Subject: AAI PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE
Proposed Commercial Development
East Corner of Central Avenue and Cambern Avenue
Lake Elsinore, CA

Dear Mr. Prystasz:

At your request and authorization, SALEM Engineering Group, Inc. (SALEM) has conducted this Phase I Environmental Site Assessment (ESA) Update of the Proposed Commercial Development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (subject property). During the course of this assessment, SALEM identified no evidence of Recognized Environmental Conditions (RECs) in connection with the subject property as defined by ASTM E1527-13 and E1527-21.

We appreciate the opportunity to assist you with this project. If you have any questions, or if we may be of further assistance, please do not hesitate to contact our office at (909) 980-6455.

Respectfully submitted,

SALEM Engineering Group, Inc.

Reily Rivera
Environmental Project Manager

Project No. 3-421-0165

PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE**PROPOSED COMMERCIAL DEVELOPMENT
EAST CORNER OF CENTRAL AVENUE AND CAMBERN AVENUE
LAKE ELSINORE, CA****1.0 EXECUTIVE SUMMARY**

SALEM Engineering Group, Inc. (SALEM) has conducted a Phase I Environmental Site Assessment (ESA) Update of the Proposed Commercial Development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (subject property). The subject property comprises five contiguous rectangular-shaped parcels of undeveloped land (Riverside County Assessor's Parcel Numbers [APNs] 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019) totaling approximately 9.23 acres. The subject property has associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. SALEM conducted this Phase I ESA Update of the subject property in conformance with the American Society for Testing and Materials (ASTM) E1527-13 and E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The U.S. Environmental Protection Agency (USEPA) has determined that the ASTM E1527-13 and E1527-21 Standard is consistent with the requirements for conducting an "All Appropriate Inquiry" under 40 C.F.R. Part 312. Thus, this Phase I ESA Update constitutes All Appropriate Inquiry (AAI) designed to identify Recognized Environmental Conditions (RECs) in connection with the previous ownership and uses of the subject property as defined by ASTM E1527-13 and E1527-21 and 40 C.F.R. Part 312.

ASTM E1527-13 and E1527-21 Section 1.1.1 *Recognized Environmental Conditions* – The term *recognized environmental conditions* is defined as "(1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment." Conditions determined to be *de minimis* are not *recognized environmental conditions*.

During the course of this assessment, SALEM identified no evidence of RECs in connection with the subject property as defined by ASTM E1527-13 and E1527-21.

2.0 PURPOSE AND SCOPE OF ASSESSMENT**2.1 Purpose**

According to ASTM E1527-13 and E1527-21, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"); that is, the

practice that constitutes “*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35) (B).

The Phase I ESA was conducted to identify ‘Recognized Environmental Conditions’ (RECs), ‘Controlled Recognized Environmental Conditions’ (CRECs) and ‘Historical Recognized Environmental Conditions’ (HRECs) as defined by the American Society for Testing and Materials (ASTM) *Designation E1527-13 and E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of the ASTM *Designation E1527-13 and E1527-21* defines an REC as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” The term as further defined by ASTM “is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” Section 3.2.18 defines a CREC as “a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations).” Section 3.2.42 defines HREC as “a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations).”

2.2 Scope of Work

The objective of the SALEM Phase I ESA Update scope of work is to provide an evaluation of RECs at the subject property and potential off-site sources. The scope of work for this Phase I ESA Update conforms to ASTM E1527-13 and E1527-21. SALEM was provided authorization to conduct the Phase I ESA Update by Mr. Jon Prystasz with Evergreen Devco, Inc. on February 15, 2022 in accordance with the scope of work outlined in SALEM’s proposal P3-422-0248. In fulfillment of the SALEM scope of work for this Phase I ESA Update, SALEM was retained to perform the following tasks:

- Acquire readily available information regarding land-use history and property development by reviewing historical aerial photographs, pertinent building permit records, historic city directories, as well as reviewing recent and historic topographic land-use maps of the subject property and surrounding area.
- Reviewing readily available local, state, and federal regulatory agency databases listed in ASTM E1527-13 and E1527-21 and compiled by Environmental Data Resources, Inc. (EDR), including but not limited to CERCLA and NPL lists for sites within one mile of the subject property. State databases, including but not limited to CALSITES, Hazardous Substance Account Act, Cortese, SWIS, SWAT, Well Investigation Program (AB1803), and LUST, were reviewed for sites within one mile of the subject property.
- Performing a reconnaissance of the subject property and surrounding areas (up to one-half mile beyond site boundary), with regard to potential off-site sources of degradation to the subject property, which included photograph documentation of subject property conditions, and identification of potential environmental concerns. Interviews with persons knowledgeable of the previous and current ownership and uses of the subject property.

-
- Identifying aboveground storage tanks and/or indications of underground storage tanks on-site.
 - In addition to ASTM E1527-13 and E1527-21, SALEM recognizes *ASTM Standard Guide for Vapor Encroachment Screening (VES) on Property Involved in Real Estate Transactions* (ASTM E2600-15) as an industry-accepted guideline to determine if a Vapor Encroachment Condition (VEC) exists at the target property. A VES consists of reviewing the Phase I ESA data combined with the application of professional judgment. SALEM evaluates the regulatory agency databases to determine if there are known or suspect contaminated sites within a minimum search distance of the target property. In addition, SALEM attempted to determine whether soil and/or groundwater have been impacted within the critical distances outlined in ASTM E2600-15.
 - Preparing this report of SALEM's findings and recommendations if warranted.

3.0 SITE DESCRIPTION

The subject property comprises five contiguous rectangular-shaped parcels of land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. At the time of SALEM's February 25, 2022 site reconnaissance, the subject property was undeveloped graded land covered with native vegetation. The subject property is located in Section 31, Township 5 South, Range 4 West, San Bernardino Baseline and Meridian, United States Geological Survey (U.S.G.S.) 7.5 Minute Topographic Map, Lake Elsinore, California Quadrangle dated 2018.

4.0 PHYSIOGRAPHY AND HYDROGEOLOGIC CONDITIONS

The subject property is located in the Elsinore Valley northwest of Lake Elsinore within the Peninsular Ranges Geomorphic Province of California. The Elsinore Valley is bounded on the southwest by the Santa Ana and Elsinore Mountains, and on the northeast by lower-elevation rolling hills. The Elsinore Valley is graben, bounded by the Glen Ivy Fault to the north, and the Willard and Wildomar Faults to the south (United States Geologic Survey [USGS], 1963 and Sharp, 1978). The flood plain deposits and valley fill of the Elsinore Valley consist of late Pliocene-aged alluvial deposits, including gravel, sand, clayey and silty sand, and clay ranging up to 300 feet in thickness. The alluvial deposits overlie the Martinez Formation, which consists of sandstone and conglomerate, siltstone, and clay deposits of Tertiary age. The Martinez Formation overlies the southward dipping, meta-igneous, basement rock deposits (Sharp, 1978). The subject property lies in the Elsinore hydrologic sub-area of the Elsinore Valley Hydrologic Unit. Groundwater beneath the subject property vicinity generally occurs within the Quaternary alluvium as perched aquifers or as the regional aquifer.

Based upon California Regional Water Quality Control Board (RWQCB) records for the MOBIL #18-AAH gasoline station leaking underground storage tank (LUST) site at 29300 Central Avenue, located approximately 1,080 feet southwest of the subject property, groundwater was reported to be encountered between 25.1 and 41.2 feet below ground surface (bgs) with a general direction of groundwater flow to the southwest. However, local groundwater level and flow direction may vary due to seasonal fluctuations in precipitation, usage demands, geology, and/or surface topography.

5.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject property and adjoining properties was conducted by SALEM's environmental assessor on February 25, 2022. The objective of the site reconnaissance is to identify RECs, including the storage and handling of hazardous substances and petroleum products on or in the vicinity of the subject property which have the potential to environmentally impact on-site soils, surface water and groundwater.

5.1 Observations

Table I summarizes the visual observations made during our site reconnaissance. A discussion of the physical observations follows Table I. Refer to the Site Map (Figure 1) and color photographs following the text for the locations of the features discussed in this section of the report.

TABLE I
Summary of Observations during Site Reconnaissance

FEATURE	OBSERVED	NOT OBSERVED
Structures (existing)		X
Evidence of past uses		X
Hazardous substances and/or petroleum products (including containers)		X
Aboveground storage tanks (ASTs)		X
Underground storage tanks (USTs) or evidence of USTs		X
Strong, pungent, or noxious odors		X
Pools of liquid likely to be hazardous substances or petroleum products		X
Drums		X
Unidentified substance containers		X
Pad-mounted/Pole-mounted transformers/capacitors/other PCB-containing equipment		X
Subsurface hydraulic equipment		X
Heating/ventilation/air conditioning (HVAC)		X
Stains or corrosion on floors, walls, or ceilings		X
Floor drains and sumps		X
Pits, ponds, or lagoons		X
Stained soil and/or pavement		X
Stressed vegetation		X
Waste or wastewater discharges to surface or surface waters on subject property (including stormwater)		X
Wells (irrigation, domestic, dry, injection, abandoned, monitoring wells)		X
Septic Systems		X

The subject property comprises five contiguous rectangular-shaped parcels of undeveloped land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. At the time of SALEM's site reconnaissance, the subject property was undeveloped graded land covered with native vegetation.

- An approximately 8' x 30' area of dumped asphalt was observed in the eastern corner of the subject property. No hazardous substances and/or petroleum products/hazardous wastes were observed on the surface of the dumped asphalt.
- An approximately 10' x 15' area pile of construction debris consisting of concrete and rebar was observed near the center of the subject property. No hazardous substances and/or petroleum products/hazardous wastes were observed on the surface of the concrete and rebar pile.

- During visual observations of the subject property, exposed surface soils did not exhibit obvious signs of discoloration. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the area observed. No standing water was observed on the subject property. No hazardous substances and/or petroleum products/hazardous wastes were observed to be stored or handled on the subject property. No indications of former structures, such as foundations, were observed on the subject property.

5.2 Adjacent Streets and Property Usage

Table II summarizes the adjacent streets and properties uses observed during the SALEM's site reconnaissance.

TABLE II
Adjacent Streets and Property Use

DIRECTION	ADJACENT STREET	ADJACENT PROPERTY USE
Northeast	None	Single-Family Residential
Southeast	None	Single-Family Residential
Southwest	Cambern Avenue	Walmart Super Center (2960 Central Avenue); Parking Lot; Taco Bell (29230 Central Avenue)
Northwest	Central Avenue	Vacant

Based on the observed uses of the properties located immediately adjacent to the subject property, it is unlikely that significant quantities of hazardous substances or petroleum products are stored or handled at the adjoining properties.

5.3 Potable Water Source

The water purveyor for the subject property is the Elsinore Valley Municipal Water District (EVMWD). The EVMWD's water quality monitoring is an on-going program with water samples obtained on a regular basis. It is the responsibility of the EVMWD to provide customers with potable water in compliance with the California Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public.

5.4 Sewage Disposal System

On February 25, 2022, the EVMWD was contacted regarding sewer service for the subject property. According to a EVMWD representative, no records of sewer service are on file for the subject property. However, Riverside County Planning Department (RCPD) records indicate that as part of a "change of zoning application" submitted on June 20, 1980, the subject property soils were being assessed for the installation of a septic tank filtration field. No additional information was contained in the RCPD files to indicate if the septic system was actually installed. Riverside County Transportation and Land Management Agency (RCTLMA) records indicate that a conditional use permit for a mobile home sales facility was issued on August 9, 1982 for the historical subject property address of 18650 Cambern Avenue. SALEM's review of historical aerial photographs reveals that the northwestern portion of the subject property was occupied by several rectangular-shaped structures resembling mobile homes from at least 1985 until at least 1990. A septic system was likely associated with the former mobile home sales facility. However, it is unknown if a septic system is currently located in the vicinity of the former mobile home sales facility. The presence of the septic system is not anticipated to adversely impact the subject property due to its presumed use for domestic purposes only. If a septic system is identified during the redevelopment of the subject property, it should be properly abandoned/closed or destroyed in accordance with all applicable state and local guidelines.

5.5 Heating and Cooling Source

No structures are located on the subject property. Therefore, no heating or cooling sources exist at the subject property. No documentation of fuel oil use was identified during review of reasonably ascertainable

records and no visual evidence of fuel oil use was identified during the site reconnaissance. Therefore, it is unlikely for a former fuel oil UST to have been used at the subject property and for a release to have occurred.

6.0 USER-PROVIDED INFORMATION

A review of a User-provided Title Report and a Phase I ESA User Questionnaire was conducted in order to help identify pertinent information regarding potential RECs associated with the subject property.

6.1 Title Report

On March 3, 2022, a Commitment for Title Insurance Report for the Boyle family parcel (Riverside County APN 377-020-014) of the subject property by First American Title Insurance Company, dated February 15, 2022, was provided to SALEM by Mr. Jon Prystasz with Evergreen Devco, Inc. The Commitment for Title Insurance Report was reviewed to identify potential deed restrictions, environmental liens or activity and use limitations (AULs) which may have occurred on or exist in connection with the subject property as indicated by the Commitment for Title Insurance Report. SALEM's review of the Commitment for Title Insurance Report indicated no deed restrictions, environmental liens, or AULs for the subject property.

On March 3, 2022, a Commitment for Title Insurance Report for the Nielsen family parcels (Riverside County APNs 377-020-016, 377-020-017, 377-020-018, and 377-020-019) of the subject property by First American Title Insurance Company, dated February, 18, 2022, was provided to SALEM by Mr. Jon Prystasz with Evergreen Devco, Inc. The Commitment for Title Insurance Report was reviewed to identify potential deed restrictions, environmental liens or AULs which may have occurred on or exist in connection with the subject property as indicated by the Commitment for Title Insurance Report. SALEM's review of the Commitment for Title Insurance Report indicated no deed restrictions, environmental liens, or AULs for the subject property. Please refer to Appendix A for copies of the two Commitment for Title Insurance Reports.

6.2 Phase I Environmental Site Assessment User Questionnaire

On March 3, 2022, a completed Phase I ESA User Questionnaire was received from Mr. Jon Prystasz with Evergreen Devco, Inc. Please refer to Appendix B for a copy of the completed Phase I ESA User Questionnaire.

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete. The user is asked to provide information or knowledge of the following:

- Environmental cleanup liens that are filed or recorded against the site.
- Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the LLPs.
- Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
- Commonly known or *reasonably ascertainable* information about the *property*.
- The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.

According to Mr. Prystasz, to the best of his knowledge as the user of this Phase I ESA, no environmental cleanup liens and no activity or land use limitations have been filed or recorded against the subject property. Mr. Prystasz indicated that he did not have knowledge of the past or current spills or chemical releases or environmental cleanups at the subject property. Additionally, Mr. Prystasz indicated that the purchase price of the subject property reasonably reflects fair market value.

7.0 SITE USAGE SURVEY

In order to assess the subject property's history, SALEM reviewed a Phase I ESA Owner Questionnaire, historical aerial photographs, building department records, city directories, planning department records, and SFIMs.

7.1 Phase I Environmental Site Assessment Owner Questionnaire

On March 3, 2022, a Phase I ESA Owner Questionnaire was received from Mr. Tim Nielsen, the current owner of the front parcels (Riverside County APNs 377-020-016, 377-020-017, 377-020-018, and 377-020-019) of the subject property. The Phase I ESA Owner Questionnaire is designed to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. Mr. Nielsen reported that he has owned his portion of the subject property for five years, and his family has owned the parcels since approximately 1989. Mr. Nielsen stated that the subject property is currently vacant land.

According to Mr. Nielsen, to the best of his knowledge, no on-site treatment or discharge of waste; no on-site leach fields, dry wells, sumps, or disposal ponds; no use, storage or disposal of hazardous substances or petroleum products; hazardous substances or petroleum products spills; buried materials; domestic, monitoring, or irrigations wells; or any additional items of environmental concern which may present an REC are associated with the subject property.

On March 3, 2022, a Phase I ESA Owner Questionnaire was received from Mr. Billie Boyle and Mrs. Josephine Boyle, the current owners of the rear parcel (Riverside County APN 377-020-014) of the subject property. The Phase I ESA Owner Questionnaire is designed to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. Mr. and Mrs. Boyle reported that they have owned their portion of the subject property since 1981, and that the subject property is currently vacant land.

According to Mr. and Mrs. Boyle, to the best of their knowledge no on-site treatment or discharge of waste; no on-site leach fields, dry wells, sumps, or disposal ponds; no use, storage or disposal of hazardous substances or petroleum products; hazardous substances or petroleum products spills; buried materials; domestic, monitoring, or irrigations wells; or any additional items of environmental concern which may present an REC are associated with the subject property. Please refer to Appendix C for copies of the completed Phase I ESA Owner Questionnaires.

7.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property and vicinity dated 1938, 1949, 1953, 1961, 1967, 1974, 1978, 1985, 1989, 1990, 1994, 2002, 2005, 2009, 2012 and 2016 were reviewed to evaluate changes in land-use for the subject property. The historical aerial photographs were supplied by EDR. Refer to Appendix D for a copy of the EDR-provided aerial photographs. A summary of the aerial photographs is provided below:

➤ **1938 Aerial Photograph**

The subject property and adjoining properties appear to be undeveloped land. What appears to be a dirt road oriented northeast to southwest transects the center of the subject property. An unpaved road (Cambern Avenue) is observed adjoining to the southwest, beyond which is undeveloped land. A paved two-lane road (Central Avenue) is observed adjoining the subject property to the northwest, beyond which are what appear to be clay pit surface mines.

