Attached please find our PHASE I ENVIRONMENTAL SITE ASSESSMENT, ("the Report") for the above-mentioned Subject Property. This report has been prepared by ENCON for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither ENCON, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, and has no personal bias with respect to the parties involved.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by ENCON.

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. ENCON is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

By signing below, ENCON declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. ENCON has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,

Hyung Kim

Environmental Professional as defined per §312.10

EXECUTIVE SUMMARY

ENCON Solutions, Inc. (hereinafter referred to as ENCON) performed a *Phase I Environmental Site Assessment* (hereinafter *ESA* or *Report*) of the subject property (hereinafter referred to as the Property) in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to or deletions from this practice are described in the individual sections of this Report. A summary of findings is provided below:

REPORT COMPONENT	SUMMARY OF FINDINGS
Property Description	<p>The Property address is 3216 West 8th St., Los Angeles, CA 90005. The Property is located on the southeastern corner of the intersection of S. Mariposa Ave. and West 8th St. in the City of Los Angeles.</p> <p>The Property is an asphalt paved parking lot improved with a small storage building and enclosed by fencing with a gate for access. The Property is identified as two adjacent parcels of land, with 135 feet on frontage on West 8th Street and depth of approximately 90 feet on Mariposa Avenue.</p>
Summary of Property Reconnaissance	<p>The Property is an asphalt paved parking lot. There are no hazardous materials used or stored at the Property.</p> <p>There was no evidence of sumps, clarifiers, underground storage tanks, or other feature of environmental concern at the property.</p>
Historical Use of the Property and Vicinity	<p>The 1921 Sanborn map shows the Property as vacant land. The 1950, 1954, and 1955 Sanborn maps show the Property as improved with an irregular-shaped office building and a small automobile garage. A strip of retail shops is located adjacent to the east of the Property in 1950. The surrounding area is a mixture of commercial and residential development. The 1961, 1968, and 1970 Sanborn maps show the Property as improved with a medical office building, similar in layout to the earlier maps with a parking area north of the building. The Ambassador Hotel Grounds are adjacent to the north, north of West 8th Street.</p> <p>The alternate address 3222 West 8th Street is listed in 1958 for Oscar De La Cruz. The 800 Mariposa Avenue address is listed as residential in the 1950s. The 810 Mariposa Avenue address is listed for the Mariposa Lodge in 1951. The 1966 to 1995 directory listings for this address appeared to identify various residential names except for 1976 and 1981 when Lee Chung Herbs is identified.</p>
Federal, State and Local Agency Records Search	The Property address is not listed on any regulatory agency databases searched for this project.
Potential Off-site Concerns	No off-site environmental concerns were identified in the immediate area of the Property.
Non-Scope Items	Unless the <i>Client</i> contracted ENCON to investigate specific Non-Scope or Non-CERCLA items, evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.5 of this Report, is neither required nor relevant for compliance with the AAI Rule or E1527-13.
Inaccessible or Un-surveyed Portions of the Property	Full access to the Property was provided to ENCON.
Data Gap	No significant data gaps were identified during the course of this assessment.

REPORT COMPONENT	SUMMARY OF FINDINGS
Conclusion	<p>REC identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No HREC identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No CREC identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Significant data gap identified: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>For detailed discussion of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), and/or Controlled Recognized Environmental Conditions (CRECs) in connection with the Property, see Section 7.0 of this Report.</p>
Recommendations and Opinions	Refer to Section 8.0 for ENCON's professional opinions and recommendations.

1.0 INTRODUCTION

ENCON Solutions, Inc. (ENCON) performed a *Phase I Environmental Site Assessment Report* (hereinafter "*ESA or Report*") of the Property in conformance with the scope and limitations of the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM Designation E1527-13.

This *Report* documents the methods and findings of the Phase I Environmental Site Assessment ("*ESA*") performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the Property.

This *Report* has been prepared by ENCON for the *Client* under the professional supervision of the principal and/or senior staff whose seal(s) and signature(s) appear hereon. Neither ENCON, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

PURPOSE AND OBJECTIVE

The purpose of this practice is to define good commercial and customary practice for conducting an *environmental site assessment* of a parcel(s) of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *User (Client, Purchaser, Lender, Owner)* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *Property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

Another purpose of this *ESA* is to assist the *Client*, in its underwriting of a proposed mortgage loan on the Property, if this *Report* is prepared as a part of a pre-financing environmental due diligence, and to identify *Recognized Environmental Conditions (RECs)* in connection with the Property described in this *Report*.

The ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to *release to the environment*; (2) under conditions indicative of a *release to the environment*; or (3) under conditions that pose a *material threat* of a future *release to the environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *Recognized Environmental Conditions* or *Controlled Recognized Environmental Conditions*. *De minimis conditions* are not *Recognized Environmental Conditions*.

Controlled Recognized Environmental Condition (CREC) is a *Recognized Environmental Condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of

required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

A *Historical Recognized Environmental Condition (HREC)* is a past release of any *hazardous substances or petroleum products* that has occurred in connection with the *Property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *Property* to any required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

Referenced Documents for ASTM Standard Practice E1527-13:

- *Resource Conservation and Recovery Act (also referred to as the Solid Waste Disposal Act), as amended ("RCRA"), 42*
- *U.S.C §6901 et seq.*
- *"All Appropriate Inquiries" Final Rule, 40 C.F.R. Part 312 Chapter 1 EPA, Subchapter J-Superfund, Emergency*
- *Planning, and Community Right-To-Know Programs, 40 C.F.R Parts 300-399 National Oil and Hazardous Substances Pollution Contingency Plan, 40 C.F.R. Part 300*
- *OSHA Hazard Communication Regulation, 29 C.F.R. §1910.1200*

SCOPE OF WORK

This *Report* was prepared for the exclusive use of the *Client or User of this Report*. The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard Practice E1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the *Property* contact and interviews with owners, agents, occupants, or other appropriate persons involved with the *Property*. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the *Property*. Findings, conclusions and recommendations included in the *Report* are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the *Client (or User)*, and/or a review of readily available and supplied documents.

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard Practice E 1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of standard historical sources; 4) a review of standard regulatory agency records; and 5) a review of a regulatory database report provided by a third-party company such as Environmental Data Resources (EDR).

LIMITATIONS AND EXCEPTIONS

ENCON renders no opinion as to the *Property* condition at un-surveyed and/or inaccessible portions of the *Property*, which are described below. ENCON relies completely on the information, whether written, graphic or verbal, provided by the *Property* contact or as shown on any documents reviewed or received

from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Where access to portions of the Property or to structures on the Property was unavailable or limited, ENCON renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Property or structure. In addition, ENCON renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The conclusions provided by ENCON are based on the information obtained by visual survey of the Property, and information provided by agents representing the Property, or agents of the owner. In addition, ENCON has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ENCON at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ENCON did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these *Environmental Services*.

CERCLA Requirements Other Than *All Appropriate Inquiry* (ASTM Standard Practice E1527-13 1.1.3) - This practice does not address whether requirements in addition to *All Appropriate Inquiries* have been met in order to qualify for the LLPs (specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of *Activity and Use Limitations*), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

It is acknowledged that ENCON's judgments shall not be based on scientific or technical tests or procedures beyond the Scope of Services or beyond the time and budgetary constraints imposed by the *Client*. It is acknowledged further that ENCON's conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. The *Client* also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the conclusions and opinion of this Report are not guaranteed to be a representation of actual conditions on the Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation.

In performing the Services, ENCON shall use that the degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized or in effect at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

It should be noted that certain conditions may not have been reasonably identifiable or ascertainable from the available information during the course of this Report. ENCON assumes that information obtained from the record review and the interviews concerning the Property is reliable. However, ENCON cannot and does not warrant or guarantee that the information provided by these other sources is accurate or correct.

Some of the information provided in this *Report* is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of the pertinent records, and the personal recollections of those persons contacted. This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Furthermore, this report does not intend to address all of the health and safety concerns, if any, associated with the Property.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other

consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by ENCON.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this *Report* may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report. Additional information that becomes available after our survey and report submission concerning the Property should be provided to ENCON so that our conclusions may be revised and modified if necessary, at additional cost.

Controlled substances are not included within the scope of this standard. Persons conducting an *environmental site assessment* as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of *business environmental risk* associated with a parcel of *commercial real estate* may necessitate investigation beyond those identified in this practice.

SIGNIFICANT ASSUMPTIONS AND LIMITING CONDITIONS

The objective of ASTM Standard Practice E1527 is to help *Users* qualify for one of the CERCLA Landowner Liability Protections (LLPs). *Users* should be aware that there are other federal, state, and local environmental laws and regulations that can impose liabilities and obligations on owners and operators of real property that are outside the scope of this practice. This practice does not address all possible environmental liabilities that a *User* may need to consider in the context of a commercial real estate transaction. Therefore, *Users* may desire to expand the scope of pre-purchase or pre-finance due diligence to assess other business environmental risks that exist beyond CERCLA liability associated with the Property.

Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, and is not an issue required to be investigated under this practice. A BER may include one or more of the non-scope issues contained in Non-Scope Considerations. Evaluation of Non-Scope or Non-CERCLA items, including those addressed in this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment Report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I report.

