Sign-off Sheet and Signatures of Environmental Professionals

This Phase I Environmental Site Assessment (with Phase II ESA) was prepared by Stantec Consulting Services Inc. ("Stantec") for the account of City Ventures Homebuilding LLC (the "Client"). Any reliance on this document by any third party is strictly prohibited. The material in it reflects Stantec's professional judgment in light of the scope, schedule and other limitations stated in the document and in the contract between Stantec and the Client. The opinions in the document are based on conditions and information existing at the time the document was published and do not take into account any subsequent changes. In preparing the document, Stantec did not verify information supplied to it by others.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

Associate Scientist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property located at 11700, 11708, 11722, and 11728 Arkansas Street, and 16403 Pioneer Boulevard, City of Artesia, County of Los Angeles, California (the "Property"), on behalf of City Ventures Homebuilding LLC (the "Client"). City Ventures Homebuilding LLC (the "User") has been designated as the User of this report.

The Property consists of approximately 2.52 acres of land currently utilized for residential and commercial uses consisting of the following: a single approximately 1,800 square foot single-family residence and associated approximate 400 square foot garage (11700 Arkansas Street); a vacant approximately 5,000 square foot commercial warehouse (11708 Arkansas Street); an unpaved lot currently used for recreational vehicle storage (11718, 11722, and 11728 Arkansas Street); and, a single approximately 800 square foot single family residence and associated parking lot currently used for recreational vehicle storage (16703 Pioneer Boulevard). Los Angeles County Office of the Assessor Parcel Numbers (APNs) associated with the Property include:

APN	Street Address	Size (Acres)
7014-003-020	11728 Arkansas Street	0.16
7014-003-021	11722 Arkansas Street	0.16
7014-003-022	11718 Arkansas Street	0.16
7014-003-023	No address	0.16
7014-003-024	11708 Arkansas Street	0.16
7014-003-025	11700 Arkansas Street	0.22
7014-003-026	11700 Arkansas Street	0.03
7014-003-028	16703 Pioneer Boulevard	1.47

The Property is zoned light manufacturing and industrial. Surrounding properties are a mix of commercial and industrial properties with residential properties located to the west. A Property location map is

illustrated on **Figure 1**. A Property map illustrating the main features of the Property is provided as **Figure 2**. Photographs taken during the site reconnaissance visit are provided in **Appendix A**.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at 11700, 11708, 11722, and 11728 Arkansas Street, and 16403 Pioneer Boulevard, City of Artesia, County of Los Angeles, California (the "Property"). Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed the following environmental issues in connection with the Property:

- **Former On-Site Recycling Facility:** A recycling facility identified as "Hi Waste Disposal Co." and "R&R Recycling" appears to have operated at the Property address of 11718 Arkansas Street, located in the northern portion of the Property, from circa 1990 until 2019. Limited information was provided for this facility in the environmental database report. Several large metallic scrap piles were observed in the northern portion of the Property during review of aerial photography. Due to the facility not operating at the Property during Stantec's reconnaissance, proper housekeeping practices for this facility are unknown. Potential releases of petroleum hydrocarbons, other liquid chemicals, and metals are commonly associated with these types of operations; therefore, the recycling facility was considered a REC to the Property.

  Carlin Environmental Consulting, Inc. (CEC) performed a limited Phase II ESA for the northern portion of the Property in 2018. This assessment was performed to evaluate multiple RECs identified by CEC in a Phase I ESA prepared for the Property (which was unavailable for review by Stantec). CEC oversaw the advancement and installation of five (5) soil vapor borings in the northern portion of the Property, advanced to a maximum depth of six feet below ground surface. Soil vapor samples were collected from each of these locations and analyzed for volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPHg) by USEPA test method 8260B. No VOCs or TPHg was detected above the method reporting limits of 200 micrograms per cubic meter (ug/m^3) in any of the soil vapor samples collected (*i.e.*, the results were "non-detect"). Therefore, CEC recommended no further investigation regarding soil vapor at the Property.

  The laboratory method reporting limits of 200 ug/m^3 exceed present day screening levels using a 0.03 attenuation factor for indoor air to soil vapor. Consequently, although the soil vapor results from this investigation did not identify any chemical impacts to soil vapor, Stantec concluded that further assessment was warranted in light of changes in laboratory detection limits and regulatory standards.

  To evaluate this issue, Stantec performed a shallow soil and soil vapor assessment in the former recycling operations area in the northern portion of the Property. Minor detections of diesel range organics (DRO) and oil range organics (ORO) were detected in shallow soil samples collected from location SV1 and SV4. No VOCs were detected above the laboratory method reporting limit (i.e. results were "non-detect"). Accordingly, Stantec recommends no further investigation regarding TPH or VOCs in soil at the Property.

  Lead was detected at 120 milligram per kilogram (mg/kg) in sample SV4-1 and 130 mg/kg in sample B4-1.5. These lead concentrations exceed the residential screening level for lead of 80 mg/kg. The elevated lead impacts at the Property are considered a REC. The lateral limit of lead impacts to near-surface soils appears to be confined to the area of borings SV4 and B4, located along the parcel boundary, as shown in **Figure 3**. Stantec considers it unlikely that lead impacts are present below the southern Property parcel as no recycling operations existed on that parcel, and that parcel has remained paved for several decades. Stantec recommends the lead impacted soil be removed from the Property to levels below the current screening level of 80 mg/kg.

With respect to soil vapor, Stantec performed a soil vapor survey in the former recycling operations area in the northern portion of the Property. TPH as gasoline was detected at 4,540 µg/m^3 at location SV4, exceeding the vapor intrusion odor nuisance level of 3,300 µg/m^3. However, this concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3. It appears TPH as gasoline detection is related to the minor TPH impacts to soil at this location. Because the detected concentrations are below the risk-based screening level, Stantec concludes that the soil vapor impacts do not represent a REC and recommends no further investigation regarding soil vapor at the Property.

- **Adjacent Automotive Repair Facility:** An automotive repair facility, identified as Cerritos Auto Repair, is located adjacent to the northeast of the Property. This facility is mis-plotted by EDR and is actually located adjacent to the north and east of the Property. This facility is identified in the environmental database report as generating hazardous waste, identified as waste oil. Multiple violations are reported for this facility, including failure to properly label hazardous waste containers and administrative non-compliance. Generally poor housekeeping practices were observed at this facility during Stantec's site reconnaissance. Given the documented violations and proximity of this facility to the Property, Stantec performed a Phase II subsurface investigation.

  More specifically, Stantec evaluated the potential for vapor encroachment from this facility onto the Property through the installation of a soil vapor location (SV6) located along the common Property boundary with this facility. Naphthalene, a VOC, was detected at 8.0 µg/m^3, exceeding the residential screening level of 2.77 µg/m^3, but below the MIASL of 83 µg/m^3. Additionally, TPH as gasoline was detected at 6,740 µg/m^3, exceeding the vapor intrusion odor nuisance level of 3,300 µg/m3. However, this concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3. Stantec concludes that this detection is not indicative of a REC and, as stated above, recommends no further investigation regarding soil vapor at the Property, including potential encroachment from the adjacent property onto the Property.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiries (AAI) into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-13. "All Appropriate Inquiry" (AAI) is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under CERCLA. following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions ("RECs") of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions ("HRECs"), and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. Due to any release to the environment;
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. De minimis conditions are minor occurrences of contamination that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies.

This Phase I ESA was conducted in accordance with the Master Services Agreement between City Ventures and Stantec (the "MSA"). The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 2.52 acres of land currently utilized for residential and commercial uses consisting of the following: a single approximately 1,800 square foot single-family residence and associated approximate 400 square foot garage (11700 Arkansas Street); a vacant approximately 5,000 square foot commercial warehouse (11708 Arkansas Street); an unpaved lot currently used for recreational vehicle storage (11718, 11722, and 11728 Arkansas Street); and, a single approximately 800 square foot single family residence and associated parking lot currently used for recreational vehicle storage (16703 Pioneer Boulevard). Los Angeles County Office of the Assessor Parcel Numbers (APNs) associated with the Property include:

APN	Street Address	Size (Acres)
7014-003-020	11728 Arkansas Street	0.16
7014-003-021	11722 Arkansas Street	0.16
7014-003-022	11718 Arkansas Street	0.16
7014-003-023	No address	0.16
7014-003-024	11708 Arkansas Street	0.16

7014-003-025	11700 Arkansas Street	0.22
7014-003-026	11700 Arkansas Street	0.03
7014-003-028	16703 Pioneer Boulevard	1.47

The Property is zoned light manufacturing and industrial. Surrounding properties are a mix of commercial and industrial properties with residential properties located to the west. A Property location map is illustrated on **Figure 1**. A Property map illustrating the main features of the Property is provided as **Figure 2**. Photographs taken during the site reconnaissance visit are provided in **Appendix A**.

2.2 SPECIAL TERMS, CONDITIONS, AND SIGNIFICANT ASSUMPTIONS

There were no special terms, conditions, or significant assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with the MSA. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report.

This report provides an evaluation of specified environmental conditions associated with the identified property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. 40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information. Stantec can neither warrant nor guarantee such thoroughness or reliability, however.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the preparation of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the site conditions encountered by Stantec at the time of the work. Accordingly, additional studies and actions may be required. The identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP). The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	Questionnaire provided by the User.
Environmental Liens or Activity Use Limitations	No	No environmental lens or activity use limitations were identified.
Previous Environmental Permits or Reports Provided by User	Yes	The user provided a Phase II ESA report prepared for the Property addresses of 11708, 11718, 11722, and 11728 Arkansas Street.
Purpose of the Phase I ESA	--	Property transaction due diligence.