➤ **1949 Aerial Photograph**

The subject property appears to be vacant land. What appears to be a shallow rectangular-shaped trench is located on the northwestern portion of the subject property. The dirt road is no longer observed on the subject property. The trench appears to be associated with the clay pit mining operations adjoining to the northwest across Central Avenue. The conditions on the adjoining properties are similar to the 1938 aerial photograph.

➤ **1953 Aerial Photograph**

The rectangular-shaped pit on the northwestern portion of the subject property appears deeper in the center and slopes out on each side. The conditions on the adjoining properties are similar to the 1949 aerial photograph.

➤ **1961 Aerial Photograph**

The conditions on the subject property and adjoining properties to the northeast, southeast, and southwest are similar to the 1953 aerial photograph. The northwest adjoining clay pit mining operations appear to have expanded further to the southwest. What appears to be residential development is observed to the east, southeast, and southwest of the subject property.

➤ **1967 Aerial Photograph**

The conditions on the subject property and adjoining properties to the northeast, southeast, and southwest are similar to the 1961 aerial photograph. The northwest adjoining clay pit mining operations appear to have expanded further to the southwest.

➤ **1974 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1967 aerial photograph.

➤ **1978 Aerial Photograph**

The rectangular-shaped pit previously observed on the subject property appears to have been backfilled and the subject property graded. northeast, southeast, and southwest are similar to the 1974 aerial photograph. The northwest adjoining clay pit appears to have been filled with water.

➤ **1985 Aerial Photograph**

The west corner of the subject property appears to be occupied by a mobile home sales facility. The remaining two-thirds of the subject property appears to be vacant land. The adjoining property to the northeast appears to have been developed with single-family residences. An increase in residential development is observed in the vicinity of the subject property. The conditions on the adjoining properties to the northwest, southeast, and southwest are similar to the 1975 aerial photograph. The northwest adjoining clay pit appears to no longer contain water. Cambern Avenue, adjoining to the southwest, appears to be a paved two-lane road.

➤ **1989 Aerial Photograph**

The mobile home sales facility appears to have expanded to the northeast and now occupies approximately one-half of the subject property. The remainder of the subject property is vacant land. Clay pit mining operations on the adjoining property to the northwest appear to have ceased and the pits backfilled. The conditions on the adjoining properties to the northeast, southeast, and southwest are similar to the 1985 aerial photograph.

➤ **1990 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1989 aerial photograph.

➤ **1994 Aerial Photograph**

The subject property no longer appears to be used as a mobile home sales facility. The subject property appears to be vacant land. The conditions on the adjoining properties are similar to the 1990 aerial photograph.

➤ **2002 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1996 aerial photograph.

➤ **2005 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2002 aerial photograph. The adjoining property to the west appears to have been mass graded in preparation for development. Central Avenue, adjoining to the northwest, appears to have been widened into a four-lane paved road.

➤ **2009 Aerial Photograph**

The conditions on the subject property and adjoining properties to the northeast, southeast, southwest, and northwest are similar to the 2006 aerial photograph. The adjoining property to the west appears to be occupied by a shopping center. The adjoining property to the southeast appears to have been developed with single-family residences. Central Avenue appears to have been widened into a six-lane paved road.

➤ **2012 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2009 aerial photograph.

➤ **2016 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2012 aerial photograph.

7.3 Building Department Records Review

On February 22, 2022, a records request was made to the City of Lake Elsinore Building and Safety Department (LEBSD) for the subject property APNs of 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019, and associated historical address of 18650 Cambern Street and 18650 Cambern Avenue. According to a representative of the LEBSD, no building permit records are available for the subject property. However, RCPD records indicate that as part of a “change of zoning application” submitted on June 20, 1980, the subject property soils were being assessed for the installation of a septic tank filtration field. No additional information was contained in the RCPD files to indicate if the septic system was actually installed.

RCTLMA records indicate that a conditional use permit for a mobile home sales facility was issued on August 9, 1982 for the historical subject property address of 18650 Cambern Avenue. SALEM's review of historical aerial photographs reveals that the northwestern portion of the subject property was occupied by several rectangular-shaped structures resembling mobile homes from at least 1985 until at least 1990. No building or planning department permits for items which may present an REC to the subject property including USTs, ASTs, demolition, or previous permanent structures were on file with the LEBSD.

7.4 City Directories

SALEM contracted with EDR to provide a City Directory Image Report dated 1971 through 2017 for the subject property and adjoining properties. The subject property's associated historical address of 18650 Cambern Avenue was listed as being occupied by Double D MBL HM SLS (1985-1992) and Bruder, Ronald S (2005-2010). The subject property was not listed in the City Directory Image Report in any other years. No evidence of RECs was identified in the City Directory Image Report for the subject property as presented by the listed adjoining property uses. Please refer to Appendix E for a copy of the EDR-provided City Directory Image Report.

7.5 Sanborn Fire Insurance Maps

SALEM reviews SFIMs to evaluate prior land use at the subject property and adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the property. SALEM contracted with EDR to provide a Fire Insurance Map Abstract indicating the availability of historic SFIMs for the subject property and adjacent properties as far back as 1867. EDR's search of collections at the Library of Congress, University Publications of America, and various public and local sources revealed no coverage for the subject property and adjacent properties. Please refer to Appendix F for a copy of the EDR SFIM No Coverage Certification.

7.6 Agricultural Chemicals

Review of historical aerial photographs dating to 1938 indicates the subject property has not been utilized for agricultural purposes. Therefore, the use, storage, and application of agricultural chemicals at the subject property are not considered an environmental concern.

7.7 Phase I Environmental Site Assessment Interview - Previous Owner

SALEM attempted to interview the previous owner of the subject property to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. However, a Phase I ESA interview with the previous owner of the subject property was not reasonably ascertainable.

7.8 Previous Environmental Reports

According to SALEM's previous environmental report titled, *Phase I Environmental Site Assessment, Proposed Commercial Development, East Corner of Central Avenue and Cambern Avenue, Lake Elsinore, California*, dated March 18, 2021, the approximately 9.23-acre subject property (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019) was undeveloped graded land covered with native vegetation at the time of SALEM's March 9, 2021 site reconnaissance. SALEM's review of historical aerial photographs, historical topographic maps, and RCTLMA records indicated that the northwestern portion of the subject property was historically occupied by a rectangular-shaped pit from at least 1949 until at least 1974 which was associated with clay pit mining operations located adjoining to the northwest across Central Avenue. By 1978, the pit had been backfilled and the subject property appeared to have been graded. It was SALEM's opinion that the pit may have been utilized for the disposal of waste generated by the clay pit mining operations and was identified as an REC. Therefore, SALEM recommended conducting a geophysical survey of the northwestern portion of the subject property to

evaluate whether waste materials or other debris were placed into the former pit, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey.

In response to the REC identified in SALEM's Phase I ESA report dated March 18, 2021, SALEM prepared a Geophysical Survey Report, dated May 14, 2021, to summarize the results of a geophysical survey that was performed on the subject property. SALEM utilized Spectrum Geophysics (Spectrum) of Chatsworth, California to conduct a geophysical survey of the subject property to evaluate whether waste materials or other debris were placed into the former pit associated with the clay pit mining operations located adjoining to the northwest across Central Avenue, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey. The geophysical survey was performed on April 19, 2021 on approximately two acres of land along the northwestern portion of the subject property to address an REC identified in SALEM's Phase I ESA report dated March 9, 2021. Spectrum employed EM-31 terrain conductivity, EM-61 high sensitivity metal detection (MD), vertical magnetic gradient (VMG), shallow focus terrain conductivity (TC), and ground penetrating radar (GPR) investigation methods. The geophysical survey did not identify any subsurface anomalies of potential environmental concern such as waste materials or other debris that may have been placed in the former pit on the northwestern portion of the subject property. SALEM concluded that, based on the data obtained from the geophysical survey, that no further investigation was warranted, and the REC identified in SALEM's March 18, 2021 Phase I ESA had been adequately investigated and was no longer considered an REC. Please refer to Appendix G for copies of available previous environmental reports.

8.0 REGULATORY AGENCY RECORDS REVIEW

SALEM conducted a review of regulatory agency records for the purpose of determining if hazardous materials/hazardous wastes and/or petroleum products have been stored or handled on the subject property and area properties of environmental concern. The most current records available were reviewed.

California Environmental Protection Agency, Department of Toxic Substances Control

SALEM's March 2, 2022 review of the California Environmental Protection Agency (Cal-EPA), Department of Toxic Substances Control (DTSC) EnviroStor database available via the DTSC website (<https://www.envirostor.dtsc.ca.gov/public/>), which tracks federal superfund sites, state response sites, voluntary cleanup sites, and school cleanup sites, indicated that no records of cleanup sites are on file with the DTSC for the subject property or adjoining properties.

SALEM additionally searched DTSC's Hazardous Waste Tracking System (HWTS) database available via the DTSC website (<https://hwts.dtsc.ca.gov/>), which tracks hazardous waste manifest and ID Number information. No records pertaining to the subject property were on file.

California Regional Water Quality Control Board

SALEM's March 2, 2022 review of the RWQCB GeoTracker leaking underground storage tank (LUST) database available via the RWQCB website (<https://geotracker.waterboards.ca.gov/>) indicated that no records of LUSTs are on file with the RWQCB for the subject property or adjoining properties.

California Division of Oil, Gas, and Geothermal Resources

On March 2, 2022, SALEM reviewed the California Geologic Energy Management Division (CalGEM) website (<https://maps.conservation.ca.gov/doggr/wellfinder>) to evaluate the potential for existing/former oil, gas, or geothermal wells on the subject property or adjoining properties. The subject property is located within CalGEM Southern District. The subject property vicinity is not located within a geothermal field.

The review of CalGEM information does not indicate that an oil, gas, or geothermal well has been drilled on the subject or adjoining properties.

South Coast Air Quality Management District

On March 2, 2022, the South Coast Air Quality Management District (SCAQMD) website (<https://xappprod.aqmd.gov/find/>) was reviewed to identify any records of historical hazardous/flammable permits, hazardous substances and/or petroleum products handling, registered USTs, and/or unauthorized releases of hazardous materials for the subject property addresses of 18650 Cambern Avenue and 18650 Cambern Street. According to the SCAQMD website, no records regarding hazardous substances and/or petroleum products handling practices were on file for the subject property.

Riverside County Department of Environmental Health

On February 22, 2022, the Riverside County Environmental Health Department (RCDEH) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling, unauthorized releases of hazardous substances or petroleum products, hazardous/flammable incidents, and/or registered USTs for the subject property addresses of 18650 Cambern Avenue and 18650 Cambern Street. According to a representative of the RCEHD, no records of historical hazardous/flammable permits, hazardous materials handling, unauthorized releases of hazardous substances or petroleum products, hazardous/flammable incidents, and/or registered USTs were on file for the subject property.

Riverside County Transportation and Land Management Agency

On February 22, 2022, SALEM contacted the RCTLMA regarding records for the subject property APNs and associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. According to a representative of the RCTLMA, the earliest record on file for the associated historical address of 18650 Cambern Street is a building permit for “MH site prep (comm)” dated August 5, 1982. Other records on file for the associated historical address of 18650 Cambern Street include a building permit for “low profile” dated August 9, 1982; a building permit for a “free standing sign” dated October 5, 1982; and a building permit for a “wooden patio to MH” dated October 20, 1982.

SALEM additionally searched the RCTLMA’s Public Land Use System (PLUS) online portal on February 22, 2022. According to the PLUS portal a conditional use permit for a “mobile home sales facility” dated August 9, 1982 was on file. Please refer to Appendix H for copies of RCTLMA records.

Riverside County Planning Department

On February 22, 2022, SALEM contacted the Riverside County Planning Department (RCPD) regarding records for the subject property APNs and associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. According to a representative of the RCPD, no records are on file for the subject property.

As stated in SALEM’s previous Phase I ESA report dated March 18, 2021, the client provided SALEM with a Change of Zone letter to the RCPD noting that the subject property “is not in the flood plain and is only subject to local nuisance runoff,” defining the suitability of the site for subsurface waste disposal (septic system) according to its soil series, and noting that paved access will be required as a condition of development dated June 27, 1980. Please refer to Appendix I for copies of RCPD records.

Riverside County Fire Department

On February 24, 2022, the Riverside County Fire Department (RCFD) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling, and registered USTs for the subject property’s historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. According to a

representative of the RCFD, no records of historical hazardous/flammable permits, hazardous materials handling, or registered USTs are on file for the subject property.

Local Area Tribal Records

According to the EDR Radius Map Report, no tribal records are listed for the subject property or adjoining properties.

8.1 Standard Environmental Record Sources

EDR performed a search of federal, state, and local regulatory agency databases for the subject property and surrounding area. The various search distances as required by ASTM E1527-13 and E1527-21 extended up to one mile from the subject property. Several agencies have published documents that list businesses or properties which have handled hazardous materials or hazardous substances, or may have had a documented release of hazardous substances or petroleum products. The databases consulted in the course of this assessment were compiled by EDR on February 22, 2022 and represent reasonably ascertainable current listings. SALEM did not verify the locations and distances of every site listed by EDR. SALEM verified locations and distances of the sites SALEM deemed as having a potential to environmentally impact the subject property. The actual location of the off-site properties identified may differ from the EDR listing. Table III summarizes the listed properties located within the specified ASTM Search Radii. The EDR Radius Map report is included in Appendix J.

0 = No sites in radius identified

--- = Not Searched

The subject property was not listed in the EDR-provided government database report. No sites with reported releases of hazardous substances or petroleum products to the subsurface were reported within a one-eighth-mile radius of the subject property.

In general, only hazardous substances or petroleum products released from facilities located approximately up-gradient and within a few hundred feet of the subject property, or in a cross-gradient direction close to the subject property, are judged to have a reasonable potential of migrating to the subject property. This

opinion is based on the assumption that materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow.

Two orphan sites were identified in the EDR-provided government database report. Based upon SALEM's visual observations made during our site reconnaissance, as well as various influencing factors including approximate distance from the subject property, the orphan sites are deemed to have a low potential to environmentally impact the subject property and do not present an REC to the subject property.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject property, adjoining, or vicinity properties in the EDR-provided government database report.

No Indian reservations or LUSTs on Indian land were reported on the subject property, adjoining, or vicinity properties in the EDR-provided government database report.

The remaining properties identified by EDR within the specified search radius of the subject property, which appeared on local, state, or federally published lists of sites that use of have had releases of hazardous substances or petroleum products, were determined through SALEM's field observations to be of sufficient distance and/or situated hydraulically cross/down-gradient of the subject property, such that impacts to the subject property are not likely and therefore, do not present an REC to the subject property.

9.0 POTENTIAL VAPOR ENCROACHMENT CONDITION

Vapor intrusion is a way by which chemicals in soil and groundwater can migrate into indoor air. Chemical vapors moving up through soil and into a building are a potential source of indoor air contamination and may pose a risk to human health. In evaluating the potential for a vapor encroachment condition (VEC) on the subject property, SALEM attempted to determine if there was information indicating that chemicals of concern were located within the "critical distance," defined as the lineal distance between the nearest edge of a contaminated plume and the nearest target property boundary. Based on ASTM E 2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the "critical distance" is equal to 100 feet, with the exception of dissolved petroleum hydrocarbons, which have a "critical distance" of 30 feet. If non-aqueous phase petroleum hydrocarbons are present, the 100-foot "critical distance" is utilized.

9.1 Vapor Encroachment Screening

SALEM has performed a Vapor Encroachment Screening (Tier 1) in general accordance with the scope and limitations of ASTM Standard Practice E2600-15 for the subject property. SALEM utilized site and site vicinity specific criteria including groundwater gradient, distance of area properties of environmental concern from the subject property, and the types of constituents of concern which were released to evaluate potential vapor encroachment issues. The purpose of this Vapor Encroachment Screening (Tier 1) is to identify the existing or potential Vapor Encroachment Conditions (VEC), as defined by ASTM E2600-15, affecting the subject property. As part of the screening, SALEM has completed the following questionnaire, as duplicated from Section X3 of ASTM E2600-15.

TABLE IV
Vapor Encroachment Questionnaire

QUESTION	RESPONSE	COMMENTS
1. Property Type?	Vacant	
2. Are there buildings/structures on the subject property?	No	
3. Will buildings/structures be constructed on the subject property in the future?	Yes	

TABLE IV (cont'd)
Vapor Encroachment Questionnaire

QUESTION	RESPONSE	COMMENTS
4. If buildings exist or are proposed, do/will they have elevators?	No	
5. Type of level below grade (existing or proposed)?	Slab-on-Grade (proposed)	
6. Is there ventilation below grade?	N/A	
7. Sump pumps, floor drains, or trenches (existing or proposed)?	No	
8. Radon or methane mitigation system installed?	N/A	
9. Heating system type (existing or proposed)?	HVAC (proposed)	
10. Type of fuel energy (existing or proposed)?	Electric/Natural Gas (proposed)	
11. Have there ever been any environmental problems at the subject property?	No	
12. Does/will a gas station operate anywhere on the subject property?	No	
13. Do any tenants use hazardous chemicals in relatively large quantities on the subject property?	No	
14. Have any tenants ever complained about odors in the building or experience health-related problems that may have been associated with the building?	No	
15. Are the operations (or proposed operations to be performed) on the subject property OSHA regulated?	No	
16. Are there any existing or proposed underground storage tanks (USTs) or aboveground storage tanks (ASTs) located on the subject property?	No	
17. Are there any sensitive receptors (children, elderly, people in poor health, etc.) that occupy or will occupy the subject property?	No	

TABLE V
Additional VEC Criteria

QUESTION	RESPONSE	COMMENTS
1. Is the subject property known to have current or past contamination?	No	
2. Is contamination of the subject property suspected?	No	
3. Is an <u>adjacent</u> property known to have current or past contamination which may have impacted the subject property?	No	
4. Is a <u>nearby</u> property known to have current or past contamination which may have impacted the subject property?	No	
5. Is regional groundwater contamination known to exist beneath the subject property?	No	
6. Are you aware of other conditions which may result in vapor intrusion at the subject property?	No	

Based upon the results of SALEM's Tier 1 VES, it is SALEM's opinion that a potential VEC "likely does not exist" at the subject property. As such, no further assessment is recommended.