Any additional services contracted for between the *User* and ENCON Solutions, Inc. including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of ASTM Standard Practice E1527-13, not part of this Report, and should only be included in the Report if so specified in the terms of engagement between the *User* and ENCON. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13).

The ASTM Standard Practice E1527-13 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I

ESA. Such additional information regarding non-ASTM Standard Practice E1527-13 issues may be provided merely for the *User's* convenience, and cannot be used to bind this report as a whole to the compliance and conformance with ASTM Standard Practice E1527-13. No disassembly of systems or building components or physical or invasive testing is to be performed unless the *Client* specifically calls for such testing as an additional scope of work.

ENCON has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Standard Practice E1527-13. This *Report* may not include all environmental conditions which can materially impact the Property other than those defined as RECs in ASTM Standard Practice E1527-13.

ENCON is not contracted to perform *Environmental Liens* and *Activity and Use Limitations (AULs)* searches via title records, and such is beyond the scope of services included in this report. Information pertaining to deed restrictions and environmental liens, Activity/Use Limitations, title search/report was requested from the *Report User*. This information may or may not be provided to ENCON at the time of the assessment. See pertinent Sections of this *Report* for further discussion.

Interviews with past or current owners, operators and occupants may not be reasonably ascertainable and can constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 4.0), this data gap may or may not be expected to alter the findings of this assessment. See Section 7.0 and 8.0 for further discussion.

Adjoining sites, neighboring sites or surrounding properties mentioned in this *Report* are defined only up to one parcel immediately next to the Property, and ENCON will only check immediately adjoining properties to identify historical use of the surrounding areas via historical sources or data on such adjoining properties, and/or walk-through visual inspection along the Property's perimeters to identify obvious signs of environmental concerns.

It is often not possible (under the "*reasonably ascertainable*" clause of the ASTM Standard Practice E1527-13) to identify every single historical business tenant or occupant of the Property. ENCON cannot be liable for not identifying all such past tenants or occupants of the project site.

This *Phase I Environmental Site Assessment* did not necessarily comply with the ASTM Standard Practice E2600-10 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-13 is required.

For the purposes of ASTM Standard Practice E1527-13, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600; however, nothing in this practice (E1527-13) should be construed to require application of the Guide E2600-10 standard to achieve compliance with all appropriate inquiries.

USER RELIANCE

This investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client* and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the *Client*. Neither this report, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the *Client*.

All reports, both verbal and written, are for the sole use and benefit of the *Client*. Either verbally or in writing, third parties may come into possession of this Report or all or part of the information generated as a result of this work. In the absence of a written agreement with ENCON granting such rights, no third

parties shall have rights of recourse or recovery whatsoever under any course of action against ENCON, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold ENCON, the *Client* and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

INDEPENDENT CONTRACTOR STATUS / PROFESSIONAL RESPONSIBILITY

In performing Services under the mutually agreed contractual agreement and verbal engagement, ENCON operates as, and has the status of, an independent contractor. Subject to any limitations established by the *Client* as to the degree of care and amount of time and expenses to be incurred and any other limitations contained in the mutually agreed contractual agreement and verbal engagement, ENCON performs the Services consistent with the level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. *Client* hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to *Client* or Property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and verbal engagement.

QUALIFICATION STATEMENT OF ENVIRONMENTAL PROFESSIONAL

ENCON states that this *Phase I Environmental Site Assessment* was performed under *Environmental Professional (EP)*'s direct supervision, that he/she has prepared and/or reviewed and approved the report, and that the methods and procedures utilized in the development of this report conform to minimum industry standards using both the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, Standard Practice E1527-13 and the United States – Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as guidelines. ENCON certifies that ENCON's *Environmental Professionals* and *Subcontractors* are properly licensed, qualified and/or certified to conduct *Phase I Environmental Site Assessments*.

ENCON's EP declares that, to the best of his/her professional knowledge and belief, he/she meets the definition of *Environmental Professional* as defined in 40 CFR Part 312. ENCON's EP who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the Property. ENCON has developed and performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

2.0 PROPERTY DESCRIPTION

2.1 PROJECT INFORMATION

Project Information	
ITEM	
Project Number	1701051-ESAI
Property Address(es)	3216 West 8 th Street, Los Angeles, CA 90005
Historical/Alternate Property Address(es)	3218, 3220, 3222 W. 8 th St. and 800 & 810 S. Mariposa Ave.
Tax Assessor's Parcel Number	5094-017-009 5094-017-008
Property Name	None identified
Property Inspection Date	June 9, 2017
Weather Condition	70 degrees Fahrenheit, sunny
Site Visit Conducted by	John Koo, Environmental Assessor
Report Author	John Koo, Environmental Consultant Mary Osborne, Senior Environmental Consultant
QA/QC Environmental Professional	Hyung Kim, Principal Consultant
Property Location	The Property is located at the southeastern corner of S. Mariposa Ave. and West 8 th St. in the city of Los Angeles, Los Angeles County.
General Setting	Commercial/retail
Property Type	Parking lot

2.2 PROPERTY IMPROVEMENTS

Property Improvements & Building / Land Description	
ITEM	
Property Description	The Property is an asphalt paved parking lot improved with a small storage building and enclosed by fencing with a gate for access. The Property is identified as two adjacent parcels of land, with 135 feet on frontage on West 8 th Street and depth of approximately 90 feet on Mariposa Avenue.
	Data Source(s) for Parcel Size: Los Angeles County Assessor
	Data Source(s) for Building Size(s): Los Angeles County Assessor
Estimated Year of Construction	Not applicable Data Source(s): aerial photographs
Improvement Description	No buildings are present other than a small storage shed.
Other Improvements & Features (including description of unimproved areas)	The Property is gated and there is a storage shed located near the southeastern corner of the lot.

2.3 PROPERTY OCCUPANTS & USE

Property Occupants & Use	
ITEM	
Present Occupant(s) and Detailed Description of Business Operation(s)	Asphalt paved parking lot – no structures are present

2.4 MUNICIPAL SERVICES & UTILITIES

Municipal Services & Utilities	
ITEM	
Potable Water Supply	N/A
Source for Heating (such fuel oil)	N/A
Electrical	N/A
Sewage Disposal System	N/A
Solid Waste Disposal	Private entity
Any Septic System, Cesspool, Seepage Pits	N/A
Private Water Well	None
Heating/Cooling System	Rooftop-mounted HVAC Systems

2.5 PHYSICAL SETTING

TOPOGRAPHY

The Property's physical location was researched employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the Property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and may show physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. The elevation of the Property is approximately 228 feet above mean sea level, and there is a regional downslope to the west/southwest.

GEOLOGY AND HYDROGEOLOGY

Hydrogeologic information was determined from review of GeoTracker data for nearby Leaking Underground Storage Tank (LUST) cases. A former gasoline station is located at 703 S. Vermont Avenue, approximately 1,900 feet northeast of the Property.

The Property is located in the Coastal Plain of the Los Angeles Basin. Based on information obtained from the GeoTracker database, the expected depth to shallow groundwater is greater than 20 feet below ground surface (bgs).

Source: http://geotracker.waterboards.ca.gov/esi/uploads/geo_report/7464128017/T0603700470.PDF

While groundwater flow direction at the Property cannot be confirmed without survey measurement of static groundwater level at triangulated points, it is expected to flow in the direction of surface topographical contour, or toward the wetland or nearest water body or discharge basin (percolation channel).

It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 PROPERTY RECONNAISSANCE

3.1 LIMITING CONDITIONS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property.

No disassembly of systems or building components or physical or invasive testing was performed. ENCON renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property. ENCON relies completely on the information, whether written, graphic or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Note: Typically lenders have environmental policies where due diligence reports are valid for one year from the report date. However, such policies and standards can vary from each lender or *User*. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM Standard Practice E1527-13.

3.2 PROPERTY RECONNAISSANCE

ENCON conducted interior and exterior observations of the Property with the intent to identify *releases* or *material threat* of future *releases* of *hazardous substances* or *petroleum products* to the *environment*. The site reconnaissance table below lists items *visually* and/or *physically* observed.

Property Reconnaissance	
ITEM	
Processes involving Petroleum Products or Hazardous Substances	None observed
Underground Storage Tanks (USTs)	None observed
Aboveground Storage Tanks (ASTs)	None observed
Fuel Islands / Dispensers, or any type of fueling system/operation	None observed
Containers or Drums of Hazardous Materials and/or Petroleum Products related to the Property's operations/processes	None observed
Unidentified Substance Containers: Other containers of suspect hazardous materials in drums, barrels, or other storage, or unlabeled/unidentified containers on site	None observed
Stained or Corroded Surfaces / Stained Soil (paved or unpaved)	None observed
Unusual areas of asphalt/cement patch or surface depressions including any possible boring locations	None observed
Stockpiled soils, fill materials, or soil piles	None observed
Stressed vegetation	None observed
Any type of heavy equipment or machinery of environmental concern	None observed
Electrical or hydraulic equipment or machinery of environmental concern	None observed
Drains for machinery/equipment cleaning or flushing	None observed
Evidence of onsite surface water impoundment, pits, dry wells or sensitive surface water features such as lagoons, ponds, and other water bodies	None observed

Property Reconnaissance	
ITEM	
Drains, sumps, wastewater treatment units, oil/water separators, clarifiers, catch basins, drip pads, or sumps	None observed
Any regulated surface-water discharges, illegal dumping, unauthorized surface runoff or discharge to potentially impact water bodies	None observed
Storm water or surface-water drainage system having any abnormal accumulation of petroleum or chemical run-off or foreign materials, any unusual blockage of the storm-water control systems	None observed
Pools of liquid such as standing surface water, pools or sumps containing liquids likely to be hazardous substances or petroleum products	None observed
Odors (strong, pungent, or noxious odors and their sources)	None observed
Septic systems, cesspools, seepage pits	None observed
Wells (private water wells, irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, vapor recovery wells or other-monitoring wells)	None observed
Railroad tracks or spurs	None observed
Visual evidence of improper handling/disposal of solid wastes	None observed

3.3 DETAILED DESCRIPTION OF SITE RECONNAISSANCE AND ENVIRONMENTAL CONDITIONS

The Property is an asphalt paved parking lot. There are no hazardous materials used or stored at the Property.

