris

EXPERTISE:

Thirty-six (36) years experience in Environmental Analytical Chemistry and Environmental Toxicology. Efforts involved full research laboratory supervision for the University of California as well as commercial laboratories involved in Environmental Analytical Chemistry. Developed and refined the now standard method for PCB Analysis in various matrices. Mr. Harris has supported Risk Assessments, Site Audits, Health and Safety Management programs, and Hazardous Waste Management Programs. In addition, Mr. Harris has brought electronic data management technology into major petroleum industry members including Exxon, USA, Chevron USA, Texaco, USA, Mobil Oil Corporation, Atlantic Richfield (ARCO), Amarada Hess, Unocal, and Pacific Gas and

Electric Company.

EXPERIENCE:

Laboratory Director for the University of California for 11 years beginning in 1964; operated laboratories on the Davis Campus and the Hopland Field Station in Mendocino County, California. Published 12 research papers at the University of California

Founded Multi-Tech Laboratories in Ukiah in 1974. Established laboratories in Ukiah and Santa Rosa, CA. Multi-Tech Laboratories was one of the larger laboratories in California. During this time Mr. Harris developed several methodologies for environmental analysis, including the standard method for the analyses of Polychlorinated Biphenyls (PCB's) in water, soils and oils. When the laboratory became a part of Environmental Testing and Certification Corporation, Mr. Harris was Executive Vice President in charge of western United States operations.

Established American Technologies in 1992 and developed it in the United States and Mexico. Changed name of American Technologies to Harris and Lee Environmental Sciences in 1997. Development and refinement of the concept of environmental management where toxic risk evaluation and regulatory requirements guide the project oversight. Supervised the management and orchestration of source monitoring in Southern California. In Northern California, developed a waste minimization program that converted waste costing \$120K per month for disposal into a usable fuel to operate high pressure steam boilers.

Has carried out property transfer assessments and aided in the control and management of environmental as well as health and safety risk. In this capacity, Mr. Harris has used his knowledge of the sciences of chemistry and toxicology to properly identify risks that are real and to separate these from situations where the risk is suspected but not real. In this capacity, Mr. Harris has assisted lending institutions, insurance companies, real estate professionals and law firms in identifying chemical profiles and characteristics in toxic situations and managing environmental risk. Mr. Harris has extensive experience in litigation support and expert testimony in areas of environmental chemistry and industrial process chemistry.

ACADEMIC

BACKGROUND: BS. Zoology, Minor, Chemistry, University of California, Davis, 1964

California Registered Environmental Assessor - REA #4966

PROFESSIONAL PROFILE

Walter Beach

TITLE: Partner: Harris and Lee Environmental Sciences, LLC

EXPERTISE:

Mr. Beach is a Registered Environmental Assessor, certified in the State of California. Mr. Beach has performed or supervised over 2,500 environmental assessments and numerous Phase II, III and IV Environmental Investigations. Mr. Beach leads the Environmental Due Diligence group within Harris and Lee Environmental Sciences, LLC.

Mr. Beach has over 25 years experience in Environmental Sciences and Management and Information Technology for Fortune 500 companies including: Charles Schwab & Co., Price Waterhouse Consulting, Novartis and Wells Fargo Bank. He specializes in Merger and Acquisition Integration, Process Improvement, Offshore Outsourcing, Project Management and Software Development and Maintenance. Mr. Beach has a unique blend of business, technical and organizational acumen to effectively communicate the issues to a range of stakeholders from individual contributors to executive leaders to solve problems always with business needs and goals in mind.

EXPERIENCE:

Mr. Beach's experience includes building and managing organizations in multiple companies of all sizes. He has worked extensively in management consulting. His background is engineering and computer information technology.

Some of Mr. Beach's professional experience includes:

Performed or supervised over 2,500 environmental assessments and numerous Phase II, III and IV Environmental Investigations.

Implemented post-acquisition integration including organization restructure, technology (applications and infrastructure), brand and business processes at a Financial Organization. Included multiple geographical locations including off-shore. Successfully met aggressive budget and schedule targets.

Responsible for developing and implementing cohesive application architecture for subsidiary of Global Pharmaceutical Corporation's world-wide enterprise. Included systems and functional areas of SAP, Siebel CRM, corporate Intranet, DR/CAPA, LIMS, R&D, Finance, Human Resources, Supply Chain Management, Clinical Development, Document Management, Contingent Workforce Outsourcing and

Business Intelligence. Implemented Long Range Planning process across the Corporation. Developed comprehensive Business Intelligence strategy for all reporting and analysis needs at Chiron. Incorporated SAP BW, Cognos and Business Objects suites and numerous, international data sources. Worked on project team that implemented the first PMO for the organization. Worked closely with business and technical areas. Experienced in regulatory and CFR Part 11 requirements.