10.0 BUSINESS ENVIRONMENTAL RISKS

10.1 Asbestos-Containing Building Materials

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. Asbestos is commonly used as an acoustic insulator, thermal insulation, fire proofing and in other building materials. Friable asbestos-containing material (ACM), when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. Non-friable ACM can be crumbled, pulverized, or reduced to powder during machining, cutting, drilling, or other abrasive procedures. Friable ACM is more likely to release fibers when disturbed or damaged than non-friable ACM. Exposure to airborne friable asbestos may result in a potential health risk because persons breathing the air may breathe in asbestos fibers. Continued exposure

can increase the amount of fibers that remain in the lung. Fibers embedded in lung tissue over time may cause serious lung diseases including: asbestosis, lung cancer, or mesothelioma. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are “presumed asbestos-containing material” (PACM).

During SALEM’s site reconnaissance, no structures were observed on the subject property. Therefore, ACMs are not considered an on-site environmental concern at this time.

10.2 Lead-Based Paint

Lead is a highly toxic metal that affects virtually every system of the body. While adults can suffer from excessive lead exposures, the groups most at risk are fetuses, infants, and children under 6. The Consumer Product Safety Commission banned the use of lead in paint in 1978. Most manufactures, however, had ceased using lead well before this time. Paint applied after 1978 is not considered suspect LBP. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as “Title X,” to protect families from exposure to lead from paint, dust, and soil. Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on lead-based paint (LBP) and LBP hazards before the sale or lease of most housing built before 1978. Sellers, landlords, and their agents are responsible for providing this information to the buyer or renter before sale or lease.

According to Section 1017 of Title X, “LBP hazard is any condition that causes exposure to lead from lead-contaminated dust; bare, lead-contaminated soil; or LBP that is deteriorated or intact LBP present on accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.” Therefore, under Title X intact lead-based paint on most walls and ceilings is not considered a “hazard,” although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. LBP is defined as any paint, varnish, stain, or other applied coating that has 1.0 mg/cm² (or 5,000 µg/g by weight) or more of lead.

During SALEM’s site reconnaissance, no structures were observed on the subject property. Therefore, LBP is not considered an on-site environmental concern at this time.

10.3 Radon

Radon is a naturally occurring gaseous substance resulting from the radioactive decay of uranium to radium and then to radon. Uranium is a common element found in many geologic formations and substrates, particularly igneous and metamorphic rocks. Radon has a half-life of only 3.8 days and decays to its daughter elements (polonium 218, polonium 214, bismuth 214, and lead 214). It is these daughter elements that represent the health hazard commonly associated with radon. Radon gas can enter a building through cracks in the foundation and walls and become attached to dust particles and inhaled which could cause damage to human lung tissue. Radon is measured in picocuries per liter of air (pCi/L). The EPA has an established safe radon level of 4 pCi/L. Based on the EPA Radon Zone Map of California, the subject Property is located within **EPA Zone 2**, which has a predicted indoor radon screening between 2 pCi/L and 4 pCi/L (Low Potential). The EDR-provided radon data cites Riverside County has having 100% of 12 1st floor spaces with <4 pCi/L. However, radon levels may vary from one area to another and the only way to accurately assess radon gas levels on the subject property is to conduct a radon gas survey.

10.4 Mold

Molds are microscopic organisms found virtually everywhere, indoors, and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity,

condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding). Mold growths often appear as discoloration, staining, or fuzzy growth on building materials or furnishings and are varied colors of white, gray, brown, black, yellow, and green. In large quantities, molds can cause allergic symptoms when inhaled or through the toxins the molds emit.

During SALEM's site reconnaissance, no structures were observed on the subject property. Therefore, mold is not considered an on-site environmental concern at this time.

11.0 DISCUSSION OF FINDINGS

Historical Uses

The subject property comprises five contiguous rectangular-shaped parcels of undeveloped land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street. SALEM's review of historical aerial photographs indicates that the subject property was undeveloped land in 1938. From at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that was deeper in the center and sloped out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue and may have been utilized for disposal of wastes generated from clay mining operations. By 1978, the pit had been backfilled and the subject property appeared to have been graded. SALEM's review of historical aerial photographs and City Directories reveals that the northwestern portion of the subject property was occupied by a mobile home sales facility from least 1985 until at least 1992. By 1994, the subject property was vacant land. Based on SALEM's site reconnaissance, previous environmental reports, and contacts with state and local regulatory agencies, no RECs were identified in connection with the historical use of the subject property.

Current Uses

At the time of SALEM's February 25, 2022 site reconnaissance, the subject property was undeveloped graded land covered in native vegetation. A minor amount of illegal dumping was observed on the subject property near the east corner including household items and asphalt. During the visual observations of the subject property, no hazardous substances or petroleum products were observed to be stored or handled on the subject property. Exposed surface soils did not exhibit obvious signs of discoloration. No other obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the area observed. Based on SALEM's field observations and contact with state and local regulatory agencies, no RECs were identified in connection with the current use of the subject property.

Adjoining Properties

Based on SALEM's field observations, review of the EDR Radius Map Report, and consultation with state and local regulatory agencies, no RECs exist in connection with the subject property from adjoining property uses.

11.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E1527-13 and E1527-21 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objects of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of

data gap. The following is a summary of data gaps encountered in the process of preparing this report including an observation as the presumed significance of that data gap to the conclusions of this assessment.

- Some of the intervals between documented sources exceeded five years.

However, taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that these data gaps might alter the conclusions of this assessment.

12.0 SUMMARY AND CONCLUSIONS

We have performed a *Phase I Environmental Site Assessment Update* in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of the Proposed Commercial Development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019; associated historical addresses of 18650 Cambern Avenue and 18650 Cambern Street), the *property*. Any exceptions to, or deletions from, this practice are described in Section 13 of this *report*. During the course of this assessment, SALEM identified no evidence of RECs in connection with the subject property as defined by ASTM E1527-13 and E1527-21.

13.0 LIMITATIONS

This Phase I ESA Update Report has been prepared for the exclusive use of **Evergreen Devco, Inc.; Evergreen-Cambern & Central North, L.L.C.; Evergreen-Cambern & Central South, L.L.C.; Evergreen-Cambern & Central South Land, L.L.C; and Cambern & Central North, L.L.C** and their subsidiaries and affiliates. Unauthorized use of or reliance on the information contained in this report, unless given express written consent by SALEM, **Evergreen Devco, Inc.; Evergreen-Cambern & Central North, L.L.C.; Evergreen-Cambern & Central South, L.L.C.; Evergreen-Cambern & Central South Land, L.L.C; and Cambern & Central North, L.L.C** is strictly prohibited. The following limitations and exceptions apply:

- The scope of work completed was designed solely to meet the needs of SALEM's client. SALEM shall not be liable for any unintended usage of this report by another party. In addition, based on the ASTM guidelines, the ESA is only valid if completed within 180 days of an acquisition or the transaction necessitating the ESA.
- No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. This ESA was designed to reduce, but not eliminate the potential for RECs at the subject property, within reasonable limits of time and cost. The ESA is not intended to be exhaustive or all-inclusive and does not represent a guarantee of the identification of all possible environmental risk.
- An ESA is intended to be a non-intrusive investigation and generally does not include sampling or testing of air, soil, water or building materials. No destructive testing was completed and concealed areas, such as behind walls or within machinery, were not accessed. Testing, if any, is designed solely to meet the needs of the ESA, not to meet any local, state, or federal regulations and should not be utilized as such.

-
- Information in this report is based on personal interviews, government records, published resources, and various historical documents. Accuracy and completeness of information varies among information sources and may be inaccurate or incomplete. The information utilized in this ESA is from sources deemed to be reliable; however, no representation or warranty is made as to the accuracy thereof. SALEM will have no ongoing obligation to obtain and include information that was not reasonably ascertainable, practically reviewable or provided to SALEM in a reasonable timeframe to formulate an opinion and complete the assessment by the agreed upon due date.
 - Unless specifically identified in the scope of work, the ESA excludes consideration of non-ASTM scope issues including, but not limited to, lead in drinking water, asbestos, lead-based paint, industrial hygiene, health and safety, endangered species, wetlands, indoor air quality, vapor intrusion, electromagnetic fields, biological agents, or mold.
 - The ESA includes some information that may be relevant to regulatory compliance, but is not intended and shall not be construed as a compliance audit and cannot be considered a verification of regulatory compliance. While the general environmental setting of the subject property is described, this assessment is not intended to be a formal flood plain or wetland determination, and no warranty is made thereof. Depending on its past, present, or future intended use, the property under review may or may not be subject to regulation and permitting under environmental and health and safety laws, such as, but not limited to, the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Occupational Safety and Health Act, and other federal, state, and local regulations. SALEM assumes no responsibility or liability respecting regulatory permitting or compliance issues.
 - Client is advised that if the ESA is obtained with the intent of qualifying the purchaser as an innocent landowner, contiguous property owner, or bona fide prospective purchaser under CERCLA, there will be continuing obligations of due care and responsiveness and additional legal requirements that likely apply to such status. SALEM accepts and undertakes no responsibility as to such requirements and advises that counsel be separately consulted with respect to such requirements.
 - The findings and conclusions presented in this Phase I ESA Report are based on field review and observations and on data obtained from the sources listed in the report. The findings of this report are valid as of the present. The passage of time, natural processes or human intervention on the subject property or adjacent properties and changes in the regulations can cause changed conditions which can invalidate the findings and conclusions presented in this report.

14.0 QUALIFICATIONS

This Phase I ESA Update was conducted under the supervision or responsible charge of SALEM's undersigned environmental professional with oversight from the undersigned registered professional. The work was conducted in accordance with ASTM E1527-13 and E1527-21, accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and SALEM's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the

subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

First American

Commitment

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-983972-PHX1

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACTIONAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

COMMITMENT CONDITIONS

1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- (a) the Notice;
- (b) the Commitment to Issue Policy;
- (c) the Commitment Conditions;
- (d) Schedule A;
- (e) Schedule B, Part I—Requirements; and
- (f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I—Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

First American

Schedule BI & BII

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-983972-PHX1

Commitment No.: NCS-983972-PHX1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- B. Pay the agreed amount for the estate or interest to be insured.
- C. Pay the premiums, fees, and charges for the Policy to the Company.
- D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- E. Releases(s) or Reconveyance(s) of Item(s): 9
- F. Other: None
- G. You must give us the following information:
 - a. Any off record leases, surveys, etc.
 - b. Statement(s) of Identity, all parties.
 - c. Other:

With respect to the trust referred to in the vesting:

- a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
- b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
- c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

The following additional requirements, as indicated by "X", must be met:

- ☒ H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- ☒ I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.
- ☐ J. The following LLC documentation is required from:
- (i) a copy of the Articles of Organization
 - (ii) a copy of the Operating Agreement, if applicable
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Company Consent to the current transaction
- ☐ K. The following partnership documentation is required :
- (i) a copy of the partnership agreement, including all applicable amendments thereto
 - (ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iii) express Partnership Consent to the current transaction
- ☐ L. The following corporation documentation is required:
- (i) a copy of the Articles of Incorporation
 - (ii) a copy of the Bylaws, including all applicable Amendments thereto
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Corporate Resolution consenting to the current transaction
- ☐ M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met: Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.
- ☐ N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-983972-PHX1

Commitment No.: NCS-983972-PHX1

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.
2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
7. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.
8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

COMMITMENT CONDITIONS

1. DEFINITIONS

- (a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
- (b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
- (c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
- (d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
- (e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
- (f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
- (g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
- (h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

- (a) the Notice;
- (b) the Commitment to Issue Policy;
- (c) the Commitment Conditions;
- (d) Schedule A;
- (e) Schedule B, Part I—Requirements; and
- (f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

- (a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
 - (i) comply with the Schedule B, Part I—Requirements;
 - (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
 - (iii) acquire the Title or create the Mortgage covered by this Commitment.
- (b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
- (c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
- (d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
- (e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
- (f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
- (g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

- (a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
- (b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
- (c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
- (d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
- (e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
- (f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. Schedule BI & BII

ALTA Commitment for Title Insurance

ISSUED BY

First American Title Insurance Company

File No: NCS-1115667-PHX1

Commitment No.: NCS-1115667-PHX1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

- A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.
- B. Pay the agreed amount for the estate or interest to be insured.
- C. Pay the premiums, fees, and charges for the Policy to the Company.
- D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.
- E. Releases(s) or Reconveyance(s) of Item(s): None
- F. Other: None
- G. You must give us the following information:
 - a. Any off record leases, surveys, etc.
 - b. Statement(s) of Identity, all parties.
 - c. Other:

A deed from the spouse of any married vestee herein be recorded in the public records, or the joinder of the spouse of any married vestee named herein on any conveyance, encumbrance or lease to be executed by the vestee.

The deed should contain the following statement:

"It is the express intent of the grantor, being the spouse of the grantee, to convey all right, title and interest of the grantor, community or otherwise, in and to the herein described property to the grantee as his/her sole and separate property."

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

With respect to the trust referred to in the vesting:

- a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
- b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
- c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

The following additional requirements, as indicated by "X", must be met:

- ☒ H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- ☒ I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

- ☐ J. The following LLC documentation is required from:
- (i) a copy of the Articles of Organization
 - (ii) a copy of the Operating Agreement, if applicable
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Company Consent to the current transaction

- ☐ K. The following partnership documentation is required :
- (i) a copy of the partnership agreement, including all applicable amendments thereto
 - (ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iii) express Partnership Consent to the current transaction

- ☐ L. The following corporation documentation is required:
- (i) a copy of the Articles of Incorporation
 - (ii) a copy of the Bylaws, including all applicable Amendments thereto
 - (iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
 - (iv) express Corporate Resolution consenting to the current transaction

- ☐ M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met:

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.
2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
7. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.
8. General and special taxes and assessments for the fiscal year 2021-2022.
First Installment: \$879.95, PAID

ALERT - CA Senate Bill 2 imposes an additional fee of \$75 up to \$225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. The property covered by this report is vacant land.

(Affects Parcels 1, 2 and 3)

2. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 18650 Cambern Street, Lake Elsinore, CA.

(Affects Parcel 4)

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

None

4. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. Introduction

"In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the 'Brownfields Amendments'), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that 'all appropriate inquiry' is not completed" - American Society for Testing and Materials (ASTM) E1527-13 Appendix X3: User Questionnaire

1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law?

No, based on my actual knowledge and review of company records

2. Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No, based on my actual knowledge and review of company records

3. As the user of the Phase I Environmental Site Assessment (ESA), do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No, based on my actual knowledge and review of company records

SALEM
engineering group, inc.

4. Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

We believe the purchase price represents fair market value

5. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

A. Do you know the past uses of the subject property?

No, based on my actual knowledge and review of company records

B. Do you know of specific chemicals that are present or once were present at the subject property?

No based on my actual knowledge and review of company records

C. Do you know of spills or other chemical releases that have taken place at the subject property?

No, based on my actual knowledge and review of company records

D. Do you know of any environmental cleanups that have taken place at the subject property?

No, based on my actual knowledge and review of company records

6. As the user of the Phase I ESA, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?

No, based on my actual knowledge and review of company records

I, the user of this Phase I ESA (or authorized representative of the User), do hereby attest that I have carefully considered the questions herein and have presented answers to the best of my knowledge and ability based upon the Responsibilities of the User as required within ASTM E1527-13 guidance.

OWNER QUESTIONNAIRE

PROPOSED GROCERY AND QSR BUILDINGS
CENTRAL AVENUE & CAMBERN AVENUE
LAKE ELSINORE, CALIFORNIA

Date: MARCH 2, 2022 Site Address: 4.96 ACRES APN: 377-020-014
N.E. CORNER OF CAMBERN & CENTRAL
CITY OF LAKE ELSINORE, CA.

Owner Name: BOYLE, BILLIE J. TRUSTEES Owner Phone No. (required): (480) 556-1512
& JOSEPHINE - BOYLE FAMILY TRUST DATED JUNE 14, 1994

Provide Name of Previous Owner(s) and Phone Number if known: RICHARD BRECHTEL, AN UNMARRIED MAN
& EVA BRECHTEL AN UNMARRIED WOMAN

How long have you owned the subject property? APPROXIMATELY 45 YEARS - ACTUALLY 41
IN MY RECORD

Have any previous investigations been conducted on the subject property? NO

What is the subject property currently used for? BARE LAND

Former Uses/Occupants of the subject property? UNKNOWN - PURCHASED AS BARE LAND

Age of onsite structure(s), if known? NO STRUCTURES

Do you have any knowledge of existing or previous underground or aboveground storage tanks being located on the subject property? NO

Do you know of any chemical or hazardous materials, persistent pesticides/herbicides being used, stored or discharged on the subject property? NO

Do you know of any Environmental Cleanup Liens or slurry walls or vapor barriers filed or recorded against the subject property? NO

Do you know of any buried materials such as garbage dumps or burn pits on the subject property? NO

Are there currently or were there historically any septic systems and/or water wells located on the subject property? NO

Any dry wells/monitoring wells? NO

Are there any drainage or disposal ponds located on the subject property? NORMAL DRAINAGE / NO DISPOSAL Ponds

Is the subject property connected to municipal water and sewer systems? GIVEN THAT THERE'S
NEVER BEEN A BUILDING OR HOMES PROBABLY
NOT CONNECTED TO WATER OR
SEWER SYSTEM.