There was no evidence of sumps, clarifiers, underground storage tanks, or other feature of environmental concern at the property.

3.4 CURRENT USES OF ADJACENT PROPERTIES

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the Property. An adjoining property is defined as any real property or properties in which the border is contiguous or partially contiguous with that of the Property, or that would be contiguous or partially contiguous with that of the Property but for a street, road, or other public thoroughfare separating them.

Adjacent Properties	
ITEM	
North	764 S. Mariposa Ave., Lavanderia across W. 8 th St.
South	812 S. Mariposa Ave., residential
West	3242 W. 8 th St., commercial building across S. Mariposa Ave.
East	3206 W. 8 th St., East-West Hotel and 807 Fedora St., residential
Northwest	757 S. Mariposa Ave., parking lot across the S. Mariposa Ave. and W. 8 th St. intersection
Northeast	3201 W. 8 th St., Robert F. Kennedy school across W. 8 th St.
Southwest	811 S. Mariposa Ave., residential across S. Mariposa Ave.
Southeast	811 Fedora St., residential

3.5 NON-SCOPE (NON-ASTM) CONSIDERATIONS

Evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.4 of this Report, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment Report ("Report") is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I report.

Any additional services contracted for between the *User* and ENCON Solutions, Inc. including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of Standard Practice E1527-13, not part of this Report, and should only be included in the Report if so specified in the terms of engagement between the *User* and ENCON. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13). No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive.

There may be environmental issues or conditions at a *Property* that parties may wish to assess in connection with *commercial real estate* that are outside the scope of this practice (the non-scope considerations). As noted by the legal analysis in Appendix X1 of ASTM Standard Practice E1527-13, some substances may be present on the *Property* in quantities and under conditions that may lead to contamination of the *property* or of nearby properties but are not included in CERCLA's definition of *hazardous substances* (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice.

Whether or not a *User* elects to inquire into non-scope considerations in connection with this practice or any other *environmental site assessment*, no assessment of such non-scope considerations is required for appropriate inquiry as defined by this practice.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Suspect asbestos-containing building materials (ACBM) in damaged condition if the structure is built prior to 1978	Since an asbestos survey is not included in the current scope of services for Phase I ESA, ENCON did not test suspect asbestos-containing building materials (ACBM) at the Property. Other than a concrete block storage building, no buildings are present at the Property.
Suspect lead-based paint (LBP) in damaged condition if the structure is residential and was built prior to 1978	Since a lead-based paint survey is not included in the current scope of services for Phase I ESA, ENCON did not test suspect lead-based paint (LBP) at the Property.
Lead in drinking water (LIW)	<p>Since a lead in drinking water survey is not included in the current scope of services for Phase I Environmental Site Assessment, ENCON did not test drinking water at the Property for lead content.</p> <p>The major source of LIW is leaching of lead from household plumbing materials or water service lines used to bring water from the main to the building. Lead can leach into drinking water through contact with the plumbing, solder, fixtures and faucets (brass), and fittings. The amount of lead in drinking water will be influenced by the type and amount of minerals in the water, how long the water stays in the pipes, the amount of wear in the pipes, the water's acidity and its temperature.</p>
Radon	Radon sampling and testing was not requested by the <i>User/Client</i> as part of this Phase I ESA.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Urea Formaldehyde	The sale and installation of Urea Formaldehyde Foam Insulation (UFFI) as thermal insulation began in approximately 1970, and continued until December 1980 when it was banned under the federal <i>Hazardous Products Act</i> . UFFI was installed in both new and existing buildings during this period. UFFI was not commonly used in industrial or commercial buildings. A UFFI survey was not included in the current scope of services for this Phase I ESA.
Suspect PCB-oil concern with hydraulic equipment, ballasts, transformers, etc.	A PCB survey was not included in the current scope of services for this Phase I ESA.
Wetlands, creeks, swale, pits, ponds, lagoons, or any other water bodies	<p>A wetland is defined as areas inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands provide a number of economically and environmentally important functions such as flood control, water quality protection, groundwater recharge, spawning areas for commercially important fish, and wildlife habitat.</p> <p>Wetlands are evaluated using three indicators: hydrology, hydrophytic vegetation, and hydric soils. Section 404 of the Clean Water Act requires a permit before dredged or fill material may be discharged into regulated wetlands (known as Jurisdictional Wetlands). The Army Corps of Engineers has primary responsibility for making wetlands jurisdictional determinations and issuing wetlands permits. A number of activities are authorized through the use of nationwide permits.</p> <p>A wetland study or survey is not included in the current scope of services for this Phase I ESA. However, based on a review of the EDR Radius Report, the site is not within a mapped National Wetland Inventory location.</p>
Visual evidence of mold problems from wet areas, roof leaks, moisture around air conditioning or plumbing units	A microbial matter survey or sampling/analysis is not included in the scope of work for this Phase I ESA.
Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment (unusual smells, noxious odors, or visual emissions, air emission stacks), excluding impacts to indoor air from releases of hazardous substances into the environment	<p>Not applicable. There are no buildings other than a small storage building.</p> <p>An indoor air quality test or evaluation is not included in the scope of work for this Phase I ESA.</p>

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Flood Zone	<p>The Federal Emergency Management Agency Flood Insurance Rate Map is typically used to determine if the Property is located within a flood zone. Such evaluation is not included in the scope of work for this Phase I ESA.</p> <p>However, based on a review of a flood zone map provided in an EDR Radius Map Report, the Property is not located within a 100-year or 500-year flood zone.</p>
Methane Gas	<p>In response to concern regarding the potential for methane accumulation beneath buildings, and potential methane intrusion into buildings, some cities or regulatory oversight agencies have established methane zones and/or methane buffer zones based on the proximity to oil wells, landfills, or naturally occurring methane deposits.</p> <p>A methane risk assessment is not included in the scope of work for this Phase I ESA.</p>
Other non-scope considerations discussed in Appendix X1 and Appendix X5 of ASTM Standard Practice E1527-13	<p>No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive. These items are not included in the current scope of services for Phase I ESA.</p> <p><i>Endangered Species Act</i>—Under the Endangered Species Act (ESA), the government protects endangered and threatened plants and animals (listed species) and their habitats. The presence of listed species can restrict use of the Property to ensure that the proposed activities do not adversely affect endangered or threatened species as well as their critical habitats. This includes <i>Biological agents, Cultural and historical resources, and Ecological resources</i>.</p> <p><i>Compliance with AULs</i>—Parties who wish to qualify for one of the LLPs will need to know whether they are in compliance with AULs, including land use restrictions that were relied upon in connection with a response action. A determination of compliance with AULs is beyond the scope of ASTM Standard Practice E1527-13.</p> <p><i>Regulatory Compliance (Includes Health and Safety and Industrial Hygiene)</i>—Properties used for industrial, commercial and even residential purposes are frequently subject to a panoply of environmental laws and regulations that relate to many aspects of operations conducted at the Property. In the context of a property transaction, noncompliance with environmental laws and regulations may create a material risk of financial loss for both building operators and owners of the properties.</p> <p><i>Potential Effects of Noncompliance</i>—Depending on the circumstances, noncompliance with various regulatory requirements could result in material costs to owners and operators of industrial, commercial or residential properties, including fines or other monetary penalties, injunctions or other equitable relief that slows or eliminates productivity, and could result in increased transaction</p>

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
	costs associated with defending claims of noncompliance. Furthermore, even in the absence of administrative or legal enforcement proceedings, the costs to bring facilities into compliance with applicable regulatory requirements could be material in some circumstances.

4.0 PROPERTY AND VICINITY HISTORY

The objective of consulting historical sources is to develop a history of the previous uses of the Property and surrounding area, in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) in connection with the Property. ENCON exercises professional judgment and consider the possible *releases* that might have occurred at a Property in light of the historical uses and, in concert with other relevant information gathered as part of the Phase I process, use this information to assist in identifying RECs, CRECs, and/or HRECs in connection with the Property.

Historical Records Search was conducted for the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

4.1 PREVIOUS ENVIRONMENTAL REPORTS

ENCON was not provided with or made aware of any previous environmental reports for the Property.

4.2 SANBORN MAP COMPANY FIRE INSURANCE MAPS

Sanborn Map Company maps were created for insurance underwriters from 1867 to present, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. In 1996, the entire Sanborn Map Company collection was acquired by Environmental Data Resources, Inc. (EDR). ENCON subcontracted with EDR to provide copies of Sanborn Map Company maps, if available, for the Property and vicinity.

