Executive Summary

PlaceWorks has performed a Transaction Screen Process Report (Phase 0) on behalf of the City of Irvine (City), for the Irvine Animal Care Center and Operations Support Facility Expansion/Renovation project in the City of Irvine, Orange County, California. Figure 1 shows the regional location and Figure 2 shows the local vicinity. This modified Phase 0 was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14e1 Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process. The modified Phase 0 involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The purpose of the assessment was to evaluate the likelihood that hazardous materials may be present in soil beneath the project site as a result of onsite or offsite activities.

Actions associated with the project include the expansion and renovation of onsite facilities for the Irvine Animal Care Center and Operations Support Facility. Project development would add a 5,000-square-foot annex building to the existing operations support facility, a fuel tank farm area, and maintenance shop structures. The parking areas would be resurfaced and restriped, and a dog park would be converted to a staff parking lot. Project development would upgrade and renovate the current Irvine Animal Care Center building and facilities, including 13,000 square feet of minor interior renovations and 3,000 square feet of major interior renovation. The project would also include the construction of 13,000 square feet of new building space for the Irvine Animal Care Center. Figure 3 is an aerial photograph showing current site conditions and Figure 4 the conceptual site plan. Figure 5 is a close-up of the project site showing potential environmental conditions within the boundaries of the project site.

The objective of this report is to assess whether there may be "recognized environmental conditions" (REC), historical RECs (HREC), and controlled RECs (CREC) associated with the subject site. Our conclusions are intended to help the user evaluate if a Phase I Environmental Site Assessment or a Phase II assessment with soil sampling may be needed for the subject site. Our opinion regarding an REC's potential impact on the subject site is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, and our experience evaluating similar sites.

RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The ASTM E 1527-13 Standard defines an REC in part as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Executive Summary

Nine potential RECs were identified for the project site. An aboveground petroleum storage tank, an aboveground waste oil tank, three hazardous chemical storage areas, a household hazardous waste collection area, vehicle lifts, and an underground storage tank that is currently in operation at the Operations Support Facility at 6427 Oak Canyon (Figure 5). Additionally, portions of the project site were used for agricultural purposes and there is a potential for residual pesticides in soil to be present. Soil sampling is only recommended in areas where soil disturbance will occur for project implementation.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

The ASTM E 1527-13 Standard defines an HREC as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

One HREC was identified for the project site. A leaking underground storage tank was removed from the Operations Support Facility at 6427 Oak Canyon and received regulatory closure from the Orange County Health Care Agency in 2000.

CONTROLLED RECS ENVIRONMENTAL CONDITIONS

The Standard also requires the identification of controlled RECs (CRECs). The ASTM Standard defines CRECs as

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

This assessment has revealed no evidence of CRECs in connection with the project site following the ASTM standard.

SUMMARY

Based on the results of this modified Phase 0 Report, nine potential RECs, including historic agricultural usage of portions of the site, and one HREC were identified in connection with the project site. This modified Phase 0 Report does not meet the "all appropriate inquiry" standards and should not be used for property transactions but only to evaluate potential environmental hazards at the project site. Areas with RECs should have a Phase II that evaluates thoroughly existing and historic land uses of that individual parcel prior to any land transfer or soil disturbance activities that could potentially expose workers to hazards.

1.1 PURPOSE

This modified Phase 0 Report was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14 Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process. The modified Phase 0 Report involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The City of Irvine is planning on expanding and renovating the onsite facilities for both the Operations Support Facility and the Irvine Animal Care Center.

The objective of this assessment was to evaluate site history, existing observable conditions, current site use, and current and historic uses of surrounding properties to identify if there may be Recognized Environmental Conditions (RECs) in connection with the subject site. RECs are defined by ASTM as

"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. This definition does not include de minimis conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).

In addition, the Standard requires the identification of historical RECs (HRECs) and known or suspect environmental conditions in the report. The standard defines historical RECs as

"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

The Standard also requires the identification of controlled RECs (CRECs). The ASTM Standard defines CRECs as

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting riskbased criteria established by regulatory authority), with hazardous substances or petroleum products

allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Our conclusions are intended to help the user evaluate the "environmental risk" associated with the site, defined by ASTM as "a risk which can have a material environmental or environmentally-driven financial impact on the business associated with the current or planned use of a parcel of commercial real estate. Consideration of environmental risk issues may involve addressing one or more non-scope considerations."

This modified Phase 0 Report does not meet the "all appropriate inquiry" standards and should not be used for property transactions but only to evaluate potential environmental hazards at the project site. Areas with RECs should have a Phase II that evaluates thoroughly existing and historic land uses of that individual parcel prior to any land transfer or soil disturbance activities that could potentially expose workers to hazards.

1.2 PROJECT DESCRIPTION

The proposed project involves the expansion and renovation of onsite facilities for both the Operations Support Facility and the Irvine Animal Care Center. The proposed expansions and renovations would better support the current City operations onsite. On the Operations Support Facility portion of the project site, project development would add a 5,000-square-foot annex building to the existing operations support facility, a tank fuel farm area, and maintenance shop structures. It would also include restriping and resurfacing for surface parking areas, including conversion of the dog park into a staff parking lot. On the Irvine Animal Care Center portion of the project site, project development would upgrade and renovate the current building and facilities, including 13,000 square feet of minor interior renovations and 3,000 square feet of major interior renovation. The project would also include the construction of 13,000 square feet of new building space. The project would add 66 new parking spaces for the Irvine Animal Care Center (26 employee spaces, 25 visitor spaces, and 15 volunteer spaces) and 459 parking spaces for the Operations Support Facility (122 employee spaces, 10 visitor spaces, and 327 fleet spaces) through resurfacing and restriping. The project would result in a total of 160 net new parking spaces. Figure 4 shows the conceptual site plan.

Aside from City adoption of a Negative Declaration or Mitigated Negative Declaration, based on PlaceWorks' review of the Irvine Zoning Ordinance, it is our understanding that the project as proposed is permitted under the sites' zoning designations and therefore does not include or require any other discretionary actions (i.e., approval of a conditional use permit or master plan).