Do you have any commonly known, reasonably ascertainable, or specialized knowledge or experience related to the subject property or nearby properties? NO

Are you aware of any contamination on the subject property? NO

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Salem Engineering Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Geotechnical Investigation Report

May 14, 2021

May 14, 2021

Project No. 3-421-0165

Mr. John Prystasz
Evergreen Devco, Inc.
2390 East Camelback Road, Suite 410
Phoenix, AZ 85016

Subject: GEOPHYSICAL INVESTIGATION REPORT
Proposed Commercial Development
NEC Central Avenue and Cambern Avenue
Lake Elsinore, California

Dear Mr. Prystasz:

SALEM Engineering Group (SALEM) has prepared this Geophysical Investigation Report to summarize the results of a geophysical survey that was performed at the proposed Commercial Development site located at the northeast corner (NEC) of Central Avenue and Cambern Avenue in Lake Elsinore, California (subject property – see Figure 1).

SALEM's March 18, 2021 Phase I Environmental Site Assessment (ESA) identified the following evidence of a Recognized Environmental Condition (REC) in connection with the subject property as defined by ASTM E1527-13:

- Based upon SALEM's review of historical aerial photographs and topographic maps, between at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that is deeper in the center and slopes out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue. By 1978, the pit had been backfilled and the subject property appeared to have been graded. It is SALEM's opinion that the pit may have been utilized for the disposal of waste generated by the clay pit mining operations.

Consequently, SALEM recommended conducting a geophysical survey of the northwestern portion of the subject property (approximately 2 acres) to evaluate whether waste materials or other debris were placed into the former pit, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey. A site plan showing the area of investigation is included as Figure 2.

Geophysical Survey Procedures

SALEM utilized Spectrum Geophysics (Spectrum) of Chatsworth, California to conduct a geophysical survey for potential backfilled cavities, waste materials or other debris, as well as other sub-grade structures of environmental concern (hoists, clarifiers, and sumps). Spectrum employed EM-31 terrain conductivity, EM-61 high sensitivity metal detection (MD), vertical magnetic gradient (VMG), shallow focus terrain conductivity (TC), and ground penetrating radar (GPR) investigation methods.

The geophysical investigation was performed on April 19, 2021 on the subject property. A survey grid was established on a rectangular coordinate system to provide horizontal control. Using a fiberglass measuring tape, Spectrum established an east-west baseline, then marked a series of parallel lines oriented perpendicular to the baseline and spaced 4 feet apart.

The following equipment was used to perform the geophysical survey:

- Radio detection 4000/8000 transmitter with matched receiver;
- Schonstedt Mac Series hand-held magnetometer;
- Fisher TW-6 M-scope – shallow focus metal detector;
- Dynatel 500 Series transmitter with matched receiver;
- Sensors and Software Noggin Cart, or MALA GPR unit;
- 8 and 33 KHz and 512 Hz sondes;
- EM-31 terrain conductivity/3D GPR unit; and
- EM-61 high sensitivity metal detector.

Spectrum initially visually inspected the subject property for evidence of subsurface utilities or other buried features. Each identified utility was investigated using active electromagnetic utility-locating instruments and its surface trace was demarcated on the ground using color-coded spray paint. The subject property was further investigated with a passive electromagnetic receiver tuned to 50/60 cycle electrical current to detect possible electrical lines (with voltages up to 30,000 volts) which may be nearby. The surface traces of detected electrical lines were demarcated on the ground using red spray paint. The subject property was further investigated using audio, radio, and 1 KHz frequencies to identify utilities re-radiating these ambient signals. In addition, the subject property was investigated using a shallow focus terrain conductivity meter to identify possible buried and abandoned conduits, as well as piping which may have no surface expression, or which may be less than 20 feet in length.

In an effort to identify drums and USTs, Spectrum utilized an EM-61 metal detector at the subject property. The EM-61 transmitter generates a primary field of short pulses of electromagnetic energy that travel downward and outward. This energy becomes "trapped" in conductive materials and causes a secondary magnetic field to be generated in these materials. Between pulses, the receiver measures the voltage of the decay curve of this secondary magnetic field, which is proportional to the conductivity of the subsurface materials. The data was downloaded to a laptop computer and processed in the field. Contour maps were generated to assist in identifying anomalous areas associated with buried metal.

Shallow focus terrain conductivity and GPR were also used to further characterize the source of significant EM-61 anomalies. The surface trace of detected features was marked on the ground with spray paint and/or stakes with flagging ribbon.

Spectrum utilized a MALA or Noggin ground penetrating radar unit in an effort to identify possible subsurface obstructions. A high frequency radio signal was transmitted into the ground via the antenna. As radio waves propagated into the ground, these signals were reflected off structures with differing electrical properties. These reflected signals were then captured by the receiver and were presented as vertical profiles on the GPR unit.

Geophysical Survey Results

A site plan showing an interpretive map of the geophysical survey and color-enhanced contour maps of the EM-61 and EM-31 differential data collected within the survey area are included as Figures 1 through 3, respectively, in Appendix A.

The largest anomalies detected in the survey area were Anomalies G and H. Both are soil density anomalies of unknown origin. Anomaly G is a high conductivity anomaly located in the northeastern portion of the survey area. Anomaly H is a low conductivity anomaly located in the central portion of the survey area close to the area where the former pit was likely located. Low conductivity anomalies are commonly

associated with areas of a coarser-grained material. Both anomalies could be associated with a backfilled excavation, different soil types (i.e., sand in one area and silt or clay in the other area), or it could simply be that the area has a lower compaction percentage than the surrounding soils. Several utility conduits were identified, along with six rectangular-shaped metallic anomalies. No USTs, septic tanks, clarifiers, sumps, or suspected septic piping were identified during the performance of the geophysical survey.

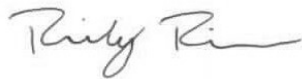

The geophysical survey did not identify any subsurface anomalies of potential environmental concern such as waste materials or other debris that may have been placed in the former pit. No further investigation is warranted.

We declare that, to the best of our professional knowledge and belief, this investigation was conducted objectively following generally accepted field practices in a matter to determine if subsurface features of potential environmental significance were present in the area evaluated.

If you have any questions, or if we can be of further assistance, please do not hesitate to contact our office at (909) 980-6455.

Respectfully submitted,

SALEM Engineering Group, Inc.

1.0 INTRODUCTION

On April 7th, 2021, Spectrum Geophysics conducted a geophysical investigation on the site of a vacant property, located at the East corner of Central Ave and Cambern Ave in Lake Elsinore, California.

The purpose of the investigation was to locate detectable buried utilities, buried metallic features and possible excavations or areas could be associated with historical mining activities. The area of investigation, as designated by Reily Rivera of Salem Engineering, was approximately 2.25 acres in size and was soil covered.

Site interferences included metal fencing surrounding three sides of the area of investigation, a metal sign in the north corner of the area, two metal benches and a trash can.

2.0 EQUIPMENT

The equipment used during this investigation consisted of a Geonics EM-31 terrain conductivity meter (EM-31), a Sensors & Software “Noggin Smart Cart” ground penetrating radar (GPR) unit coupled to a 500-MHz antenna, a Fisher TW-6 M-Scope shallow-focus metal detector (M-Scope) and a RadioDetection RD4000 electromagnetic utility locator (RD4000). A Trimble Pro 6H GPS unit and a digital field computer were used during EM-31 data acquisition.

3.0 METHODS AND FIELD PROCEDURES

3.1 EM-31 Terrain Conductivity Meter

The EM-31 instrument has a long history of demonstrated use for the delineation of buried features (both metallic and nonmetallic), chemical waste such as that associated with shallow contaminant plumes, and lateral changes in lithology or mineralogy such as coarse grained gravel vs clay, or even construction waste material (such as bits of construction debris with high metals content) versus native soils.

EM-31 Standard data acquisition (archive)

The EM-31 is an instrument that measures the lateral variation in subsurface conductivity (or resistivity, its reciprocal), where lateral changes in measured near surface conductivity typically indicate changes in the conductivity of near surface soils. Because the material of which the subsurface is composed controls the ability of the subsurface to carry an electrical current (or hold a secondary field), different conductivity (or resistivity, its reciprocal) values from the EM-31 measurements can be used to delineate lateral contrasts in the composition of subsurface materials. In particular, with the aid of a regularly spaced grid of data points, the EM-31 can be used to delineate the boundaries of buried metallic features, such as old building foundations, areas of reinforcement, buried steel bars, or metallic USTs or clarifiers; as well as buried unreinforced

concrete structures, buried nonmetallic debris, and nonmetallic utilities, when compared with background soils.

The EM-31 (an electromagnetic induction instrument) is a walking instrument that consists of two coils (transmitter and receiver) mounted on either end of a plastic boom, where boom lengths are either 12 feet (standard) or 6 feet (short). During operation, an alternating current is applied to the transmitter coil, which sends a primary electromagnetic (EM) field into the ground. This primary field induces eddy currents in buried conductive material that are encountered, and these eddy currents generate a secondary magnetic field. This secondary magnetic field is measured at the receiver and compared to the primary field in terms of the component in phase with the primary field (in-phase) and the component out of phase with the primary magnetic field (the quadrature component). The quadrature component is converted to read conductivity in millimhos per meter. The in-phase component is set to read 0 in background materials and is very sensitive to buried metal.

Prior to the acquisition of EM-31 data in the designated area of investigation, a base station was established in an area determined to be representative of background soils, and relatively unaffected by surface metallic debris, buried metallic debris, and other sources of cultural interference. Before any field data were acquired, the base station was occupied and the in-phase component of the EM-31 was zeroed with the instrument at normal operating height. Once this was done, readings of conductivity and in-phase component were collected and stored in a digital field computer. The base station data were used to monitor instrument drift and determine background conductivity at the Site.

Once the EM-31 base station data had been acquired, EM-31 readings were collected along parallel northeast-southwest survey lines spaced approximately 5 feet apart within the designated area of investigation at the Site. These readings were collected at a rate of 5 readings per second and stored, along with GPS positions, in a digital field computer. The EM-31 data were processed in the field and used to generate color enhanced contour maps of the conductivity data to assist in identifying anomalous areas that could be associated with buried metallic material or features of interest.

3.2 Electromagnetic Utility Location

During this investigation, active electromagnetic (EM) utility-locating methods were used to relocate linear EM-61 anomalies and to delineate the surface trace of detectable underground utilities.

Active locating was initiated by transmitting an alternating current at a known frequency (8 kHz for this site) on a street lighting line exposed at the surface. A receiver, tuned to 8 kHz, was then used to locate the signal maxima (or surface trace) of the applied signal. The street lighting did not pass through the area of investigation and was not mapped.

The Fisher M-Scope metal detector was used to relocate shallow buried metallic features identified in the EM-61 data. The M-Scope has a transmitter and a receiver at the ends of a short boom. The transmitter emits a radio-frequency source signal that induces a secondary

magnetic field in metallic material in its immediate vicinity. The receiver measures the signal strength of this secondary magnetic field and emits an audible response, the volume and pitch of which increase in the presence of metallic material. The sensitivity of the M-Scope allows the operator to locate the lateral boundaries of a metallic object.

Detected utilities were marked on the ground with surveyor's paint.

4.0 RESULTS

A geophysical interpretation map is presented in Figure 1, a contour map of the EM-31 Conductivity data is presented in Figure 2 and a contour map of the EM-31 In-phase data is presented in Figure 3.

4.1 EM-31

The colors in the EM-31 contour maps represent the magnitudes of the measured values where yellow to light green colors represent background readings, deep green to blue colors represent measured values below background and orange to pink colors represent increasing values above background. The dimensions of EM-31 anomalies are usually much larger than the dimensions of the corresponding sources, however small objects like scrap metal are usually undetected by the EM-31. It should be noted that the orientation of the EM-31 coils relative to a conductor will influence the magnitude of the measured values. When crossing a linear conductor at a right angle to oblique angle, the EM-31 response is typically negative over the conductor with positive "shoulders" either side of the conductor. When surveying parallel to a linear conductor the EM-31 response is typically positive and well above background readings. As the amplitude drops below background and into negative values this response is typically associated with areas of reinforced concrete or buried metal.

The EM-31 data were used to identify possible buried utilities, buried metallic features and possible excavations or areas that could be associated with historical mining activities. A few linear anomalies were observed in the southern and western portion of the data and follow-up with EM-utility locating methods and GPR identified these as possible conduits. One anomaly in the north corner of the area of investigation was observed and is most likely caused by a metal sign in that location. Several significant anomalies were detected in the EM-31 data that could not be attributed to above ground cultural features and/or detected utilities. These anomalies are detailed below:

Anomaly A is an 18- X 18-foot, high amplitude anomaly located along Eastings 6232208 to 6232226 and between Northings 2198467 to 2198485. This anomaly is significant in size and is evident in both the EM-31 conductivity and in-phase data. EM-utility locating methods and GPR provided no further information.

Anomaly B is a 29- X 11-foot, high amplitude, metallic anomaly located along Eastings 6232213 to 6232240 and between Northings 2198488 to 2198517. This anomaly is significant in size and is evident in the EM-31 in-phase data only. Two metal benches and a trash can were identified to the west of the anomaly but could not be declared as the sole source. This anomaly was identified in post-processing and therefore additional follow-up to identify other possible subsurface sources has not been completed.

Anomaly C is a 17- X 12-foot, moderately low amplitude anomaly located along Eastings 6232145 to 6232165 and between Northings 2198269 to 2198290. This anomaly is relatively small in size and is evident in the EM-31 in-phase data only. No surface features were identified in this area to indicate an aboveground cause. This anomaly was identified in post-processing and therefore additional follow-up to identify other possible subsurface sources has not been completed.

Anomaly D is a 10- X 10-foot, moderately low amplitude anomaly located along Eastings 6232313 to 6232323 and between Northings 2198293 to 2198303. This anomaly is relatively small in size and is evident in the EM-31 in-phase and conductivity data. Confirmation of a metallic source was determined using shallow focus metal detection; however, no specific source for the anomaly could be determined. EM-utility locating methods and GPR provided no further information.

Anomaly E is a 7.5- X 7-foot, moderately low amplitude anomaly located along Eastings 6232324 to 6232331 and between Northings 2198302 to 2198310. This anomaly is relatively small in size and is evident in the EM-31 in-phase and conductivity data. Confirmation of a metallic source was determined using shallow focus metal detection; however, no specific source for the anomaly could be determined. EM-utility locating methods and GPR provided no further information.

Anomaly F is an 8.5- X 33-foot, high amplitude, in-phase anomaly located along Eastings 6232511 to 6232540 and between Northings 2198455 to 2198484. This anomaly is significant in size and is evident in the EM-31 in-phase data only. No surface features were identified in this area to indicate an aboveground cause. This anomaly was identified in post-processing and therefore additional follow-up to identify other possible subsurface sources has not been completed.

Anomaly G is an 8.5- X 33-foot, high amplitude, conductivity anomaly located along Eastings 6232376 to 6232487 and between Northings 2198486 to 2198597. This anomaly is significant in size and is evident in the EM-31 conductivity data only. Based on the elevated conductivity amplitude and subtle topography change observed in the field, it is possible that this anomaly could be associated with an excavation or possible mining activity. EM-utility locating methods and GPR provided no further information.

Anomaly H is a 114- X 60-foot, slightly low amplitude, conductivity anomaly located along Eastings 6232230 to 2198513 and between Northings 2198417 to 2198550. This anomaly is significant in size and is evident in the EM-31 conductivity data only. Low amplitude anomalies can indicate a coarser grained material, therefore, it is possible that this anomaly could be associated with an excavation or possible mining activity. No surface features were identified in this area to indicate an aboveground cause. This anomaly was identified in post-processing and therefore additional follow-up to identify other possible subsurface sources has not been completed.

5.0 LIMITATIONS

The detection of subsurface objects and utilities is dependent upon acquiring reliable data with geophysical instruments above ground. These data may be interpreted as representative of subsurface objects. The electromagnetic waves or fields being measured, however, may be attenuated and/or distorted by a number of factors including soil moisture, corrosion, and proximity to other surface and subsurface structures. A discussion of the limitations of each method follows.

5.1 EM-31

The EM-31 is capable of detecting changes in soil up to 10 feet below ground surface in vertical dipole mode, with the bulk of the subsurface information being derived from depths of 4-7 feet. The depth at which the EM-31 can detect a metallic object will depend on the conductivity of the soil, local electromagnetic interference, and the amount of metal that the structure contains. For example, the diameter and wall thickness of a metallic pipe, each, influence the data. Additionally, the electromagnetic fields generated by the instrument produce secondary fields, not only in buried features, but also in aboveground metallic objects such as chain-link fencing and signs, which then radiate a field that causes interference to the detection of subsurface features of interest.

Due to electromagnetic interference, the EM-31 instrument was not able to detect subsurface features located within a 15-foot radius of surface metallic objects such as fences or metallic signs. As a result, Figure 1 may not depict all subsurface features present at this site.

5.2 GPR

The performance capability of GPR is dependent on the electrical conductivity of the soil at the site. If the soil conductivity is high, attenuation of the radar signal in the soil can severely restrict the maximum penetration depth of the radar signal. Under favorable conditions depth of penetration can be greater than 10 feet; however, average depths of GPR penetration in Southern California tend to range between 2-5 feet. Soils high in clay content and moisture will have higher signal attenuation, therefore, GPR surveys should be performed in the dry

season if at all possible. Soil moisture, especially in high-clay soils, only increases the radar attenuation rates, further limiting the radar performance.