EDR responded that Sanborn Map Company fire insurance maps were available for the Property, with the following information determined from our review:

The 1921 Sanborn map shows the Property as vacant land. The 1950, 1954, and 1955 Sanborn maps show the Property as improved with an irregular-shaped office building and a small automobile garage. The surrounding area is a mixture of commercial and residential development. A strip of retail shops is located adjacent to the east of the Property in 1950. By 1961, 1968, and 1970 Sanborn maps show the Property as improved with a medical office building, similar in layout to the earlier maps with a parking area north of the building. The Ambassador Hotel Grounds are adjacent to the north, north of West 8th Street.

4.3 HISTORICAL AERIAL PHOTOGRAPHS

ENCON reviewed aerial photographs provided in the EDR Aerial Photo Decade Package and Google Earth. A summary of observations is provided below:

Aerial photographs from 1948 and 1952 indicate a building is present but use is not apparent. The surrounding area appears mostly residential. The 1954 to 1980 aerial photographs show the Property as similar in layout to the 1961 Sanborn fire insurance map. An irregular shaped building is located on the south portion of the Property. The 1989 to 2012 aerial photographs show the Property as a parking lot, similar to the current layout.

4.4 LOCAL STREET DIRECTORIES / HISTORICAL CITY DIRECTORIES

ENCON reviewed the Historical City Directories provided by EDR for the years 1926-2014. See Appendix D for full directory listings. A summary of listings is provided below:

Subject Property – 3216 and 3218 West 8 th Street	
YEAR	LISTING
1920 to 2014	Address is not listed

The alternate address 3222 West 8th Street is listed in 1958 for Oscar De La Cruz. The 800 Mariposa Avenue address is listed as residential in the 1950s. The 810 Mariposa Avenue address is listed for the Mariposa Lodge in 1951. The 1966 to 1995 directory listings for this address appeared to identify various residential names except for 1976 and 1981 when Lee Chung Herbs is identified.

4.5 CITY/COUNTY BUILDING DEPARTMENT, ZONING/LAND USE, PROPERTY TAX RECORDS, PROFILES

Building Department records were researched for this project with the following information identified:

A 1954 permit identified a conversion of an existing 2-story building from a hotel to doctor's offices on the ground floor. Dr. William Brown is identified on the Certificate of Occupancy issued June 21, 1954. A one-story garage is also located on the Property. The hotel building is described as a 14-room structure. A permit is issued in 1972 for repair of earthquake damage to a 2-story office building (810 S. Mariposa Avenue). The Property is a parking lot in 1977 with a Certificate of Occupancy issued to Chung Lee Yoon in June 1977.

The Los Angeles County Assessor identified the Property as follows:

5094-017-009: Previously improved with a 5000-square foot structure (Lot 48)
5094-017-008: Previously improved with an 8,000-square-foot structure on a commercial/industrial parcel (TRACT # 2140 N 10 FT EX OF ST OF LOT 46 AND EX OF ST LOT 47)

Source:

http://maps.assessor.lacounty.gov/GVH_2_2/Index.html?configBase=http://maps.assessor.lacounty.gov/Geocortex/Essentials/REST/sites/PAIS/viewers/PAIS_hv/virtualdirectory/Resources/Config/Default

4.6 HISTORICAL TOPOGRAPHIC MAPS

ENCON reviewed the most recently photo-revised USGS Topographic Map for the Property to determine if any feature(s) of environmental concern were identified. No features of environmental concern were identified.

Source: Nationwide Environmental Title Research, LLC's database www.historicaerials.com

4.7 OIL & GAS MAPS

ENCON reviewed California Department of Conservation, Division of Oil, Gas & Geothermal Resources (DOGGR) maps for the Property and immediate vicinity via the DOGGR Online Mapping System (DOMS), but found no active or abandoned oil and/or gas wells on the Property or in the immediate vicinity. The closest well appears approximately 1,000 feet northeast of the Property, west of South

Catalina Street, identified as the Ambassador Core Hole, a plugged production well operated by Chevron USA, Inc.

Source: <http://maps.conservation.ca.gov/doms/doms-app.html>

4.8 OTHER HISTORICAL RECORDS

This category includes, but is not limited to: miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current *owners* or *occupants* of neighboring properties, or records in the files and/or personal knowledge of the *Property owner* and/or *occupants*.

ENCON obtained no additional Property information from available internet sources.

5.0 STANDARD ENVIRONMENTAL RECORDS SEARCH

5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were provided by governmental record search database suppliers, such as Environmental Data Resources (EDR). For definitions of database acronyms, review the database report in Appendix C and/or refer to ASTM Standard Practice E1527-13 Section 3.3 and 8.2.

Database sources maintained by local offices were obtained via records requests. Databases were searched for properties with reported environmental listings within radii specified by ASTM Standard Practice E1527-13, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is included as an appendix to this Report. The database report may identify certain "orphan sites" which are those facilities that could not be mapped or geocoded due to inadequate address information.

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. These sites are usually not identified in the Radius Map Report. ENCON cannot be held liable for not correctly locating these orphan sites to determine their impact to the Property.

The ASTM Standard Practice E1527-13 Sections 3.3 and 8.2 uses terminology such as Leaking Storage Tank and Registered Storage Tank to refer to both Leaking Underground/Aboveground Storage Tanks and Underground/Aboveground Storage Tanks. For the purposes of this assessment, ENCON has used state-specific terminology to refer to Leaking Storage Tanks and/or other Registered Storage Tanks as generally defined by the state in which the Property is located.

5.2 PROPERTY LISTING(S)

FEDERAL AGENCY LISTINGS		STATE AGENCY LISTINGS	
DATABASE	PROPERTY LISTED	DATABASE	PROPERTY LISTED
NPL	No	State/Tribal Equivalent NPL	No
De-listed NPL	No	State/Tribal Equivalent CERCLIS	No
CERCLIS	No	State/Tribal SWF/LF	No
CERCLIS-NFRAP	No	State/Tribal Voluntary Cleanup Sites	No
RCRA-CORRACTS	No	State/Tribal Brownfield Sites	No
RCRA-TSDF	No	State/Tribal Leaking Storage Tank	No
RCRA-Generator	No	State/Tribal SLIC	No
ERNS	No	State/Tribal Registered Storage Tank	No
Federal IC/EC Registries	No	State/Tribal IC/EC Registries	No
Other Federal List	No	Other State List	No

The Property is not identified on any regulatory agency databases searched for this project.

LOCAL ENVIRONMENTAL AGENCY LISTINGS	
AGENCY	RECORDS ON FILE FOR THE PROPERTY
State Environmental Agency(ies) with Local/Regional Offices	
California State Water Resources Control Board (SWRCB) – Geotracker database	No
CA Department of Toxic Substances Control (DTSC) – ENVIROSTOR database	No
DTSC – Hazardous Waste Tracking System database	No
County/City Environmental Agency(ies)	
Los Angeles City Fire Department	Agency Response Pending
Air Quality Management District	
South Coast Air Quality Management District (SCAQMD)	No
See below for a discussion of agency records, if any, for the Property.	

5.3 SURROUNDING SITES: FEDERAL AGENCY LISTINGS

FEDERAL AGENCY LISTING(S)		
DATABASE	MINIMUM SEARCH DISTANCE (MILES)	PROPERTIES IDENTIFIED WITHIN SEARCH DISTANCE
NPL	1.0	0
De-listed NPL	0.5	0
CERCLIS	0.5	0
CERCLIS-NFRAP	0.5	1
RCRA-CORRACTS	1.0	0
RCRA-TSDF	0.5	0
RCRA-Generator	Adjoining Sites	1

CERCLIS-NFRAP (SEMS Archived):

The Berendo Shopping Center is located approximately 2,500 feet northeast of the Property on Sixth Street and reported as archived from CERCLIS in 2000. This site is not identified as an environmental concern for the Property.

RCRA-Generator

There is one nearby RCRA-LQG at 3201 West 8th Street where the Ambassador Global Education facility is mapped. The waste generating operations commenced in 2011. This nearby RCRA site is not assessed as an environmental concern for the Property.

5.4 SURROUNDING SITES: STATE AGENCY LISTINGS

STATE ENVIRONMENTAL AGENCY LISTING(S)		
DATABASE	MINIMUM SEARCH DISTANCE (MILES)	PROPERTIES IDENTIFIED WITHIN SEARCH DISTANCE
State/Tribal Equivalent NPL	1.0	0
State/Tribal Equivalent CERCLIS	0.5	17
State/Tribal SWF/LF	0.5	1
State/Tribal Leaking Storage Tank	0.5	16
State/Tribal Registered Storage Tank	Adjoining Sites	0
State/Tribal IC/EC Registries	Adjoining Sites	0
State/Tribal Voluntary Cleanup Sites	0.5	0
State/Tribal Brownfield Sites	0.5	0
State/Tribal SLIC (CA only)	0.5	2
Other State List	Adjoining Sites	1

State/Tribal Equivalent CERCLIS

Of the 17 sites identified on the EnviroStor database, only one is located within a ¼ mile radius of the Property. The Hobart Wilton Primary School is located approximately 1,000 feet south of the Property and not assessed as an environmental concern to the Property.