1.3 SITE DESCRIPTION

The approximately 18.7-acre project site is currently developed with and operates as the Irvine Animal Care Center and the Operations Support Facility. The Irvine Animal Care Center portion of the site (APN 466-01-135) is developed with various buildings and structures, outdoor support spaces, and a surface parking lot. The Operations Facility portion of the site (APNs 466-01-123, -133, -138, and -114) is developed with City's Public Works administrative offices, fleet buildings, operations facilities, surface parking lots, and Irvine Central Bark (a dog park). Overall, the site contains 119 employee and visitor parking spaces and 180 fleet

vehicle spaces. Other site improvements across the entire project site include driveways, walkways, block walls and fences, and landscape improvements.

1.4 DETAILED SCOPE OF SERVICES

The objective of this assessment was to evaluate site history, existing observable conditions, current site use, and current and historic uses of surrounding properties to identify the potential presence of Recognized Environmental Conditions (RECs) in connection with the subject site. RECs are defined by ASTM as

"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. This definition does not include de minimis conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).

In addition, the Standard requires the identification of historical RECs (HRECs) and known or suspect environmental conditions in the report. The standard defines historical RECs as

"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

The Standard also requires the identification of controlled RECs (CRECs). The ASTM Standard defines CRECs as

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Our conclusions are intended to help the user evaluate the "environmental risk" associated with the site, defined by ASTM as "a risk which can have a material environmental or environmentally-driven financial impact on the business associated with the current or planned use of a parcel of commercial real estate. Consideration of environmental risk issues may involve addressing one or more non-scope considerations."

PlaceWorks performed the following detailed scope of services to complete the modified Phase 0 in general accordance with ASTM E 1528-14: The report does not meet the "all appropriate inquiry" standards and

should not be used for property transactions but only to evaluate potential environmental hazards at the project site

- Visual observations of site conditions, and of abutting property use, to evaluate the nature and type of activities that have been or are being conducted at, and adjacent to, the project site, in terms of the potential for release or threat of release of hazardous substances or petroleum products.
- Review of federal, state, and local environmental database information within the subject property using a database service to access records. Use of 7.5-minute topographic maps to evaluate the project site's physical setting.
- Review of federal, state, and local environmental files pertaining to the project site and nearby sites with the potential to impact the project site.
- Review of historical aerial photographs.

Interpretation of information and data assembled as a result of the above work tasks, and formulation of conclusions regarding the potential presence of RECs that may need additional assessment.

1.4.1 Additions, Limitations and Exceptions

Considerations identified as beyond the scope of a modified Phase 0 Site Assessment that may affect business environmental risk as a property include the following: asbestos-containing materials (ACMs), radon, soil/ground water vapors, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, mold, health and safety issues, ecological resources, endangered species, indoor air quality, and high voltage power lines. These environmental issues may warrant assessment based on the type of property or transactions.

This assessment did not include testing of electrical equipment for the presence of polychlorinated biphenyls (PCBs) or the collection of other environmental samples such as water, air, soil, building materials, paint, and radon or methane gas. Interviews with past and present land owners, operators and occupants were not made. This assessment also did not include an extensive assessment for the potential damage from earthquakes, floods, landslides, etc.

Additional issues included in this modified Phase 0 include the following:

- A review of California Geologic Energy Management Division records;
- A review of geological references for the presence of naturally occurring asbestos;
- Prior usage of subject property for agricultural purposes, mining activities, illegal drug manufacturing and disposal, and U.S. Government ownership.

This Report was prepared pursuant to an Agreement between the City of Irvine and PlaceWorks. All uses of this Report are subject to, and deemed acceptance of, the conditions and restrictions contained in the Agreement. The observations and conclusions described in this Report are based solely on the Scope of Services provided pursuant to the Agreement. PlaceWorks has not performed any additional observations, investigations, studies or other testing not specified in the Agreement. PlaceWorks shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Agreement.

This Report is prepared for the exclusive use of the City of Irvine in connection with the Irvine Animal Care Center & Operations Support Facility Expansion/Renovation project. There are no intended beneficiaries other than the City of Irvine. PlaceWorks shall owe no duty whatsoever to any other person or entity on account of the Agreement or the Report. Use of this Report by such other person or entity without the written authorization of the City of Irvine and PlaceWorks shall be at such other person's or entity's sole risk, and shall be without legal exposure or liability to PlaceWorks.

Use of this Report by any person or entity, including by the City of Irvine, for a purpose other than the Irvine Animal Care Center & Operations Support Facility Expansion/Renovation project, is expressly prohibited unless such person or entity obtains written authorization from PlaceWorks indicating that the Report is adequate for such other use. Use of this Report by any person or entity for such other purpose without written authorization by PlaceWorks shall be at such person's or entity's sole risk and shall be without legal exposure or liability to PlaceWorks.

This Report reflects site conditions observed and described by records available to PlaceWorks as of the date of report preparation. The passage of time may result in significant changes in site conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the report. Accordingly, the City of Irvine and any other party to whom the report is provided recognize and agree that PlaceWorks shall bear no liability for deviations from observed conditions or available records after the time of report preparation.

Use of this Report by any person or entity in violation of the restrictions expressed in this Report shall be deemed and accepted by the user as conclusive evidence that such use and the reliance placed on this Report, or any portions thereof, is unreasonable, and that the user accepts full and exclusive responsibility and liability for any losses, damages or other liability which may result.

PlaceWorks has completed this assessment in general conformance with ASTM E 1528-14. Exceptions were made to the ASTM work scope and this report is considered a modified Phase 0 Report. This modified Phase 0 Report does not meet the "all appropriate inquiry" standards and should not be used for property transactions but only to evaluate potential environmental hazards at the project site.