Head of Information Technology Off-shoring corporate-wide for Financial Company. Created program for utilization of offshore companies for all aspects of system life cycle work within the company. The Offshore Development Office was responsible for vendor selection, negotiating contracts, governance, infrastructure, security, and financial reporting. Demonstrated 40% project savings over traditional approaches with annual savings of \$22,000,000.

Director of Technology for Capital Markets and Trading business in Brokerage. Responsible for all technology solutions and infrastructure (desktop, servers, applications, helpdesk, etc.) for business unit with over \$1B annual revenue. Multiple geographic locations supported. Partnered with business to decrease unit operating costs by 42% while revenues increased by 300%. Led application development and maintenance organization of 100+. Hired skilled staff, including successor, and developed processes and tools to promote repeatable success and drive down costs. Partnered with business clients and fostered team concept and pride in work. Group achieved the finest track record of any within the company, delivering over 300 projects with 93+% success rate and receiving 15 corporate-wide awards.

ACADEMIC BACKGROUND:

BS, Computer Engineering, Boston University, 1983

MS, Computer Science, University of California, Berkeley, 1986

MBA, Duke University-Fuqua School of Business, 1991

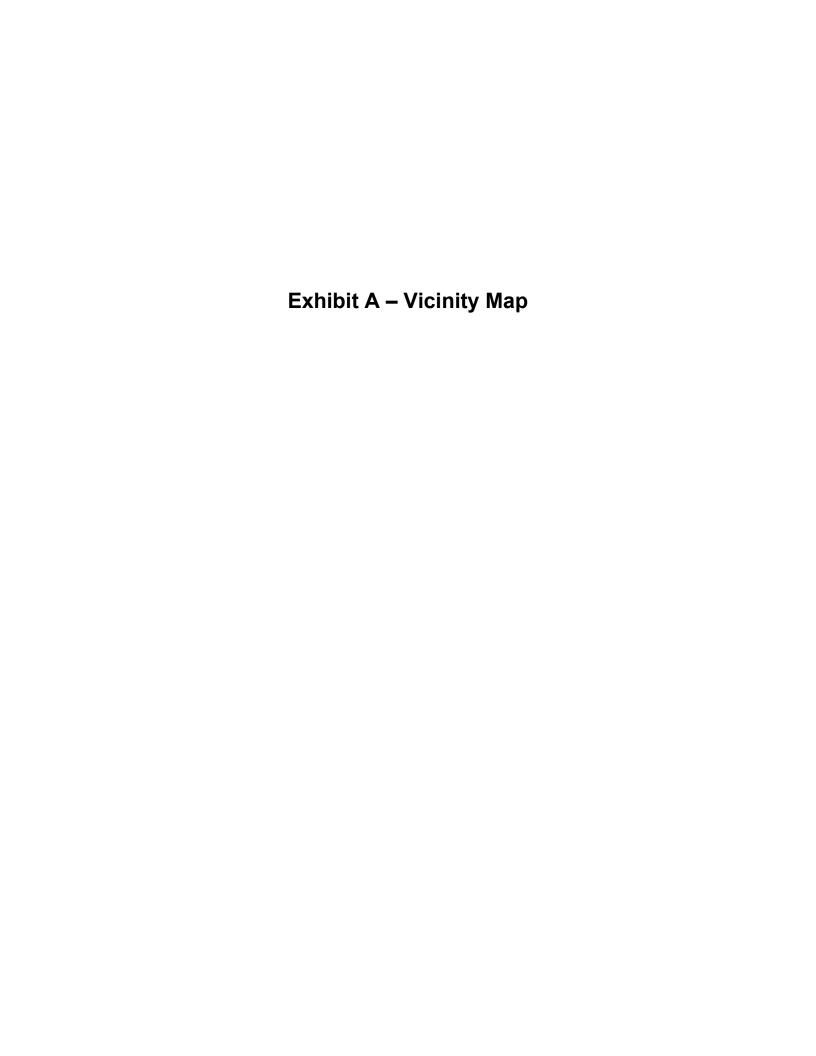

PATENTS: Mr. Beach holds three patents in Computer Design

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Harris & Lee Env. Sciences were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2021 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALADDIN CLEANERS	105 TERRACE BLVD	ENE 0 - 1/8 (0.112 mi.)	F46	204