State/Tribal LST (Leaking Storage Tank) – LUST (Leaking Underground Storage Tank) and SLIC:

Of the 16 sites identified, only one LUST site is located within a ¼ mile radius of the Property.

LISTING	ADDRESS	DISTANCE
Century Industries	761 S. Normandie Avenue	0 – 1/8 NW

The above site is a closed LUST case as of 1995, located approximately 500 feet northwest of the Property. Based on distance and reported status, this LUST site is not assessed as an environmental concern for the Property.

The remaining LUST cases are not identified as environmental concerns based on reported horizontal distances from the Property. The two SLIC cases identified are both located more than ¼ mile from the Property and not assessed as environmental concerns for the Property.

EDR Historical Cleaners

One nearby site is identified as D.E. Blackwell at 3204 W. 8th Street, listed in 1929 and 1933 for a clothes presser and cleaners. This address is not otherwise listed on any agency databases.

6.0 USER PROVIDED INFORMATION

6.1 USER PROVIDED INFORMATION

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property.

The purpose of this section is to describe tasks to be performed by the *User*. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for an *landowner liability protections (LLP)* to CERCLA liability. While such information is not required to be provided to the *environmental professional*, the *environmental professional* shall request that the *User* provide the results of these tasks as such information can assist the *environmental professional* in identifying Recognized Environmental Conditions.

Per ASTM Standard Practice E1527-13, the “*User*” is defined as follows:

User—the party seeking to use Practice E 1527-13 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *User* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

USER/CUSTOMER QUESTIONNAIRE	
QUESTION	USER/CUSTOMER TO ANSWER
<p>(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</p> <p>Are you aware of any environmental cleanup liens against the <i>Property</i> that are filed or recorded under federal, tribal, state or local law?</p>	<p>The <i>User</i> has not informed ENCON of any knowledge of cleanup liens filed or recorded against the <i>Property</i>.</p> <p>An environmental cleanup lien/AUL search is not required from ENCON as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this Report; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the <i>Property</i> were identified.</p> <p>Source: http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</p>

<p>(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).</p> <p><i>Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</i></p> <p>Are you aware of any AULs, such as <i>engineering controls</i>, land use restrictions or <i>institutional controls</i> that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?</p>	<p>The <i>User</i> has not informed ENCON of any knowledge of activity or land use limitations associated with the Property.</p> <p>An environmental cleanup lien/AUL search is not required from ENCON as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this Report; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the Property were identified.</p> <p>Source: http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</p>
<p>(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</p> <p>As the <i>User</i> of this <i>ESA</i> do you have any specialized knowledge or experience related to the <i>Property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>Property</i> or an adjoining <i>property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	<p>The <i>User</i> has not informed ENCON of any specialized knowledge or experience related to the Property or nearby properties.</p>
<p>(4.) Relationship of the purchase price to the fair market value of the <i>Property</i> if it were not contaminated (40 CFR 312.29).</p> <p>Does the purchase price being paid for this <i>Property</i> reasonably reflect the fair market value of the <i>Property</i>? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ENCON of any information pertaining to the purchase price with respect to the fair market value of the Property.</p>
<p>(5.) Commonly known or <i>reasonably ascertainable</i> information about the <i>Property</i> (40 CFR 312.30).</p> <p>Are you aware of commonly known or <i>reasonably ascertainable</i> information about the <i>Property</i> that would help the <i>Environmental Professional (EP)</i> to identify conditions indicative of releases or threatened releases? For example, as <i>User</i>,</p> <p>(a.) Do you know the past uses of the <i>Property</i>?</p> <p>(b.) Do you know of specific chemicals that are present or once were present at the <i>Property</i>?</p> <p>(c.) Do you know of spills or other chemical releases that have taken place at the <i>Property</i>?</p> <p>(d.) Do you know of any environmental cleanups that have taken place at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ENCON of any commonly known or reasonably ascertainable information about the Property that would identify conditions indicative of releases or threatened releases, other than as described in Section 6.3 (Interviews), if applicable.</p>

<p>(6.) The degree of obviousness of the presence of likely presence of contamination at the <i>Property</i>, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the <i>User</i> of this <i>ESA</i>, based on your knowledge and experience related to the <i>Property</i> are there any <i>obvious</i> indicators that point to the presence or likely presence of contamination at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ENCON of any obvious indicators that point to the presence or likely presence of contamination at the <i>Property</i>, other than as described in Section 6.3 (Interviews), if applicable.</p>

6.2 PRELIMINARY TITLE REPORT OR LAND TITLE RECORDS

No Preliminary Title Reports, recorded Land Title Records or Historical Chain of Title were reviewed for this assessment. ENCON's scope of investigation as well as contractual agreement between ENCON and the *Client* does not include obtaining and reviewing a Preliminary Title Reports, recorded Land Title Records or Historical Chain of Title.

6.3 INTERVIEWS

Interview with Others (e.g. Occupants of Nearby Properties)			
		INTERVIEW DETAILS	
Name	Mr. Sean Yoon		
Business Title	Owner's representative		
Name of Firm	N/A		
Contact Information	213-381-0091		
Property Purchase Date	N/A		
Purpose of Environmental Assessment	Property Sale	Refinance	Other
			x
Summary	Mr. Sean Yoon, the owner's representative was interviewed over the phone. Mr. Yoon stated that the site is a parking lot and has been for quite some time. He also mentioned that the site will be redeveloped into a hotel/condominium in the future.		
Interview with Others (e.g. Occupants of Nearby Properties)			
		INTERVIEW DETAILS	
Name	Jennifer		
Business Title	Employee		
Address	764 S. Mariposa Ave.		
Name of Business	Lavanderia		
Contact Information	N/A		
Duration of Occupancy / Employment	Less than a year		
Summary	Jennifer, an employee at the Property to the north was interviewed at the time of site visit. She stated that the site has been the same as long as she has been there and was not aware of any environmental concerns associated with the Property.		
Interview with Others (e.g. Occupants of Nearby Properties)			
		INTERVIEW DETAILS	
Name	Mr. Kim		
Business Title	Employee		

Address	3424 W. 8 th St.
Name of Business	Office
Contact Information	N/A
Duration of Occupancy / Employment	2 years
Summary	Mr. Kim, an employee at one of the units located to the west of the Property, was interviewed at the time of visit. Mr. Kim was not aware of any environmental concerns associated with the Property and stated that the site has been the same as long as he has been there.

7.0 CONCLUSIONS

ENCON Solutions, Inc. (ENCON) performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. The ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *Property*: (1) due to *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not Recognized Environmental Conditions.

A *Historical Recognized Environmental Condition (HREC)* is a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *Property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *Property* to any required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

A *Controlled Recognized Environmental Condition (CREC)* is a *Recognized Environmental Condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

Conclusions and Findings

ENCON performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 of the Property. This environmental assessment has revealed the following in connection with the Property:

REC identified:	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
HREC identified	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
CREC identified:	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Significant data gap identified:	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No