2.1 SITE DESCRIPTION

The project site is currently developed with thirteen structures for various municipal operations. The project site consists of various facilities and maintenance operations along with the Irvine Animal Care Center. Operations include, but are not limited to, fleet maintenance, sign shop, painting shed, household hazardous waste collection, Compressed Natural Gas station, storage, staging for a nursery, dog park, and the animal care center. The Irvine Animal Care Center portion of the site (APN 466-01-135) is developed with various buildings and structures, outdoor support spaces, and a surface parking lot. The Operations Support Facility portion of the site (APNs 466-01-123, -133, -138, and -114) is developed with City's Public Works administrative offices, fleet buildings, operations facilities, surface parking lots, and Irvine Central Bark (a dog park). Overall, the site contains 119 employee and visitor parking spaces and 180 fleet vehicle spaces. Other site improvements across the entire project site include driveways, walkways, block walls and fences, and landscape improvements.

The United States Geological Survey (USGS) topographic map for the project site is the Tustin Quadrangle (2018). The USGS topographic maps were used as the source for site setting information. The project site is located in Orange County at approximately 33.67642° north latitude and 117.76415° west longitude, a portion of Section 6 of Township 6 South, Range 8 West and a portion of Section 1 of Township 6 South, Range 9 West of the San Bernardino Base Line and Meridian.

The project site is approximately 18.7 acres and consists of five parcels, Assessor's Parcel Numbers 466-01-114, -123, -133, -135, and -138. The site is in the central portion of the City of Irvine, approximately 0.2 mile southwest of Interstate 5 (I-5) and 0.5 mile west of State Route 133 (SR-133). The site is generally bounded by the Metrolink railroad and agricultural land to the north, commercial and office development to the east, Oak Canyon Road to the south, and commercial and office development and the Oak Creek Golf Club and Driving Range to the west.

The project site and its immediate vicinity are within the Oak Creek Planning Area (PA12), which is generally bounded by the I-5 freeway to the north, Sand Canyon Avenue to the east, agriculture uses and the San Diego Freeway (I-405) to the south, and Jeffrey Road to the west. The zoning designations of the project site are 6.1 (Institutional) and 5.4B (General Industrial). The General Plan land use designations are Educational Facility and Research/Industrial.

The project site is an area with a typical Mediterranean climate, characterized by warm dry summers and mild winters. The Western Regional Climate Center (2020) collected climatic data at Tustin Irvine Ranch from 1902 to 2003. The mean temperature in the area ranges from a low of 40.2° Fahrenheit (°F) in the winter to a high of 85.2°F in the summer, although extremes of 18°F and 111°F have been recorded. The average annual precipitation is 12.86 inches per year and snowfall is extremely rare in this area.

2.2 GENERAL LAND USE

Historically, the project site was developed for agricultural purposes (orchards and row crops) from at least 1938 to about 1994. Structures first appeared on the site in the 1985 aerial photograph.

2.3 GEOLOGY AND HYDROGEOLOGY OF THE STUDY AREA

Subsurface explorations were not performed for this evaluation; therefore, site geology and hydrology were evaluated on the basis of readily-available public information or references.

2.3.1 Topography

Based on a review of the United States Geological Survey (USGS) 7.5-minute Topographic Series, Tustin, California Quadrangle Map (USGS 2018) and the Geologic Map of the Santa Ana 30' X 60' Quadrangle (Morton 2004), the project site is located on Holocene and late Pleistocene alluvial fan deposits. The project site is located at an elevation of approximately 180 feet above mean sea level (msl) and is surrounded by open space and office commercial land (USGS 2018). Surrounding areas away from the project site have gentle terrain. A site visit was performed by a representative of PlaceWorks (2020) to confirm the general surface conditions described above.

2.3.2 Geologic Information

The project site is located on the southeastern edge of the Tustin Plain within the Peninsular Ranges Geomorphic Province. The Peninsular Ranges Geomorphic Province extends approximately 900 miles southward from the Los Angeles-Pomona-San Bernardino Basins to Baja California, Mexico and is characterized by elongated northwest-trending mountain ranges separated by sediment-floored valleys (Yerkes et al. 1965). The most dominant structural features of the province are the northwest-trending fault zones, most of which die out, merge with, or are terminated by the steep reverse faults at the southern margin of the San Gabriel-San Bernardino Mountains within the Transverse Ranges Geomorphic Province far to the north of the Site. The property itself sits atop Holocene and late Pleistocene alluvial fan deposits (Morton 2004).

2.3.3 Naturally Occurring Asbestos Containing Minerals

Based on a review of A General Location Guide for Ultramafic Rocks in California – Areas More Likely to Contain Naturally Occurring Asbestos (Department of Conservation, Division of Mines and Geology, 2000) and Van Gosen and Clinkenbeard (2011), the project site is not located within a ten-mile radius or downstream from an area thought to contain naturally occurring asbestos (NOA).

2.3.4 Groundwater and Surface Water Information

The nearest surface water body is Agua Chinon Creek is located less than 0.35 mile southeast of the project site (USGS 2018). Based on surface topography, surface water at the project site generally flows west.

The project site is located within the Coastal Plain of Orange County Groundwater Basin (California Department of Water Resources 2004). Regional groundwater flow is generally towards the west. Groundwater flow is expected to follow the ground level slope of surface elevations toward Newport Bay. Hydrogeologic investigations were not performed on the project site for this investigation; therefore, it is unknown to what extent localized variations in groundwater presence and flow occur on the project site.

Water is supplied to the project site from Irvine Ranch Water District (IRWD). IRWD obtains its water mostly from local groundwater. Water is also imported from Northern California and the Colorado River by the Metropolitan Water District of Southern California (MWD). The remainder of their water supply is obtained from reservoirs located in Orange County.

3. Site History

3.1 PAST USAGE OF THE SITE AND ADJOINING PROPERTIES

Past usage of the project site and adjoining properties were assessed through a review of historical aerial photographs. Copies of the historical aerial photographs reviewed are included in Appendix A.

Based on a review of historical aerial photographs, the project site was developed for agricultural purposes (orchard and row crops) from at least 1938 to about 1994. Structures first appeared in the 1985 aerial photograph.

Adjoining properties to the south and west of the project site have been office commercial since at least 2005. A recreational vehicle mall was formerly located northeast of the site, beyond the railroad tracks from at least 1977 to about 2012.

