Mr. Dan Long FVIP, LLC 41391 Kalmia Street, Suite 200 Murrieta, California 92562

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT BREW PUB (APNS 963-070-002 TO -004) MURRIETA, CALIFORNIA

Dear Mr. Long:

As you requested on behalf of FVIP, LLC (the Client), we have performed a Phase I Environmental Site Assessment (ESA) for approximately 2.17 acres of vacant land (the Site) located immediately east of Highway 79 and west of Briggs Road in Murrieta, California. The Site is identified by County of Riverside Assessor's Parcel Numbers (APNs) 963-070-002 to -004.

You requested a Phase I ESA to provide information regarding the potential for existing hazardous substances or petroleum products at the Site as required by the Riverside County Environmental Health Department for the proposed development. The accompanying report presents the details of our Phase I ESA.

We appreciate the opportunity to have performed this Phase I ESA for FVIP, LLC. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON WEST, INC.

Scott M. Nunes, CAC Senior Environmental Scientist

(EMAIL) Addressee

Jim Brake, PG Senior Geologist/Vice President

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

1. INTRODUCTION

This report presents the findings of a Phase I Environmental Site Assessment (ESA) of approximately 2.17 acres of vacant land (the Site) located immediately east of Highway 79 and west of Briggs Road in Murrieta, California (Figure 1). The Site is identified by the County of Riverside APNs 963-070-002 to -004. No addresses are associated with the Site. The Phase I ESA was requested by FVIP, LLC (the Client) to provide information regarding the potential for existing hazardous substances or petroleum product impacts at the Site as required by the Riverside County Environmental Health Department for the proposed development.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of 'recognized environmental conditions' (REC) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* Section 1.1.1 of ASTM Designation E 1527-13 defines an REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions." De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

ASTM *Designation E 1527-13* also defines 'Historical' and 'Controlled' RECs. They define an 'Historical REC' as "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM defines a 'Controlled REC' as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." An HREC is not a REC if the release meets current standards for unrestricted residential use. A CREC remains a REC by definition because it does not meet the unrestricted residential use requirement unconditionally.

We also conducted the Phase I ESA in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM Designation E1527-13:

- **"Uncertainty Not Eliminated** No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost."
- **"Not Exhaustive** All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information."
- **"Level of Inquiry is Variable** Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry."

1.2 Scope of Services

Our Proposal No. IE-1644, dated April 5, 2016, describes the scope of services for this Phase I ESA. We performed the scope of services outlined in the proposal with the exception that Sanborn Maps were not reviewed. Environmental Data Resources, Inc. (EDR) stated that Sanborn Map coverage does not exist for the Site.

1.3 Report Limitations

The main components of the Phase I ESA and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** we reviewed physical setting references to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Regulatory Agency Records Review:** we reviewed regulatory agency records to obtain information that could potentially help identify RECs at or potentially affecting the Site. We reviewed publicly available Federal, State, and local regulatory agency records for the Site.

- **Site History:** we reviewed historical references to assess the previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.
- Site Reconnaissance: we performed a site reconnaissance to observe site conditions and activities for indications of evidence of RECs. The site reconnaissance was for the Site only. Offsite properties and features were viewed solely from the vantage of the Site and public thoroughfares.

1.4 Data Gaps

ASTM Designation E 1527-13 defines a data gap as "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. No significant data gaps were identified during the performance of this Phase I ESA. Sanborn maps were not available for the Site, however, this is not considered a data gap as it did not affect our ability to assess the historical use of the Site.

2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The Site is located adjacent to the east of Highway 79 and west of Briggs Road in Murrieta, California (Figure 1). The Site is identified by County of Riverside APNs 963-070-002 to -004. The Site is depicted in Section 6 of Township 7 South, Range 2 West, San Bernardino Base and Meridian on the United States Geological Survey's (USGS) *Murrieta, California, 7.5-minute Topographic Map* (USGS, 2012).

2.2 Site and Vicinity General Characteristics

The Site is vacant land with the surrounding vicinity being primarily vacant land and commercial development. The Site Plan (Figure 2) depicts the site boundaries and features, and surrounding properties.