8.0 RECOMMENDATIONS AND OPINIONS

ENCON performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

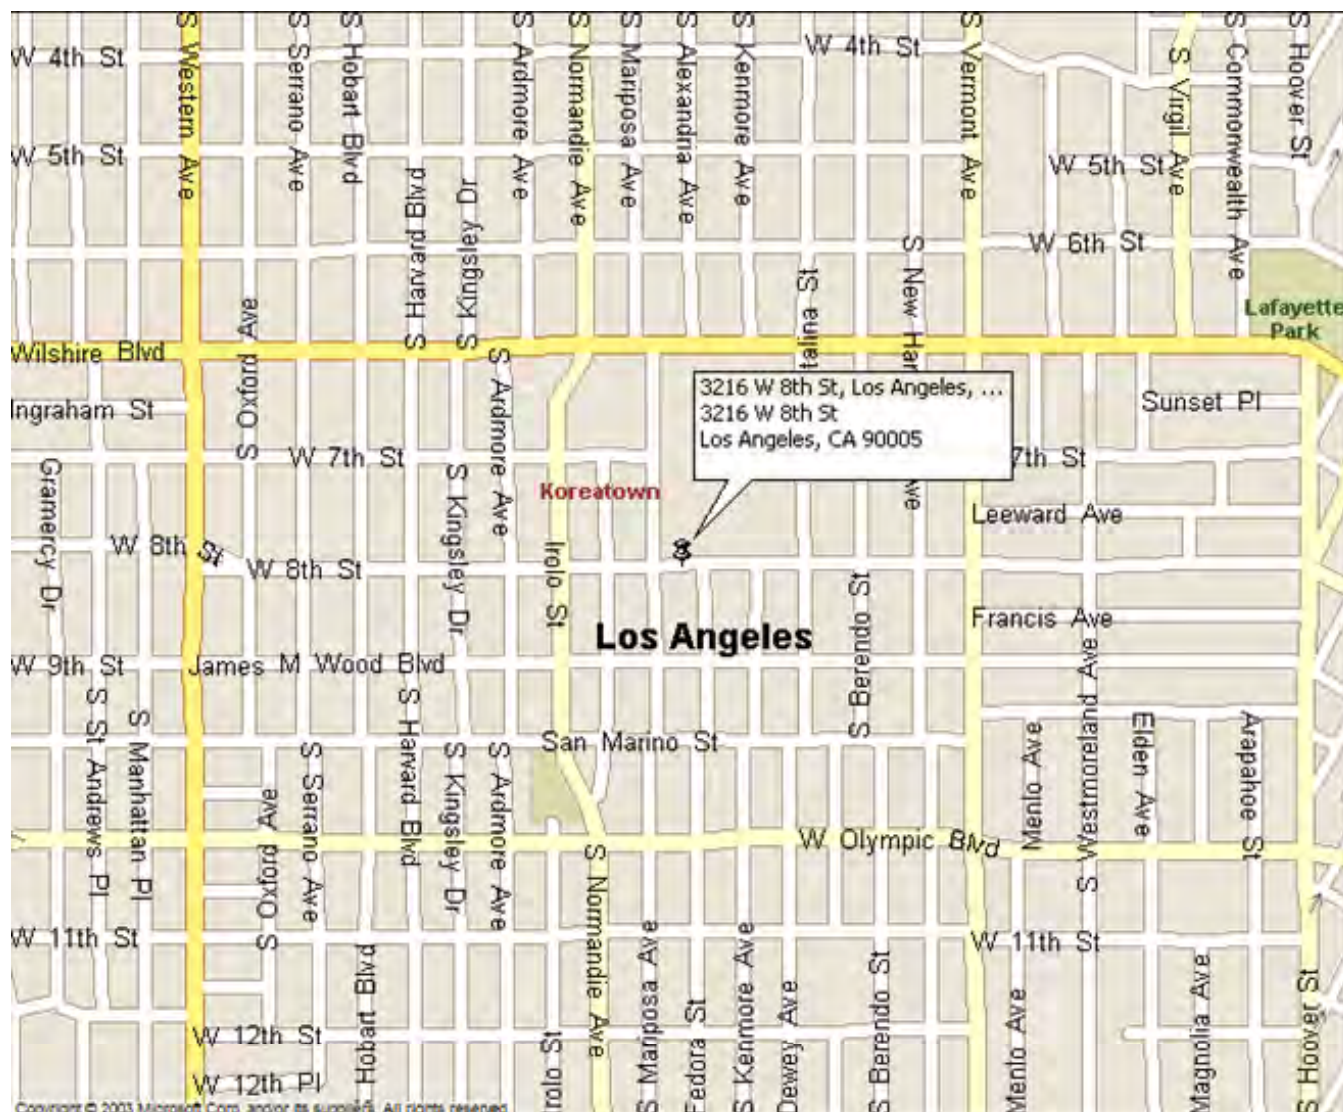

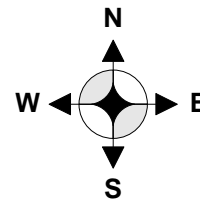

This environmental assessment has revealed no Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) in connection with the Property. ENCON recommends No Further Investigation at this time.

9.0 REFERENCES

During the preparation of this Report, a number of sources were contacted, individuals were interviewed, and various federal, state, county or local municipal agencies were consulted. Documentation applicable to the Property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM Standard Practice E1527-13. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydrogeologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this Report in corresponding sections. Any additional reference sources not cited in each applicable section of this report, if applicable, are disclosed in this section.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

EXECUTIVE SUMMARY

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which

EXECUTIVE SUMMARY

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 17 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110012247899

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 06/08/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 07/31/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/28/2016	Source: Department of the Navy
Date Data Arrived at EDR: 01/04/2017	Telephone: 843-820-7326
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 05/15/2017
Number of Days to Update: 93	Next Scheduled EDR Contact: 08/28/2017
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 05/31/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 09/11/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

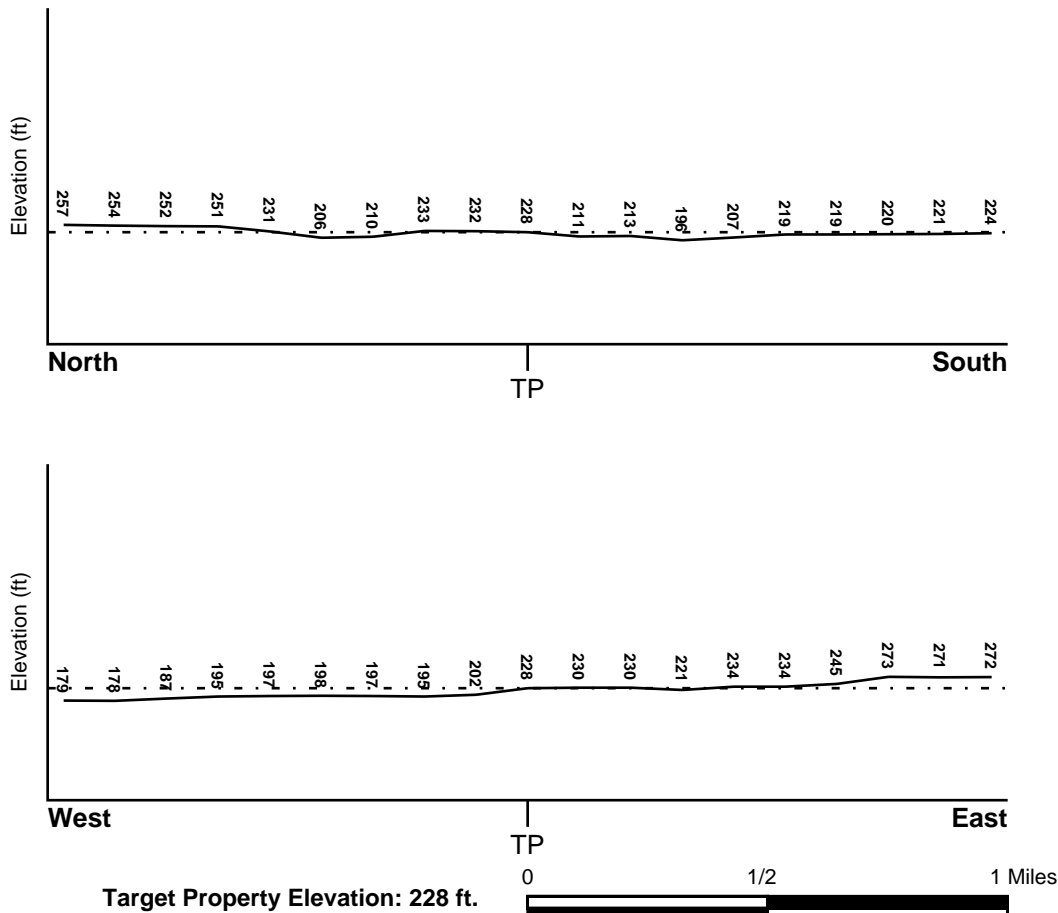

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	0 - 1/8 Mile WNW	SW
A2	1/2 - 1 Mile NNE	Not Reported
A3	1/2 - 1 Mile NNE	Varies
4	1/2 - 1 Mile NNE	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types: gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

The map displays the Los Angeles area with a grid of streets and topographical features. Key locations include:

- Los Angeles International Airport (LAX):** Marked with a yellow star and a yellow circle in the center of the map.
- Operating Engineers Pension Trust Bldg Heliport:** Located to the northeast of the airport, marked with a black star.
- Major Roads:** S Normandie Ave, Wilshire Blvd, James M Wood Blvd, S Western Ave, S Hoover St, S Granberry Pl, W Washington Blvd, and W 1st St.
- Landmarks:** The Los Angeles Convention Center and the Los Angeles Music Center are visible in the southeast.
- Geographical Features:** The map shows the Pacific Ocean to the west and the San Gabriel Mountains to the east.

A large black circle is drawn around the airport, and a smaller yellow circle is drawn around the airport's terminal area. The map is titled "Map of the Los Angeles area".

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Encon Solutions were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

BOARD OF PUBLIC WORKS

DEPARTMENT OF BUILDINGS

Application to Alter, Repair or Demolish

To the Board of Public Works of the City of Los Angeles:

Application is hereby made to the Board of Public Works of the City of Los Angeles, through the office of the Chief Inspector of Buildings, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

SET-BACK AGREEMENT

BLDG. FORM 50

(Date) 10-3-24

Mr. J. J. Backus,
Chief Inspector of Buildings,
Los Angeles, California.

Dear Sir:

I hereby agree to erect the building and every portion thereof referred to in this application at least 15 feet back from the street property line, except that the eaves or cornice, platforms and unenclosed porches, one story in height, may extend into the area between the main wall of the building and the front property line, in accordance with the action of the City Council in establishing a set-back line for this property; and I further agree not to erect any fence, wall or other structure or any portion thereof, between said set-back line and the street property line.

I hereby agree to accept the permit issued for the erection of this building subject to the foregoing conditions.

(Signed)

J. E. Shield

Hyung Kim, PE - Principal Consultant
CEM, CHMM, M.S., LEED-AP, P.E., QSD, QSP

Education

BS, Chemical Engineering, California State University, Long Beach, 1995
MS, Civil/Environmental Engineering, University of Southern California, 1997

General Qualifications

With over 15+ years of industry experience, Mr. Kim manages all aspects of environmental assessment and consulting/engineering operations. With a strong educational and professional background in hazardous waste management, environmental regulatory compliance and engineering/assessment planning, he plays a pivotal role in the overall operations of environmental project management. Mr. Kim has also successfully represented the company to financial and & real estate institutions as a technical marketing Director.

