### Updated Transportation Analysis for the 3216 W 8th St Mixed-Use Project

1 message

Wes Pringle <wes.pringle@lacity.org> To: Griselda Gonzalez < Griselda Gonzalez@lacity.org> Cc: Jonathan Chambers <JChambers@gibsontrans.com> Wed, Oct 11, 2023 at 3:41 PM

Hi Griselda,

On May 5, 2023, the Los Angeles Department of Transportation (LADOT) issued a revised transportation assessment report to the Department of City Planning for the proposed mixed-use development project located at 3216 West 8th Street based on the transportation analysis prepared by Gibson Transportation Consulting, dated April 11, 2023. However, since the report was released, the project description has been modified and an addendum transportation analysis dated September 11, 2023 was prepared by Gibson Transportation Consulting.

The current project includes 60 hotel rooms, 20 residential units (including four affordable units) and 3,600 squarefeet of restaurant space. DOT concurs with the transportation analysis that the changes to the project will not create any new significant impacts and no adverse circulation, access, and safety issues. All of the project requirements identified in DOT's May 5, 2022 letter shall remain in effect.

From: Wes Pringle, Transportation Engineer

Department of Transportation

Subject: TRANSPORTATION ASSESSMENT FOR THE PROPOSED MIXED-USE PROJECT LOCATED

AT 3216 WEST 8<sup>TH</sup> STREET (CPC-2018-1511-ZC-ZV-ZAA-BL-CU-CUB-SPR)

On November 12, 2021, the Los Angeles Department of Transportation (LADOT) issued a transportation assessment report to the Department of City Planning (**Attachment 1**) for the proposed mixed-use project located at 3216 West 8<sup>th</sup> Street based on the transportation analysis prepared by Gibson Transportation Consulting (Gibson), dated October 28, 2021. However, since the report was released, the project description has been modified, the Transportation Assessment Guidelines (TAG) were updated in August 2022, and an addendum transportation analysis dated April 11, 2023 was prepared by Gibson.

The current project proposal compares to the previous revised project as follows:

|                        | Previous Revised Project (2021) | Current Project (2023)          |
|------------------------|---------------------------------|---------------------------------|
| Land Use               |                                 |                                 |
| Hotel                  | 95 rooms                        | 60 rooms                        |
| Residential            | None                            | 20 units including 4 affordable |
| Commercial Space       | 4,716 square feet (sf)          | 3,000 sf                        |
| (Restaurant)           |                                 |                                 |
| <b>Completion Year</b> | 2022                            | 2023                            |

The April 11, 2023 addendum updated the project's the site plan (**Attachment 2**) and CEQA (California Environmental Quality Act) assessment including the VMT (Vehicle Miles Traveled) analysis (**Attachment 3**). Like the previous project, the current project includes the Transportation Demand Management (TDM) strategy of including bike parking per LAMC (Los Angeles Municipal Code) as a project design feature. LADOT concurs with the results of the updated assessment based on the latest TAG dated August 2022 that the current project's expected impacts would be less than significant. All of the project requirements that are identified in LADOT's November 12, 2021 letter (**Attachment 1**) shall remain in effect

If you have any questions, please contact Segal Ismael of my staff at (213) 972-4986.

FORM GEN. 160A (Rev. 1/82)

# CITY OF LOS ANGELES INTER-DEPARTMENTAL CORRESPONDENCE

3216 W 8<sup>th</sup> St

DOT Case No. CEN20-52481

Date: November 12, 2021

To: Susan Jimenez, Administrative Clerk

Department of City Planning

From: Wes Pringle, Transportation Engineer

Department of Transportation

Subject: UPDATED TRANSPORTATION IMPACT VMT ANALYSIS FOR THE PROPOSED HOTEL AND

**COMMERCIAL PROJECT LOCATED AT 3216 WEST 8TH STREET** 

On December 28, 2017, the Department of Transportation (DOT) issued a traffic assessment report to the Department of City Planning for the proposed mixed-use project located at 3216 West 8<sup>th</sup> Street. The proposed project was subject to a transportation analysis, prepared by Gibson Transportation Consulting, dated July 2017 and updated version dated October 2017, in which the study included the detailed analysis of ten intersections and determined that under the previous traffic impact criteria there would be no significant traffic impacts. However, subsequent to the releasing of the report, pursuant to the Senate Bill (SB 743) and the recent changes to the Section 15064.3 of the State's California Environmental Quality Act (CEQA) Guidelines, the City of Los Angeles adopted vehicle miles traveled (VMT) as the criteria by which to determine transportation impacts under CEQA. Therefore, in response to this action and a change in the project description, the applicant submitted a VMT analysis for the proposed project on October 28, 2021. Therefore, please replace the previous December 28, 2017 DOT assessment, in its entirety, with this report.