3.1.1 Aerial Photographs

Aerial photographs obtained from EDR for the years 1938, 1946, 1952, 1963, 1967, 1972, 1977, 1985, 1989, 1994, 2005, 2009, 2012, and 2016 were reviewed for the project site and adjoining properties.

- 1938 The northwestern portion of the project site is occupied by an orchard. The southeastern portion of the project site is utilized for row crops. The surrounding land is rural agriculture with a few structures clustered to the east of the project site.
- 1946 The project site and surrounding area appear relatively unchanged in comparison to the 1938 aerial photograph.
- 1952 The project site and surrounding area appear relatively unchanged in comparison to the 1946 aerial photograph.
- 1963 The project site appears relatively unchanged in comparison to the 1952 aerial photograph. Northeast of the project site, the road going past the cluster of structures has expanded.
- 1967 The project site and surrounding area appear relatively unchanged in comparison to the 1963 aerial photograph.
- 1972 The project site and surrounding appears relatively unchanged in comparison to the 1967 aerial photograph.

3. Site History

- 1977 The project site appears relatively unchanged in comparison to the 1972 aerial photograph. A recreational vehicle mall is located northeast of the project site.
- 1985 The project site is now developed with approximately 14 structures, paved areas, and landscaping. There is a parking lot to the west northwest of the project site. There is residential development southwest of the project site. A small portion of the western part of the site is still developed with an orchard.
- 1989 The project site and surrounding appears relatively unchanged in comparison to the 1985 aerial photograph.
- 1994 The project site and surrounding appears relatively unchanged in comparison to the 1989 aerial photograph.
- 2005 No orchards are located on the site. A shade structure is apparent on the western corner of the site. Office buildings are apparent to the east and southwest of the site.
- 2009 Additional office buildings are apparent southwest of the site.
- 2012 The project site appears relatively unchanged in comparison to the 2009 aerial photograph.
- 2016 The project site appears relatively unchanged in comparison to the 2012 aerial photograph. Land to the northeast appears to be vacant.

3.1.2 Prior Agricultural Use

Based on the review of historical aerial photographs, isolated portions of the project site appear to have been used for agricultural purposes from at least 1938 to about 1994. The agricultural uses included an orchard and row crops.

3.1.3 Mines

Based on the review of historical sources (aerial photographs) and the database search report, there is no evidence to indicate that the project site was ever utilized for mining operations.

3.1.4 Prior U.S. Government Ownership

Based on the historical aerial photographs and databases reviewed, the project site does not appear to have been previously owned by the U.S. Government.

4.1 STANDARD ENVIRONMENTAL RECORDS REVIEW

PlaceWorks utilized the electronic database service EDR to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced Agency records, located within the project boundaries (complete listing is contained in Appendix B):

Database Searched	project site Listed?	Number of Facilities Listed on project site
NPL sites	No	0
Delisted NPL sites	No	0
CERCLIS sites	No	0
CERCLIS-NFRAP sites	No	0
Federal ERNS	No	0
RCRA non-CORRACTS TSD Facilities	No	0
RCRA CORRACTS TSD Facilities	No	0
Federal Institutional/Engineering Controls	No	0
State/Tribal Equivalent NPL Sites	No	0
State/Tribal Equivalent CERCLIS Sites	No	0
State/Tribal Registered Storage Tanks	Yes	4
State/Tribal Landfills and Solid Waste Disposal Sites	Yes	1
State/Tribal Leaking Storage Tanks	Yes	1
State/Tribal Institutional/Engineering Controls	No	0
State/Tribal Voluntary Cleanup Sites	No	0
State/Tribal Brownfield Sites	No	0
Orphan Site List	No	0
HAZNET and EMI	Yes	3

A review of selected regulatory agency databases for documented environmental concerns on the site was conducted by EDR in February 12, 2020. A copy of the report is included in Appendix B.

A summary of the more significant listings that are located within the project site identified in the database search is included in the table below. Additional investigation is recommended prior to soil disturbance in areas where chemical storage activities took place on the site.

Listing	Description
Irvine Animal Care Center 6443 Oak Canyon (EDR Map ID 1) CERS	According to the CERS database, the facility is a chemical storage facility and has 8 listings related to violations. CERS is a list of sites in the California Environmental Protection Agency Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Water Collection, Hazardous Waste Generator, and RCRA Large Quantity Generator programs.
Steve J Aguirre Sid S Zaidi 6427 Oak Canyon (EDR Map IDs A2 & A3) PEST LIC	The property is listed twice for active Qualified Applicator Certificate facilities for Landscape Maintenance and once for Right-of-way Pest Control. PEST LIC is a listing of licenses and certificates issued by the Department of Pesticide Regulation. The DPR issues licenses and/or certificates to persons and businesses that apply or sell pesticides; pest control dealers and brokers; and person who advise on agricultural pesticide application.
Clean Energy – 6427 Oak Canyon 6427 Oak Canyon (EDR Map ID A4) FINDS ECHO	The facility is listed as a place that generates, transports, treats, stores, or disposes of hazardous waste. FINDS is the Facility Index System that contains both facility information and pointers to other sources of information that contain more detail. ECHO provides integrated compliance and enforcement information on regulated facilities.
The City of Irvine 6427 Oak Canyon (EDR Map ID A5) HAZNET	The facility has 147 HAZNET listings related to the lawful manifested off-site disposal of hazardous waste. HAZNET data is extracted from the copies of hazardous waste manifests received each year by the DTSC.
City of Irvine Operational Cntr 6427 Oak Canyon (EDR Map ID A6) FINDS	The facility is listed as a place that generates, transports, treats, stores, or disposes of hazardous waste. FINDS is the Facility Index System that contains both facility information and pointers to other sources of information that contain more detail.
Clean Energy – 6427 Oak Canyon St 6427 Oak Canyon STE 2BUS (EDR Map ID A7) FINDS	The facility is listed as a place that generates, transports, treats, stores, or disposes of hazardous waste. FINDS is the Facility Index System that contains both facility information and pointers to other sources of information that contain more detail.