Stantec forwarded the ASTM recommended User Questionnaire to Mrs. Kim Prijatel, Senior Vice President of Development at City Ventures. The completed User Questionnaire returned to Stantec my Mrs. Prijatel and is included in **Appendix C**.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The Property is located at approximately 64 feet above mean sea level (amsl). The Property topography is relatively flat, and regional topography is to the south (EDR, 2020).
Soil/Bedrock Data:	The Property is situated on Quaternary Recent Alluvium which has been deposited due to erosion from the San Gabriel Mountains located to the north of the Site. Drilling and sampling performed at a nearby facility indicates the alluvium generally consists of sand, silt, silt with varying percentages of sand, and sandy clay to the total depth explored of 50 feet.
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	According to a quarterly groundwater monitoring report prepared for a facility located approximately 500 feet to the west of the Property, groundwater is present at approximately 18-20 feet below ground surface, and flows to the south/southwest (GeoEnviro Services, Inc. 2020).
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The regional topography in the area of the Property is generally to the south. The Property is located at approximately 64 feet amsl, and is relatively flat (EDR, 2020). Surface water runoff is expected to infiltrate through unpaved portions of the Property, with excess expected to follow north toward Arkansas Street.

4.1.2 Regional and Property Geology

The Property is located in the Los Angeles Basin portion of the Coastal Plain of Los Angeles County at an approximate elevation of 64 feet above mean sea level (amsl). The Property topography is generally flat

with a slight slope towards the southwest. The nearest surface water is the San Gabriel River Channel, located approximately 1.50 miles to the west. The Coastal Plain lies within the northwest quadrant of the Peninsular Range geomorphic province, a structural complex of blocks having similar trending faults that extends southward into San Diego County and Baja California. The Peninsular Range province consists of generally northerly and northwesterly trending mountain ranges and associated valleys. Examples of the structural trend include Newport-Inglewood Fault Zone, the Paramount Syncline, the Dominguez Anticline, the Gardena Syncline, the Wilmington Anticline, and the Wilmington Syncline. Locally, the site is within the vicinity of the South Gate-Santa Ana depression, a generally down-warped feature underlying the Downey Plain. The depression is a generally northwest-trending structure between the Baldwin Hills and the La Brea Plain and extends into Orange County. The major structural feature of the South Gate-Santa Ana depression in the vicinity of the site is the Norwalk Syncline. The Norwalk Syncline lies to the west of the City of Artesia (east of the site) and extends northwesterly to the Inglewood Fault. (California Department of Water Resources [DWR], 1961).

The Property is situated on Quaternary Recent Alluvium which has been deposited due to erosion from the San Gabriel Mountains located to the north of the Site. Drilling and sampling performed at a nearby facility indicates the alluvium generally consists of sand, silt, silt with varying percentages of sand, and sandy clay to the total depth explored of 50 feet.

4.1.3 Regional and Property Hydrogeology

According to CDWR Bulletin 118 dated October 1, 2003, the Property lies above the Central Subbasin of the Coastal Plain of Los Angeles Groundwater Basin (No. 4-11.04) in the South Coast Hydrologic Region of California. The groundwater in the basin occurs in multiple aquifers with varying thicknesses and yields both confined and unconfined within younger alluvium. Groundwater is utilized heavily for municipal and industrial uses and limited irrigation and domestic uses (CDWR Bulletin 118 dated September 1975). According to data retrieved from the California State Water Resources Control Board online database Geotracker, groundwater in the vicinity of the Property is encountered at approximately 18-20 feet below ground surface, and flows to the south/southwest.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be to the south-southeast. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property address of 11708 Arkansas Street was identified as “Rooney Daniel” in the environmental database report under the following database listings: HAZNET, HWTS, ECHO, RCRA NonGen/NLR, and FINDS. Upon reviewing the ECHO database listing, no violations were reported from this facility from 2017 through 2020. The ECHO, FINDS, and RCRA listings are related to the former recycling center facility located at this Property address. According to the HAZNET database listing, asbestos containing waste was disposed from this facility in 2019 to a licensed off-site facility. No other listings were identified in the database repot for the Property.

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby property, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC].

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases represents or doesn’t represent a concern is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Chevron USA SS 095619 / Pioneer Chevron / Bob’s Chevron 16725 Pioneer Boulevard Artesia, CA	UST, RCRA NonGen/NLR, FINDS, ECHO, LUST, Cortese, CERS, HIST CORTESE, CERS HAZ WASTE, SWEEPS UST, CERS TANKS, LOS ANGELES CO. HMS, HWTS, EDR Hist Auto	76 feet southeast	No
This facility is a fuel service station with multiple underground storage tanks (USTs) located at the facility. The USTs are located approximately 50 feet from the southeastern Property boundary. The facility is also listed as a leaking underground storage tank (LUST) case, with a case closure issued by the California State Water Resources Control Board in 2002. Multiple violations were also listed for this facility for non-compliance in leak testing, monitoring requirements, and permitting issues. No data was identified in the database report pertaining to the extent of impacts related to the LUST case for this facility. Stantec researched the Waterboard online database Geotracker in an attempt to identify impacts related to this facility; however, no documents were available on this database for review. Based on the potential that residual impacts remain at this facility, Stantec performed a Phase II subsurface investigation to sample and analyze soil vapor near the property boundary. The results			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
indicated VOCs concentrations below applicable regulatory thresholds, and Stantec recommends no further investigation regarding this issue.			
Cervantes, Lawrence & Mary 11663 East 168th Street Artesia, California	RCRA NonGen / NLR	154 feet south southwest	No
This facility is listed for the handling of hazardous wastes, and is distinctly identified as a non-generator. No violations are reported for this facility.			
AAMCO 16649 Pioneer Boulevard Artesia, California	HIST UST, EMI	188 feet east	No
This facility is listed as having a 500-gallon waste oil tank. No violations are listed for this facility.			
Cerritos Auto Repair 16649 Pioneer Boulevard Artesia, California	CERS HAZ WASTE, LOS ANGELES CO HMS, CERS	188 feet east	No
This facility is mis plotted by EDR, and is actually located adjacent to the north of the Property. This facility is listed as generating hazardous waste, identified as waste oil. Multiple violations are reported for this facility, including failure to properly label hazardous waste containers and administrative non-compliance. Generally poor housekeeping practices were observed at this facility during Stantec site reconnaissance (Section 5.0). Given the documented violations and proximity of this facility to the Property, Stantec performed a Phase II subsurface investigation to sample and analyze soil vapor near the property boundary. The results indicated VOCs concentrations below applicable regulatory thresholds, and Stantec recommends no further investigation regarding this issue.			

The remaining listings in the database search report provided in **Appendix D** do not constitute a potential REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 Local Health Department

Agency Name Contact Information	Findings
County of Los Angeles Department of Public Works Environmental Programs Division PO Box 1460 Alhambra, California	Stantec submitted a request for records for the Property and surrounding facilities to this agency via email on October 5, 2020. A response was received from Mr. David Coscia on October 13, 2020 indicating that no records were on file for the Property addresses of 11700, 11708, 11722, 11728 Arkansas Street, and 16703

https://ladpw.org/epd/CleanLA/ OpenFileReview.aspx	Pioneer Boulevard with this agency. Stormwater records were identified for the Property address of 11718 Arkansas Street.
Department of Toxic Substances Control 5796 Corporate Avenue Cypress, California https://envirostor.dtsc.ca.gov/	Stantec submitted a request for records for the Property to this agency via email on October 5, 2020. A response was received from this agency on September 24, 2020 indicating that no records were on file for the Property addresses of 11700, 11708, 11718, 11722, 11728 Arkansas Street, and 16703 Pioneer Boulevard with this agency. Additionally, Stantec researched the online database managed by this agency, Envirostor, for records. No records were identified for the Property address on that database.
California Regional Water Quality Control Board, Los Angeles Region 320 W 4th St Suite 200 Los Angeles, California https://geotracker.waterboards.ca.gov/	Stantec submitted a request for records for the Property to this agency via email on October 5, 2020. As of the date of this report, no response has been received from this agency. Additionally, Stantec researched the online database managed by this agency, Geotracker, for records. No records were identified for the Property address Property addresses of 11700, 11708, 11722, 11728 Arkansas Street, and 16703 Pioneer Boulevard with this agency.
County of Los Angeles Department of Public Works Solid Waste Information Management System (SWIMS) https://dpw.lacounty.gov/epd/swims/ OnlineServices/search-methane-hazards-esri.aspx	Stantec reviewed information on this database to determine if the Property was within a methane mitigation zone. According to the website, reviewed on October 8, 2020, the Property is not located within 300 feet of an oil or gas well or 1,000 feet of a methane producing site. Therefore, according to this database, a methane mitigation system may not be required.
California Geologic Energy Management Division (CalGEM) https://maps.conservation.ca.gov/ doggr/wellfinder/	Stantec reviewed information on the CalGEM Well Finder database to determine the proximity of oil and gas wells in the vicinity of the Property. According to the database, the closest oil well is located approximately ½-mile to the west of the Property. This well is identified with as American Petroleum Institute (API) number 040370512, well number 1, operated by Artesia Oil Co. of California. The current status of the well is idle.