-----

DOT has reviewed the transportation analysis prepared by Gibson Transportation Consulting, dated October 28, 2021, for a proposed hotel and commercial project located at 3216 West 8<sup>th</sup> Street. In compliance with SB 743 and CEQA, a VMT analysis is required to identify the project's ability to promote the reductions of green-house gas emissions, access to diverse land uses, and the development of multimodal networks. The significance of a project's impact, in this regard, is measured against the VMT thresholds established in DOT's Transportation Assessment Guidelines (TAG), as described below.

#### **DISCUSSION AND FINDINGS**

### A. Project Description

The project site is currently occupied by a surface parking lot and four unit apartment, which will be replaced by the project. The project proposes to construct a new hotel with 95 rooms and 4,716 square feet of ground-floor commercial space (assumed to be restaurant). Vehicular access will be provided via full-access driveways on Mariposa Avenue and 8th Street; the driveway on Mariposa Avenue will provide direct access to parking, and the 8th Street driveway will provide access to the valet pick-up and drop-off area. A secondary ramp from the valet area to the

subterranean parking would be for valet operators only. The updated analysis did not indicate if there were to be any changes to the number of vehicle or bike parking spaces. The project is expected to be completed by 2022.

### B. CEQA Screening Threshold

Prior to accounting for trip reductions resulting from the application of Transportation Demand Management (TDM) Strategies, a trip generation analysis was conducted to determine if the project would exceed the net 250 daily vehicle trips screening threshold. Using the City of Los Angeles VMT Calculator tool, which draws upon trip rate estimates published in the Institute of Transportation Engineers' (ITE's) Trip Generation, 9<sup>th</sup> Edition manual as well as applying trip generation adjustments when applicable, based on sociodemographic data and the built environment factors of the project's surroundings, it was determined that the project does exceed the net 250 daily vehicle trips threshold.

Additionally, the analysis included further discussion of the transportation impact thresholds:

- T-1 Conflicting with plans, programs, ordinances, or policies
- T-2.1 Causing substantial vehicle miles traveled
- T-3 Substantially increasing hazards due to a geometric design feature or incompatible use.

The assessment determined that the project would not have a significant transportation impact under Thresholds T-1 and T-3. A project's impact per Threshold T-2.1 is determined by using the VMT calculator and is discussed further below.

### C. <u>Transportation Impacts</u>

On July 30, 2019, pursuant to Senate Bill (SB) 743 and the recent changes to Section 15064.3 of the State's California Environmental Quality Act (CEQA) Guidelines, the City of Los Angeles adopted vehicle miles traveled (VMT) as a criteria in determining transportation impacts under CEQA. The new DOT Transportation Assessment Guidelines (TAG) provide instructions on preparing transportation assessments for land use proposals and defines the significant impact thresholds.

The DOT VMT Calculator tool measures project impact in terms of Household VMT per Capita, and Work VMT per Employee. DOT identified distinct thresholds for significant VMT impacts for each of the seven Area Planning Commission (APC) areas in the City. For the Central APC area, in which the project is located, the following thresholds have been established:

Household VMT per Capita: 6.0Work VMT per Employee: 7.6

As cited in the VMT Analysis report prepared by Gibson Transportation Consulting, the VMT projections for the proposed project is no Household VMT per capita and Work VMT of 8.1 after the application of providing bike parking per LAMC as a project design feature. Including the mitigation measure, the Work VMT per capita is reduced to 7.6. Therefore, it is concluded that VMT impact of the Project would be mitigated to have a less than significant Work VMT impact. A copy of the VMT Calculator summary reports is provided as **Attachment A** to this report.

#### D. Safety, Access, and Circulation

During the preparation of the new CEQA guidelines, the State's Office of Planning and Research stressed that lead agencies can continue to apply traditional operational analysis requirements to inform land use decisions provided that such analyses were outside of the CEQA process. The authority for requiring non-CEQA transportation analysis and requiring improvements to address potential circulation deficiencies, lies in the City of Los Angeles' Site Plan Review authority as established in Section 16.05 of the Los Angeles Municipal Code (LAMC), Section 16.05. Therefore, DOT continues to require and review a project's site access, circulation, and operational plan to determine if any safety and access enhancements, transit amenities, intersection improvements, traffic signal upgrades, neighborhood traffic calming, or other improvements are needed. In accordance with this authority, the project has completed a circulation analysis using a "level of service" screening methodology that indicates that the trips generated by the proposed development will likely result in adverse circulation conditions at one location. DOT has reviewed this analysis and determined that it adequately discloses operational concerns. A copy of the circulation analysis table that summarizes these potential deficiencies are provided as Attachment B to this report.