City of Irvine Op. Support Fac. LVT OP. 6427 Oak Canyon (EDR Map ID A8)	The facility has listings in the years 2008, 2010, 2011 and 2012. RGA LF lists EDR Recovered Government Archive Landfill database which provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists.
Orange County Household Haz Mat Center 6411 Oak Canyon (EDR Map ID B9) HAZNET	The facility has over a thousand HAZNET listings related to the lawful manifested off-site disposal of hazardous waste. HAZNET data is extracted from the copies of hazardous waste manifests received each year by the DTSC.
Orange County Household Haz Mat Center 6411 Oak Canyon (EDR Map ID B11) FINDS ECHO	The facility is listed as a place that generates, transports, treats, stores, or disposes of hazardous waste. ECHO provides integrated compliance and enforcement information on regulated facilities.
Irvine HHW 6411 Oak Canyon (EDR Map ID B12) CERS HAZ WASTE CERS	The facility is listed on the CERS HAZ WASTE database for household hazardous waste collection and also as a hazardous waste generator. According to the CERS database, the facility is a chemical storage facility and has 38 listings related to violations and compliance evaluation inspections.
City of Irvine Operation Support Facility A 6427 Oak Cyn (EDR Map ID A13)	The site is listed on the registered UST database. The listing provides two locations: 33.6771155, -117.7635161 and 33.67596, -117.76469.
Clean Energy Corp 6427 Oak Canyon Rd (EDR Map ID A14) HAZNET	The facility has one HAZNET listing related to the lawful manifested off-site disposal of hazardous waste. HAZNET data is extracted from the copies of hazardous waste manifests received each year by the DTSC.
Orange County Household Haz Mat Center 6411 Oak Canyon	The facility was filed as a non-generator, i.e. one that does not generate hazardous waste in a document dated in 1993. No

(EDR Map ID B15)	violations were found.
RCRA NonGen/NLR	
The City of Irvine 6427 Oak Canyon (EDR Map ID A16)	The facility is listed in the ECHO database. ECHO provides integrated compliance and enforcement information on regulated facilities.
ЕСНО	
City of Irvine Operation Support Facility A 6427 Oak Cyn (EDR Map ID A17) CERS HAZ WASTE CERS TANKS CERS	The CERS HAZ WASTE database lists the facility as a Hazardous Waste Generator. The CERS TANKS database lists the facility as having an aboveground petroleum storage tank and an underground storage tank. CERS lists the facility as a chemical storage facility.
City of Irvine Operational Cntr 6427 Oak Canyon (EDR Map ID A18) SWF/LF LUST PEST LIC CERS	The facility is listed on the Solid Waste Information System as a Limited Volume Transfer Operation for inert or mixed municipal wastes. The facility is permitted to process 60 cubic yards of material per day. The facility is listed on the Orange County LUST database for a leaking gasoline UST which was closed in 2000. According to the LUST database, the facility experienced a gasoline release that impacted soil only, and received closure in 2000. The facility had discovered the release during a tank closure in 1997. The facility is listed on the PEST LIC database has having an active Qualified Applicator License for Landscape Maintenance. The CERS database identifies the facility as a leaking underground storage tank cleanup site.
City of Irvine Operational Cntr 6427 Oak Canyon (EDR Map ID A19) RGA LUST	The facility has listings in the years 2005, 2006, 2007, 2008, 2009, 2010, 2011 and 2012. RGA LUST is the EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.
Clean Energy – 6427 Oak Canyon	The facility is listed as a chemical storage facility. Two violations are

Compiled from Records formerly available from the State Water Resources Control Board in California.		

4. Environmental Records Review

4.2 TITLE SEARCH

Chain of ownership reports were not obtained for the project site.

4.3 ADDITIONAL ENVIRONMENTAL RECORDS REVIEW

4.3.1 Proximity to Fuel Transmission Lines

Based on a search of the Underground Service Alert of Southern California records and the National Pipeline Mapping System maps, there are no fuel transmission lines within the project site. However, a petroleum pipeline operated by Kinder Morgan and a transmission natural gas pipeline operated by Southern California Gas Company are located adjacent to the project site within the railroad right-of-way.

4.3.2 State of California Geologic Energy Management Division Records

A review of the California Geologic Energy Management Division records (2020) was conducted. No oil or gas wells were identified within a half mile radius of the project site.

5. Site Reconnaissance

A site visit to observe site conditions was conducted by Danielle Clendening of PlaceWorks on March 6, 2020. PlaceWorks personnel observed the exterior portions of the project site, including the boundaries. No weather-related conditions or other conditions that would limit our ability to observe the site occurred during our site reconnaissance. Site photographs are included in Appendix C.

5.1 SITE VISIT OBSERVATIONS

The project site consists of various facilities and maintenance operations along with the Irvine Animal Care Center. Operations include, but are not limited to, fleet maintenance, sign shop, painting shed, household hazardous waste collection, Compressed Natural Gas station, storage, staging for a nursery, dog park, and the animal care center. There are approximately 13 structures located within the boundaries of the project site. The eight current potential RECs, listed in the Executive Summary and Findings and Conclusions sections, were observed during the site visit and pictures of the potential RECs are included in Appendix C. No violations or improper storage, handling, or usage of equipment and supplies were noted during the site visit. Note that these eight potential RECs are only a concern if soil disturbance was to occur near or adjacent to the potential RECs.

5.2 QUESTIONNAIRE

Questionnaires were filled out by Michael Kelly, Community Services Specialist at the City of Irvine Animal Care Center and Joe Dillman, Fleet Services Superintendent at the City of Irvine Operations Support Facility.

For the Animal Care Center, there are no underground storage tanks, above ground storage tanks, or lifts. The Animal Care Center has chemical storage onsite that is tracked by the California Environmental Reporting System (CERS). There are no known spills on the site since December 2015 (the period of time Mr. Kelly has been working there). The Animal Care Center has been in operation since 1984. Mike Cribbin is the current manager of the Animal Care Center.