As a Principal Engineer, Mr. Kim is responsible for in-house QA/QC management in remedial action design, contamination assessment, hazardous material management and real estate due diligence assessment. Mr. Kim also oversees and trains most of the in-house technical staff and directs environmental planning, abatement, engineering, assessment, and remediation projects with assistance from E.P., P.E, P.G., P.H.G, I.H., CAC, and other environmental certified professionals.

Relevant Project Experience

- Environmental Site Assessment Phase I / Transaction Screen Due Diligence

Mr. Kim has managed over 15,000 site assessment projects performed nationwide since 1999, with full responsibility as the Chief Signatory Assessor and/or the Principal Environmental Consultant providing oversight, technical review, and quality control for subcontractors, in-house staff assessors, engineers and consultants. Property types assessed include, but are not limited to industrial and commercial properties, residential properties, gas stations, medical care facilities, agricultural uses, special use properties, and more.

In addition to site assessment services and consulting, Mr. Kim has conducted and managed projects pertaining to facility compliance auditing, storm water control, reporting and consulting (SWPPP), regulatory permitting and compliance, NPDES permitting, Clean Air Act and Clean Water Act, RCRA and CERCLA regulatory compliance assessments, Fannie Mae & HUD project due diligence, and numerous high-caliber commercial portfolio risk assessment.

- Phase II Subsurface Investigation & Pollution Characterization

Co-managed subsurface investigations nationwide (extensive experience in CA, NV, AZ, WA, CO, TX, NY, NJ, and MD) with PE, PG and PHG, involving various types of drilling methods such as geo-probe/direct-push, hollow-stem (limited access to high torque) or solid-stem auger, bucket auger, air rotary or percussion hammer, hydro-punch, limited access drilling, hand-auger, soil vapor probing, etc. With extensive hydrogeology knowledge, particularly for the Southern California region, Mr. Kim handles all aspects of groundwater contour estimation, recharge rate monitoring, surveying, and installation, monitoring, and decommissioning of extraction wells, including water table wells, upper and lower aquifer characterization wells, vertical profile cluster wells, multiport vapor piezometer wells, multipurpose groundwater and vapor piezometer wells, constructed using PVC, stainless steel.

- Environmental Site Remediation & Cleanup
- 129 North McKinley Street, Corona, CA - Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance: Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.
- 27532-27596 Sierra Highway and 18402 Soledad Canyon Road, Canyon Country, CA 91351 - Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance: Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.
- 16573 Ventura Boulevard, Suite 6, Encino, CA 91436 - Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance: Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.
- 11450 South Street, Cerritos, CA 90703 - Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance: Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.
- 1060 Crenshaw Boulevard, Los Angeles, CA 90019 – Sitewide Remedial Investigation regarding former gas station operations. Managed and worked with County Fire Department regarding investigation and scope of work. Installation of monitoring wells to characterize extent of contamination.
- 17700 Roscoe, Northridge, CA – Soil Vapor Extraction and Groundwater Monitoring, Operation & Maintenance: Managed and worked with RGs and PEs on mass transfer calculation from pilot testing, vapor radius of influence, assisted C.E. in VES design calculation, calculation of mass removal rate, pore volume exchange time, length of SVE operation, or Soil Vapor Extraction and Dual Phase High Vacuum Extraction remediation projects. He also calculated and work with

Registered Hydro-Geologist to conduct remedial action plan, feasibility study, pilot remediation testing study involving evaluation and calculation of transmissivity, storativity, hydraulic conductivity, specific storage, seepage velocity, groundwater capture zone ROI and other hydrologic parameters.

- Underground Storage Tank/Clarifier Abandonment & Regulatory Closure
Successfully managed more than 50 site abandonment and subsurface removal projects pertaining to underground storage tanks, clarifiers, in-ground lifts, etc. for sites such as gas service stations, private fueling stations, industrial manufacturing operations, and automotive related businesses throughout Southern California (Los Angeles, Orange, Riverside, San Bernardino, San Diego, and Kern counties). Project experience includes, but is not limited to, permitting, regulatory compliance, degassing/dry-icing/certification (USTs), contract management, AQMD Rule 1166, excavation, monitoring via PID and FID, sampling & reporting, waste disposal and profiling, etc.
- Asbestos/Lead/IAQ/Mold Assessment & Abatement
1996-2013 managed over 200 public & private abatement projects with CACs, CIH and DHS Inspectors. With hands-on experience from identification of hazardous material through inspection and survey to actual abatement and disposal management of such wastes including recycling of mercury vapor and PCB ballasts, Mr. Kim has been the key technical and managerial representative in more than 100 public works projects. Prepared IIPP, H&S, Respiratory Protection Plan, QAQC abatement procedures and regulatory compliance. Mold abatement, IAQ inspection with CIH, AQMD permitting of Negative Air Machines, HEPA Vacuum, preparation of abatement work plan, Procedure 5 emergency abatement plan with CAC
- Architectural/Engineering Due Diligence
Mr. Kim has managed ASTM E2018 Property Condition Assessment projects and Probable Maximum Loss (Seismic Evaluation Assessment) calculations in accordance with ASTM E-2026 Estimation of Building Damageability procedures for mainly institutional investors and conduit lenders. Projects include pre-securitization due diligence for Conduit Portfolio, in accordance with Fannie Mae Guidelines and other institutional investment due diligence guidelines.
- Energy/Energy Consulting
Mr. Kim has conducted and managed over 50 energy reports for SBA 504 CDC lenders to comply with public policy goals. Projects include a wide array of commercial properties including but not limited to hotel, office, retail, fitness center, automotive service businesses, industrial warehouses, industrial cold storage facilities, as well as other specialized facilities. Numerous application of energy saving measures were discussed and presented in the report including variable frequency drive, photo cells, occupancy, photo sensors, lighting retrofit, cool roof, renewable energy, and energy consumption simulation.

Professional Affiliations / Certifications

- California Professional Civil Engineer – 75083, 2009
- General Engineering Contractor "A"
- Hazardous Substance Removal Contractor "HAZ"
- Member of AIChE (American Institute of Chemical Engineers)
- Member of EAA (Environmental Assessment Association), Certified Environmental Manager #73547
- Institute of Hazardous Material Management, CHMM Master Level #012554
- Cal OSHA Hazwoper Training Certificate
- Uniform Fire Code Training for CUPA Inspectors
- CUPA Hazardous Waste Inspector Training 8 Hours

- UST Inspector Training, CUPA, 8 Hours
 - Nevada State Certified Environmental Manager #2057
 - LEED AP, USGBCI
 - QSD & QSP #20568
-
- Princeton Groundwater, Groundwater Pollution and Hydrology, Certificate of Completion, 2004
 - Professional Civil Engineering Service - Certificate of completion, 2007
 - Vapor Intrusion and Health Risk Assessment – Professional Training, 2009
 - Storm-water Pollution Prevention Training – Professional Training, 2009

Charles E. Wechsler – Senior Project Manager

Education

Juris Doctor, Concord Law School

Master of Business Administration, International Business, Marshall School of Business

University of Southern California

B.A. Physical Sciences, Colgate University

Graduate Hydrogeology Coursework, Syracuse University

General Qualifications

Mr. Wechsler is a Senior Project Manager with over 25 years of broad-based technical and management skills providing environmental consulting services. An excellent communicator with skills in assembling teams across multiple technical specialties and business lines, interacting with all organization levels from rank-and-file employees to C-level, and cultivating long-term relationships with clients.

Mr. Wechsler has led and performed: environmental due diligence (single sites and portfolios); surface, subsurface, and indoor air investigations, risk assessments, environmental liability cost modeling, and general commercial/industrial environmental, health and safety project/program management, mergers and acquisitions, and business, market, financial and legal analyses. He has demonstrated successes leading challenging multi-disciplinary projects and completing them within budget and time constraints, and also has a profitable track record leading Phase I and Phase II site assessments in multiple states and multiple countries; Phase II soil/soil vapor/groundwater investigations, remedial construction projects, industrial facility closures and multi-disciplinary environmental impact studies.

Industry Experience

- Mr. Wechsler brings experience and expertise to project management, environmental due diligence, subsurface investigations, client, vendor and internal relationships, mergers & acquisitions and marketing & business development as a Senior Project Manager.

Relevant Project Experience

- **Hazardous Materials Management**
 - EPA oversight contractor at 4 superfund sites in EPA Regions I and II, monitored drilling contractors, well installation, EPA prime technical contractors, performed CLP soil/groundwater sampling, reviewed project work plans, technical specifications and reports.
 - Emergency Responder, through dedicated EPA service contract, for 15+ oil spills and chemical releases. Conducted assessment, sampling and documentation during emergency responses.
 - Assistant Field Engineer at mixed chemical/pesticide waste superfund site in Massachusetts, documented cleanup activities, equipment supply, distribution, maintenance and data management.
- **Phase I Environmental Assessments**
 - Conducted Phase I assessments for numerous single-site, multiple site, multi-state, and international projects, and has reviewed and provided recommendations for clients on numerous Phase I ESA's.
- **Phase II Subsurface Investigations**
 - Assistant Field Operations Manager for groundwater/hydrogeological investigation involving major defense contractor. Coordinated drilling operations, including sampling, well

installation, well development, collaborated with client and contractors, managed on-site waste storage and sampling.