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 28 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Status Date: 05/03/2013 ZZZ Case Worker: 1TSO415 RB Case Number:

Local Agency: HEALDSBURG/SEBASTAPOL, CITY OF

File Location: Regional Board Local Case Number: Not reported

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel

Site History: The property is currently operated as a cardlock fueling facility. In

January 1991 one 10,000 gallon underground diesel tank was removed and it was determined to have leaked. Groundwater monitoring wells have been installed in both shallow and intermediate zones (total depth of 35 feet). Insitu bioremediation which includes injection of hydrogen peroxide and nutrients started in November 2008. This is in an area where groundwater is being used for domestic and agricultural

supply. Site was closed with no further remediation required.

Local Agency: HEALDSBURG/SEBASTAPOL, CITY OF

File Location: Regional Board Local Case Number: Not reported

Potential Media Affect: Well used for drinking water supply

Potential Contaminants of Concern: Diesel, Gasoline

Site History: In December 1981 an unauthorized release was reported approximately

12,040 gallons of petroleum hydrocarbons had been released over a period of several months. The following 12 years were spent assessing

the release and testing remedial alternatives to delineate

hydrocarbons in soil and groundwater. In 1993, Texaco and ExxonMobil negotiated a package-property swap. ExxonMobil took immediate steps

to reduce risk to people and the environment. Since that time,

ExxonMobil has installed, operated, and maintained a groundwater pump and treat system (GWPTS) and dual-phase extraction (DPE) system and commenced quarterly groundwater monitoring and sampling of monitoring

wells located on site and off site.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0
Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major

adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance

from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological

waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum

products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

File Location: Regional Board Local Case Number: Not reported

Well used for drinking water supply Potential Media Affect:

Potential Contaminants of Concern: Gasoline

Site History: Site is a retail gasoline station and has been at the site for at

least 40 years. Subsurface investigations at the site started in 1999. In 2004 five underground fuel storage tanks were removed. Approximately 2,000 cubic yards of impacted soil was removed from the

site. Air injection lines were installed on site and under the adjacent building for soil and groundwater remediation. Interim remediation has included free product removal and soil vapor

extraction.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

handling of petroleum, petroleum-based products, solvents, and waste oil. Two underground storage tanks (USTs) were removed in 1986 under oversight from the Healdsburg Fire Department. The location of the USTs is unknown, the contents are unknown, and no soil sampling was done. In 2013, a well was installed at the site as part of the adjacent Aladdin Cleaners tetrachloroethylene (PCE) and trichloroethylene (TCE) release investigation. PCE and TCE have been detected in the well.

22 CCR 15 66265.192(h) - California Code of Regulations, Title 22,

Chapter 15, Section(s) 66265.192(h)

Violation Description:

Violation Notes:

Violation Division:

Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design

standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external

corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic;

2. Corrosion-resistant coating (such as epoxy or fi

Returned to compliance on 05/04/2015. Owner/Operator does not have a tank assessment for the [note size and contents of tank] tank. The owner or operator of a hazardous waste tank shall obtain a written assessment reviewed and certified by an independent, qualified, professional engineer, registered in California attesting that the system has sufficient structural integrity, is acceptable for the transferring, storing, and treating of hazardous waste, and that the tanks and containment system are suitably designed. Immediately have an assessment prepared for the [note size and contents of tank] tank. Submit a schedule showing when this will be accomplished to the CUPA

by [date, 30 days from now]. Healdsburg/Sebastopol JPA

 02-12-2015

Citation: HSC 6.7 25290.2(d) - California Health and Safety Code, Chapter 6.7,

Section(s) 25290.2(d)

Violation Description: Failure of the UST system installed on or after July 1, 2003 and

before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water

intrusion into the secondary containment.

Violation Notes: Returned to compliance on 06/08/2016. Owner/Operator did not design

and/or construct UST system with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. The alarms were still going to Redwood Oil. Alarms need to go to someone at Flyer's. They were not able to submit a report of alarms to the CUPA after the inspection. They need to be able to respond to alarms since it is an unmanned station. Design/Construct UST system installed on or after July 1, 2003 and before July 1, 2004 so that the monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. Submit

verification.