4.3.2 Fire Department

Agency Name Contact Information	Finding
County of Los Angeles Fire Department Health and Hazardous Materials Division https://lacountyfire.govqa.us/	Stantec submitted a request for records for the Property to this agency through the online records requests system on October 8, 2020. A response was received from this agency on October 8, 2020 indicating that no records were on file for the Property addresses of 11700, 11708, 11722, 11728

Agency Name Contact Information	Finding
	Arkansas Street, and 16703 Pioneer Boulevard with this agency

4.3.3 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
Artesia Department of Public Works 18747 Clarkdale Avenue Artesia, California 562-865-6262 https://www.cityofartesia.us/	Stantec submitted a request for records for the Property to this agency on October 8, 2020. As of the date of this report, no response has been received from this agency. The lack of response from this agency is not considered a significant data gap.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation was not provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1928	1" = 500'	The Property appears to be largely undeveloped. The southern portion of the Property appears to be a field, or bare soil, with few trees, and the northern portion of the Property adjacent to Arkansas Street appears to be green and developed with a single residence. The surrounding area is largely undeveloped.
1938	1" = 500'	The Property appears similar to the previous photograph. The northern portion of the Property appears to be developed with single-family residences, and the southern portion of the Property remains vacant. Few residences are located to the north of the Property.
1947	1" = 500'	The Property appears similar to the previous photograph. Limited amount of development has occurred in the area surrounding the Property.
1952	1" = 500'	Multiple small residence are located in the northern portion of the Property. Several smaller structures, and single rectangular features are located in the southeastern portion of the Property. Properties to

Year	Scale	Observations, Property and Adjoining Properties
		the south and west appear vacant. Properties to the north and east appear to be developed with commercial
1963	1" = 500'	Multiple small residences are located in the northern portion of the Property. Two small residences are located in the southern portion of the Property. New residential development is located south and west of the Property. A commercial building is located northwest of the Property. The surrounding area appears fully developed with a mixture of residential and commercial development.
1977, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2012, 2016	1" = 500'	All structures have been cleared from the southern portion of the Property, which is now used as an recreational vehicle storage lot. Two residential structures are located in the northern portion of the Property, with a single rectangular commercial structure between them. A fuel service station is now located immediately to the southeast of the Property. Several containers and materials are observable in the northern portion of the Property from the early 1990's through 2016 around the eastern residence, likely associated with the recycling facility documented to have operated at the Property.

Name of aerial photograph source: EDR, 2020

4.4.3 City Directories

Stantec retained a third party to research available reverse city directories for the Property, in approximately five-year intervals.

The following is a summary of Stantec's review of the city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Subject Property: 11700 Arkansas Street Artesia, California	1994 1999 2004 2006 2014	HAS UWC Occupant Unknown Jun Okamoto HAS Uwc David Brown
Subject Property: 11718 Arkansas Street Artesia, California	1994-2014	Hi Waste Disposal Co., R&R Recycling
Subject Property: 11722 Arkansas Street Artesia, California	--	No listings
Subject Property: 16703 Pioneer Boulevard	19994-2014	Pioneer RV Storage

Subject/Adjoining Property	Year	Listed Occupants
Artesia, California		
Adjoining East: 16649 Pioneer Boulevard Artesia, California	1999-2004	Cerritos Auto Repair
Adjoining East: 16707 Pioneer Boulevard Artesia, California	2000	Donald Brown
Adjoining East: 11663 Dornes Street Artesia, California	--	No Listings
Adjoining South: 16725 Pioneer Boulevard Artesia, California	1994-2014	Bobs Chevron, Chevron Station Artesia
Adjoining West: 16716 Alburtis Avenue Artesia, California	--	No Listings

Name of city directories and source: EDR, 2020

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Property. The Sanborn® Map Search Report indicating “no coverage” is presented in **Appendix E**.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Whittier, Los Alamitos, Artesia, and Downey, California Quadrangles (scale 1:24,000) to help identify past Property usage and areas of potential environmental concern.

No RECs were noted during our review of the topographic maps. Copies of the historical maps are provided in **Appendix E**. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1986, 1899, 1902	1:62,500	The Property is depicted as vacant. Few small structures, likely residences, are located sparsely throughout the vicinity of the Property.
1923, 1925,	1:24,000	The Property remains depicted as vacant. Minor development is observed in the surrounding area.
1942, 1943	1:24,000	The Property is depicted as vacant. Small structures are located on the west- and east-adjacent properties. Several smaller structures are not observable throughout the area, indicative of residential development.
1945	1:24,000	The Property is depicted as developed with what appears to be two small structures, located in the northern portion of the Property along Arkansas Street.
1947, 1949, 1950, 1951	1:24,000	The Property is depicted as vacant. Additional development is observable to the east and south of the Property.
1964, 1965	1:24,000	The majority of smaller structures have been removed from the map and replaced with red shading, indicating new development. The Property and surrounding area is shaded. "Niemes School" is located approximately 200 feet west of the Property. Interstate highway 605 is located approximately 1-mile west of the Property.
1972, 1981	1:24,000	The Property and surrounding area appears similar to the previous map. The California Route 91 highway is now depicted approximately 1,000-feet south of the Property.
2012	1:24,000	All major structures have been removed from the map, and the only features shown are major roadways and the topographic contours.

Name of maps and source: EDR, 2020

4.4.6 Other Historical Sources

The following documents were provided to Stantec for review in connection with the Property:

Limited Phase II Investigation at 11708, 11817, 11722 & 11728 Arkansas Street, City of Artesia, California, dated October 18, 2018, prepared by Carlin Environmental Consulting, Inc.

Carlin Environmental Consulting, Inc. (CEC) performed a limited Phase II ESA for the northern portion of the Property in 2018. This assessment was performed to evaluate multiple RECs identified by CEC in a Phase I ESA prepared for the Property (which was unavailable for review by Stantec). CEC oversaw the advancement and installation of five (5) soil vapor borings in the northern portion of the Property, advanced to a maximum depth of six feet below ground surface. Soil vapor samples were collected from each of these locations and analyzed for volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPHg) by USEPA test method 8260B. No VOCs or TPHg

was detected above the method reporting limits of 200 micrograms per cubic meter (ug/m3) in any of the soil vapor samples collected (i.e., the results were “non-detect”). Therefore, CEC recommended no further investigation regarding soil vapor at the Property.

The laboratory method reporting limits of 200 ug/m3 exceeded present day screening levels using a 0.03 attenuation factor for indoor air to soil vapor. Consequently, to evaluate this issue in light of changes in laboratory detection limits and regulatory standards, Stantec performed a shallow soil and soil vapor assessment in the former recycling operations area in the northern portion of the Property, as described in Section 6.0, which confirmed vapor conditions does not represent a human health risk exceeding applicable human health risk criteria.

No other documents associated with the Property were provided to Stantec for review.

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Joshua Sargent, Geologist with Stantec, on September 29 and October 2, 2020. Access to the Property was provided by Mr. Daniel Rooney of WK USA. Stantec was unaccompanied during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of potential areas of environmental concern. Photographs collected during the Property visit are included in **Appendix A**.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across the Property.
- Traverse the periphery of all structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located south of Arkansas Street and east of Alburtis Avenue in a mixed used residential and commercial area of Artesia.
Property Operations.	The northern and southern portions of the Property are used for recreational vehicle storage (motor home, boats, and travel trailers). A single-family residence with associated detached garage is located in the northwestern corner of the Property.
Structures, Roads, Other Improvements:	A single-family residence with associated detached garage is located in the northwest corner of the Property; a single approximate 5,300 square-foot vacant commercial building is located in the north-central portion of the Property; an approximate 1,000-square foot residence is located in the southern-central portion of the Property.
Property Size (acres):	2.50 acres
Estimated % of Property Covered by Buildings and/or Pavement:	70%
Observed Current Property Use/Operations:	Residential and recreational vehicle storage.
Observed Evidence of Past Property Use(s):	Residential and recreational vehicle storage.

Sewage Disposal Method (and age):	None observed.
Potable Water Source:	None observed.
Electric Utility:	Electrical power poles were observed outside of the Property boundaries along Arkansas Street and Alburtis Avenue.

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	None observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

No entry was provided into the two residential structures, and associated garage, located on the Property. Stantec made the following observations during the Property reconnaissance of the building interiors for the single commercial structure located in the northern portion of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	None observed
Surface Stains or Corrosion:	None observed
Floor Drains and Sumps:	None observed
Other Interior Observations:	Miscellaneous construction debris was observed within the commercial building located in the northern portion of the Property.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	Minor surficial staining was observed within the asphalt-paved parking area in the southern portion of the Property, associated with the storage of recreational vehicles in this area.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	A trash enclosure was observed in the western area of the southern storage area.
Potential Areas of Fill Placement:	None observed.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	No stormwater discharge was observed.
Wells:	No wells were observed.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

NORTH	Arkansas Street, followed by a welding shop and an equipment rental yard.
EAST	A fast-food restaurant (El Pollo Loco) is located directly east of the Property. An auto service facility (Cerritos Auto repair Center) is located northeast of the Property.
SOUTH	Single-family residences are located directly south of the Property. A Chevron fuel service station is located southeast of the Property.
WEST	Single-family residences.

Refer to **Figure 2**.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining properties:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property is located at approximately 64 feet above mean sea level (amsl). The Property topography is relatively flat, and regional topography is to the south (EDR, 2020).

6.0 SUBSURFACE INVESTIGATION

Based on historical documents including aerial photographs, the Property was formerly used as a recycling center until circa 2014. The historical use of the Property as a recycling facility can be a potential concern due to the potential spills of various petroleum distillate fluids and/or solvents, and mishandling of metallic debris. Accordingly, Stantec recommended collection of soil samples for chemical analysis to determine if hydrocarbons and/or heavy metals were present in near-surface soils at levels that represent a Recognized Environmental Condition (REC) or that are of concern to residential development. Additionally, nearby facilities located to the northeast and southeast of the Property were identified as a REC for potential vapor encroachment.

To address the above potential RECs, Stantec performed a Phase II ESA at the Property. Stantec provided the services of a field geologist on October 20 and 22, and December 23, 2020 to supervise and direct the field activities. All work was performed under a California licensed professional and consisted of the following:

- Advance eight (8) soil borings in the northern portion of the Property where the on-site recycling facility operated (SV1 through SV4 and B1 through B4), and collect soil samples from the one- and three-foot depth intervals.
- Advance seven (7) soil vapor borings (SV1 through SV7) across the Property to assess potential soil vapor impacts from off- and on-site operations.