5.3 General

It should be understood that detecting subsurface objects and utilities is dependent upon the recognition of physical phenomena at the ground surface. These phenomena can be magnetic fields or electro-magnetic waves that give rise to a surface expression which in turn is interpreted as representative of subsurface objects. These waves, however, may be attenuated and/or distorted by a number of factors including soil moisture, corrosion, and proximity to other surface and subsurface facilities.

Phoenix, AZ 85016

Subject: **AAI PHASE I ENVIRONMENTAL SITE ASSESSMENT**
Proposed Commercial Development
East Corner of Central Avenue and Cambern Avenue
Lake Elsinore, CA

Dear Mr. Prystasz:

At your request and authorization, SALEM Engineering Group, Inc. (SALEM) has conducted this Phase I Environmental Site Assessment (ESA) of the proposed Commercial Development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (subject property). During the course of this assessment, SALEM identified the following evidence of a Recognized Environmental Condition (REC) in connection with the subject property as defined by ASTM E1527-13:

- Based upon SALEM's review of historical aerial photographs and topographic maps, between at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that is deeper in the center and slopes out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue. By 1978, the pit had been backfilled and the subject property appeared to have been graded. It is SALEM's opinion that the pit may have been utilized for the disposal of waste generated by the clay pit mining operations. Therefore, SALEM recommends conducting a geophysical survey of the northwestern portion of the subject property to evaluate whether waste materials or other debris were placed into the former pit, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey. If the geophysical survey and test pits identify evidence of waste or other debris being disposed of in the former pit, SALEM recommends conducting a Limited Soils Assessment (LSA) in the area of the former pit to assess potential impacts to on-site soils by various suspected constituents of concern.

We appreciate the opportunity to assist you with this project. If you have any questions, or if we may be of further assistance, please do not hesitate to contact our office at (909) 980-6455.

Respectfully submitted,

SALEM Engineering Group, Inc.

Project No. 3-421-0165

PHASE I ENVIRONMENTAL SITE ASSESSMENT**PROPOSED COMMERCIAL DEVELOPMENT
EAST CORNER OF CENTRAL AVENUE AND CAMBERN AVENUE
LAKE ELSINORE, CA****1.0 EXECUTIVE SUMMARY**

SALEM Engineering Group, Inc. (SALEM) has conducted a Phase I Environmental Site Assessment (ESA) of the proposed Commercial Development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (subject property). The subject property consists of five contiguous rectangular-shaped parcels of undeveloped land (Riverside County Assessor's Parcel Numbers [APNs] 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019) totaling approximately 9.23 acres. The subject property has a historical associated address of 18650 Cambern Avenue. SALEM conducted this Phase I ESA of the subject property in conformance with the American Society for Testing and Materials (ASTM) E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The U.S. Environmental Protection Agency (USEPA) has determined that the ASTM E1527-13 Standard is consistent with the requirements for conducting an "All Appropriate Inquiry" under 40 C.F.R. Part 312. Thus, this Phase I ESA constitutes All Appropriate Inquiry (AAI) designed to identify Recognized Environmental Conditions (RECs) in connection with the previous ownership and uses of the subject property as defined by ASTM E1527-13 and 40 C.F.R. Part 312.

ASTM E1527-13 Section 1.1.1 *Recognized Environmental Conditions* – The term *recognized environmental conditions* is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term as further defined by ASTM "is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Conditions determined to be *de minimis* are not *recognized environmental conditions*.

During the course of this assessment, SALEM identified the following evidence of a Recognized Environmental Condition (REC) in connection with the subject property as defined by ASTM E1527-13:

- Based upon SALEM's review of historical aerial photographs and topographic maps, between at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that is deeper in the center and slopes out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue. By 1978, the pit had been backfilled and the subject property appeared to have been graded. It is SALEM's opinion that the pit may have been utilized for the disposal of waste generated by the clay pit mining operations. Therefore, SALEM recommends conducting a geophysical survey of the northwestern portion of the subject property to evaluate whether waste materials or other debris were placed into the former pit, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey. If the geophysical survey and test pits identify evidence of waste or other debris

being disposed of in the former pit, SALEM recommends conducting an LSA in the area of the former pit to assess potential impacts to on-site soils by various suspected constituents of concern.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E1527-13, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the “*landowner liability protections*,” or “*LLPs*”): that is, the practice that constitutes “*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35) (B).

The Phase I ESA was conducted to identify ‘Recognized Environmental Conditions’ (RECs), ‘Controlled Recognized Environmental Conditions’ (CRECs) and ‘Historical RECs’ (HRECs) as defined by the American Society for Testing and Materials (ASTM) *Designation E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of the ASTM *Designation E1527-13* defines an REC as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” The term as further defined by ASTM “is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” Section 3.2.18 defines a CREC as a “recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” Section 3.2.42 defines HREC as a “past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and land use limitations, institutional controls, or engineering controls).”

2.2 Scope of Work

The objective of the SALEM Phase I ESA scope of work is to provide an evaluation of RECs at the subject property and potential off-site sources. The scope of work for this Phase I ESA conforms to ASTM E1527-13. SALEM was provided authorization to conduct the Phase I ESA by Mr. Jon Prystasz with Evergreen Devco, Inc. on February 18, 2021. In fulfillment of the SALEM scope of work outlined in SALEM’s Proposal No. P3-421-0072, SALEM was retained to perform the following tasks:

- Acquire readily available information regarding land-use history and property development by reviewing historical aerial photographs, pertinent building permit records, historic city directories, as well as reviewing recent and historic topographic land-use maps of the subject property and surrounding area.

-
- Reviewing readily available local, state and federal regulatory agency databases listed in ASTM E1527-13 and compiled by Environmental Data Resources, Inc. (EDR), including but not limited to CERCLA and NPL lists for sites within one mile of the subject property. State databases, including but not limited to CALSITES, Hazardous Substance Account Act, Cortese, SWIS, SWAT, Well Investigation Program (AB1803), and LUFT, were reviewed for sites within one mile of the subject property.
 - Performing a reconnaissance of the subject property and surrounding areas (up to one-half mile beyond site boundary), with regard to potential off-site sources of degradation to the subject property, which included photograph documentation of subject property conditions, and identification of potential environmental concerns.
 - Interviews with persons knowledgeable of the previous and current ownership and uses of the subject property.
 - Identifying aboveground storage tanks and/or indications of underground storage tanks on-site.
 - In addition to ASTM E1527-13, SALEM recognizes ASTM *Standard Guide for Vapor Encroachment Screening (VES) on Property Involved in Real Estate Transactions* (ASTM E2600-15) as an industry-accepted guideline to determine if a Vapor Encroachment Condition (VEC) exists at the target property. A VES consists of reviewing the Phase I ESA data combined with the application of professional judgment.
 - SALEM evaluates the regulatory agency databases to determine if there are known or suspect contaminated sites within a minimum search distance of the target property. In addition, SALEM attempted to determine whether soil and/or groundwater have been impacted within the critical distances outlined in ASTM E2600-15.
 - Preparing this report of SALEM's findings and recommendations if warranted.

3.0 SITE DESCRIPTION

The subject property consists of five contiguous rectangular-shaped parcels of land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has a historical associated address of 18650 Cambern Avenue. At the time of SALEM's March 9, 2021 site reconnaissance, the subject property was undeveloped graded land covered with native vegetation. The subject property is located in Section 31, Township 5 South, Range 4 West, San Bernardino Baseline and Meridian, United States Geological Survey (U.S.G.S.) 7.5 Minute Topographic Map, Lake Elsinore, California Quadrangle dated 2012.

4.0 PHYSIOGRAPHY AND HYDROGEOLOGIC CONDITIONS

The subject property is located in the Elsinore Valley northwest of Lake Elsinore within the Peninsular Ranges Geomorphic Province of California. The Elsinore Valley is bounded on the southwest by the Santa Ana and Elsinore Mountains, and on the northeast by lower-elevation rolling hills. The Elsinore Valley is graben, bounded by the Glen Ivy Fault to the north, and the Willard and Wildomar Faults to the south (United States Geologic Survey [USGS], 1963 and Sharp, 1978). The flood plain deposits and valley fill of the Elsinore Valley consist of late Pliocene-aged alluvial deposits, including gravel, sand, clayey and silty sand, and clay ranging

up to 300 feet in thickness. The alluvial deposits overlie the Martinez Formation, which consists of sandstone and conglomerate, siltstone and clay deposits of Tertiary age. The Martinez Formation overlies the southward dipping, meta-igneous, basement rock deposits (Sharp, 1978). The subject property lies in the Elsinore hydrologic sub-area of the Elsinore Valley Hydrologic Unit. Groundwater beneath the subject property vicinity generally occurs within the Quaternary alluvium as perched aquifers or as the regional aquifer.

According to California Regional Water Quality Control Board (RWQCB) records for the ARCO #5618 gasoline station leaking underground storage tank (LUST) site at 29355 Central Avenue, located approximately 1,100 feet southwest of the subject property, groundwater was first encountered between 29.53 and 41.36 feet below ground surface (bgs) with a general direction of flow to the south-southwest. However, local groundwater level and flow direction may vary due to seasonal fluctuations in precipitation, usage demands, geology, and/or surface topography.

5.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject property and adjoining properties was conducted by SALEM's environmental assessor on March 9, 2021. The objective of the site reconnaissance is to identify RECs, including the storage and handling of hazardous substances and petroleum products on or in the vicinity of the subject property which have the potential to environmentally impact on-site soils, surface water and groundwater.

5.1 Observations

Table I summarizes the visual observations made during our site reconnaissance. A discussion of the physical observations follows Table I. Refer to the Site Map (Figure 1) and color photographs following the text for the locations of the features discussed in this section of the report.

TABLE I
Summary of Observations during Site Reconnaissance

FEATURE	OBSERVED	NOT OBSERVED
Structures (existing)		X
Evidence of past uses		X
Hazardous substances and/or petroleum products (including containers)		X
Aboveground storage tanks (ASTs)		X
Underground storage tanks (USTs) or evidence of USTs		X
Strong, pungent, or noxious odors		X
Pools of liquid likely to be hazardous substances or petroleum products		X
Drums		X
Unidentified substance containers		X
Pad-mounted/Pole-mounted transformers/capacitors/other PCB-containing equipment		X
Subsurface hydraulic equipment		X
Heating/ventilation/air conditioning (HVAC)		X
Stains or corrosion on floors, walls, or ceilings		X
Floor drains and sumps		X
Pits, ponds, or lagoons		X
Stained soil and/or pavement		X
Stressed vegetation		X
Waste or wastewater discharges to surface or surface waters on subject property (including stormwater)		X
Wells (irrigation, domestic, dry, injection, abandoned, monitoring wells)		X
Septic Systems		X

The subject property consists of five contiguous rectangular-shaped parcels of undeveloped land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has an associated historical address of 18650 Cambern Avenue. At the time of SALEM's site reconnaissance, the subject property was undeveloped graded land covered with native vegetation.

- An approximately 150' x 25' mound of sand was observed on the subject property along the subject property's eastern boundary. The mound appeared to contain household rubbish and construction debris. No hazardous substances and/or petroleum products/hazardous wastes were observed on the surface of the sand mounds.
- An approximately 30' x 8' rectangular-shaped mound of dumped asphalt was observed in the eastern corner of the subject property. No hazardous substances and/or petroleum products/hazardous wastes were observed on the surface of the asphalt pile.
- An approximately 10' x 15' area of dumped dry concrete was observed in the southern corner of the subject property. No hazardous substances and/or petroleum products/hazardous wastes were observed on the surface of the concrete pile.
- During the visual observations of the subject property, no hazardous substances or petroleum products were observed to be stored or handled on the subject property. Exposed surface soils did not exhibit obvious signs of discoloration. No other obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the area observed.

5.2 Adjacent Streets and Property Usage

Table II summarizes the adjacent streets and properties uses observed during the SALEM's site reconnaissance.

TABLE II
Adjacent Streets and Property Use

DIRECTION	ADJACENT STREET	ADJACENT PROPERTY USE
Northeast	None	Single-Family Residential
Southeast	None	Single-Family Residential
Southwest	Cambren Avenue	Vacant
Northwest	Central Avenue	Vacant

Based on the observed uses of the properties located immediately adjacent to the subject property, it is unlikely that significant quantities of hazardous substances or petroleum products are stored or handled at the adjacent properties.

5.3 Potable Water Source

The water purveyor for the subject property is the Elsinore Valley Municipal Water District (EVMWD). The EVMWD's water quality monitoring is an on-going program with water samples obtained on a regular basis. It is the responsibility of the EVMWD to provide customers with potable water in compliance with the California Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public.

5.4 Sewage Disposal System

On March 11, 2021, the EVMWD was contacted regarding sewer service for the subject property. According to a EVMWD representative, no records of sewer service are on file for the subject property. However, Riverside County Planning Department (RCPD) records indicate that as part of a "change of zoning

application” submitted on June 20, 1980, the subject property soils were being assessed for the installation of a septic tank filtration field. No additional information was contained in the RCPD files to indicate if the septic system was actually installed. Riverside County Transportation and Land Management Agency (RCTLMA) records indicate that a conditional use permit for a mobile home sales facility was issued on August 9, 1982 for the historical subject property address of 18650 Cambern Avenue. SALEM’s review of historical aerial photographs reveals that the northwestern portion of the subject property was occupied by several rectangular-shaped structures resembling mobile homes from at least 1985 until at least 1990. A septic system was likely associated with the former mobile home sales facility. However, it is unknown if a septic system is currently located in the vicinity of the former mobile home sales facility. The presence of the septic system is not anticipated to adversely impact the subject property due to its presumed use for domestic purposes only. If a septic system is identified during the redevelopment of the subject property, it should be properly abandoned/closed or destroyed in accordance with all applicable state and local guidelines.

5.5 Heating and Cooling Source

No structures are located on the subject property. Therefore, no heating or cooling sources exist at the subject property. No documentation of fuel oil use was identified during review of reasonably ascertainable records and no visual evidence of fuel oil use was identified during the site reconnaissance. Therefore, it is unlikely for a former fuel oil UST to have been used at the subject property and for a release to have occurred.

6.0 USER-PROVIDED INFORMATION

A review of the user-provided Title report and a Phase I ESA User Questionnaire was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject property.

6.1 Title Report

On February 18, 2021 a Commitment for Title Insurance Report for the Boyle family parcel (Riverside County APN 377-020-014) of the subject property by First American Title Insurance Company, dated October 3, 2019 was provided to SALEM by Mr. Jon Prystasz with Evergreen Devco, Inc. The Commitment for Title Insurance Report was reviewed to identify potential deed restrictions, environmental liens or activity and use limitations (AULs) which may have occurred on or exist in connection with the subject property as indicated by the Commitment for Title Insurance Report. SALEM’s review of the Commitment for Title Insurance Report indicated no deed restrictions, environmental liens or AULs for the subject property. However, as quoted from the Commitment for Title Insurance, “this Commitment is not an abstract of Title, report of the condition of Title, legal opinion, opinion of Title, or other representation of the status of Title.” Applicable environmental liens or AULs may not all be listed in the Commitment for Title Insurance. Therefore, SALEM recommends that at the close of the real estate transaction and upon the issuance of the Final Title Report that the Final Title Report be reviewed and any information deviating from that presented in the Commitment for Title Insurance reviewed herein revealing evidence of RECs be added.

On February 18, 2021 a Commitment for Title Insurance Report for the Nielsen family parcels (Riverside County APNs 377-020-016, 377-020-017, 377-020-018, and 377-020-019) of the subject property by First American Title Insurance Company, dated August 5, 2020 was provided to SALEM by Mr. Jon Prystasz with Evergreen Devco, Inc. The Commitment for Title Insurance Report was reviewed to identify potential deed restrictions, environmental liens or AULs which may have occurred on or exist in connection with the subject property as indicated by the Commitment for Title Insurance Report. SALEM’s review of the Commitment for Title Insurance Report indicated no deed restrictions, environmental liens or AULs for the

subject property. However, as quoted from the Commitment for Title Insurance, “this Commitment is not an abstract of Title, report of the condition of Title, legal opinion, opinion of Title, or other representation of the status of Title.” Applicable environmental liens or AULs may not all be listed in the Commitment for Title Insurance. Therefore, SALEM recommends that at the close of the real estate transaction and upon the issuance of the Final Title Report that the Final Title Report be reviewed and any information deviating from that presented in the Commitment for Title Insurance reviewed herein revealing evidence of RECs be added. Refer to Appendix A for copies of the two Commitment for Title Insurance Reports.

6.2 Phase I Environmental Site Assessment User Questionnaire

On February 18, 2021, a completed Phase I ESA User Questionnaire was received from Mr. Jon Prystasz with Evergreen Devco, Inc. Please refer to Appendix B for a copy of the completed Phase I ESA User Questionnaire.

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that “*all appropriate inquiry*” is not complete. The user is asked to provide information or knowledge of the following:

- Environmental cleanup liens that are filed or recorded against the site.
- Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the LLPs.
- Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
- Commonly known or *reasonably ascertainable* information about the *property*.
- The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.

According to Mr. Prystasz, to the best of his knowledge as the user of this Phase I ESA, no environmental cleanup liens and no activity or land use limitations have been filed or recorded against the subject property. Mr. Prystasz indicated that he did not have knowledge of the past or current spills or chemical releases or environmental cleanups at the subject property. Additionally, Mr. Prystasz indicated that the purchase price of the subject property reasonably reflects fair market value.

7.0 SITE USAGE SURVEY

In order to assess the subject property’s history, SALEM reviewed a Phase I ESA Owner Questionnaire, historical aerial photographs, building department records, city directories, planning department records and SFIMs.