2.2.1 Topography

The topography of the Site and surrounding vicinity is relatively flat. The USGS Murrieta, 7.5-minute *Topographic Map* (USGS, 2012) shows the site elevation at approximately 1,345 feet above mean sea level, with a general topographic gradient of the site vicinity to the west-southwest.

2.2.2 Geologic Conditions

The Site is located within the Perris Block of the Peninsular Ranges Geomorphic Province. The Perris Block is characterized by granitic highlands which display three elevated erosional surfaces surrounded by alluviated valleys. The Peninsular Ranges are bound by the Transverse Ranges (San Gabrielle and San Bernardino Mountains) to the north, the Colorado Desert Geomorphic Province to the east. The Peninsular Ranges extend westward into the Pacific Ocean and southward to the tip of Baja California. Overall the Peninsular Ranges are characterized by Cretaceous-age granitic rock and a lesser amount of Mesozoic-age metamorphic rock overlain buy terrestrial and marine sediments. Faulting within the province is typically northwest trending and includes the San Andreas, San Jacinto, Elsinore, and Newport-Inglewood faults. Locally, the Site is within the northern portion of the Temecula Valley, southeast of the intersection of the Wildomar and Murrieta Hot Springs faults. Older alluvium overlies granitic bedrock in the vicinity of the Site.

According to the United States Department of Agriculture's (USDA) Soil Conservation Service (SCS), which leads the National Cooperative Soil Survey (NCSS), soil at the Site is generally well-drained sandy loam. The soil has slow infiltration rates.

2.2.3 Hydrologic and Hydrogeologic Conditions

During our Geotechnical Investigation of the Site in December, 2015, we did not encounter groundwater within our excavations to the maximum depths explored of 16 feet. There are no publicly available well records for wells in the vicinity of the Site. We anticipate groundwater is deeper than 50 feet in the vicinity of the Site. Based on our experience in the vicinity of the Site, it is common for perched water or seepage of infiltrated surface water to occur above less permeable units (granitic bedrock). During the rainy season, localized perched water conditions may develop above less permeable units that may require special consideration during grading operations. Groundwater elevations are dependent on seasonal precipitation, irrigation, and land use, among other factors, and vary as a result.

2.3 Current and Planned Uses of the Site

The Site is currently vacant land not under any use. The planned use of the Site is a commercial brew pub facility.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

There are no structures on the Site. Various utilities including water and light poles are located along the sidewalk along Briggs Road. Natural gas pipelines (The Gas Company) bisect the northern portion of the Site in a southeast to northwest direction. Further description of the Site is presented in Section 6.0.

2.5 Current Uses of Adjoining Properties

The Site is bound by Highway 79 to the west, beyond which are vacant land and a Moose Lodge a nursery to the south; vacant land with high-tension power lines to the north; and Briggs Road to the east, beyond which are vacant land and II-VI Optical Systems.

3. USER-PROVIDED INFORMATION

This section provides responses to inquiries made to the Client for site information. The Client was asked if they know of previous environmental reports or documents that may exist and, if so, whether copies could be provided. They were also asked if they have knowledge of legal or administrative proceedings involving the Site. Mr. Dan Long of The Rancon Group, representing the Client, completed a Client Questionnaire (Appendix A).

3.1 Title, Appraisal and Sale Agreement Records

The Client did not provide any title, appraisal, or sale agreement records.

3.2 Environmental Liens or Activity and Use Limitations

Mr. Long stated that he is unaware of any environmental liens on, or use limitations for, the Site.

3.3 Specialized Knowledge

Mr. Long indicated that he has specialized knowledge regarding nearby properties and the Site, though he did not elaborate on that information.

3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Long provided no commonly known information or reasonably ascertainable information unique to the Site.

3.5 Owner, Property Manager, and Occupant Information

Mr. Long stated that FIVP, LLC currently owns the Site and that the Rancon Group manages it. Interview information provided by the site owner is summarized in Section 7.0.

3.6 Valuation Reduction for Environmental Issues

Mr. Long indicated that he was not aware of any environmental conditions on the Site which could lead to a potential valuation reduction of the Site.

3.7 Reason for Performing Phase I ESA

The Client requested the Phase I ESA to obtain information regarding the potential for existing hazardous substances or petroleum product impacts at the Site as required by the Riverside County Department of Environmental Health for the proposed development.