All boring locations advanced during this investigation are depicted on Figure 3.

Soil samples were collected at the one-, three-, and five-foot depth intervals from locations SV1 through SV4. Soil samples were collected by discharging the hand auger contents directly into pre-cleaned laboratory-provided eight-ounce glass jars with Teflon®-lined lids. The one- and three-foot soil samples were analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), and California Code of Regulations (CCR) Title 22 metals by United States Environmental Protection Agency (USEPA) test method 8015, 8260, and 6010/7471, respectively.

Five soil vapor locations were advanced in the northern portion of the Property in the former recycling facility operation area (SV1 through SV5); one location was advanced in the northeast corner of the Property near the off-site automotive repair facility (SV6); and, one location was advanced in the southeastern corner of the Property near the Chevron fuel station (SV7). The soil vapor probes were installed at the five-foot depth interval in accordance with the Department of Toxic Substances Control (DTSC) *Advisory – Active Soil Gas Investigation*, dated 2015. The soil vapor probes were constructed with a 1” Airstone set in a 12-inch #3 Monterey Sand filter pack. The soil vapor probe was sealed by a transition seal of 12 inches of dry granular Wyoming bentonite, followed by an annular seal of hydrated Wyoming bentonite to the surface. The soil vapor probe was connected to the surface by ¼” outer-diameter Nylaflow tubing. The soil vapor probes were allowed to equilibrate a minimum of 48-hours prior to sample collection, in accordance with the DTSC Advisory.

Laboratory analytical test results from this assessment are attached as **Appendix G**. The laboratory test results from this investigation are discussed below and were compared to the more conservative value between the DTSC Human and Ecologic Risk Office (HERO), Note 3 screening levels for residential and commercial land use (DTSC, 2020), the USEPA Regional Screening Levels (RSLs) for residential sites (USEPA, 2020), and the San Francisco Bay Regional Water Quality Control Board (SFRWQCB) Environmental Screening Levels (ESLs). All soil concentrations are reported and discussed in units of milligrams per kilogram (mg/kg), and are summarized in **Table 1** and **Table 2**. All soil vapor concentrations are reported and discussed in units of micrograms per cubic meter ($\mu g/m^3$), and summarized in **Table 3**.

6.1 SUBSURFACE INVESTIGATION RESULTS

During the advancement of soil borings SV1 through SV4 in the northern portion of the Property, sporadic metallic objects were noted in near-surface soils, likely sourced from the former recycling facility operations in that portion of the Property. Soils throughout the Property consisted of silty sand from surface to approximately four feet bgs, transitioned to a fine-grained sand from four to five feet bgs, and clay encountered at five feet bgs, the maximum depth explored during this investigation. All photoionization detector (PID) measurements recorded as 0.0 parts per million by volume (ppmV).

Two soil vapor boring locations were proposed to be advanced in the central and western areas of the southern portion of the Property. However, a concrete slab was encountered at these locations at approximately six inches below the asphalt surface. Therefore, no soil vapor sampling was conducted at these locations.

6.1.1 Soil Results

Minor detections of diesel range organics (DRO) and oil range organics (ORO) were detected in shallow soil samples collected from location SV1 and SV4, located in the northern portion of the Property in the area of the former recycling facility operations. The reported concentrations of these compounds did not exceed residential use screening levels. No other detections of TPH were detected at any other locations in this area. No VOCs were detected above the laboratory method reporting limit (*i.e.* results were “non-detect”). Stantec recommends no further investigation regarding TPH or VOCs in soil at the Property.

Various metals were detected in shallow soil samples collected in the northern portion of the Property in the area of the former recycling facility. Generally, the metals detected above the laboratory method reporting limits were within typical California regional background ranges, with the exception of lead detected at 120 milligram per kilogram (mg/kg) in sample SV4-1 and 130 mg/kg in sample B4-1.5. These lead concentrations exceed the residential screening level for lead of 80 mg/kg. The elevated lead impacts at the Property are considered a REC. The lateral limit of lead impacts to near-surface soils appears to be confined to the area of borings SV4 and B4, located along the parcel boundary, as shown in **Figure 3**. Stantec considers it unlikely that lead impacts are present below the southern Property parcel as no recycling operations existed on that parcel, and that parcel has remained paved for several decades.

6.1.2 Soil Vapor Results

Various VOCs were detected in soil vapor samples collected across the Property below residential risk-based screening levels, with the exception of the following:

- Tetrachloroethylene (PCE) was detected at 41.9 µg/m^3 at SV5, exceeding the residential screening levels of 15.3 µg/m^3
- Naphthalene was detected at 8.0 µg/m^3 at location SV6, exceeding the residential screening level or 2.77 µg/m^3
- TPH as gasoline was detected at 4,540 µg/m^3 at SV4 and at 6,740 µg/m^3 at SV6. This concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3.

No VOCs, including those listed above, were detected above risk-based modified indoor air screening levels (MIASLs) using the currently-applicable attenuation factor of 0.001.

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

- **Recreation Vehicle Storage:** The Property has been used to store recreational vehicles, including motor homes, boats, and trailers, since the late 1970's. Minor surficial petroleum staining was observed in the asphalt-parking area in the southern portion of the Property associated with the storage of these vehicles. Due to the observed staining is minor, considered likely limited to the asphalt surface, and not indicative of a significant release to the Property. Therefore, the minor surficial staining is considered a *de minimis* condition.

- **Former on-site recycling facility:** A recycling facility identified as "Hi Waste Disposal Co." and "R&R Recycling" appears to have operated at the Property address of 11718 Arkansas Street, located in the northern portion of the Property, from circa 1990 until 2019. Limited information was provided for this facility in the environmental database report. Several large metallic scrap piles were observed in the northern portion of the Property during review of aerial photography. Due to the facility not operating at the Property during Stantec's reconnaissance, proper housekeeping practices for this facility are unknown. Potential releases of petroleum hydrocarbons, other liquid chemicals, and metals are commonly associated with these types of operations; therefore, the recycling facility was considered a REC to the Property.

  Carlin Environmental Consulting, Inc. (CEC) performed a limited Phase II ESA for the northern portion of the Property in 2018. This assessment was performed to evaluate multiple RECs identified by CEC in a Phase I ESA prepared for the Property (which was unavailable for review by Stantec). CEC oversaw the advancement and installation of five (5) soil vapor borings in the northern portion of the Property, advanced to a maximum depth of six feet below ground surface. Soil vapor samples were collected from each of these locations and analyzed for volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPHg) by USEPA test method 8260B. No VOCs or TPHg was detected above the method reporting limits of 200 micrograms per cubic meter (ug/m^3) in any of the soil vapor samples collected (*i.e.*, the results were "non-detect"). Therefore, CEC recommended no further investigation regarding soil vapor at the Property.

  The laboratory method reporting limits of 200 ug/m^3 exceed present day screening levels using a 0.03 attenuation factor for indoor air to soil vapor. Consequently, although the soil vapor results from this investigation did not identify any chemical impacts to soil vapor, Stantec concluded that further assessment was warranted in light of changes in laboratory detection limits and regulatory standards.

  To evaluate this issue, Stantec performed a shallow soil and soil vapor assessment in the former recycling operations area in the northern portion of the Property. Minor detections of diesel range organics (DRO) and oil range organics (ORO) were detected in shallow soil samples collected from location SV1 and SV4. No VOCs were detected above the laboratory method reporting limit (i.e.

results were “non-detect”). Accordingly, Stantec recommends no further investigation regarding TPH or VOCs in soil at the Property.

Lead was detected at 120 milligram per kilogram (mg/kg) in sample SV4-1 and 130 mg/kg in sample B4-1.5. These lead concentrations exceed the residential screening level for lead of 80 mg/kg. The elevated lead impacts at the Property are considered a REC. The lateral limit of lead impacts to near-surface soils appears to be confined to the area of borings SV4 and B4, located along the parcel boundary, as shown in **Figure 3**. Stantec considers it unlikely that lead impacts are present below the southern Property parcel as no recycling operations existed on that parcel, and that parcel has remained paved for several decades. Stantec recommends the lead impacted soil be removed from the Property to levels below the current screening level of 80 mg/kg.

- **On-Site Commercial Structure:** A commercial structure with office space, addressed as 11708 Arkansas Street, is located in the northern portion of the Property. No specific occupancy information was identified for this address in the environmental database report; however, the address was identified as “Rooney Daniel” in the environmental database report under the following database listings: HAZNET, HWTS, ECHO, RCRA NonGen/NLR, and FINDS. Upon reviewing the ECHO database listing, no violations were reported from this facility from 2017 through 2020. The ECHO, FINDS, and RCRA listings are related to the former recycling center facility located at this Property address. According to the HAZNET database listing, asbestos containing waste was disposed from this facility in 2019 to a licensed off-site facility. Stantec observed general construction waste material inside the storage area of this structure during the site reconnaissance. No below-ground features (*i.e.* clarifiers, pits, sumps, or lifts) were observed within this building. Use of this structure prior to the recycling facility operations is unknown.

  As a cautionary measure, Stantec evaluated soil vapor conditions below this structure. Stantec advanced a single soil vapor boring (SV5) in the central portion of this structure. Tetrachloroethylene (PCE) was detected at 41.9 µg/m^3 at this location, exceeding the residential screening level of 15.3 µg/m^3, but below the MIASL of 460 µg/m^3. Due to the detected concentrations are reported below the risk-based screening level, Stantec does not recommend further investigation regarding these impacts. However, although these vapor impacts are below the risk-based screening level, a regulatory agency may request to perform additional assessment to delineate the lateral and vertical extent of impacts.