#### **PROJECT REQUIREMENTS**

#### A. <u>CEQA-Related Requirements</u>

Per the transportation analysis, the applicant will implement the following TDM strategies as mitigation measures:

1. Voluntary Travel Behavior Change Program – This strategy involves active outreach to employees regarding available alternative transportation modes (public transit, walking, bicycling, ridesharing, etc.). It also may provide mechanisms for employees to report or track their travel modes and incentives for participation to boost engagement. At least 70% of employees will be included in this TDM strategy with the details of the program subject to approval by LADOT prior to the issuance of a Certificate of Occupancy for the project.

#### B. Additional Requirements and Considerations

To comply with the transportation and mobility goals and provisions of adopted City plans and ordinances, the applicant should be required to implement the improvements listed below.

#### 1. Parking Requirements

The updated analysis did not indicate if there are any changes to the number of vehicle parking spaces being provided. The number of bicycle parking was also not disclosed, however, the project has committed to providing bike parking per LAMC as a project design feature. The applicant should check with the Department of Building and Safety on the number of Coderequired parking spaces needed for the project.

#### 2. Highway Dedication and Street Improvements

Per the Mobility Element of the General Plan, **West 8th Street** is designated as an Avenue II, which would require a 28-foot half-width roadway and a 43-foot half-width right-of-way. **South Mariposa Avenue** is designated as a Local Street Standard, which would require an 18-foot half-width roadway and a 30-foot half-width right of way. The applicant should check with BOE's Land Development Group to determine if there are any other applicable highway dedication,

street widening and/or sidewalk requirements for this project.

#### 3. Project Access and Circulation

The proposed site plan illustrated in Attachment C is acceptable to DOT; however, review of the study does not constitute approval of the driveway locations, dimensions, access, and circulation scheme, and loading/unloading area for the project. Any changes to the project's site access, circulation scheme, or loading/unloading area after issuance of this report would require separate review and approval and should be coordinated with DOT's Citywide Planning Coordination Section at 201 N. Figueroa Street, 5th Floor, Room 550, at (213) 482-7024. The applicant should contact DOT for driveway width and internal circulation requirements prior to the commencement of building or parking layout design efforts so that such traffic flow considerations are designed and incorporated early into the building and parking layout plans. If any project driveway will be signalized, the applicant should contact DOT's Permit Plan Review Section ladot.planprocessing@lacity.org for review of the traffic signal plan. All new driveways should be Case 2 driveways and 30 feet for two-way operations and any security gates should be a minimum 30 feet from the property line. Should the project include a supermarket, DOT recommends that a dock manager and/or flag person be employed to assist delivery truck access to the loading area. DOT may recommend additional requirements once a complete review of the loading operations is conducted.

### 4. Worksite Traffic Control Requirements

DOT recommends that a construction work site traffic control plan be submitted to DOT's Citywide Temporary Traffic Control Section or Permit Plan Review Section for review and approval prior to the start of any construction work. Refer to <a href="http://ladot.lacity.org/what-we-do/plan-review">http://ladot.lacity.org/what-we-do/plan-review</a> to determine which section to coordinate review of the work site traffic control plan. The plan should show the location of any roadway or sidewalk closures, traffic detours, haul routes, hours of operation, protective devices, warning signs and access to abutting properties. DOT also recommends that all construction related traffic be restricted to off-peak hours to the extent feasible.

#### 5. Development Review Fees

Section 19.15 of the Los Angeles Municipal Code identifies specific fees for traffic study review, condition clearance, and permit issuance. The applicant shall comply with any applicable fees per this ordinance.

If you have any questions, please contact me at (213) 972-8482.

### Notes:

Future without Project Conditions are unchanged from the Future without Project Conditions (Year 2022) analyzed in the TIS.

Future with Revised Project Conditions apply the Revised Project trip generation estimates to the same distribution pattern as used in the TIS.

The V/C ratio and LOS for each intersection were calculated using LADOT's Critical Movement Analysis spreadsheet.