7.1 Phase I Environmental Site Assessment Owner Questionnaire

On February 19, 2021, a Phase I ESA Owner Questionnaire was received from Mr. Tim Nielsen, the current owner of the front parcels (Riverside County APNs 377-020-016, 377-020-017, 377-020-018, and 377-020-019) of the subject property. The Phase I ESA Owner Questionnaire is designed to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. Mr. Nielsen reported that he has owned his portion of the subject property for four years, and his family has owned the parcels since approximately 1989. Mr. Nielsen stated that the subject property is currently vacant land.

According to Mr. Nielsen, to the best of his knowledge, no on-site treatment or discharge of waste; no on-site leach fields, dry wells, sumps, or disposal ponds; no use, storage or disposal of hazardous substances or petroleum products; no existing or former USTs or ASTs; no hazardous material spills; no buried materials; no domestic, monitoring, or irrigation wells; or any additional items of environmental concern which may present an REC are associated with the subject property.

On February 22, 2021, a Phase I ESA Owner Questionnaire was received from Mr. Billie Boyle and Mrs. Josephine Boyle, the current owners of the rear parcel (Riverside County APN 377-020-014) of the subject property. The Phase I ESA Owner Questionnaire is designed to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. Mr. and Mrs. Boyle reported that they have owned their portion of the subject property since 1979, and that the subject property is currently vacant land.

According to Mr. and Mrs. Boyle, to the best of their knowledge, no on-site treatment or discharge of waste; no on-site leach fields, dry wells, sumps, or disposal ponds; no use, storage or disposal of hazardous substances or petroleum products; no existing or former USTs or ASTs; no hazardous material spills; no buried materials; no domestic, monitoring, or irrigation wells; or any additional items of environmental concern which may present an REC are associated with the subject property. Please refer to Appendix C for copies of the completed Phase I ESA Owner Questionnaires.

7.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property and vicinity dated 1938, 1949, 1953, 1961, 1967, 1974, 1978, 1985, 1989, 1990, 1994, 2002, 2005, 2009, 2012 and 2016 were reviewed to evaluate changes in land use for the subject property. The historical aerial photographs were supplied by EDR. Refer to Appendix D for a copy of the EDR-provided aerial photographs. A summary of the aerial photographs is provided below:

➤ **1938 Aerial Photograph**

The subject property and adjoining properties appear to be undeveloped land. An unpaved road (Cambern Avenue) is observed adjoining to the southwest, beyond which is undeveloped land. A paved two-lane road (Central Avenue) is observed adjoining the subject property to the northwest, beyond which are what appear to be clay pit surface mines.

➤ **1949 Aerial Photograph**

What appears to be a shallow rectangular-shaped trench is located on the northwestern portion of the subject property. The trench appears to be associated with the clay pit mining operations adjoining to the northwest across Central Avenue. No structures are located on the subject property. The conditions on the adjoining properties are similar to the 1938 aerial photograph.

➤ **1953 Aerial Photograph**

The subject property is vacant land. The rectangular-shaped pit on the northwestern portion of the subject property appears deeper in the center and slopes out on each side. The conditions on the adjoining properties to the northwest (clay pit mining), northeast, southeast, and southwest are similar to the 1949 aerial photograph.

➤ **1961 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1953 aerial photograph with the exception of the clay pit mining operations which appear to have expanded to the southwest.

➤ **1967 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1961 aerial photograph with the exception of the clay pit mining operations which appear to have further expanded to the southwest.

➤ **1974 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1967 aerial photograph.

➤ **1978 Aerial Photograph**

The rectangular-shaped pit previously observed on the subject property appears to have been backfilled and the subject property graded. No structures are located on the subject property. The conditions on the adjoining properties are similar to the 1974 aerial photograph with the exception of the clay pit immediately adjoining to the northwest, which appears to have been filled with water.

➤ **1985 Aerial Photograph**

The west corner of the subject property appears to be occupied by a mobile home sales facility. The remaining three-quarters of the subject property appears to be vacant land. The adjoining property to the northeast has been developed with single-family residences. A slight increase in residential development is observed in the vicinity of the subject property. The conditions on the adjoining properties to the northwest, southeast, and southwest are similar to the 1975 aerial photograph with the exception of the adjoining clay pit to the northwest which no longer appears to contain water.

➤ **1989 Aerial Photograph**

The mobile home sales facility appears to have expanded to the northeast and now occupies approximately one-half of the subject property. The remainder of the subject property is vacant land. Clay pit mining operations on the adjoining property to the northwest appear to have ceased and the pits backfilled. Single-family residential development adjoins the subject property to the northeast. Vacant land adjoins the subject property to the southeast and southwest.

➤ **1990 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1989 aerial photograph.

➤ **1994 Aerial Photograph**

The subject property no longer appears to be used as a mobile home sales facility. The subject property appears to be vacant land. The conditions on the adjoining properties are similar to the 1990 aerial photograph.

➤ **2002 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 1996 aerial photograph.

➤ **2005 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2002 aerial photograph with the exception of the adjoining property to the west which appears to have been mass graded in preparation for development.

➤ **2009 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2006 aerial photograph with the exception of the adjoining property to the west which is occupied by a shopping center.

➤ **2012 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2009 aerial photograph.

➤ **2016 Aerial Photograph**

The conditions on the subject property and adjoining properties are similar to the 2012 aerial photograph.

7.3 Building Department Records Review

On February 24, 2021, a records request was made to the City of Lake Elsinore Building and Safety Department (LEBSD) for the subject property APNs of 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019, and associated historical address of 18650 Cambern Avenue. According to a representative of the LEBSD, no building permit records are available for the subject property. However, RCPD records indicate that as part of a “change of zoning application” submitted on June 20, 1980, the subject property soils were being assessed for the installation of a septic tank filtration field. No additional information was contained in the RCPD files to indicate if the septic system was actually installed. RCTLMA records indicate that a conditional use permit for a mobile home sales facility was issued on August 9, 1982 for the historical subject property address of 18650 Cambern Avenue. SALEM’s review of historical aerial photographs reveals that the northwestern portion of the subject property was occupied by several rectangular-shaped structures resembling mobile homes from at least 1985 until at least 1990. No building or planning department permits for items which may present an REC to the subject property including USTs, ASTs, demolition, or previous permanent structures were on file at the agencies included in SALEM’s research.

7.4 City Directories

On February 23, 2021, SALEM contracted with EDR to provide a City Directory Image Report dated 1971 through 2017 for the subject property. The subject property’s historical associated address of 18650 Cambern Avenue was listed as being occupied by Double D MBL HM SLS (1985-1992) and Bruder, Ronald S (2005-2010). The subject property was not listed in the City Directory Image Report in any other years. There were no earlier City Directory records available. Please refer to Appendix E for a copy of the EDR-provided City Directory Image Report.

7.5 Sanborn Fire Insurance Maps

SALEM reviews SFIMs to evaluate prior land use at the subject property and adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the property. On February 23, 2021, SALEM contracted with EDR to provide a Fire Insurance Map Abstract indicating the availability of historic SFIMs for the subject property and adjacent properties as far back as 1867. EDR’s search of collections at the Library of Congress, University Publications of America, and various public and local sources revealed no coverage for the subject property and adjacent properties. Please refer to Appendix F for a copy of the EDR SFIM No Coverage Certification.

7.6 Agricultural Chemicals

Review of historical aerial photographs indicates the subject property has not been utilized for agricultural purposes. Therefore, the use, storage, and application of agricultural chemicals at the subject site are not considered an environmental concern and therefore do not present an REC to the subject property.

7.7 Phase I Environmental Site Assessment Interview - Previous Owner

SALEM attempted to interview the previous owner of the subject property to provide pertinent information regarding potential environmental and historical impacts associated with the subject property. However, a Phase I ESA interview with the previous owner of the subject property was not reasonably ascertainable due to the absence of current contact information.

7.8 Previous Environmental Reports

SALEM was not provided with additional environmental reports for the subject property.

8.0 REGULATORY AGENCY RECORDS REVIEW

SALEM conducted a review of regulatory agency records for the purpose of determining if hazardous substance or petroleum products, as well as hazardous wastes have been stored or handled on the subject property and area properties of environmental concern. The most current records available were reviewed.

California Environmental Protection Agency, Department of Toxic Substances Control

SALEM's February 24, 2021 review of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) EnviroStor California cleanup sites database available via the DTSC Internet Website which tracks federal superfund sites, state response sites, voluntary cleanup sites, and school cleanup sites, indicated that no records of cleanup sites are on file with the DTSC for the subject property or adjoining properties.

California Regional Water Quality Control Board

SALEM's February 24, 2021 review of the RWQCB GeoTracker leaking underground fuel tank (LUFT) database available via the RWQCB Internet Website indicated that no records of LUFTs are on file with the RWQCB for the subject property or adjoining properties.

California Division of Oil, Gas, and Geothermal Resources

SALEM reviewed the California Division of Oil, Gas, and Geothermal Resources (DOGGR) website (<http://maps.conservation.ca.gov/doms/index.html>) to evaluate the potential for existing/former oil, gas, or geothermal wells on the subject property or adjoining properties. The subject property is located within DOGGR Southern District. The subject property vicinity is not located within an oil, gas, or geothermal field. The review of DOGGR information does not indicate that an oil, gas, or geothermal well has been drilled on the subject or adjoining properties.

Riverside County Department of Environmental Health

On February 25, 2021, the Riverside County Environmental Health Department (RCDEH) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling, unauthorized releases of hazardous substances or petroleum products, hazardous/flammable incidents, and/or registered USTs for the subject property. According to a representative of the RCEHD, no records of historical hazardous/flammable permits, hazardous materials handling, unauthorized releases of hazardous substances or petroleum products, hazardous/flammable incidents, and/or registered USTs were on file for the subject property.

Riverside County Transportation and Land Management Agency

On February 25, 2021, SALEM searched the RCTLMA's Public Land Use System (PLUS) online portal. According to the PLUS portal, the earliest record on file for the historical associated address of 18650 Cambern Street is a building permit for "MH site prep (comm)" dated August 5, 1982. Other records on

file include a building permit for “low profile” dated August 9, 1982; a building permit for a “free standing sign” dated October 5, 1982; a building permit for a “wooden patio to MH” dated October 20, 1982; and a conditional use permit for a “mobile home sales facility” dated August 9, 1982. Please refer to Appendix G for copies of RCTLMA records.

Riverside County Planning Department

On February 25, 2021, SALEM contacted the RCPD regarding records for the subject property APNs and associated historical address of 18650 Cambern Avenue. According to a representative of the RCPD, no records are on file for the subject property.

However, the client provided SALEM with a Change of Zone letter to the RCPD noting that the subject property “is not in the flood plain and is only subject to local nuisance runoff,” defining the suitability of the site for subsurface waste disposal (septic system) according to its soil series, and noting that paved access will be required as a condition of development dated June 27, 1980. Please refer to Appendix H for copies of RCPD records.

Riverside County Fire Department

On February 25, 2021, the Riverside County Fire Department (RCFD) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling and registered USTs for the subject property’s historical address of 18650 Cambern Avenue. According to a representative of the RCFD, no records of historical hazardous/flammable permits, hazardous materials handling, or registered USTs are on file for the subject property.

Local Area Tribal Records

According to the EDR Radius Map Report, no tribal records are listed for the subject property or the adjoining properties.

8.1 Standard Environmental Record Sources

EDR performed a search of federal, state, and local regulatory agency databases for the subject property and surrounding area. The various search distances as required by ASTM E1527-13 extended up to one mile from the subject property. Several agencies have published documents that list businesses or properties which have handled hazardous substances and petroleum products or hazardous waste, or may have had a documented release of hazardous substances or petroleum products. The databases consulted in the course of this assessment were compiled by EDR on December 20, 2019 and represent reasonably ascertainable current listings. SALEM did not verify the locations and distances of every site listed by EDR. SALEM verified locations and distances of the sites SALEM deemed as having a potential to environmentally impact the subject property. The actual location of the off-site properties identified may differ from the EDR listing. Table III summarizes the listed properties located within the specified ASTM Search Radii. The EDR Radius Map report is included in Appendix I.

EDR RECOVERED GOVERNMENT ARCHIVES						
Exclusive recovered Government Archives						
RGA LF	Recovered Government Archive Solid Waste Facilities List	0	---	---	---	---
RGA LUST	Recovered Government Archive Leaking Underground Storage Tank	0	---	---	---	---

0 = No sites in radius identified

--- = Not Searched

The subject property was not listed in the EDR-provided government database report. No sites with reported releases of hazardous substances or petroleum products to the subsurface were reported within a one-eighth-mile radius of the subject property.

In general, only hazardous substances or petroleum products released from facilities located approximately up-gradient and within a few hundred feet of the subject property, or in a cross-gradient direction close to the subject property, are judged to have a reasonable potential of migrating to the subject property. This opinion is based on the assumption that hazardous substances and petroleum products generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow.

Two orphan sites were identified in the EDR-provided government database report. Based upon SALEM's visual observations made during our site reconnaissance, as well as various influencing factors including approximate distance from the subject property, the orphan sites are deemed to have a low potential to environmentally impact the subject property and therefore, do not present an REC to the subject property.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject property, adjoining, or vicinity properties in the EDR-provided government database report.

No Indian reservations or LUSTs on Indian land were reported on the subject property, adjoining, or vicinity properties in the EDR-provided government database report.

The remaining properties identified by EDR within the specified search radius of the subject property, which appeared on local, state, or federally published lists of sites that use of have had releases of hazardous substances or petroleum products, were determined through SALEM's field observations to be of sufficient distance and/or situated hydraulically cross/down-gradient of the subject property, such that impacts to the subject property are not likely and therefore, do not present an REC to the subject property.

9.0 POTENTIAL VAPOR ENCROACHMENT CONDITION

Vapor intrusion is a way by which chemicals in soil and groundwater can migrate into indoor air. Chemical vapors moving up through soil and into a building are a potential source of indoor air contamination and may pose a risk to human health. In evaluating the potential for a vapor encroachment condition (VEC) on the

subject property, SALEM attempted to determine if there was information indicating that chemicals of concern were located within the “critical distance”, defined as the lineal distance between the nearest edge of a contaminated plume and the nearest target property boundary. Based on ASTM E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the “critical distance” is equal to 100 feet, with the exception of dissolved petroleum hydrocarbons, which have a “critical distance” of 30 feet. If non-aqueous phase petroleum hydrocarbons are present, the 100-foot “critical distance” is utilized.

9.1 Vapor Encroachment Screening

SALEM has performed a Vapor Encroachment Screening (Tier 1) in general accordance with the scope and limitations of ASTM Standard Practice E2600-15 for the subject property. SALEM utilized site and site vicinity specific criteria including groundwater gradient, distance of area properties of environmental concern from the subject property, and the types of constituents of concern which were released to evaluate potential vapor encroachment issues. The purpose of this Vapor Encroachment Screening (Tier 1) is to identify the existing or potential Vapor Encroachment Conditions (VEC), (as defined by ASTM E2600-15) affecting the subject property. As part of the screening, SALEM has completed the following questionnaire, as duplicated from Section X3 of ASTM E2600-15.

TABLE IV
Vapor Encroachment Questionnaire

QUESTION	RESPONSE	COMMENTS
1. Property Type?	Vacant	
2. Are there buildings/structures on the subject property?	No	
3. Will buildings/structures be constructed on the subject property in the future?	Yes	
4. If buildings exist or are proposed, do/will they have elevators?	No	
5. Type of level below grade (existing or proposed)?	Slab-on-Grade (proposed)	
6. Is there ventilation below grade?	N/A	
7. Sump pumps, floor drains, or trenches (existing or proposed)?	No	
8. Radon or methane mitigation system installed?	N/A	
9. Heating system type (existing or proposed)?	HVAC (proposed)	
10. Type of fuel energy (existing or proposed)?	Electric/Natural Gas (proposed)	
11. Have there ever been any environmental problems at the subject property?	No	
12. Does/will a gas station operate anywhere on the subject property?	No	
13. Do any tenants use hazardous chemicals in relatively large quantities on the subject property?	No	
14. Have any tenants ever complained about odors in the building or experience health-related problems that may have been associated with the building?	No	
15. Are the operations (or proposed operations to be performed) on the subject property OSHA regulated?	No	
16. Are there any existing or proposed underground storage tanks (USTs) or aboveground storage tanks (ASTs) located on the subject property?	No	
17. Are there any sensitive receptors (children, elderly, people in poor health, etc.) that occupy or will occupy the subject property?	No	

TABLE V
Additional VEC Criteria

QUESTION	RESPONSE	COMMENTS
1. Is the subject property known to have current or past contamination?	No	
2. Is contamination of the subject property suspected?	No	
3. Is an adjacent property known to have current or past contamination which may have impacted the subject property?	No	

TABLE V (cont'd)
Additional VEC Criteria

QUESTION	RESPONSE	COMMENTS
4. Is a <u>nearby</u> property known to have current or past contamination which may have impacted the subject property?	No	
5. Is regional groundwater contamination known to exist beneath the subject property?	No	
6. Are you aware of other conditions which may result in vapor intrusion at the subject property?	No	

Based upon the results of SALEM's Tier 1 VES, it is SALEM's opinion that a potential VEC "likely does not exist" at the subject property. As such, no further assessment is recommended.

10.0 BUSINESS ENVIRONMENTAL RISKS

10.1 Asbestos-Containing Building Materials

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. Asbestos is commonly used as an acoustic insulator, thermal insulation, fire proofing and in other building materials. Friable asbestos-containing material (ACM), when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. Non-friable ACM can be crumbled, pulverized, or reduced to powder during machining, cutting, drilling, or other abrasive procedures. Friable ACM is more likely to release fibers when disturbed or damaged than non-friable ACM. Exposure to airborne friable asbestos may result in a potential health risk because persons breathing the air may breathe in asbestos fibers. Continued exposure can increase the amount of fibers that remain in the lung. Fibers embedded in lung tissue over time may cause serious lung diseases including: asbestosis, lung cancer, or mesothelioma. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

During SALEM's site reconnaissance, no structures were observed on the subject property. Therefore, ACMs are not considered an on-site environmental concern at this time.