- **Adjacent LUST Case:** A fuel service facility identified as “Bob’s Chevron” is located adjacent to the southeast of the Property. This facility is a fuel service station with multiple underground storage tanks (USTs) located at the facility. The USTs are located approximately 50 feet from the southeastern Property boundary. The facility is also listed as a leaking underground storage tank (LUST) case, with a case closure issued by the California State Water Resources Control Board (Waterboard) in 2002. Multiple violations were also listed for this facility for non-compliance in leak testing, monitoring requirements, and permitting issues. No data was identified in the environmental database report or the online database pertaining to the extent of impacts related to the LUST case for this facility. Stantec researched the Waterboard online database Geotracker in an attempt to identify impacts related to this facility; however, no documents were available on this database for review. There is potential that residual impacts remain at this facility, which have the potential to present a vapor encroachment condition for the Property. Therefore, this facility was considered a REC to the Property and warranted further investigation.

  Stantec evaluated the potential for vapor encroachment from this facility onto the Property with the installation of a single soil vapor location (SV7), located along the common Property boundary with this facility. Various VOCs were detected in the soil vapor sample collected adjacent to this facility;

however, no VOCs were detected at concentrations exceeding their respective residential-use screening levels. Therefore, this facility is no longer considered a REC to the Property and Stantec recommends no further investigation regarding this facility.

- **Adjacent Automotive Repair Facility:** An automotive repair facility, identified as Cerritos Auto Repair, is located adjacent to the northeast of the Property. This facility is mis-plotted by EDR and is actually located adjacent to the north and east of the Property. This facility is identified in the environmental database report as generating hazardous waste, identified as waste oil. Multiple violations are reported for this facility, including failure to properly label hazardous waste containers and administrative non-compliance. Generally poor housekeeping practices were observed at this facility during Stantec's site reconnaissance. Given the documented violations and proximity of this facility to the Property, Stantec performed a Phase II subsurface investigation.

  More specifically, Stantec evaluated the potential for vapor encroachment from this facility onto the Property through the installation of a soil vapor location (SV6) located along the common Property boundary with this facility. Naphthalene, a VOC, was detected at 8.0 µg/m^3, exceeding the residential screening level of 2.77 µg/m^3, but below the MIASL of 83 µg/m^3. Additionally, TPH as gasoline was detected at 6,740 µg/m^3, exceeding the vapor intrusion odor nuisance level of 3,300 µg/m3. However, this concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3. Stantec concludes that this detection is not indicative of a REC and, as stated above, recommends no further investigation regarding soil vapor at the Property, including potential encroachment from the adjacent property onto the Property.

7.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a "data gap" as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.
Facility Access Restrictions to Site Reconnaissance:	No access was provided to the residence located at 11700 Arkansas Street or the office/residence located at 16703 Pioneer Boulevard. The lack of entry into this space is not considered a significant data gap.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	None.
Data Gaps from Historical Records Review:	None.

Gap	Discussion
Data Gaps from Interviews:	No interviews were conducted as part of this Phase I ESA. The lack of interview is not considered a significant data gap.
Other Data Gaps:	None.

7.3 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the property located at 11700, 11708, 11722, and 11728 Arkansas Street, and 16403 Pioneer Boulevard, City of Artesia, County of Los Angeles, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed the following evidence of recognized environmental conditions in connection with the Property:

- **Former On-Site Recycling Facility:** A recycling facility identified as "Hi Waste Disposal Co." and "R&R Recycling" appears to have operated at the Property address of 11718 Arkansas Street, located in the northern portion of the Property, from circa 1990 until 2019. Limited information was provided for this facility in the environmental database report. Several large metallic scrap piles were observed in the northern portion of the Property during review of aerial photography. Due to the facility not operating at the Property during Stantec's reconnaissance, proper housekeeping practices for this facility are unknown. Potential releases of petroleum hydrocarbons, other liquid chemicals, and metals are commonly associated with these types of operations; therefore, the recycling facility was considered a REC to the Property.

  Carlin Environmental Consulting, Inc. (CEC) performed a limited Phase II ESA for the northern portion of the Property in 2018. This assessment was performed to evaluate multiple RECs identified by CEC in a Phase I ESA prepared for the Property (which was unavailable for review by Stantec). CEC oversaw the advancement and installation of five (5) soil vapor borings in the northern portion of the Property, advanced to a maximum depth of six feet below ground surface. Soil vapor samples were collected from each of these locations and analyzed for volatile organic compounds (VOCs) and total petroleum hydrocarbons as gasoline (TPHg) by USEPA test method 8260B. No VOCs or TPHg was detected above the method reporting limits of 200 micrograms per cubic meter (ug/m^3) in any of the soil vapor samples collected (*i.e.*, the results were "non-detect"). Therefore, CEC recommended no further investigation regarding soil vapor at the Property.

  The laboratory method reporting limits of 200 ug/m^3 exceed present day screening levels using a 0.03 attenuation factor for indoor air to soil vapor. Consequently, although the soil vapor results from this investigation did not identify any chemical impacts to soil vapor, Stantec concluded that further assessment was warranted in light of changes in laboratory detection limits and regulatory standards.

  To evaluate this issue, Stantec performed a shallow soil and soil vapor assessment in the former recycling operations area in the northern portion of the Property. Minor detections of diesel range organics (DRO) and oil range organics (ORO) were detected in shallow soil samples collected from location SV1 and SV4. No VOCs were detected above the laboratory method reporting limit (i.e. results were "non-detect"). Accordingly, Stantec recommends no further investigation regarding TPH or VOCs in soil at the Property.

  Lead was detected at 120 milligram per kilogram (mg/kg) in sample SV4-1 and 130 mg/kg in sample B4-1.5. These lead concentrations exceed the residential screening level for lead of 80 mg/kg. The

elevated lead impacts at the Property are considered a REC. The lateral limit of lead impacts to near-surface soils appears to be confined to the area of borings SV4 and B4, located along the parcel boundary, as shown in **Figure 3**. Stantec considers it unlikely that lead impacts are present below the southern Property parcel as no recycling operations existed on that parcel, and that parcel has remained paved for several decades. Stantec recommends the lead impacted soil be removed from the Property to levels below the current screening level of 80 mg/kg.

With respect to soil vapor, Stantec performed a soil vapor survey in the former recycling operations area in the northern portion of the Property. TPH as gasoline was detected at 4,540 µg/m^3 at location SV4, exceeding the vapor intrusion odor nuisance level of 3,300 µg/m^3. However, this concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3. It appears TPH as gasoline detection is related to the minor TPH impacts to soil at this location. Because the detected concentrations are below the risk-based screening level, Stantec concludes that the soil vapor impacts do not represent a REC and recommends no further investigation regarding soil vapor at the Property.

- **Adjacent Automotive Repair Facility:** An automotive repair facility, identified as Cerritos Auto Repair, is located adjacent to the northeast of the Property. This facility is mis-plotted by EDR and is actually located adjacent to the north and east of the Property. This facility is identified in the environmental database report as generating hazardous waste, identified as waste oil. Multiple violations are reported for this facility, including failure to properly label hazardous waste containers and administrative non-compliance. Generally poor housekeeping practices were observed at this facility during Stantec's site reconnaissance. Given the documented violations and proximity of this facility to the Property, Stantec performed a Phase II subsurface investigation.

  More specifically, Stantec evaluated the potential for vapor encroachment from this facility onto the Property through the installation of a soil vapor location (SV6) located along the common Property boundary with this facility. Naphthalene, a VOC, was detected at 8.0 µg/m^3, exceeding the residential screening level of 2.77 µg/m^3, but below the MIASL of 83 µg/m^3. Additionally, TPH as gasoline was detected at 6,740 µg/m^3, exceeding the vapor intrusion odor nuisance level of 3,300 µg/m3. However, this concentration does not exceed the human health risk level for residential purposes of 20,000 µg/m^3. Stantec concludes that this detection is not indicative of a REC and, as stated above, recommends no further investigation regarding soil vapor at the Property, including potential encroachment from the adjacent property onto the Property.

8.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-13 non-scope services were performed as part of this Phase I ESA:

8.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows: maximum risk is from paint applied before 1950.
- There is severe risk from paint applied before 1960.
- There is moderate risk from deteriorated paint applied before 1970.
- There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

The Property buildings are believed to have been constructed in the early- to mid-1970's. Therefore, the presence of LBP is considered possible.

8.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Stantec makes no warranty as to the possible existence or absence of inaccessible materials or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition to be compliant with, EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

Given the age of the existing buildings on the Property (circa 1970's), the presence of ACMs is considered probable. Stantec recommends conducting a comprehensive, pre-demolition ACM survey in accordance with the sampling protocol of the Asbestos Hazard Emergency Response Act (AHERA) prior to any activities with the potential to disturb building materials to determine whether ACM are present.

Further, in the event ACM is detected, Stantec recommends proper removal and disposal of the materials identified prior to any activities with the potential to disturb them.

8.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (http://www.epa.gov/radon/zonemap.html).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	
Normally-occupied sub grade areas present? (i.e., basement apartments, offices, stores, etc.)		
No subgrade areas are present at the Property.		

The Property is located in Zone 2 and is considered to have medium potential for radon. To determine Property-specific radon levels, a radon survey would have to be conducted. However, there are no occupied subgrade areas, further investigation of indoor radon issues does not appear to be warranted.

Notes:

All concentrations reported in microgram per cubic meter ($\mu g/m^3$)

(1) - Reported as feet below original grade.

(2) - More conservative screening level between USEPA Region 9 RSL (May, 2020) and DTSC HERO Note 3 (April, 2020), and SFBRWQCB ESL (2019, Rev. 2)

"<" - Results reported below Laboratory Reporting Limit.