4. RECORDS REVIEW

This section summarizes our review of readily available agency records for the Site and properties in the surrounding vicinity.

4.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a search of Federal, State, and local databases for the Site and surrounding area. The search distance for the review extended one mile from the site boundaries. A copy of the report entitled *The EDR Radius MapTM Report with GeoCheck*, dated April 8, 2016, is in Appendix B.

4.1.1 Site

The Site is not listed in any of the databases searched by EDR.

4.1.2 Nearby Properties

The facility on the adjacent property east of the Site is identified on two databases searched by EDR. Exotic Materials, Inc. (also listed as Lightworks Optical Systems) at 36570 Briggs Road is listed on the RCRA-SQG and RCRA-LQG databases. The facility is listed as having handled halogenated solvents, non-halogenated solvents, ignitable waste, corrosive waste, various metals, and benzene. The facility has received minor violations, which were deemed to have been rectified in a compliance evaluation inspection in November 2009. This facility is not expected to have negatively impacted the Site due to its regulatory status.

Seven other properties within ¹/₄-mile of the Site are listed on various databases searched by EDR. The information in the EDR report with respect to these properties/facilities does not suggest that activities associated with them are likely to have negatively impacted the environmental condition of the Site based on:

- the status of the facilities i.e., closed regulatory cases or historical cases. Release was remediated or monitored and not impacting other offsite properties including the Site;
- types of listings i.e., non-release-based listings. Listings for possible use or storage of chemicals, but no reported releases;
- distance from the Site, i.e., likely too far for a possible release of hazardous substances or petroleum products to have been transported in groundwater; and
- direction with respect to the direction of groundwater flow i.e., Site is not downgradient of a possible release therefore hazardous substances or petroleum products would not be transported toward or to the Site.

4.1.3 Orphan Summary

The Orphan Summary in EDR's report identifies properties that have incomplete address information and could not be specifically plotted. There are no listings in the Orphan Summary.

4.2 Vapor Encroachment Screening/Conditions

The VEC application provided by EDR is a Tier 1 screening process that follows ASTM *Designation E 2600-10*. The VEC application screens known or suspected contaminated properties with volatile or semi-volatile chemicals of concern (COCs) within an area of concern (AOC) around the Site to determine if COCs in vapor from those properties could encroach upon the Site. If the length and width of a contaminant plume from a property are known, then the AOC for a VEC extends 100 feet beyond the known plume dimensions. If the plume dimensions are not known, then ASTM *Designation E 2600-10* specifies AOC dimensions based on each type of COC plume (non-petroleum or petroleum).

The AOC for volatile, non-petroleum hydrocarbon COCs (i.e., COCs from dry cleaner sites, industrial sites, manufactured gas plants, hazardous waste disposal sites, and landfills) extends 1,760 feet (1/3 mile) from the site boundary. The AOC for volatile petroleum hydrocarbon COCs (i.e., COCs from gasoline stations or bulk distribution facilities) extends 528 feet (1/10 mile) from the site boundary. However, the AOC around the Site for both types of COCs can be reduced based on known groundwater flow direction, as summarized in the following table:

Location of COC Release	AOC Distance		
Relative to Groundwater Flow Direction	Volatile Non-Petroleum Hydrocarbon COCs	Volatile Petroleum Hydrocarbon COCs	
Upgradient of the Site	1,760 feet or 1/3 mile	528 feet or 1/10 mile	
Cross-gradient from the Site	365 feet	165 feet	
Downgradient of the Site	100 feet	100 feet	

If a known release of volatile COCs is within the AOC, there is a potential that a VEC exists on the Site unless it can be ruled out based on the presence of a hydraulic or physical barrier. A river can act as a hydraulic barrier or a clay layer in soil can act as a physical barrier that would impede the migration of volatile COCs in vapor onto the Site. Manmade or natural features or conditions such as utility corridors or fractured bedrock, can also create preferential vapor pathways that enable vapor to encroach onto the Site.

Based on information in *The EDR Vapor Encroachment Screen Report*, dated April 19, 2016, provided by EDR (Appendix C), no properties within the AOC were identified as having releases of either volatile non-petroleum hydrocarbon COCs or volatile petroleum hydrocarbon COCs.