The Operations Support Facility has two underground storage tanks, two above ground storage tanks, five vehicle lifts, and three hazardous waste storage containment areas for hydrocarbon-containing waste. The hazardous waste storage containment areas are located towards the north end of the Operations Support Facility for drum storage containing cleaned up hydrocarbons mixed with absorbent, adjacent to Building 4 (Fleet Services building) where used oil is stored prior to pick up for proper disposal, and inside Building 4 for oil that will be used for vehicle maintenance. There are no reported spills on the site.

5. Site Reconnaissance and Key Personnel Interview(s)

6. Findings and Conclusions

This modified Phase 0 Report was performed by adaptation of the scope and limitations of the American Society for Testing and Materials (ASTM) E 1528-14 Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process. The modified Phase 0 Report involved a search of local, state and federal databases for known hazardous or contaminated material sites, a site reconnaissance, a review of historic aerial photographs, and a review of environmental reports in the vicinity. The City of Irvine is planning on expanding and renovating the onsite facilities for both the Operations Support Facility and the Irvine Animal Care Center.

RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The ASTM E 1527-13 Standard defines an REC in part as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Nine potential RECs were identified for the project site. An aboveground petroleum storage tank, an aboveground waste oil tank, three hazardous chemical storage areas, a household hazardous waste collection area, vehicle lifts, and an underground storage tank that is currently in operation at the Operations Support Facility at 6427 Oak Canyon (Figure 5). Additionally, portions of the project site were used for agricultural purposes and there is a potential for residual pesticides in soil to be present. Soil sampling is only recommended in areas where soil disturbance will occur for project implementation.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

The ASTM E 1527-13 Standard defines an HREC as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

One HREC was identified for the project site. A leaking underground storage tank was removed from the Operations Support Facility at 6427 Oak Canyon and received regulatory closure from the Orange County Health Care Agency in 2000.

CONTROLLED RECS ENVIRONMENTAL CONDITIONS

The Standard also requires the identification of controlled RECs (CRECs). The ASTM Standard defines CRECs as

6. Findings and Conclusions

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

This assessment has revealed no evidence of CRECs in connection with the project site following the ASTM standard.

SUMMARY

Based on the results of this modified Phase 0 Report, nine potential RECs, including historic agricultural usage of portions of the site, and one HREC were identified in connection with the project site. This modified Phase 0 Report does not meet the "all appropriate inquiry" standards and should not be used for property transactions but only to evaluate potential environmental hazards at the project site. Areas with RECs should have a Phase II that evaluates thoroughly existing and historic land uses of that individual parcel prior to any land transfer or soil disturbance activities that could potentially expose workers to hazards.

7. Credentials

This report was prepared by Michael Watson and Denise Clendening, who served as the Staff Geologist and Director-in-Charge of this project, respectively. Qualifications and information for project personnel is provided in Appendix D.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EPA Id: CA6170023208				

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 3 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 3 HAZNET sites within approximately 0.001 miles of the target property.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter

6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material

inventory information for all reportable hazardous materials on site

at or above reportable quantities.

Violation Notes: Returned to compliance on 11/29/2018. OBSERVATION: The facility has

not submitted the Hazardous Materials Inventory Chemical Description page for the 55-gallon degreaser. In addition, the facility has not completed the list of 24 Federal Hazard Categories for each chemical reported. Please uncheck the list of 5 "Obsolete" federal hazard categories and check the boxes that apply on the new list of 24 in the Chemical Description Page for each chemical. The federal hazard category can be found in Section 2 of the Safety Data Sheet for each chemical. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for the 55-gallons of degreaser and complete the Federal Hazard Categories for all chemicals electronically in the California Environmental Reporting System (CERS)

within 30 days.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter

6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in

safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training

records for a minimum of three years.

Violation Notes: Returned to compliance on 11/29/2018. OBSERVATION: Annual training

documentation for all applicable employees was not available for review. CORRECTIVE ACTION: Submit documentation (i.e. training sign-in sheet) to this agency demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan. Please provide the documentation within 30 days.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

and treat, store, or dispose of hazardous waste. RCRAInto allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access

additional FINDS: detail in the EDR Site Report.

Eval Date: 10-31-2018

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous materials inspection.

Inspection was conducted with Glenda Garbott, Site Supervisor. Facility is in compliance with the 2018 annual reporting requirement. Facility has disclosed 12 chemicals (11 are HHW wastes and 1 for propane used on site). Information that has been reported appears to be consistent with materials observed on site. Site map was reviewed and appears to be accurate. Facility conducts initial emergency plan training. Required emergency plan elements are also covered in the daily safety meeting. Reviewed employee training documents.

6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to provide the following training to all oil-handling

personnel: 1. Operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations.

5. Contents of the SPCC Plan.

Violation Notes: OBSERVATION: Failure to provide training to all oil-handling personnel

regarding one or more of the following: 1. The operation and

maintenance of equipment to prevent discharges. 2. Discharge procedure

protocols. 3. Applicable pollution control laws, rules, and

regulations. 4. General facility operations. AND 5. The contents of the SPCC Plan. CORRECTIVE ACTION: Provide training in: 1. The operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. AND 5. The contents of the SPCC Plan. Keep employee training records for a

minimum of three years.

Violation Date: 05-14-2019

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23,

Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection

at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 06/17/2019. OBSERVATION: Owner/Operator

failed to meet one or more of the requirements applicable to overfill prevention equipment. 1) The flapper used to monitor overfill in the diesel fill sump would not activate and needs replacement. 2) The flapper in the unleaded gasoline fill sump was not tested by 10/13/18. That flapper was tested during the inspection. CORRECTIVE ACTION: Repair/replace the flapper in the diesel fill sump and provide test

results to this Agency within 30 days.