BOLD - Analyte detected above laboratory report lining limit

Indicates value above the residential screening level (0.03 AF)

Abbreviations:

AF - Attenuation Factor

DTSC - Department of Toxic Substance Control

EPA - United States Environmental Protection Agency

ESL - Environmental Screening Level

HERO - Human and Ecological Risk Office

MBK - 2-Hexanone

MIBK - 4-Methyl-2-pentanone

NA - Not Analyzed

NE - Not Established

PCE - Tetrachloroethene

SFBRWQCB - San Fransisco Bay Regional Water Quality Control Board

1,1,1-TCA - 1,1,1-trichlorethane

1,2,4-TMB - 1,2,4-Trimethylbenzene

1,3,5-TMB - 1,3,5-Trimethylbenzene

VOCs - Volatile Organic Compounds

APPENDICES

Appendix A Photographs of the Property and Vicinity

Photo #1 View of Property from Alburtis Avenue and Arkasas Street. View looking to the southeast.

Photo #2 View of southern Property parcel. This area is utilized for recreation vehicle storage. Several minor surficial petroleum stains were observed in this area.

Photo #3 View of minor surficial petroleum staining in southern Property parcel.

Photo #4 View of small residential structure located on southern Property parcel. View looking to the northwest.

Photo #5 View of 11708 Arkansas Street exterior. View looking to the southeast.

Photo #6 View of 11708 Arkansas Street interior.

Photo #7 View of 11708 Arkansas Street interior.

Photo #8 View of 11708 Arkansas Street interior.

Photo #9 View of northern Property parcels. View looking to the south.

Photo #10 View of northern Property parcels. These parcels are utilized for recreation vehicle storage, and the ground surfacace is gravel. View looking to the east.

Appendix B STANTEC RESUMES

Alicia R Jansen CAC, LRCIA

Environmental Scientist

Alicia is an Associate Scientist with over ten years of experience in Phase I and II Environmental Assessments, with strong emphasis in water quality and environmental research. She is experienced in California Environmental Quality Act (CEQA) compliance and the preparation of initial studies. Alicia has managed the preparation of environmental documents, training programs, and environmental compliance during large environmental monitoring projects. Alicia's environmental consulting experience includes performing asbestos and lead-based paint surveys, oversight of contractors during asbestos abatement, hazardous materials surveys, and Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13.

EDUCATION

BA, Environmental Studies, San Jose State University, San Jose, California, 2004

CERTIFICATIONS & TRAINING

Residential Measurement Provider, 108212, National Radon Proficiency Program, Anaheim, California, 2015

REGISTRATIONS

Certified Asbestos Consultant #CAC #15-5379, State of California Division of Occupational Safety and Health

Lead Related Construction Inspector Assessor #19526, California Department of Public Health

MEMBERSHIPS

Member, Groundwater Resources Association of California

PROJECT EXPERIENCE

Health, Safety & Industrial Hygiene

Confidential Health Care Company, Asbestos, Lead-Based Paint, and Hazardous Materials Survey, Northern California (Staff)

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple occupied hospitals and office spaces. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings.

State of California General Services, Asbestos, Lead-Based Paint, and Hazardous Materials Survey, Northern California (Project Lead)

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple communication towers in remote areas. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings.

** denotes projects completed with other firms*

Alicia R Jansen CAC, LRCST

Environmental Scientist

Indoor Air Quality Assessments*, San Jose, California (Staff)
Alicia performed site inspections, interviews, and collected air samples to be analyzed for various air pollutants and molds including formaldehyde, penicillium, aspergillus, cladosporium, and stachybotry. She prepared reports summarizing findings and made recommendations.

Veteran's Administration of Puget Sound, Asbestos and Lead-Based Paint Survey, Seattle, Washington (Project Scientist)
Alicia served as the Project Scientist responsible for hazardous building material assessments, specifically asbestos and lead-based paint. These services were required as part of the pre-design tasks for this project. Over 300 samples were collected over the span of four days culminating in a final hazardous building materials report to be incorporated into the facility design as well as demolition activities once the construction phase of the project commences.

Interim Remedial Action, Indoor Air Sampling, and Sub-Slab Soil Gas Sampling, Sunnyvale, California (Staff)
Alicia conducted an indoor air sampling survey using air sampling pumps, dosimeter badges, and flame ionization detector (FID) during a sump excavation. She performs semi-annual sub-slab soil vapor sampling and indoor air quality surveys using summa canisters. She assists with the preparation and submittal of reports summarizing the findings and provides recommendations to the RWQCB.

Lead Dust Assessment and Abatement Oversight, Fremont, California (Project Scientist)
Alicia assisted with the evaluation of lead dust in an industrial facility. A total of 307 dust wipe samples were collected in order to evaluate the potential presence of lead dust throughout the two-story, 500,000 square foot manufacturing building.

Former Tesoro Coke Facility, Asbestos, Lead-Based Paint Survey, Pittsburg, California (Project Scientist)
Alicia assisted with an asbestos and lead paint survey of 20 structures at the facility ultimately scheduled for demolition. More than 200 samples were collected over the span of two days. A report was prepared that will stand up to regulatory scrutiny for demolition while providing the information needed for worker safety during demolition activities at the facility

Permitting, Compliance, Auditing

Tesoro Refinery, Initial Study*, Benicia, California (Staff)
Alicia assisted with the background research and preparation of applicant-prepared initial study for the upgrade of a refinery.

Transmission Line Upgrade*, San Mateo to San Francisco, California (Staff)
Alicia supported the environmental compliance program for the construction of a 27-mile 230 kV underground and overhead transmission line. She assisted with the preparation and submittal of variance requests, extra work space requests, and daily and weekly reports for submittal to the California Public Utilities Commission. She also conducted research and assisted with training and report preparation.

** denotes projects completed with other firms*

Alicia R Jansen CAC, LRCST

Environmental Scientist

Remedial Investigations & Assessments

Multiple Confidential Clients, Phase I Environmental Site Assessments (ESA), Multiple Sites, California (Project Lead)

Alicia performs Phase I ESA in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13 to achieve compliance with requirements of the "All Appropriate Inquiries" rule required to obtain protection from liability under the federal Comprehensive Environmental Response, Cleanup and Liability Act (CERCLA). Previous sites include large industrial warehouses, multi-tenant commercial buildings, and residential properties. She reviews topographic maps, Sanborn Fire Insurance Maps, and files at local regulatory agencies. She interviews present and former property owners and performed site and adjacent property reconnaissance. She prepares reports summarizing the findings and provides recommendations for further assessment if applicable.

California Department of Transportation Portfolio, Multiple Sites, Northern California (Project Lead)

Alicia prepared quarterly groundwater monitoring reports, subsurface investigation reports, sensitive receptor surveys, and preferential pathway studies for various California Department of Transportation locations throughout northern California. She assisted with the utility locating, work plan preparation, field coordination, archived data onto the State Water Resource Control Board's (RWQCB) Geotracker electronic filing system.

Homebuilder, Soil Gas Sampling and Human Health Risk Assessment, San Jose, California (Project Lead)

Alicia performed a soil vapor survey in conformance with the DTSC, Advisory Active Soil Gas Investigations, using a low-dead volume soil vapor sampling device and a mobile laboratory for onsite chemical analysis. She also assisted with the report preparation summarizing the findings and providing recommendations for further assessment, if applicable.

Goodyear Portfolio, Northern California and Hawaii (Project Lead)

Alicia performed Phase I ESAs and Phase II Site Assessments for various Goodyear Tire & Rubber Company locations throughout California and Hawaii. She assisted with the installation of monitoring wells and exploratory borings; underground storage tank removals; site restoration; product removal with passive recovery system; archived data onto the State Water Resource Control Board's Geotracker electronic filing system; and assisted with the preparation of quarterly groundwater monitoring reports, sensitive receptor surveys, site conceptual models, and subsurface investigation reports.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985, Expires 2011

Professional Geologist #4066, State of California Issued 1985, Expires 2011

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminates involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony
Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office
Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California
Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments
Siting Studies
Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation
Assessment and Remedial Design, California (Project Supervisor)
Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*
Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*
Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*
Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately $2 million.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The over all cost savings for the client was more than $1 million. Total cost was less than $250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was $22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of and industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was $450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been $2.8 million to date.

** denotes projects completed with other firms*

Joshua Sargent PG

Geologic Staff
9 years of experience ·San Bernardino, California

Joshua is a staff geologist with a master's degree in geological sciences. He has extensive field experience in Phase I and II Environmental Site Assessment (ESA) field work and report preparation and environmental remediation. His field experience includes mapping of shallow faults throughout Southern California using refraction seismology equipment, soil logging and collection, soil vapor collection, and surface and groundwater collection with basic flow measurements and parameter stabilization. Joshua also has experience working with 1166 South Coast Air Quality Management District (AQMD) air monitoring on projects ranging from limited access dry cleaner excavations, solvent excavations, and petroleum excavations related to underground storage tank releases. Included in this type of monitoring is the assessment of a safe work environment for the contractors involved with this type of work. He is skilled in using ArcGIS 10, Adobe Suite, and the Microsoft Office Suite.

Joshua's environmental consulting experience includes performing Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13, and the collection, and interpretation of Phase II Environmental Assessment data. Joshua also has experience in preparing detailed Remedial Actions Plans (RAPs), groundwater monitoring reports, and other documents for State and County agency submittal.

REGISTRATIONS

Professional Geologist #9730, State of California

PROJECT EXPERIENCE

HEALTH AND SAFETY MANAGEMENT

Health and Safety Subcontractor Oversight Services | Geological Staff

Joshua has provided subcontractor oversight for field activities including soil, soil vapor, and groundwater sampling. Other field activities include well destruction and on-site remediation.