4.3 Additional Environmental Record Sources

We searched additional readily available environmental record sources. The search distance for the review extended approximately 1/4-mile from the Site. This section summarizes our findings.

4.3.1 GeoTracker and EnviroStor Websites

We reviewed additional environmental records sources including the State Water Resources Control Board (SWRCB) GeoTracker webpage (http://geotracker.waterboards.ca.gov/) and the Department of Toxic Substances Control (DTSC) EnviroStor webpage (<u>http://www.envirostor.dtsc.ca.gov/public/</u>) for information regarding nearby properties/facilities of concern. The EnviroStor and GeoTracker website databases did not have listings for any properties/facilities within approximately ¹/₄-mile of the Site.

4.3.2 <u>State of California Department of Conservation, Division of Oil, Gas and</u> <u>Geothermal Resources (DOGGR)</u>

We reviewed information available from the DOGGR website (http://www.conservation.ca.gov) for existing/former oil, gas, or geothermal wells on or within the site vicinity. According to the website, no oil and gas wells are listed on or adjacent to the Site.

4.3.3 County of Riverside Department of Agriculture, Weights and Measures

The County of Riverside, Department of Agriculture, Weights and Measures maintains records regarding restricted pesticide use at the Site. The County of Riverside, Department of Agriculture, Weights and Measures requires an address in order to perform a records search. No addresses are associated with the parcels on the Site.

4.3.4 County of Riverside Department of Environmental Health

The County of Riverside Department of Environmental Health (DEH) maintains records of UST releases and hazardous materials releases and cleanups for properties and facilities in Riverside County. The DEH requires an address in order to perform a records search. No addresses are associated with the parcels on the Site.

5. HISTORICAL USE

This section summarizes information we obtained from a variety of sources regarding the historical uses of the Site and identifies historical uses that could have led to RECs. The sources of information included historical aerial photographs, historical topographic maps, and city directories provided by EDR.

5.1 Sanborn, Inc. Fire Insurance Maps

According to EDR's Sanborn Map Report dated April 8, 2016, Sanborn maps do not exist for the Site or site vicinity.

5.2 Aerial Photographs

We reviewed historical aerial photographs provided by EDR for the years 1938, 1949, 1953, 1961, 1967, 1978, 1985, 1989, 1996, 2002, 2005, 2006, 2009, 2010 and 2012 (Appendix D) for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum. The following table summarizes the observations of the Site and adjacent properties on the aerial photographs.

N.	Observations			
Year	Site	Adjacent Properties		
1938 (1" = 500")	The Site appears to have been vacant land.	Adjacent properties appear to have been vacant land, with the exception of an improved road adjacent west of the southern portion of the Site.		
1949 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
$\begin{array}{c c} 1953 \\ (1" = 500") \end{array}$ The Site appears to have been agricultural land.		Adjacent properties appear to have been agricultural land in all directions.		
1961 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
1967 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
1978 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph, with the exception of an improved road to the east and vacant land to the north.		
1985 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
1989 (1" = 500')	The Site appears to have been vacant land.	All adjacent properties appear to have been vacant land.		
1996 (1" = 500')	We observed no significant changes from the previous photograph.	Adjacent properties were vacant land and a commercial-type structure to the west (beyond Highway 79); vacant land to the north; Briggs Road, beyond which were vacant land and a rectangular commercial facility to the east; and a nursery to the south.		
2002 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
2005 (1' = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.		
$\begin{array}{c} 2006 \\ (1" = 500") \end{array}$ We observed no significant changes from the previous photograph.		We observed no significant changes from the previous photograph.		

AERIAL PHOTOGRAPH REVIEW SUMMARY

	Observations		
Year	Site	Adjacent Properties	
2009 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.	
2010 (1" = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.	
2012 (1'' = 500')	We observed no significant changes from the previous photograph.	We observed no significant changes from the previous photograph.	

We observed no site or vicinity conditions on the aerial photographs that would suggest the potential presence of RECs on the Site or adjoining or nearby properties Agricultural use was present on the Site from at least 1953 until sometime prior to 1996 and represents a potential environmental concern because of the possible use of pesticides. However, the Site has since been graded and tilled and the potential presence of pesticides in soil from past agricultural use is not expected to be of concern due the disturbance/grading of the soil, likely diminishing pesticides, if present.