- Project Hydrogeologist for groundwater investigation at upstate NY commercial facility, including review/assessment of previous site work, identification of site groundwater flow patterns, recommendations for future monitoring, well installation, and soil/groundwater testing.

- **Remediation Projects**

- Project Manager and Field Engineer for remedial program requiring field testing of soils by XRF and PCB analysis, removal of approximately 10K cubic yards of metals and PCB-contaminated soil. Supervised remedial construction contractor, laboratory contractor, equipment vendors and other on-site personnel.
- Led agency closure and facility decommissioning for a movie film laboratory facility after successfully leading a 10-year process to close soil, groundwater and indoor air issues under the Los Angeles Regional Water Quality Control Board. Managed and led multiple investigations, from initial due diligence through regulatory closure for site/off-site groundwater, soil and soil vapor. Led indoor air assessment and human health risk assessment. Successfully petitioned agency for in-place underground storage tank closure.
- Introduced screening program criteria for clients to segment potential contamination sites based on risk factors (how site used, chemicals involved). This process enabled efficient evaluation of several hundred sites throughout the U.S. of a manufacturing company client over a 5+year period. Developed plans for subsurface investigation/remediation at multiple sites while complying with regulatory guidelines.

- **Other Projects**

- Project Manager for NEPA environmental assessments for U.S. Postal Service, including project scheduling, identifying/contracting with subcontractors for socioeconomic, traffic, environmental and cultural investigations.
- Senior Compliance Auditor and Project Manager for Lawrence (MA) Main Post Office and Vehicle Maintenance Facility audits.

Professional Affiliations / Certifications

- OSHA 40-hour HAZWOPER
- OSHA 8-hour Refresher

Thomas Lindros – California Professional Hydrogeologist, Professional Geologist, Water Distribution and Treatment Operator, Grade 2

Education

B.S., Geology, 1984

Post Bachelor's Degree Studies in Geology, 1988

General Qualifications

Mr. Lindros is a State of California Registered Geologist and Hydrogeologist, and a Certified Site Surveillance Technician. He has a Bachelors degree in Geological Studies with emphasis in field mapping and structural geology from the California Lutheran University, and completed post bachelors degree studies in Micropaleontology from California State University at Northridge. Mr. Lindros has 2 years of geotechnical industry experience in Ventura County, California, and has been working as a hydrogeologist and site remediation specialist in Southern California since 1990. Mr. Lindros has an extensive background in geochemical and geotechnical sampling, electronic/visual geophysical logging, UST tank pull sites, etc.

Mr. Lindros has personally logged over 20 miles of soil and bedrock from borehole advanced using the various drilling methods, and installed over 1,600 observation, monitoring and extraction wells, including water table wells, upper and lower aquifer characterization wells, vertical profile cluster wells and municipal water supply wells to depths of over 1,200 feet, multiport vapor piezometer wells, multipurpose groundwater and vapor piezometer wells, constructed using PVC, stainless steel, Westbay Multiport materials.

He has also supervised abandonment of groundwater monitoring wells and conducted aquifer testing of alluvial and bedrock materials in unconfined and semi-confined conditions, using slug, step rate, falling head, and constant rate methods.

Industry Experience

- Mr. Lindros has successfully synthesized and evaluated complex data to support geotechnical investigations, site assessments, remedial investigations, feasibility studies, and health risk assessments.
- Mr. Lindros has worked on a variety of projects with clients ranging from private (Unocal and Aerojet General Corporation) to public agencies (California Regional Water Quality Control Board, Metropolitan Water District, Los Angeles Department of Water and Power).
- Mr. Lindros has employed investigative techniques including soil gas sampling, vapor monitoring well installation and sampling, groundwater monitoring well installation and sampling, GeoProbe sampling, cone penetrometer testing (CPT), Hydropunch groundwater sampling, geologic mapping, soil density testing, surface and borehole geophysics, and aquifer packer testing.
- Mr. Lindros is familiar with hollow stem auger, bucket auger, direct mud rotary, direct air rotary, dual tube percussion, Stratex/Odex down-hole hammer, and other drilling methods. He also possesses experience with diamond coring, core handling and logging of bedrock materials, geophysical refraction/reflection surveys and borehole geophysical techniques including electric logs, natural gamma, sonic, video, spinner, acoustic televiewer (ATV), and caliper logs.

Relevant Project Experience

- **San Gabriel Valley Superfund Site – Azusa, CA**
 - Mr. Lindros was the project manager with design and oversight responsibility, data collection and reporting. Completed an 800-point soil gas survey soil sample collection and analysis at of 70 boring locations in alluvial gravels. Installed 32 multi-completion vadose zone piezometer wells, and 7 deep (350 feet) multi-purpose groundwater and vadose zone monitoring wells. Presented data using color graphics, evaluated data comprehensively to describe spatial and temporal chemical trends in the vadose and saturated zones to develop a conceptual model of fate and transport of chlorinated solvents in the subsurface.
- **San Gabriel Valley Superfund Site – BPOU PRE-DESIGN WELLS – Baldwin Park, CA**
 - Mr. Lindros was the Registered Geologist responsible for oversight of drilling, well design, well installation and well sampling of the USEPA BPOU Multiport Pre-Design Wells installed by Camp, Dresser & McKee. Responsibilities included review of drilling/logging procedures (i.e. cuttings, mud weight/viscosity, lag times, drill times, etc), review of downhole geophysical logs and comparison to field logs, correlation of Pre-Design borings to nearby water production well lithology and design, and assist in providing design recommendations to USEPA for approval and construction. Also provided oversight during well installation, video logging, well development and well sampling phases of work.
- **Former Manufactured Gas Plant Sites – Long Beach, Corona, San Bernardino, CA**
 - Working with Southern California Edison (SCE), Mr. Lindros was responsible for Site Characterization, collection of data to support Human Health Risk Assessments, and completing projects through Remedial Investigation/Feasibility Study (RI/FS). Prepared technical reports for submittal to Department of Toxic Substances Control (DTSC). MGP sites were re-developed, and access to former MGP sources areas was limited by current developments no longer owned by SCE.
- **Eastside Reservoir Project, Secondary Inlet – Winchester, California**
 - Mr. Lindros was the lead geologist responsible for collection of geotechnical and geological information to assist in tunnel and pipeline design. Performed detailed surface geologic mapping of metamorphic schist and plutonic rocks associated with emplacement of the Southern California Batholith. Performed seismic refraction surveying, collection of continuous NX vertical, inclined and oriented core, and performed detailed aerial photograph analysis. Logged RQD, Fracture Frequency, and Percent Recovery in addition to very detailed lithologic description, particularly of fracture orientation, frequency, surfaces and fillings. Evaluated orientation data using a computerized stereo-net program to identify regional vs. local orientation sets relative to the orientation of the tunnel alignment.
- **Puente Hills Landfill Subsurface Barrier No. 5 – Puente Hills, California**
 - Mr. Lindros was responsible for mapping of backcuts and slurry wall excavations during installation of Barrier No. 5. Monitored Cement-Bentonite (CB) slurry parameters for compliance with project specifications. Installed post-barrier wall groundwater monitoring well installation using bucket auger drilling methods and open hole construction. Client: County Sanitation Districts of Los Angeles.

Professional Affiliations / Certifications

- State of California Certified Hydrogeologist No. 467, 1996
- State of California Registered Geologist No. 5940, 1994
- California Stormwater Quality Association Qualified SWPPP Developer (QSD) and Qualified SWPPP Practitioner (QSP) # 24181
- County of Ventura Registered Well Inspector, 1998 through present

- State of California Certified Site Surveillance Technician No. 96-2110, 1996
- State of Nevada Licensed Asbestos Abatement Consultant No. IMo684, 1996
- Westbay Multiport Well System Training/Certification, 1997
- OSHA 40-hour Health and Safety Training, 1990
- Annual OSHA 8-hour Health and Safety Refresher Courses, 1991 through present
- Geophysical Borehole Clearance Training (Ground Penetrating Radar, Pipe and Cable Location), 1992
- Supervisory Hazardous Substances/Waste Health and Safety Training, 1994
- First Aid and CPR AED, 2016

Mary Osborne, REA, CEM – Senior Environmental Consultant / Project Manager

Education

B.S., Biological Oceanography

General Qualifications

Possessing over 25+ years of industry experience, Ms. Osborne has prepared and collectively reviewed thousands of Transaction Screen Assessments, Phase I Environmental Site Assessments, and Phase II Subsurface Investigation Assessments. With an extensive background in regulatory compliance, permitting, site assessment, and auditing, Ms. Osborne has completed hundreds of environmental compliance audits for RCRA and non-RCRA generator and TSDF facilities; and assisted with environmental permitting and regulatory requirements for industry, including air quality permits, wastewater discharge permits, and hazardous materials handling and storage. Other relevant project experience pertains to the management and performance of Property Condition Assessments (PCAs), merger and acquisition audits for industrial and commercial facilities, and environmental due diligence portfolio management.

Registrations and Certifications

Environmental Professional §312.10, 40CFR312

Nevada Certified Environmental Manager #2185

OSHA 40-Hour Health and Safety Training

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)
01/30/2017

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).