ENVIRONMENTAL SITE ASSESSMENTS

Environmental and Geotechnical Soil Assessment | Various Locations, Arizona, California, and Nevada | 2013-Present | Soil Assessment

Joshua has performed environmental soil assessments throughout California, Arizona, and Nevada. These activities have included soil collection for geotechnical and environmental purposes and logging using various drilling techniques including direct push technology (DPT), hollow stem auger (HSA), cone penetrometer testing (CPT), and sonic. The collected soils were logged in accordance with the United Soil Classification System (USCS). Role: Soil Assessment | Cost: Varies; $10,000-$100,000 | Dates involved: 08/2013-Ongoing

Phase II Site Assessment | California | Author

Joshua has conducted the field investigation and formulated the deliverable related to identified recognized environmental conditions (RECs) for the Property. The field responsibilities included managing on-site contractors and health and safety operations, and the collection of soil soil vapor, and groundwater. The office responsibilities included the review and interpretation of analytical data, authoring and reviewing the report deliverable to the client.

Phase I Site Assessment | California | Phase I and Phase II Environmental Site Assessment, Author

Joshua performed an on-site reconnaissance survey, historical records investigation, and formulated the report deliverable. The report provided a thorough review of the property history and defined present environmental concerns for the client.

SOIL SAMPLING

Dust and Pesticide Monitoring, Soil Sampling | Monterey Park, California | AED 150K | 2013-2014 | Field Ovversight

Joshua performed field oversight during contaminated soil removal at a future residential community. Dust and toxaphene were monitored simultaneously to generate a site-specific threshold for dust concentration. Routine dust monitoring was performed once the threshold was determined. Property gridding and soil sampling were performed to determine contamination. Role: Field Oversight | Cost: $150,000 | Dates involved: 01/2013-06/2014

SOIL VAPOR INTRUSION ASSESSMENT

Vapor Intrusion Assessment from Historical Manufacturing Operations | North San Diego County, California | 2017-Present | Technical Support

Joshua has been involved with assessing the possible intrusion of harmful vapors into commercial and residential structures related to a release of solvents from a historical manufacturing facility. Joshua has been the site contact for all assessment activities and the lead oversight staff for all on-site and off-site activities. These assessments have included the collection of soil, soil vapor, sub-slab vapor, and groundwater throughout the area, located on public and private property. Joshua has overseen remedial efforts at the Site, which have included the installation of air purifiers, floor sealing, and target depressurization areas. Role: Technical Support | Cost: Varies; $50,000 - 1,000,000 | Dates involved: 02/2017-Ongoing

Soil Vapor Monitoring Well Installation | Various Locations, California | USD 60K | 2015-Present | Field Oversight

Joshua performed field oversight during the installation of multiple soil vapor monitoring wells. He assisted with health and safety oversight, described the soil during drilling, activities, assisted with the well installation, and conducted the subsequent soil vapor sampling. Role: Field Oversight | Cost: $60,000 | Dates involved: 03/2015-Ongoing

TECHNICAL WRITING

Various Technical Writing Projects | 2013-Present | Geological Staff

Joshua prepares Health and Safety plans, written permit applications, Phase I and Phase II Environmental Site Assessments reports, Work Plans detailing the results from soil, soil vapor, and groundwater sampling. Role: Health and Safety Support | Cost: Varies; $10,000-$100,000 | Dates involved: 08/2013-Ongoing

ENVIRONMENTAL SITE REMEDIATION

Soil Vapor Remediation | Orange County, California | Geological Staff

Joshua has provided monthly operation and maintenance on a soil vapor extraction system operating at a historical landfill. Components of the operation and maintenance included measurements of the recovered vapor for methane and volatile organic compounds, and collecting flow measurements from the extraction wells. Joshua prepared month operation and maintenance reports.

Subcontractor Oversight Services and Confirmation Soil Sampling | Geological Staff

Joshua has provided subcontractor oversight for remedial excavation of pesticide- and petroleum-impacted soil, and later conducted confirmation sampling to ensure all impacted material had been removed from the Site.

Att A – ASC Laboratory Report

October 18, 2018

Prepared For: Pioneer Reality Development, LLC
c/o Roland Spongberg at WKS Restaurant Group
2735 Carson Street, Lakewood, CA 90712

Subject: **Limited Phase II Investigation for 11708, 11718, 11722 & 11728 Arkansas Street, Artesia, California**

1.0 Introduction

Carlin Environmental Consulting, Inc. ("CEC") is pleased to prepare this Limited Phase II Investigation Report for Pioneer Reality Development, LLC, c/o Roland Spongberg at WKS Restaurant Group (the "Client"). This Phase II ESA report is for the property located at 11708, 11718, 11722 & 11728 Arkansas Street, City of Artesia, Los Angeles County and hereafter referred to as the Site or subject site. It is CEC's understanding that the proposed future use of the Site is undecided, but potential options include light industrial (storage warehouse) and in-fill residential.

1.1 Previous Reports

CEC had previously been retained by the Client to prepare a Phase I Environmental Site Assessment for this Site, with the knowledge that a Phase II investigation may be recommended. It was decided that the Phase I ESA would be conducted and completed prior to this subject investigation and the Phase I ESA report was published on September 10, 2018.

The Phase I ESA report prepared by CEC for this Site did not identify a potential contamination source *on the Site*. However, CEC did identify several Recognized Environmental Conditions (RECs) at nearby sites within a 500-foot radius of the subject site that presented the potential to negatively impact the subject site through migration of subsurface contamination. These nearby sites include current and historical Leaking Underground Storage Tank (LUST) and Historical Cleaners. As stated in the Phase I, these listings typically indicate a significant potential for subsurface contamination issues.

As a result of the nearby REC's, CEC recommend to the Client that a "limited subsurface investigation be conducted to determine if soil vapor at the Site has been negatively affected by these nearby sites". This subject report is the result of that recommendation.

2.0 Assessment Standards

This environmental investigation and the resulting report were generally prepared utilizing the procedures presented in ASTM E1903-11 Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process.

2.1 Limitation and Exceptions

This investigation was conducted using a degree of care and skill normally exercised, under similar circumstances, by reputable soil engineers, geologists, and environmental geoscientist practicing in this and similar localities. Opinions presented herein apply to site conditions existing at the time of our studies and cannot necessarily be taken to apply to site condition or changes that we are not aware of or have not had the opportunity to evaluate. CEC also assumes that the information provided by the owners, reviewed reports, regulatory database provider and regulatory agencies is true and reliable. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this document.

The format of this assessment report generally follow the recommended ASTM format as presented in E 1903-11. Some ASTM format sections, such as descriptions of the site and existing improvements, have been restricted and/or combined where appropriate and other, such as Special Terms and Conditions that are not applicable to this assessment have been eliminated.

3.0 Background

The Site is a rectangular shaped parcel of land located in the City of Artesia and encompasses approximately 0.95 acres. The Site consists of five Assessor Parcel Number's (APN): 7014-003-(20, 21, 22, 23, 24). It is located in a mixed commercial/light industrial and residential area located approximately 850 feet north of the California State Route 91 and just over one mile east of Interstate 65. Refer to Figure 1 for approximate Site Location.

The Site is was most recently occupied by Hi Waste Disposal, recycling yard. Currently the Site is vacant and unused. The Client indicated that previous tenants ceased recycling operations in November of 2017 and vacated the Site in January 2018.

CEC recommends that the reader of this document refer to the Phase I ESA for additional Site background and historical usage information.

4.0 Topography and Geology

The topography in the vicinity of the site is relatively flat lying with a slight tilt to the south and southwest towards the coyote creek channel. The elevation at the site is approximately 64 feet above sea level.

The Site is located within the southwestern block of the Los Angeles Basin, also referred to as the Los Angeles Depositional Basin, between the Peninsular Ranges and Transverse Ranges geomorphic provinces of California. The basin is known for its active tectonics, structural complexity, and abundant oil production.

A northwest structural trend is evident in many folding and faulting features of the regional geology, characteristic of the Peninsular Ranges geomorphic province. These include the Newport–Inglewood Fault Zone, the Paramount Syncline, the Dominguez Anticline, the Gardena Syncline, the Wilmington Anticline, and the Wilmington Syncline. Geologic units of the northern Peninsula Ranges province consist of Jurassic and Cretaceous-age basement rocks overlain by as much as 32,000 feet of marine and non-marine sedimentary strata ranging in age from the late Cretaceous to Holocene epochs. Characteristic of the southwestern block of the Los Angeles Basin is the basement rock referred to as the Catalina Schist. The nearly ubiquitous presence of this Cretaceous schist as a basement rock in the region indicates that the Newport–Inglewood Fault Zone may have been a boundary between oceanic and continental crusts, separated by a subduction zone at that boundary (Barrows, 1974).

The Site is characterized by a relatively simple areal geology and physiography, with more complex stratigraphic and structural relationships at depth. The site is located on a relatively flat, low-lying area featuring transitional structures that consist of partially buried anticlines and synclines. The site is located in the vicinity of the South Gate–Santa Ana depression, a generally down-warped area underlying the Downey Plain. The depression is a generally northwest-trending structure between the Baldwin Hills and the La Brea Plain and into Orange County. The major structural feature of the South Gate–Santa Ana depression in the vicinity of the site is the Norwalk Syncline. The Norwalk Syncline lies to the west of the City of Artesia (but east of the site) and extends northwesterly to the Inglewood Fault (DWR, 1961).

In the site vicinity, the thickness of Quaternary alluvium is interpreted to be on the order of approximately 25 feet. Based on geologic logs of shallow monitoring wells, the shallow alluvium consists predominantly of sands, silts, and sandy or silty clays near the site.