5.3 **Topographic Maps**

We reviewed historical topographic maps for the years 1901, 1942, 1943, 1953, 1973, 1979, and 2012 provided by EDR (Appendix E). The following summarizes observations of the Site and adjacent properties on the historical topographic maps.

	Obser	vations	
Year	Site	Adjacent Properties	
1901 No land use is depicted. (1: 125,000)		No land use is depicted, with the exception of a street to the west.	
1942 (1: 62,500)	No significant changes are depicted on the Site from the previous topographic map.	No significant changes are depicted from the previous topographic map.	
1943 (1:62,500)	No significant changes are depicted on the Site from the previous topographic map.	e No significant changes are depicted from the previous topographic map.	
1953 (1:24,000)	No significant changes are depicted on the Site from the previous topographic map, with the exception of a "pipeline" traversing the northern portion.	No significant changes are depicted from the previous topographic map.	
1973 (1:24,000)	No significant changes are depicted on the Site from the previous topographic map.	No significant changes are depicted from the previous topographic map.	
1979 (1:24,000)	No significant changes are depicted on the Site from the previous topographic map.	No significant changes are depicted from the previous topographic map.	
2012 (1:24,000)	No significant changes are depicted on the Site from the previous topographic map.	No significant changes are depicted from the previous topographic map.	

TOPOGRAPHIC MAP REVIEW SUMMARY

The historical topographic maps depict nothing that would suggest the presence of RECs on the Site or adjacent properties.

5.4 City Directories

EDR prepared a city directory image report of cross-referenced directories reviewed at approximately five-year intervals from 1975 through 2013. The Site is not listed (no addresses). Various commercial properties, including a nursery, are listed for addresses in the immediate site vicinity. A copy of the EDR city directory image report including information regarding offsite facilities is in Appendix F.

6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Mr. Scott Nunes with Geocon performed the site reconnaissance on April 18, 2016, by walking the Site. Mr. Nunes performed the offsite survey by making observations of adjacent properties from the Site and adjacent roads and thoroughfares. Vegetation growth limited the observation of various areas on the Site. Weather on the day of the site reconnaissance was sunny with temperatures in the mid-80s. Photographs of various site features and offsite properties are appended. Figure 2 illustrates selected site features.

6.2 General Site Setting

The Site is located in an area of mainly vacant land and commercial facilities.

6.3 Onsite Survey

The Site consists of relatively flat vacant land (Photo #s 1-3). The ground appears to have been tilled, with dry brush/grass covering some areas. Sign markers for natural gas pipelines (Photo #s 4 and 5) were observed on the northern portion, traversing the Site in a southeast to northwest direction. We observed various utilities, including water and underground light poles along the sidewalk along Briggs Road.

6.4 Offsite Survey

Properties within the site vicinity include:

- North High-tension power lines (Photo #6) and vacant land (Photo #7).
- **East** Briggs Road, beyond which is II-VI Optical Systems (Photo #8, a commercial warehouse structure)
- **South** Moon Valley Nurseries (Photo #9).
- West Highway 79, beyond which is vacant land and a Moose Lodge (Photo #10).

7. INTERVIEWS

We interviewed Mr. Dan Long, representing the Site owner, via a site owner questionnaire regarding the current and past uses of the Site. Mr. Long stated that the Site was historically used for farming until March 1990, when it was subdivided to its current configuration. Mr. Long stated that since then, the Site has been graded and improved with curb, gutter, sidewalks, street lights, and a paved street. Mr. Long stated that there is annual and seasonal weed abatement on the Site. In addition, he stated a high-pressure natural gas line bisects the Site. Mr. Long is unaware of any environmental concerns for the Site.

8. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM *Designation E 1527-13*, for the Site in Murrieta, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

The assessment has revealed no evidence of RECs on the Site.

Prior to any construction activities near the natural gas pipelines on the northeastern portion of the Site, the owners of those lines should be notified so they can confirm their locations and observe construction activities at their discretion.