Reviewed hazardous waste disposal receipts/manifests for prior three years. Please correct your identification number data by informing the state of your correct zip code. To maintain your identification number you must respond to the state's annual verification questionnaire. Further information may be obtained on the web: www.dtsc.ca.gov Verified a copy of the uniform hazardous waste manifest is mailed to the state within 30 days of hazardous waste disposal. Verified all

universal wastes [Truncated]

Fleet Service Superintendent. Verified that drained used oil filters were closed and labeled with the start accumulation date. Facility was unable to locate hazardous waste manifests from the last 3 years due to personnel changes. Mr. Smith and Mr. Drew will continue to try and obtain the records. Please notify this Agency with the results by 6/1/2018. The following violations have been corrected: I400 - Generator properly labeled all containers or tanks containing hazardous waste as required. I617 - All containers of hazardous waste

were closed except when adding or removing waste. The following violation is still outstanding: I474 - Owner/operator maintained a signed copy of manifests from the designated facility for 3 years.

Eval Notes: Orange County Environmental Health as the Certified Unified Program

Agency (OC CUPA) administers the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by

the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent letters to regulated businesses requesting they electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is a violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic

submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California

Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still

accurate. Failure to electronically submit [Truncated]

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

23, Chapter 16, Section(s) 2716(a) through (e)

Violation Description: For designated operator (DO) monthly inspections conducted before

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded

to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct

days.

Violation Notes: Returned to compliance on 05/24/2019. March DO report missing DO

signature. Please ensure all future DO reports are signed by the DO.

Eval General Type: Compliance Evaluation Inspection

05-14-2014 Eval Date:

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: rur completed corrected address: "6470 OAK CANYON IRVINE, CA 92618"

> Mechanical inspection with David Johnson, of the underground tank system & records. Verified the facility has two continuously VPH double walled liquid filled fiberglass tank systems and sumps with double walled fiberglass piping which are continuously monitored by constant vacuum. The pressurized piping has no leak detector and supply back up generators. The system is monitored by a VeederRoot TLS monitor unit located in the guardhouse next to the loading dock. The system has both high level alarms and flapper valves for overfill prevention. Spill buckets were hydrostatically tested. Violations noted last year were addressed on 6 21 2013 but were erroneously rejected. Forms have been updated and are onsite available for review.

Facility has been notified to electronically submit Business Activities, Owner/Operator Identification, UST facility and tank

information pages, monitoring plan, [Truncated]

Eval General Type: Compliance Evaluation Inspection

Eval Date: 05-10-2017

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: An on-site inspection was conducted this date to witness the annual

monitoring system certification. Ken Withee (Sunwest) conducted the monitoring system certification and provided current Veeder-Root and ICC certifications. This facility contains: 2 - USTs 3 - Transition Sumps Monitor system is a Veeder-Root monitor panel and reads all functions normal. Tank system is VPH and STPs are located on tank-tops. Overfill protection provided by fill-tube shut-off valve (flapper) and audible/visual alarms. Sensors were observed positioned so as to initiate alarms at the earliest point possible. Sensors were re-positioned in a true vertical position upon installation after testing. Alarm history and setup tape reviewed while on site. The following were tested: - Sensors, initiated alarm when tested in water - Overfill protection (ATGs set at 90% capacity) for an external audible and visual alarm - Spill buckets using a visual hydrostatic

test - Line test [Truncated]

Violation Date: 12-05-2017

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and

portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical

characteristics of the Hazardous Waste, and starting accumulation

date.

Violation Notes: Returned to compliance on 12/05/2017. Observed one 120 gallon cube of

each used oil and waste antifreeze to be missing the hazardous characteristic (toxic). Labels were completed during inspection.

Observed one used oil caddy, spoke with Jose Padilla, who stated caddy is drained once a month. Caddy is a hazardous waste container and must

be labeled with required elements. Label was provided during inspection, filled in with required information and placed on

container. Violation was abated on site.

Eval Notes: On-site for an Aboveground Petroleum Storage Tank (APST) inspection

with Ben Alford. All APST facilities must amend or prepare and implement a Spill Control and Countermeasure Plan (SPCC) All facilities with SPCC's must implement the SPCC by providing training for onsite personnel and conduct periodic inspections and maintenance to verify the APST is intact. Facility stores onsite between 1,320 and 9,999 gallons of regulated petroleum products in 55-gallon drums or tanks and must comply with the Aboveground Petroleum Storage Act (APSA) Discussed OCHCAG s APST inspection program and the need to develop and implement a Spill Control and Countermeasure (SPCC) Plan

per the California Health & Safety Code and the Code of Federal Regulations. Facilities that are a qualified Tier I facility (less than 10,000 gallons and no single container greater than 5,000 gallons) can create their own SPCC Plan using the federal template.

Facilities that are a qualified Tier II [Truncated]

Comments: Database Validation Program confirms NFA for DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 02/08/1991

Comments: The PA Report was reviewed by Region 4 staff. The Internat- ional

Raceway leased 114 acres from the Irvine Co. from 1966 to 1983. Since

1983, property has been regraded and develop ed into

commercial/industrial businesses & a nursery. Alth- ough up to 75 vehicles per month were maintained on the site no heavy duty engine cleaning was necessary because the eng- ines were always being torn

down and rebuilt. Staff recomm- ends NFA by DTSC.

CERS Description: Industrial Facility Storm Water

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 07-16-2001

Violations Found: No

Eval Type: Industrial Storm Water Compliance Evaluation

Eval Notes: On July 16, 2001, under clear breezy conditions, Regional Board staff

conducted a routine inspection of the above referenced facility. Staff met with the faciliy's Senior Facilities Tecnician Trevor Johnson. The facility SWPPP presented during this inspection was dated July 1992. Mr. Johnson stated that a more recently updated version of the plan was kept at the offices in the City of Orange. Upon review of the 1992 plan, it was found to be adequate but very antiquated. During the course of the facility site walk the 2000 updated version of the plan was made available for review. Up to date information, as well as, recent training records were kept in this most recent version of the plan. The facility site walk revealed many BMPs illustrated in the plan were being implemented, while additional attention was need in regards to others. The latter included: drums stored in areas exposed to potential rainfall that had oil residues covering the tops, vehicle engine and transmission parts that had lubricants on them or that had dripped onto exposed areas of concrete, batteries stored in areas exposed to potential rainfall and outfalls that had been clogged with debris. These areas have been equipped with automatic storm water samplers. Mr. Johnson was reminded that the samples collected from these locations would show a representation of the conditions of the entire site. Therefore it would be in his best interest that the

sample location would be AT LEAST as clean as the rest of the yard.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection

