Present Land Use/Zoning/General Plan Designation:	
Open Space (O), Planned Community (PC), and Re	esidential Single-Family District (R-1)

Project Description: (please use a separate page if necessary)

The proposed project would result in the managed reduction of fire fuel hazards within the City's greenbelt system, collectively the "Pian Aree", where the fire hazard is high due to high fuel loads. To reduce the risk of wildfire, the City prepared e Greenbelt Fuel Reduction Pian (Pian) for the Pian Area, and has prepared e Draft Supplemental I S/MNDto analyze and disclose the potentially significant environmental effects associated with the expansion of the Pian Area to include the Old Capitol Site greenbelt. Managed reduction of fire fuel hazards would include, but is not limited to the following actions: thinning of vegetation; removal of trees, focusing primarily on dead and dying trees; trees or large tree-form shrubs (reaching 4 feet or teller at maturity) that are to be retained in defensible spaces would be trimmed or pruned to reduce both vertical and horizontal fuel continuity; removal of exotic/invasive plants; and prescribed grazing, utilizing goats end sheep, to thin and remove vegetation in areas where high fire hazard conditions exist due to dry conditions.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