10. QUALIFICATIONS

This Phase I ESA report was prepared by Mr. Scott Nunes and reviewed by Mr. Jim Brake. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries investigation in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Brake has an MS degree in Geological Science and 29 years of experience in environmental investigation and remediation, including implementation of Remedial Investigation/Feasibility Study programs and soil and groundwater remedial actions for private industrial and government clients. He has managed a wide variety of projects for clients in the manufacturing, transportation, mining, automobile and real estate industries including Environmental Protection Agency and DTSC Superfund sites. Mr. Brake has extensive experience in the performance of Phase I and II ESAs of commercial, industrial, and agricultural properties throughout Northern California.

Mr. Nunes is a Senior Environmental Scientist for Geocon. He has over 28 years conducting and managing environmental investigations. Mr. Nunes has completed numerous Phase I and II ESAs, Preliminary Endangerment Assessments, underground storage tank removals, and asbestos and lead-based paint survey and abatement activities for a variety of residential, commercial, school, hospital, industrial, agricultural, and municipal properties. He has a Bachelor's of Arts in Geography-Ecosystems (Environmental Science) and is a Certified Asbestos Consultant (CAC) in California.

CLIENT-PROVIDED INFORMATION FOR THE SITE

SITE: Brew Pub (APNs 963-070-002 to -004) Geocon Project Number: T26277-22-02

*Please elaborate on any question answered "yes." If the question does not apply to the site, please answer "N/A".

- 1. If possible, please provide us with the title, appraisal, or sale agreement records to review and discuss in the Phase I ESA.
- 2. Are you aware of any environmental liens or activity and use limitations associated with the Site? NO
- 3. Do you have any specialized knowledge of the Site? Yes
- 4. Please provide any commonly known or reasonably ascertainable information about the Site. The site was historically used for farming activities, but has since been subdivided, graded and improved with streets, curbs, gutters and utilities.
- 5. Who currently owns, manages, and operates the Site? FVIP, LLC and the Rancon Group
- 6. Has the monetary value of the Site been reduced due to environmental issues associated with the Site or adjacent properties? NO
- 7. Why are you requesting a Phase I ESA for the Site? Required by Riverside County Health Dept.

m

- 1. What is your relationship to the site? I represent the ownership group that purchased the property in December 2015.
- Do you have good knowledge regarding the uses and physical characteristics of the site?
 ∑ Yes
 - □ No If not, who does?_____ Phone Number: _____
- 3. Do you have good knowledge regarding the activities/processes conducted at the site?
 ☑ Yes
 ☑ No If not, who does? Phone Number:
- C. PROPERTY INFORMATION
- 1. To the best of your knowledge, what are the current and past uses of the site? Please describe with approximate dates.

The property was historically used for farming activities, until March 1990 when the site was subdivided to it's current configuration. Since 1990 the property was graded and improved with curb, gutter, sidewalks, street lights and paved street. The site has remained in its current condition with limited activity to date. Activities include annual and seasonal weed abatement. There is a high pressure gas line that bisects the property.

^{2.} To the best of your knowledge, what are the current and past uses of the adjoining properties? Same as Item No 1 above.

PHASE I INTERVIEW QUESTIONNAIRE Page 2 of 8

- 3. To the best of your knowledge, what are the current and past uses in the surrounding area? <u>Vacant parcels are vacant and no uses exist, beyond farming mentioned in Item No. 1 above. Other</u> <u>sites include a nursery, medical offices/technology, offices and open space. To the immediate west is</u> <u>Highway 79 (Winchester Rd)</u>
- Are there currently, or have there been in the past, any surface water bodies such as creeks or streams or other surface drainage on or adjacent to the site?
 No
- Any historical or current pools of liquid noted? Source? Location? Describe. No
- 6. Any historical or current standing water noted? Source? Location? Describe.
 - No
- Are there any waste water discharges (including storm water) to a drain, ditch, or stream on the site and/or on adjacent properties: No
- 8. Are there currently, or have there been in the past, any wells (e.g. water, oil, gas, irrigation, injection, abandoned), pits, clarifiers, cisterns, cesspools, or similar receptacles noted where liquids drain, collect or are stored (sumps) that are likely to contain hazardous substances or petroleum products on the site or adjacent properties?

Not that I am aware of.