Eval Date: 03-28-2003 Violations Found: No

Eval Type: Industrial Storm Water Compliance Evaluation

Eval Notes: On March 28, 2003 under clear, warm, and gusty (Santa Ana wind)

conditions, Regional Board Staff conducted a routine compliance inspection of the above referenced facility. Staff met with Tom Espinoza, the facility's Section Supervisor over Facilities

Maintenance. The facility's SWPPP was made available for on site review by staff. The plan was originally prepared in 1992 and has gone through a series of updates. However, the plan did not have a current list of response personnel and other facility contacts. The SWPPP was

MAP FINDINGS Map ID

Direction Distance

EDR ID Number Elevation Site Database(s) **EPA ID Number**

OCTA IRVINE (Continued)

S101609583

last certified on 7/16/01 by Harold Elingston, who Mr. Espinoza said, has not been with the company for over a year. Since that time, the facility has added an enclosed bus wash structure surrounded by trench drains, plumbed to a clarifier. The SWPPP did not include this as a BMP. Observation records last dated 1998 were contained in the SWPPP binder. Mr. Espinoza stated that the most recent forms are kept at the corporate offices. Staff told Mr. Espinoza that these records are required to be kept on site and available for review by agency staff in the event of an inspection. The site itself was well maintained and had ample BMPs for most of its operations. However, storage of batteries, drums filled with waste oils and various vehicle parts

storage areas could have been better maintained. BMPs were in need of

additional oversight in order to have them maximize their effectiveness.

Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7,

Section(s) 25284, 25286

Violation Description: Failure to submit a complete and accurate application for a permit to

operate a UST, or for renewal of the permit.

Violation Notes: OBSERVATION: Tank pages submitted to CERS requires corrections.

CORRECTIVE ACTION: Please review regulator comments on CERS, make

corrections and resubmit tank pages within 30 days.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

D-1484 TC5968932.2s Page GR-2

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property
Data Coverage

TUSTIN YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
A1	1/4 - 1/2 Mile ENE	S
A2	1/4 - 1/2 Mile ENE	WSW
A4	1/4 - 1/2 Mile ENE	W
1G	1/4 - 1/2 Mile ENE	W
2G	1/4 - 1/2 Mile ENE	WSW
3G	1/4 - 1/2 Mile ENE	S

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SORRENTO

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Bou	ındary		Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity	
1	0 inches	11 inches	clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Воц	ındary	ndary Classification		fication	Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity	Soil Reaction (pH)
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

DENISE CLENDENING, PhD

Associate Principal, Site Assessment Services

Denise has over 27 years of experience providing technical oversight and performing human health risk assessments, site assessments, and investigations of chemical waste at multiple sites including Resource Conservation & Recovery Act (RCRA) and Superfund sites. She is adept at applying alternatives that are economical yet protective of human health and the environment. She conducts realistic assessments and calculates target cleanup levels based on site-specific exposure scenarios. Her work has involved pesticides, heavy metals, solvents, and petroleum-contaminated soils. She assists multiple school districts in California with site assessment, public relations, and the Department of Toxic Substance Control (DTSC) school site approval process. She participates in public hearings and school board meetings and coordinates her projects with the CEQA process.

Before joining PlaceWorks, Denise managed large divestiture environmental due diligence projects for the electric power industry and was involved in numerous environmental projects for oil field operation. Her experience also includes the development and testing of risk assessment software and teaching training courses in risk assessment using different software programs.

Denise has established a very good reputation with regulatory agencies and negotiates risk-related issues on behalf of her clients. She is a member of the Los Angeles Regional Water Quality Control Board Underground Storage Tank Advisory Board and has extensive experience with site closure activities with the DTSC, Environmental Protection Agency, Regional Water Quality Control Boards, and local oversight agencies throughout California.

HIGHLIGHTS OF EXPERIENCE

ENVIRONMENTAL & HEALTH RISK ASSESSMENTS

- » Xerox Corporation Preliminary Environmental Assessment and Health Risk Assessment | Santa Ana CA
- » Human Health Risk Evaluation, Literature Research for American Petroleum Institute
- » City of Redlands Health Risk Assessment | Redlands CA
- » Caltrans Risk Assessment and Groundwater Impact Analysis | California
- » Risk Assessments and Indoor Air Sampling for Confidential Client(s) | Various Locations
- » Human Health & Ecological Risk Assessment Technical Review | Various Locations
- » Landfill Risk Assessments | Various Locations
- » Risk Assessments for Pesticide Contaminated Soil | Various Locations
- » Human Health Risk Assessment for Confidential Mineral Resources Client | Arizona
- » Human Health Risk Assessment at Whites Point Nike Missile Site | Los Angeles County CA
- » Human Health Risk Assessment at Fort MacArthur | Los Angeles County CA

DENISE CLENDENING Associate Principal

dclendening@placeworks.com

MICHAEL WATSON, PG

Associate Geologist

With over a decade in the environmental consulting industry, Mike is proficient in providing field and office support to project managers performing site assessment and remediation. He performs site assessments, geohazard studies, air quality and industrial hygiene assessments, groundwater investigations, and remedial actions. Mike also manages materials acquisition, field equipment maintenance, and subcontractor coordination on large field investigations and monitoring programs.

A dedicated geologist, Mike continually strives to refine his knowledge, methods, and efficacy. He is especially committed to his current work for numerous school districts throughout California, where he assists in site assessment services and the Department of Toxic Substances Control's school site approval process. He performs Phase I ESAs, PEAs, geohazard studies, supplemental site investigations, remedial investigation reports, removal action documents, feasibility study reports, Title 5 Constraints Studies, and fill testing reports. In addition, he assists with the management and implementation of field investigations, assembles project data, and arranges methodical and comprehensive procedures to attain the client's goals.

HIGHLIGHTS OF EXPERIENCE

SITE ASSESSMENTS