Case Worker: FAB Local Agency: Not reported RB Case Number: 1NSO696 File Location: Regional Board

Potential Media Affected: Well used for drinking water supply

Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride,

Stoddard solvent / Mineral Spriits / Distillates

Aladdin Cleaners is a dry cleaning business with active on-site Site History:

operations since at least 1956. Soil, groundwater, and surface water was sampled from on and downgradient of the facility in 1999, and dry cleaning solvents were detected in groundwater in many of the

locations. Pilot testing activities have included injection of

substances to promote active dechlorination of dry cleaning chemicals.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

EDR ID Number

EPA ID Number

Direction Distance

Elevation Site Database(s) EPA ID Number

MAX MACHINERY INC (Continued)

1000818851

EDR ID Number

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. STATE MASTER

Local Agency: HEALDSBURG/SEBASTAPOL, CITY OF

File Location: Regional Board Local Case Number: Not reported

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History: The property is an active gasoline service station with carwash. In

1997 soil boings detected a release to groundwater from the existing underground storage tanks (USTs). In 1999 the UST were upgraded with an application of a lining material. In 2003 these USTs were removed and 3,818 tons of petroleum impacted soil and 4,000 gallons of

impacted groundwater was pumped from the excavation. In April 2008 a High-Vacuum Dual-Phase extraction system started extracting from four

stored in a manner which may rupture the container or cause it to

leak.

Violation Notes: Returned to compliance on 05/21/2019. Containers were left open so

rain could get in. The lids were missing so the owner temporarily covered them. They were empty but did have a hazardous waste sticker affixed. Close containers and teach employees to prevent illegal

discharges to the stormdrain.

Violation Division: Healdsburg/Sebastopol JPA

Violation Program: HW
Violation Source: CERS

Site ID: 407824

Site Name: Healdsburg Chevron & Carwash

Violation Date: 05-24-2018

Citation: HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7,

Section(s) 25290.1(d)

Violation Description: Failure of a UST system installed on or after July 1, 2004 to be

designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.

capable of detecting water intrusion into the secondary containment.

Violation Notes: Returned to compliance on 08/24/2018. Owner/Operator did not design

and/or construct UST system with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment, and/or water intrusion into the secondary containment. Once Western Fiberglass has fixed these we will retest. UST system must have a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment, and detecting water intrusion into the secondary containment. Submit verification. Western Fiberglass has ordered parts to fix this. They fixed the rest of the systems replacing all penetration boots in sumps and UDCG s under

permit.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EDR ID Number

Such wastes could cause turbidity and siltation. Uncontaminated soils,

rubble and concrete are examples of this category.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0
Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month

if all of the following conditions are met: (1) The quantity of

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 05/09/2018. [Describe the HW containers or

tanks found stored >180 days]. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. Immediately gather up all of the paint, fertilizer, bulbs and waste containers stored along the fence and put in secondary containment. Call and set up an appointment for a small business at Meecham Dump

and the these to the household collection facility. Keep a receipt.

S121741200

Citation: 40 CFR 1 265.171 - U.S. Code of Federal Regulations, Title 40, Chapter

1, Section(s) 265.171

Violation Description: Failure to accumulate hazardous waste in a container that is in good

condition.

Violation Notes: Returned to compliance on 06/05/2014. The facility has major

housekeeping issues that can be easily addressed. Close containers, put oil filters in drums and do not overflow, throw garbage in garbage containers, have a designated smokingh area. Properly dispose of

5-gallon waste containers.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

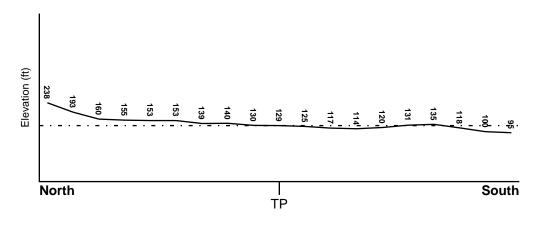

TOPOGRAPHIC INFORMATION

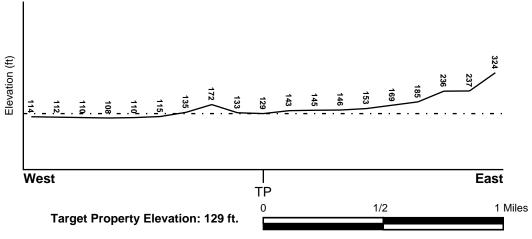

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ZAMORA

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information									
Layer	Boundary			Classification		Saturated hydraulic				
	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)			
1	0 inches	5 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Burbank Housing Development 155 DRY CREEK RD HEALDSBURG, CA 95448 EDR Inquiry # 6733794.3 Harris & Lee Env. Sciences 120 Ross Valley Drive San Rafael, CA 94901-0000 Contact: Cathy Neumann

11/03/21

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Harris & Lee Env. Sciences were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