- 9. Identify the source of potable water on the site. Eastern Municipal Water District
- 10. Identify the sewage disposal system on the site (type and age). Eastern Municipal Water District, stubbed lines from the main currently exist, new connections will be

PHASE I INTERVIEW QUESTIONNAIRE Page 3 of 8

built with the proposed project

- Is there any historical or current solid waste disposal on site? Describe. 11. No
- Is there any historical or current unnatural fill or grading, particularly fill of unknown origin? Describe. 12. Not that I am aware of or that have been disclosed to me
- Is there any historical or currently stained soil or pavement? Describe. 13. No
- Is there any historical or current stressed vegetation noted (other than caused by drought)? Describe. 14. No
- 15. To your knowledge, are there or have there been:

Hazardous substances on the site? Petroleum products on the site?

□ Yes	🗵 No
□ Yes	🗵 No

If current uses involve hazardous substances or petroleum products, please identify the type, quantity and storage conditions of those substances.

Hazardous Substance or Petroleum Products	Location	Quantity	Storage Conditions

If hazardous or otherwise controlled waste storage areas are present on the site, please identify the type, location, quantity, and storage conditions of the waste materials.

Material Stored	Location	Quantity	Storage Conditions

PHASE I INTERVIEW QUESTIONNAIRE Page 4 of 8

16. If hazardous substances and/or petroleum products are present, are there indications of any of the following:

An existing release? A past release? A threat of their release? ☐ Yes ⊠ No
 ☐ Yes ⊠ No
 ☐ Yes ⊠ No

If yes to any of the above, please describe:

17. Are there any aboveground or underground storage tanks? No Identify tank volume, location, material, age.

AST/UST and Age	Location	Tank Volume	Material stored

18. Are there any historical or current drums and/or other containers? No

Identify volume, material, and location.

Volume	Material	Location

- Have there been any historical or any current noxious odors noted on the Site? Source? Describe.
 No
- 20. To your knowledge, are there any utility corridors on the Site? Describe.

Yes, Gas line runs through the property

21. Any electrical or hydraulic equipment likely to contain PCB's such as transformers, hydraulic lifts, or elevators (fluorescent light ballast excluded).

PHASE I INTERVIEW QUESTIONNAIRE Page 5 of 8

No
Are there any occupants on the Site? Describe and list duration of occupancy.
NO

22.

PHASE I INTERVIEW QUESTIONNAIRE Page 6 of 8

23. Are there structures present on the site? Provide a general description of the structures on the site (amount, size, and age)? None

Structure	Sq. Footage	Age

- 24. If any structures identify the type of HVAC system and fuel source on the interior. Any boilers present? N/A
- 25. Is the facility equipped with any backup generators? Fuel source?
 - No
- Any historical or current stains or corrosion on floors, walls or ceilings?
 No
- 27. Do you have good knowledge regarding the identity of any existing documents relating to the Site?

🛛 Yes			
🗖 No	If not, who does?	Phone Numl	ber:

28. To your knowledge, do any of the following documents exist with respect to the Site? If yes, please name the document and comment upon whether it is available for review.

Document	Availability/ Source	Title of Document
Environmental site assessment reports?	Yes	On file with Riverside County
Environmental audit reports?	Unsure	
Environmental permits?	Unsure	
Storage Tank registrations?	N/A	
Underground Injection System registrations?	N/A	
Material safety data sheets (MSDS)?	No	
Community right-to-know plans?	No	

PHASE I INTERVIEW QUESTIONNAIRE

Page 7 of 8

Document	Availability/ Source	Title of Document
Safety plans?	No	
Spill Prevention, Countermeasure, & Control Plans?	No	
Illness and Injury Prevention Plans?	No	
Reports regarding hydrogeologic conditions on the site or surrounding area?	No	
Hazardous waste generator notices or reports?	No	
Geotechnical studies?	Yes	Prepared by Geocon
Risk assessments?	No	
Recorded Activity and Use Limitations (AULs)?	No	

To your knowledge, do any of the following exist with respect to the Site?