10.2 Lead-Based Paint

Lead is a highly toxic metal that affects virtually every system of the body. While adults can suffer from excessive lead exposures, the groups most at risk are fetuses, infants and children under 6. The Consumer Product Safety Commission banned the use of lead in paint in 1978. Most manufactures, however, had ceased using lead well before this time. Paint applied after 1978 is not considered suspect LBP. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X," to protect families from exposure to lead from paint, dust, and soil. Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on lead-based paint (LBP) and LBP hazards before the sale or lease of most housing built before 1978. Sellers, landlords, and their agents are responsible for providing this information to the buyer or renter before sale or lease.

According to Section 1017 of Title X, "LBP hazard is any condition that causes exposure to lead from lead-contaminated dust; bare, lead-contaminated soil; or LBP that is deteriorated or intact LBP present on accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects." Therefore, under Title X intact lead-based paint on most walls and ceilings is not considered a "hazard,"

although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. LBP is defined as any paint, varnish, stain, or other applied coating that has 1.0 mg/cm² (or 5,000 µg/g by weight) or more of lead.

During SALEM's site reconnaissance, no structures were observed on the subject property. Therefore, LBP is not considered an on-site environmental concern at this time.

10.3 Radon

Radon is a naturally occurring gaseous substance resulting from the radioactive decay of uranium to radium and then to radon. Uranium is a common element found in many geologic formations and substrates, particularly igneous and metamorphic rocks. Radon has a half-life of only 3.8 days and decays to its daughter elements (polonium 218, polonium 214, bismuth 214, and lead 214). It is these daughter elements that represent the health hazard commonly associated with radon. Radon gas can enter a building through cracks in the foundation and walls and become attached to dust particles and inhaled which could cause damage to human lung tissue. Radon is measured in picocuries per liter of air (pCi/L). The EPA has an established safe radon level of 4 pCi/L. Based on the EPA Radon Zone Map of California, the subject Property is located within **EPA Zone 2**, which has a predicted indoor radon screening between 2 pCi/L and 4 pCi/L (Low Potential). The EDR-provided radon data cites Riverside County has having 100% of 1st floor spaces with <4 pCi/L. However, radon levels may vary from one area to another and the only way to accurately assess radon gas levels on the subject property is to conduct a radon gas survey.

10.4 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding). Mold growths often appear as discoloration, staining, or fuzzy growth on building materials or furnishings and are varied colors of white, gray, brown, black, yellow, and green. In large quantities, molds can cause allergic symptoms when inhaled or through the toxins the molds emit.

During SALEM's site reconnaissance, no structures were observed on the subject property. Therefore, mold is not considered an on-site environmental concern at this time.

11.0 DISCUSSION OF FINDINGS

Historical Uses

The subject property consists of five contiguous rectangular-shaped parcels of undeveloped land totaling approximately 9.23 acres located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019). The subject property has an associated historical address of 18650 Cambern Avenue. SALEM's review of historical aerial photographs indicates that the subject property was undeveloped land in 1938. From at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that was deeper in the center and sloped out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue and may have been utilized for disposal of wastes generated from clay mining operations. By 1978, the pit had been backfilled and the subject property appeared to have been graded. SALEM's review of historical aerial photographs and City Directories reveals that the northwestern portion of the subject property was occupied by a mobile home sales facility

from least 1985 until at least 1992. The former rectangular-shaped pit located on the northwestern portion of the subject property from 1949 until approximately 1974 presents an REC to the subject property for which additional investigation is recommended.

Current Uses

At the time of SALEM's March 9, 2021 site reconnaissance, the subject property was undeveloped graded land covered in native vegetation. Some illegal dumping was observed on the subject property including household items, stockpiled soil, dry concrete, and asphalt. During the visual observations of the subject property, no hazardous substances or petroleum products were observed to be stored or handled on the subject property. Exposed surface soils did not exhibit obvious signs of discoloration. No other obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the area observed.

Based on SALEM's field observations and contact with state and local regulatory agencies, the potential for adverse environmental impacts to the subject property associated with current site use appears to be low. Therefore, there is no evidence that RECs exist in connection with the current use of the subject property.

Adjoining Properties

Based on SALEM's field observations, review of the EDR Radius Map Report and consultation with state and local regulatory agencies, there is no evidence that RECs exist in connection with the subject property from adjoining property uses.

11.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E1527-13 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objects of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap. The following is a summary of data gaps encountered in the process of preparing this report including an observation as the presumed significance of that data gap to the conclusions of this assessment.

- Some of the intervals between documented sources exceeded five years.
- Absence of a Final Title Report.

However, taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that these data gaps might alter the conclusions of this assessment.

12.0 SUMMARY AND CONCLUSIONS

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13 of the proposed commercial development site located on the east corner of Central Avenue and Cambern Avenue in Lake Elsinore, California (Riverside County APNs 377-020-014, 377-020-016, 377-020-017, 377-020-018, and 377-020-019; associated historical address of 18650 Cambern Street), the *property*. Any exceptions to, or deletions from, this practice are described in Section 13 of this *report*.

During the course of this assessment, SALEM identified the following evidence of a REC in connection with the subject property as defined by ASTM E1527-13:

- Based upon SALEM's review of historical aerial photographs and topographic maps, between at least 1949 and until at least 1974, the northwestern portion of the subject property appears to have been occupied by a rectangular-shaped pit that is deeper in the center and slopes out on each side. During this time period, the subject property appears to be associated with the clay pit mining operations located adjoining to the northwest across Central Avenue. By 1978, the pit had been backfilled and the subject property appeared to have been graded. It is SALEM's opinion that the pit may have been utilized for the disposal of waste generated by the clay pit mining operations. Therefore, SALEM recommends conducting a geophysical survey of the northwestern portion of the subject property to evaluate whether waste materials or other debris were placed into the former pit, and the excavation of test pits in areas of potential environmental concern identified during the geophysical survey. If the geophysical survey and test pits identify evidence of waste or other debris being disposed of in the former pit, SALEM recommends conducting an LSA in the area of the former pit to assess potential impacts to on-site soils by various suspected constituents of concern.

13.0 LIMITATIONS

This Phase I ESA Report has been prepared for the exclusive use of **Evergreen Devco, Inc.; Evergreen-Cambern & Central North, L.L.C.; and Evergreen-Cambern & Central South, L.L.C.** and their subsidiaries and affiliates. Unauthorized use of or reliance on the information contained in this report, unless given express written consent by SALEM, **Evergreen Devco, Inc.; Evergreen-Cambern & Central North, L.L.C.; and Evergreen-Cambern & Central South, L.L.C.** is strictly prohibited. The following limitations and exceptions apply:

- The scope of work completed was designed solely to meet the needs of SALEM's client. SALEM shall not be liable for any unintended usage of this report by another party. In addition, based on the ASTM guidelines, the ESA is only valid if completed within 180 days of an acquisition or the transaction necessitating the ESA.
- No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. This ESA was designed to reduce, but not eliminate the potential for RECs at the subject property, within reasonable limits of time and cost. The ESA is not intended to be exhaustive or all-inclusive and does not represent a guarantee of the identification of all possible environmental risk.
- An ESA is intended to be a non-intrusive investigation and generally does not include sampling or testing of air, soil, water or building materials. No destructive testing was completed and concealed areas, such as behind walls or within machinery, were not accessed. Testing, if any, is designed solely to meet the needs of the ESA, not to meet any local, state or federal regulations and should not be utilized as such.
- Information in this report is based on personal interviews, government records, published resources, and various historical documents. Accuracy and completeness of information varies among information sources and may be inaccurate or incomplete. The information utilized in this ESA is from sources deemed to be reliable; however, no representation or warranty is made as to the

accuracy thereof. SALEM will have no ongoing obligation to obtain and include information that was not reasonably ascertainable, practically reviewable or provided to SALEM in a reasonable timeframe to formulate an opinion and complete the assessment by the agreed upon due date.

- The ESA includes some information that may be relevant to regulatory compliance, but is not intended and shall not be construed as a compliance audit and cannot be considered a verification of regulatory compliance. While the general environmental setting of the subject property is described, this assessment is not intended to be a formal flood plain or wetland determination, and no warranty is made thereof. Depending on its past, present or future intended use, the property under review may or may not be subject to regulation and permitting under environmental and health and safety laws, such as, but not limited to, the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Occupational Safety and Health Act, and other federal, state and local regulations. SALEM assumes no responsibility or liability respecting regulatory permitting or compliance issues.
- Client is advised that if the ESA is obtained with the intent of qualifying the purchaser as an innocent landowner, contiguous property owner, or bona fide prospective purchaser under CERCLA, there will be continuing obligations of due care and responsiveness and additional legal requirements that likely apply to such status. SALEM accepts and undertakes no responsibility as to such requirements and advises that counsel be separately consulted with respect to such requirements.
- The findings and conclusions presented in this Phase I ESA Report are based on field review and observations and on data obtained from the sources listed in the report. The findings of this report are valid as of the present. The passage of time, natural processes or human intervention on the subject property or adjacent properties and changes in the regulations can cause changed conditions which can invalidate the findings and conclusions presented in this report.

14.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of SALEM's undersigned environmental professional with oversight from the undersigned registered engineer. The work was conducted in accordance with ASTM E1527-13, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and SALEM's quality-control policies. We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This permit becomes void if it is not completed within 180 days from date of issuance. If it is not, it must be renewed or abandoned for a period of 180 days.

☐ **LICENSED CONTRACTORS DECLARATION:** I hereby affirm that I am licensed under provisions of Chapter 4.5 commencing with Section 70001 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

☐ **OWNER-BUILDER DECLARATION:** I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 70001 of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____, B & P C. (Attach Certificate).
Date: _____ Owner: _____

WORKERS' COMPENSATION DECLARATION: I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3900, Lab. C.).

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the County Building Inspection Department of County _____ Department.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date: _____ Applicant: _____
NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions of this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high (Chap. 12, Div. 2, Sec. 341, Title B, C.A.C.).

☐ As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

☐ Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3067, Div. C.).

Lender's Name: _____
Lender's Address: _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY: I certify I have read this application and state that the information given is correct. I agree to comply with all state laws and county ordinances relating to building construction, and authorize a representative of the County of Riverside, Department of Building and Safety, to enter upon the property for which I have applied for this permit for the purpose of making inspections.

This permit becomes void if work not commenced within 180 days from date of issuance, OR, if work has been suspended or abandoned for a period of 180 days

☐ **LICENSED CONTRACTORS DECLARATION:** I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

☐ **OWNER-BUILDER DECLARATION:** I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____ B & P.C. (Attach Certificate).
Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION: I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

☐ Certified copy is hereby furnished

☐ Certified copy is filed with the County Building Inspection Department or County _____ Department

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE: This section need not be completed if the permit is for one hundred (\$100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.
Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION:

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. (Chap. 3.2, Grp 2, Art 2, Sec 341, Title 8, C.A.C.)

☐ As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

☐ Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

RE: Change of Zone No. 3095

Dear Ms. Boyle:

In order for staff to further process your change of zone application, additional information will be required. Some environmental concerns indicated by the initial environmental assessment need to be resolved. The following information needs to be submitted:

- (1) Hydrological study addressing the affect of being within the 100-year flood plain of Arroyo Del Toro Creek.
- (2) Severe limitations of the soil as a septic tank filtration field must be resolved. Please include subsurface soils investigations which have been performed.
- (3) Also indicate if paved access to this site exists, or if this developer will install off-site road improvements, if needed.

If you have any questions, please contact this office at 787-2205.

Very truly yours,

RIVERSIDE COUNTY PLANNING DEPARTMENT

File - Lake Elsinore
RECEIVED JUN 30 1980

Dear Ms. McGrew:

Re: CZ 3095, Request for Additional Information
Our File No. 79-74

This is in response to your letter dated June 20, 1980, requesting additional information regarding Change of Zone 3095.

Your first concern was the location of the property within the Arroyo del Toro Creek Flood Plain. In response, I plotted the project site on National Flood Insurance Act mapping of the area (attached). Please note, the project site is not in the flood plain and is only subject to local nuisance runoff.

Your second concern was the suitability of the site for subsurface waste disposal. The project site is located within the Arbuckle soil series, as delineated by Soil Conservation Service mapping of Western Riverside County. The Riverside County Division of Environmental Health has assigned a rate of 45 square feet of leach line bottom area for each 100 gallons of capacity to nearby Parcel Map 11504, Parcel Map Book 54, Page 44, records of Riverside County. The Division has assigned a rate of 31 square feet to Tentative Tract 11414, one-quarter mile to the northwest. Both projects are located on Arbuckle series soil.

Your third concern was access to the property. Paved access does not exit at this time. The requesting zoning, C-P-S, requires plot plan review for all property development (Riverside County Ordinance 348, Section 18.30). The review agencies include the Road Department and paved access would be required by that agency as a condition of development.

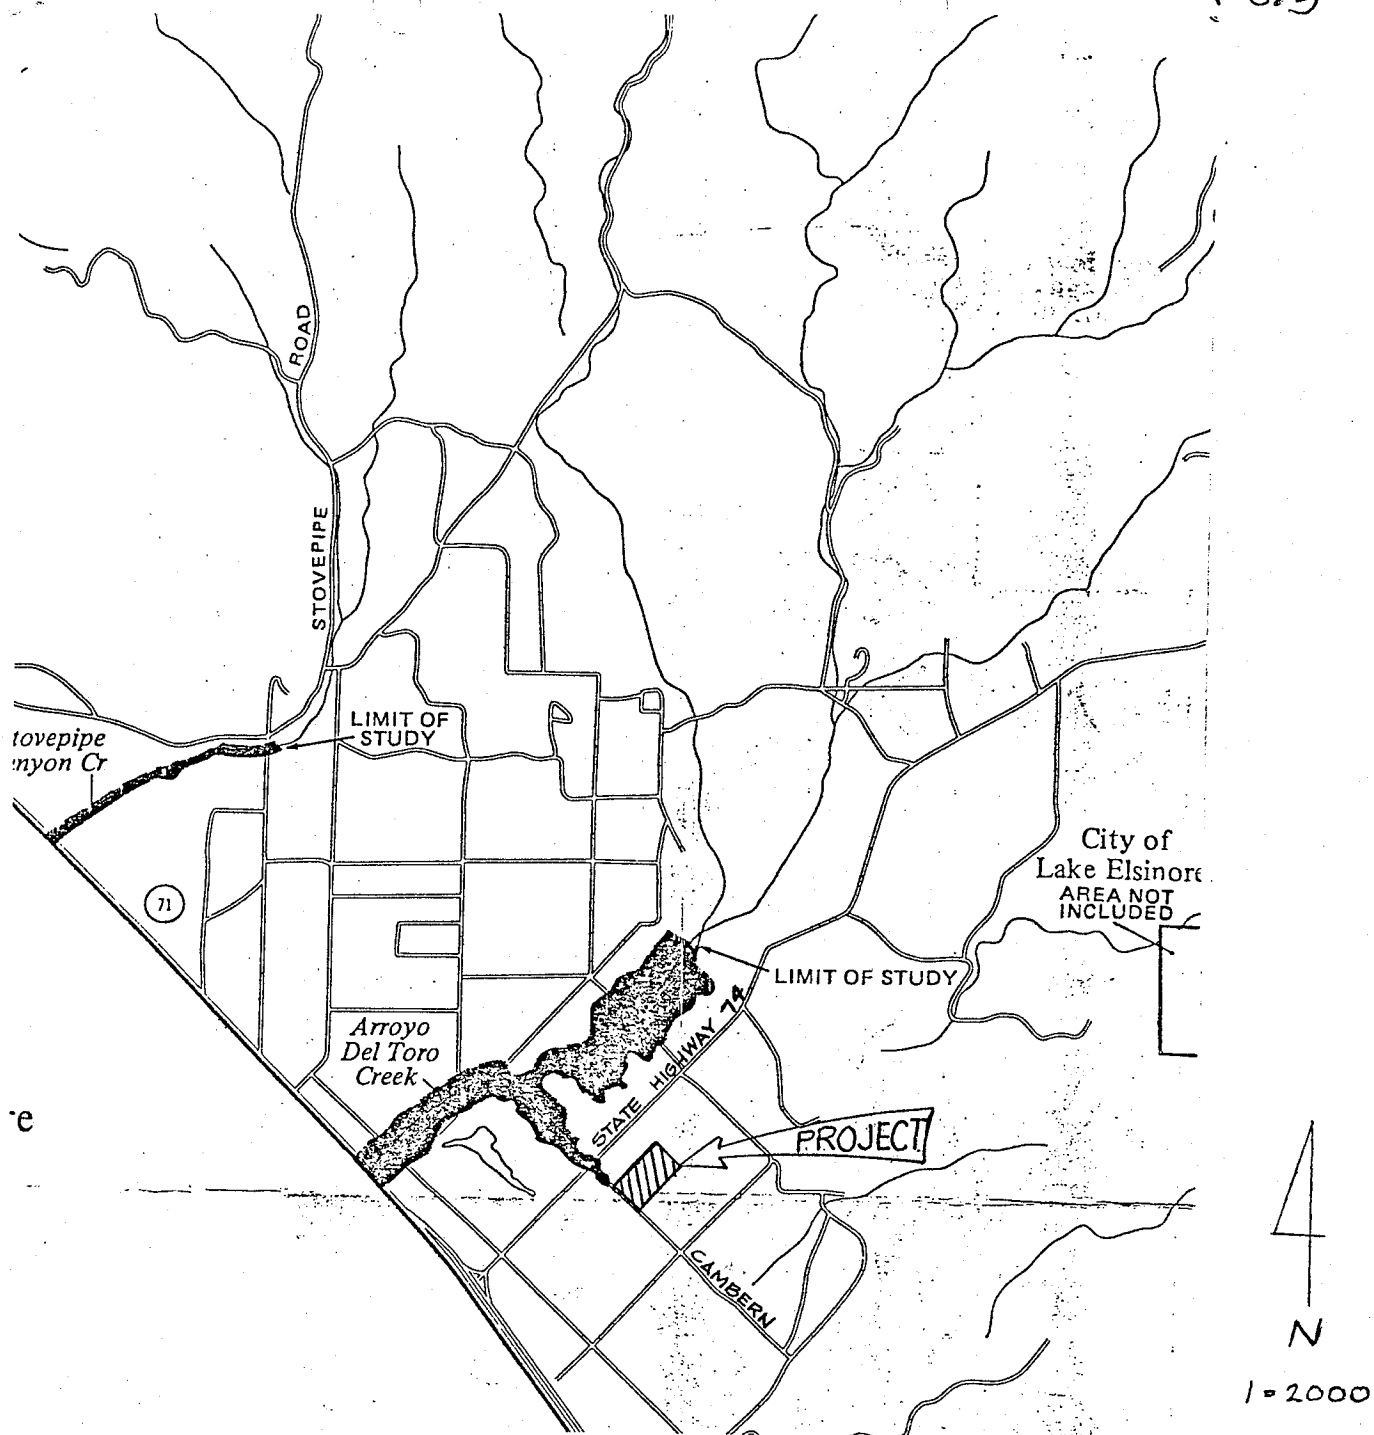

Ms. Paula McGrew

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 8 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Site Name: Grocery Outlet #357
Violation Date: 10-10-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 10/18/2018.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility has been advised to dispose of current waste handled at the facility despite its small quantity amount. Also Facility Fire Extinguishers are currently being scheduled to be serviced.
Eval Division: Riverside County Department of Env Health

Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P001
Waste Description:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Waste Code:	P046
Waste Description:	ALPHA,ALPHA-DIMETHYLPHENETHYLAMINE (OR) BENZENEETHANAMINE, ALPHA, ALPHA-DIMETHYL-
Waste Code:	P075
Waste Description:	NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS
Waste Code:	P188
Waste Description:	BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-

5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: P204

Waste Description: PHYSOSTIGMINE (OR) PYRROLO[2,3-B]INDOL-5-OL,
1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYL-METHYLCARBAMATE (ESTER),
(3AS-CIS)-

Waste Code: U010

Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE,
6-AMINO-8-[[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-MET
HOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR)
MITOMYCIN C

Waste Code: U015

Waste Description: AZASERINE (OR) L-SERINE, DIAZOACETATE (ESTER)

Waste Code: U019

Waste Description: BENZENE (I,T)

Waste Code: U034

Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035

Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U037

Waste Description: BENZENE, CHLORO- (OR) CHLOROBENZENE

Waste Code: U044

Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U057

Waste Description: CYCLOHEXANONE (I)

Waste Code: U058

Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-,
2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059

Waste Description: 5,12-NAPHTHACENEDIONE,
8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-
7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR)
DAUNOMYCIN

Waste Code: U075

Waste Description: DICHLORODIFLUOROMETHANE (OR) METHANE, DICHLORODIFLUORO-

Waste Code: U089

Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS,
(E)-

Waste Code: U121

Violation Description: Chapter 16, Section(s) 2715(c)(2)
Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.

Violation Notes: Returned to compliance on 03/26/2014.

Violation Division: Riverside County Department of Env Health

Violation Program: UST

Violation Source: CERS,

Site ID: 108322

Site Name: Costco Wholesale #746 (Gas Station)

Violation Date: 03-04-2020

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/21/2021.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: Not reported
File Location: Local Agency Warehouse
Local Case Number: 200118158
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: ***Data prior to 2005 does not appear in GeoTracker. Consult agency file for all site data*** On November 29, 2001, 11 soil samples were taken beneath the dispensers and product lines for a fuel system upgrade. Up to 7.9 ppm TPH and 230 ppb MTBE was detected. The site was placed into LOP. On April 2, 2002, 4 borings were drilled to 40. Up to 740 ppb MTBE (35) was detected in the soil. In mid-December 2002, three groundwater wells were installed. The wells were screened from 25 to 55. Up to 1200 ppb MTBE (30) and 600 ppb TBA (40) were detected in the soil. On Nov. 17 and 18, 2003, four additional wells were installed. The wells were screened from 23-53, 18-48, and 20-50.

Up to 16000 ppb MTBE (30 and 35) and 19000 ppb TBA (20) were detected in the soil. 3 additional wells were installed January 28 and 29, 2004. The wells were screened from 20-50 and 25-50. Up to 3500 ppb MTBE (25) and 1900 ppb TBA (40) were detected in the soil. One final well was installed September 2004. No oxygenates were detected in the oil except for one hit of DIPE at 0.022J at 35. Dual Phase Vacuum Extraction was operated on site using 6 wells from October 13, 2005 to June 12, 2006 running one month a quarter. The system operated 1981 hours and removed 31751 gallons of water 725 pounds of VOCs and 85 pounds of TPHg. TPHg vapor influent went from 96 ppmv to <10 ppmv. MTBE went from 37 to 0.68 ppmv. Four confirmation borings were drilled to 40 November 5, 2007 and sampled every 5. All constituents were ND except for MTBE which had two hits of 2.3J and 2.7J ppb. The groundwater was sampled from January 2, 2003 until November 14, 2007. TPHg decreased from 12500 ppb to <100 ppb. Benzene decreased from 29 ppb to <0.5 ppb and has not been detected above 1 ppb since November 2005. MTBE decreased from 12000 ppb to 1.4 ppb. TBA decreased from 135000 ppb to <10 ppb. 1/13/2011 Closure/no further action letter issued by RCDEH.

Local Agency: RIVERSIDE COUNTY LOP
File Location: Local Agency
Local Case Number: 200319347
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History:

On November 22, 2002, soil samples were taken during dispenser and piping upgrades. MTBE was detected in 10 of 19 samples up to 0.86 ppm. The site was placed into the LOP program for further assessment. In July 2003, three angle soil vapor extraction wells (B-1, B-2, and B-3) were installed to depths of approximately 45 feet below ground surface (bgs). TPHg and benzene were not detected in any of the soil samples analyzed. MTBE was detected in nine of the 27 soil samples with a high of 17 ppm MTBE detected at 40 ft bgs in boring B-1. Soil vapor extraction wells screened from 5 ft to 45 ft bgs were installed in the borings. Groundwater was not encountered; however, the Mobil station across the street has a water table at 41ft bgs. Bases on the results of this assessment the installation of groundwater monitoring wells were required. In September 2003, three groundwater monitoring wells (MW-4, MW-5, and MW-6) were installed. MW-4 was installed to approximately 65 ft bgs. MW-5 and MW-6 were installed to approximately 70 ft bgs. Groundwater was encountered between 42 ft and 53 ft bgs. MW-4 was screened from 35 ft to 65 ft bgs and MW- 5 and MW-6 were screened from 40 ft to 70 ft bgs. All soil samples were ND for TPHg. Benzene was detected in two soil samples at 0.0018 ppm (MW-6@65 ft) and 0.00072 ppm (MW-6@70 ft). MTBE was detected in three samples at 0.0090 ppm (MW-4@50 ft), 0.0021 ppm (MW-4@55ft), and 0.0023 ppm (MW-6@55 feet). In March 2007, the consultant requested closure as the leak has been stopped, the site was adequately characterized, the groundwater plume is stable, and the site presents no significant threat to the environment. In April 2007, closure was denied as the well screens were submerged and the 17 ppm MTBE was not addressed. The RCDEH required groundwater sampling from all the wells (monitoring and SVE), and based on those results, soils remediation may be needed. On July 3, 2007, six wells were sampled (three groundwater monitoring wells and three SVE wells). No TPHg, BTEX or oxygenates detected in any well. Groundwater elevations in monitoring well MW-5 were still above the screen interval. The water level

ranged from 36.5 to 39.46 ft bgs, above the level where the 17 ppm MTBE was detected at 40 ft bgs in the soil. The consultant recommended the site be reviewed for closure. In December 2007, closure was considered but denied based on 17 ppm MTBE found at 40 ft bgs in well B-1. Assessment is required in the area downgradient from the southwest dispenser. No down gradient wells have been installed in this area. January/February 2008, Soil samples were collected during dispenser piping upgrade and pump island extension work. Station improvements include three USTs, four dispenser islands, and a convenience store. Samples were collected beneath four dispenser islands (DISP-1-3 through DISP-4-3) and six product lines (PL-1-3 through PL-6-3) using a hand auger. On February 6, 2008, composite soil samples were collected from the two stockpiles (SP-1 and SP-2) and one additional soil sample was collected from beneath product line (PL-7-3). All samples collected contain lead ranging from 3.7 ppm (DISP-1-3) to 8.6 ppm (SP-1). All samples were ND for TPHg, BTEX, MTBE, DIPE, ETBE, TAME, TBA or ethanol. In Feb 2008, soil vapor extraction well B-3 and ground water monitoring well MW-6 were destroyed due to construction activities on the east side of the dispensers. In April 2008, monitoring well MW-7 was installed downgradient of B-1. The purpose of the assessment was to further define the extent of dissolved hydrocarbons in groundwater downgradient from dispenser #1. The monitoring well was installed 15 ft north of purposed area due to underground utilities. The well was completed to 50 ft bgs and screened between 30 ft to 50 ft bgs. Groundwater was encountered at approximately 39- 40 ft bgs. Groundwater samples were ND for all constituents tested except 0.42J ppb toluene and 50J ppb naphthalene. Soil samples were collected every 5 feet. All soil samples were ND for all constituents tested (TPHg, BTEX, MTBE, DIPE, ETBE, TAME, TBA and Ethanol). In January 2009, the consultant recommended site closure based on non-detect results from groundwater samples. Groundwater elevations in monitoring well MW-5 were still above the screen interval. Groundwater was within the screened zone in B-1, B-2, MW-4, and MW-7. In May 2009, RCDEH and the SARWQCB reviewed the site for closure and were concerned about the 17 ppm MTBE detected in the submerged soil sample at 40 feet from boring B-1 near the dispenser. Additional sampling or vapor testing in this area was required to explain the concentration of MTBE detected in soil and not reflected in groundwater sampling results. In September 2009, RCDEH and the SARWQCB concurred with case closure based on information obtained from a site visit on September 15, 2009. Groundwater monitoring well MW-7 was observed to be 10 feet from the dispenser and not 20 feet as depicted on site maps submitted in reports. Additional sampling was not required and assessment was considered complete. Groundwater Monitoring Groundwater monitoring and sampling activities began in November 2003. Monitoring wells B-1 and B-2 were installed on July 3, 2007 and have been ND for all constituents tested since installation (nine quarters). Monitoring wells B-3 was also installed on July 3, 2007, and ND for all constituents tested for three quarters until it was destroyed on February 1, 2008 due to construction activities. Monitoring wells MW-4 and MW-5 were installed on November 5, 2003. Groundwater monitoring well MW-4 has been ND for all constituents tested except for MTBE which was detected at a maximum concentration of 75 ppb in August 2005. MW-4 has been ND for all constituents test, including MTBE, for the last nine quarters. MW-4 had a submerged screen between March 2005 and October 2006. Groundwater monitoring

well MW-5 has had a submerged screen since December 2004 and has been ND for all constituents tested since installation. Groundwater monitoring well MW-6 was installed on November 5, 2003 and destroyed on February 1, 2008 due to construction activities. MW-6 was ND for all constituents tested except for a maximum concentration of MTBE at 56 ppb in August 2004 and 1.8J ppb methyl chloride. MW-6 had a submerged screen between May 2005 and January 2007. Groundwater monitoring well MW-7 was installed in April 2008, and has been ND for all constituents tested except 0.42J ppb Toluene. A final groundwater sampling event was conducted on July 1, 2009. All five wells were sampled and ND for all constituents tested except: bromodichloromethane at 0.46J ppb (MW-7) and 0.35J ppb (B-1); chloroform at 0.49 ppb (MW-7) and 0.48 ppb (B-1); and dibromochloromethane at 0.57J ppb (MW-7) and 0.49 ppb (B-1). Case closed 6/16/2010

Violation Date: 05-04-2020
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 02/03/2022
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/11/2022
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 02/03/2022
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/11/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/20/2021

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Last EDR Contact: 12/29/2021
Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/20/2021

Next Scheduled EDR Contact: 04/25/2022
Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 12/17/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/04/2022

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/15/2021	Source: Department of the Navy
Date Data Arrived at EDR: 11/16/2021	Telephone: 843-820-7326
Date Made Active in Reports: 02/08/2022	Last EDR Contact: 02/07/2022
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/23/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/19/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/19/2021	Telephone: 703-603-0695
Date Made Active in Reports: 02/14/2022	Last EDR Contact: 11/18/2021
Number of Days to Update: 87	Next Scheduled EDR Contact: 03/07/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/19/2021	Source: Environmental Protection Agency

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PROPOSED COMMERCIAL DEVELOPMENT
CAMBERN AVENUE / CENTRAL AVENUE
LAKE ELSINORE, CA 92532

TARGET PROPERTY COORDINATES

Latitude (North):	33.695428 - 33° 41' 43.54"
Longitude (West):	117.332243 - 117° 19' 56.07"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	469208.2
UTM Y (Meters):	3728242.5
Elevation:	1321 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015893 LAKE ELSINORE, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ARBUCKLE

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6
2	25 inches	44 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6
3	44 inches	68 inches	stratified very gravelly sandy loam to very gravelly sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: GARRETSON

Soil Surface Texture: gravelly very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1
2	9 inches	53 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1
3	53 inches	72 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1

Soil Map ID: 3

Soil Component Name: CORTINA

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

EDUCATION

Bachelor of Science – Environmental Science – University of California, Riverside

EXPERIENCE

2019 to Present – Environmental Project Manager – Salem Engineering Group, Inc. – Rancho Cucamonga, CA

2017 to 2019 – Engineering Technician – Adkan Engineers – Riverside, CA

2015 to 2016 – Research Associate – Lyons Biogeochemistry Laboratory at UCR – Riverside, CA

PROFESSIONAL BACKGROUND

Environmental Engineering: Manage and conduct Phase I Environmental Site Assessments of commercial and multi-tenant properties. Manage of Phase II Environmental Site Assessments, including: oversight of installation of groundwater and soil vapor monitoring wells; groundwater, soil vapor, and ambient air sampling; report preparation for ongoing monitoring. Special knowledge includes environmental laws and regulations, technical writing, independent research, and environmental impact analysis.

Civil Engineering: Write full Initial Studies and manage associated technical studies; use AutoCAD Civil 3D for civil design, including sewer lines, water lines, storm drain lines, housing tracts, grading, topographic maps, and tract maps. Special knowledge includes AutoCAD Civil 3D, civil design, and technical writing.

Biogeochemical Research: Responsible for laboratory work involving sequential and total iron extractions, total organic/inorganic carbon analysis, chromium reductions, and sample preparation for ICP-MS analysis. Special knowledge includes soil sampling and classification; soil water content analysis; operation and troubleshooting of field equipment including dissolved oxygen meters, electrical conductivity/TDS meters, and iron, magnesium, and nitrogen test strips; and operation and troubleshooting of laboratory equipment including ELTRA Furnace and Carbon Sulfur Determinator, inductively coupled plasma mass spectrometer, pipettes, pH probes, and microscopes.

REGISTRATION

Registered Geotechnical Engineer – California
Registered Civil Engineer - California
Registered Grading Inspector – Los Angeles

CERTIFICATION

OSHA 40-Hour Hazardous Waste Operations and Emergency Response
Training (29 CFR 110.120) (HAZWOPER)
Certified Hazardous Materials Manager

EDUCATION

Masters of Science in Geotechnical Engineering, Utah State University, Logan, Utah
Bachelor of Science in Civil Engineering, Chung-Yuan University, Chung-Li, Taiwan

EXPERIENCE

2007 to Present – Senior Geotechnical Engineer, Salem Engineering Group, Inc., Rancho Cucamonga, California
2003 to 2007 – Senior Engineer, Krazan & Associates, Inc., Ontario, California
1994 to 2003 – Senior Engineer/Vice President, Morhol, Inc., Anaheim, California
1988 to 1994 – Project Engineer, Leighton & Associates, Inc., Irvine, California

PROFESSIONAL BACKGROUND

Geotechnical Investigations: Responsible for staff supervision, client relations, technical review, budget preparations, and profit/loss statements. Provided project management for geotechnical engineering projects for industrial plants, school and hospital sites, wastewater treatment plants, bridges and culverts, sewer lines, stadiums, embankments, service stations, commercial developments, industrial facilities, and landfills. Experienced in a broad range of geotechnical engineering applications such as shallow and deep foundation investigation, slope stability, pavement design, liquefaction potential, ground improvement, soil suitability and availability assessment, soil-cement treatment, soil-lime stabilization, erosion control, landfill construction, septic system design, as well as field and laboratory soil testing.

Construction Testing & Inspection Services: Responsible for overseeing Special Inspectors, testing laboratory personnel and procedures, client relations, technical review of reports, and insure conscientious cost management. Oversee the testing of concrete, post-tension cables, soil, welding, and construction materials to insure conformance to current building standards and codes. Report the results of materials tested to the appropriate agencies and companies.

Environmental Engineering: Provide detailed Phase I investigative site reports. Conduct environmental audits and provide recommendations for corrective measures. Extensive experience in lithologic logging and sampling in consolidated and unconsolidated material for environmental exploration. Provide recommendations for the management of underground storage tanks and hazardous waste.