29. Notices or other correspondence from any government agency relating to past or current violations of environmental laws? □ Yes ⊠ No

If yes, describe:

30. Notices or other correspondence from any government agency relating to environmental liens encumbering the Site? □ Yes ⊠ No

If yes, describe:_____

31. Pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances, or petroleum products in, on, or from the Site? □ Yes ⊠ No

If yes, describe:

32. Notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? □ Yes ⊠ No

If yes, describe:

PHASE I INTERVIEW QUESTIONNAIRE Page 8 of 8

33. Please provide any additional information relative to this project.

None

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

ABBOTT CARDIOVASCULA	30590 COCHISE CIR	S 0 - 1/8 (0.076 mi.)	B4	23

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EXOTIC MATERIALS, IN	36570 BRIGGS ROAD	SE 0 - 1/8 (0.009 mi.)	A1	8

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 12/14/2015 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/30/2015 Date Data Arrived at EDR: 11/07/2015 Date Made Active in Reports: 01/04/2016 Number of Days to Update: 58 Source: EPA Telephone: N/A Last EDR Contact: 04/05/2016 Next Scheduled EDR Contact: 04/18/2016 Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/30/2015 Date Data Arrived at EDR: 11/07/2015 Date Made Active in Reports: 01/04/2016 Number of Days to Update: 58 Source: EPA Telephone: N/A Last EDR Contact: 04/05/2016 Next Scheduled EDR Contact: 04/18/2016 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/11/2016 Date Data Arrived at EDR: 01/22/2016 Date Made Active in Reports: 03/18/2016 Number of Days to Update: 56 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 04/05/2016 Next Scheduled EDR Contact: 06/06/2016 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015 Date Data Arrived at EDR: 03/02/2016 Date Made Active in Reports: 04/05/2016 Number of Days to Update: 34

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/22/2015 Date Data Arrived at EDR: 12/23/2015 Date Made Active in Reports: 02/18/2016 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 03/22/2016 Next Scheduled EDR Contact: 07/04/2016 Data Release Frequency: Semi-Annually

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 12/17/2015 Date Data Arrived at EDR: 12/22/2015 Date Made Active in Reports: 02/08/2016 Number of Days to Update: 48 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 03/07/2016 Next Scheduled EDR Contact: 06/20/2016 Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014 Date Data Arrived at EDR: 03/18/2014 Date Made Active in Reports: 04/24/2014 Number of Days to Update: 37 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 03/11/2016 Next Scheduled EDR Contact: 05/09/2016 Data Release Frequency: Varies

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/07/2015 Date Data Arrived at EDR: 12/08/2015 Date Made Active in Reports: 01/21/2016 Number of Days to Update: 44 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 03/08/2016 Next Scheduled EDR Contact: 06/20/2016 Data Release Frequency: Semi-Annually

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Target Property Map:	5641304 MURRIETA, CA
Version Date:	2012
Southeast Map:	5640928 BACHELOR MOUNTAIN, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

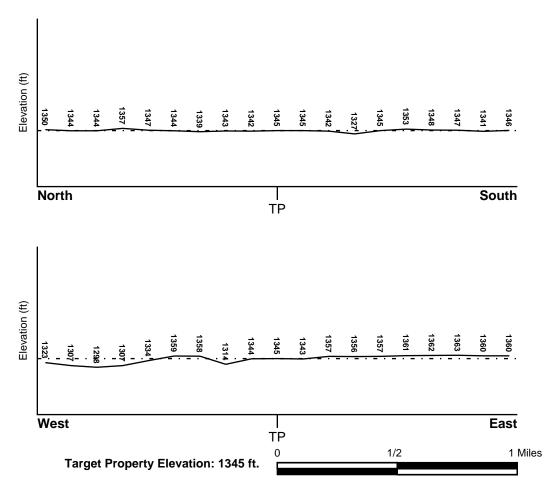

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Ν

Target Property County RIVERSIDE, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06065C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported
NATIONAL WETLAND INVENTORY	NWI Electronic
<u>NWI Quad at Target Property</u> MURRIETA	<u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	•	1.25 miles
Status:		Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	MONSERATE
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Low
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Bou	indary		Classification		Saturated hydraulic		
Layer	Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.3 Min: 6.1	
2	9 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1	
3	27 inches	44 inches	indurated	Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:	
4	44 inches	57 inches	cemented	Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:	
5	57 inches	70 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6	

Soil Map ID: 2

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