Quaternary Lakewood Formation sediments underlie the alluvium in the site vicinity and are interpreted to be present between approximately 25 and 280 feet below ground surface (bgs). The Lakewood Formation includes all upper Pleistocene deposits other than the Older Dune Sands. Typical lithology of the Lakewood Formation in the vicinity of the site includes stream-type deposits with finer-grained flood-plain sediments.

Pliocene-aged San Pedro Formation sediments underlie the Lakewood Formation with a thickness in the area of several hundred feet. San Pedro Formation sediments are comprised of fine gravels, sands, and silty sands with interbedded finer-grained materials (DWR, 1961).

5.0 Scope of Work

This section discusses activities recently concluded and details the subsurface investigation conducted throughout the Site.

5.1 Field Investigation

The limited Phase II investigation included a subsurface investigation to determine if potential contaminates of concern in the form of soil vapor are negatively impacting the subject site.

A total of five (5) borings were made using a Geoprobe Direct Push rig equally dispersed throughout the Site. No borings were made within the existing structures. All borings were pushed to depths between five and six feet below ground surface (bgs). Soil samples were collected in acetate sleeves from the depths of approximately four to six feet bgs. These soil samples were analyzed in the field via visual and olfactory indications for the presence of contamination. These potential visual and olfactory indications included stained soil (i.e. dark, sludge, etc.) and soil with a potent unnatural odor. These indications were not observed; thus, CEC did not submit soil samples to the laboratory for analyses.

At each of the five borings, a vapor probe was installed just above the total depth of the boring (approximately 5 feet) at 6 feet. Vapor probes consisted of a collection tip with a porous media connected to ¼-inch diameter polypropylene tubing that was extended to the surface. Sand (#3 Monterey) was placed beneath and above the probe tip a minimum of one foot. Above the sand layer, a minimum of one foot of hydrated bentonite crumbles was placed to isolate the soil vapor probe to subsurface conditions.

Prior to collection of vapor samples each of the probes were purged a minimum of three volumes of vapor. After the purging, the polypropylene tubing was connected to a vacuum box with was loaded with a properly labeled Tedlar bag. The vacuum box created the suction necessary to fill the Tedlar bag with vapor from the installed probe. This process was completed for each boring. At the completion of the vapor collection process, the Tedlar bags were placed in a non-chilled cooler and transported to a certified laboratory under proper chain of custody protocols. The Laboratory (Alpha Scientific Corporation) was located at 16760 Gridley Road, Cerritos, Ca. 90703.

5.2 Laboratory Results

A total of six soil vapor samples were collected from the five boring locations (a duplicate was collected from Boring #5 and is labeled and CEC-6 in the lab report). Samples were analyzed under EPA Method 8260B for Volatile Organic Compounds (VOCs).

All samples analyzed were Non-Detect for the compounds in question.

5.3 Results Analysis

As stated above, there was no detection of chemicals of concern in the collected soil vapor samples. CEC considers the scope and extent of this investigation to be representative of current Site conditions. The official laboratory report is provided as an appendix to this report. It is CEC's opinion that, had there been a presence of subsurface contamination beneath the Site, this investigation would have detected such.

6.0 Conclusions and Recommendations

This Limited Phase II ESA investigation was conducted for the purpose of addressing the potential for subsurface contamination from nearby potential REC sites. Laboratory testing and analysis did not indicate the presence of VOC's or TPH-g (vapor). Thus, it is CEC's conclusion and recommendation that no further investigative activities be conducted regarding this matter and no mitigation measures for soil vapor intrusion are warranted for future Site developments.

Project: Arkansas St
Project Site: Arkansas St., Artesia, CA
Sample Date: 09-18-2018
Lab Job No.: AG809031

Dear Mr. Carlin:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 09-18-2018 and analyzed by the following EPA methods:

EPA 8260B (VOCs by GC/MS)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions and with a chain of custody record attached.

Alpha Scientific Corporation is a CA ELAP certified laboratory (Certificate Number 3007). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph. D.
Laboratory Director

Sample Acceptance Checklist

Section 1

Client: CEC Project: Arkansas St. Lab Job# AG809031

Date Received: 9-18-2018

Sample(s) received in cooler(s)? Yes____ No ✓ (skip to Section 2)

Cooler(s) packed with: Ice____ Ice Packs____ Packing Material_____

Cooler Temperature (°C) : #1:_____ #2:_____ #3:_____ #4:_____ #5_____

(Acceptable range is 0°C to 6°C or arriving on ice for samples received on the same day as collected.)

(Ambient Temperature for vapor or air samples is acceptable).

If sample(s) received outside acceptable range, Project Manager contacted by(Personnel Initial):_____

Section 2	YES	NO	N/A
Was a COC received?	✓		
Were client sample IDs present?	✓		
Were sample(s) collection dates present?	✓		
Was the COC signed?	✓		
Were tests clearly indicated?	✓		
Did all samples arrive intact? If no, indicate below.	✓		
Did all container labels agree with COC?	✓		
Were correct containers used for the tests required?	✓		
Was there sufficient sample amount for requested tests?	✓		
Were the samples correctly preserved?	✓		
Was there headspace in VOA vials?			✓
Were Custody seals present?		✓	
If yes-were they intact?			✓

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: Artesia A

Property Address(es): 11700 Arkansas Street

City: Artesia State CA Zip 90701

Property Owner Name: Pioneer Realty Dev, LLC, Ronald Spangberg, Donald and Catherine Brown, QSR Holdings

Property Owner Phone #: _____

2. Contact For Site Access

Name: Daniel Rooney

Company/Organization/Title: owner representative

Phone #(562) 354-4851 E-Mail Address: daniel.rooney@wksusa.com

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes ___X___ No

If yes, describe or attach details of the lien _____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ Yes ___X___ No

If yes, describe or attach details of the limitations _____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____ Yes _X_ No

If yes, describe or attach details of your specialized knowledge or experience _____

_____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

_X_ Yes _____ No

_____ Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

_X_ Yes (describe) RV Storage / Industrial

_____

_____

_____ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

_____ Yes (describe) _____

_____

_____

_X_ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

_____Yes (describe) _____

_____

_____

__X__No

Do you know of any environmental cleanups that have taken place at the property?

_____Yes (describe) _____

_____

_____

__X__No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?

_____Yes (describe) _____

_____

_____

__X__No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

__X__Yes (describe) Seller has provided Ph.1/2 from 2016

_____

_____

_____No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity

generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 25 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 31 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 07/06/2020 has revealed that there is 1 HWT site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

JOHAL OIL CORPORATION (Continued) **S104537906**

Violation Description:	Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.
Violation Notes:	Returned to compliance on 05/14/2018. OBSERVATION: All hazardous wastes must be transported by a licensed hazardous waste hauler. -Did not observe any hazardous waste drums at the facility. The owner stated that he has not generated any hazardous wastes since he took over the business but was planning to take any hazardous wastes at his other location (15604 Pioneer Blvd/FA0020941). Instructed owner that he cannot transport hazardous wastes since he is not a licensed hauler. CORRECTIVE ACTION: Contact a licensed hauler when hazardous wastes have been generated at the business.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 93533
Site Name: ARTESIA TRANSMISSION & MUFFLER
Violation Date: 7/5/2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 02/08/2018. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 93533
Site Name: ARTESIA TRANSMISSION & MUFFLER
Violation Date: 7/5/2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 07/05/2017. OBSERVATION: The generator's EPA ID number(CAD982041386) is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number. Operator completed an application for a California EPA ID number at the time of inspection.
Violation Division: Los Angeles County Fire Department

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DIFFERENTIAL EXCHANGE (Continued) **S123536647**

Site Name: DIFFERENTIAL EXCHANGE
Violation Date: 4/10/2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 06/14/2018. OBSERVATION: Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. -The following disposal documentation/manifests was not available during time of inspection: used oil. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years and submit copies to the CUPA by 05/10/18.

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS

NAVARRO TRUCKING (Continued) **1011488105**

LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F010
Waste Description: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F011
Waste Description: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

Waste Code: F012
Waste Description: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste Code: F020
Waste Description: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

Waste Code: F021
Waste Description: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

Waste Code: F022
Waste Description: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE

NAVARRO TRUCKING (Continued) **1011488105**

PURIFICATION) FROM THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENES UNDER ALKALINE CONDITIONS.

Waste Code: F023
Waste Description: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

Waste Code: F024
Waste Description: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

Waste Code: F025
Waste Description: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

Waste Code: F026
Waste Description: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENE UNDER ALKALINE CONDITIONS.

Waste Code: F027
Waste Description: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

Waste Code: F028
Waste Description: RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

Waste Code: K001
Waste Description: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

Waste Code: K002
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME YELLOW AND ORANGE PIGMENTS.

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K003
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF MOLYBDATE ORANGE PIGMENTS.

Waste Code: K004
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF ZINC YELLOW PIGMENTS.

Waste Code: K005
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME GREEN PIGMENTS.

Waste Code: K006
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS (ANHYDROUS AND HYDRATED).

Waste Code: K007
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF IRON BLUE PIGMENTS.

Waste Code: K008
Waste Description: OVEN RESIDUE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS.

Waste Code: K009
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

Waste Code: K010
Waste Description: DISTILLATION SIDE CUTS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

Waste Code: K011
Waste Description: BOTTOM STREAM FROM THE WASTEWATER STRIPPER IN THE PRODUCTION OF ACRYLONITRILE.

Waste Code: K013
Waste Description: BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

Waste Code: K014
Waste Description: BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

Waste Code: K015
Waste Description: STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.

Waste Code: K016
Waste Description: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.

Waste Code: K017
Waste Description: HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.

Waste Code: K018
Waste Description: HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.

Waste Code: K019

NAVARRO TRUCKING (Continued) **1011488105**

Waste Description: HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.

Waste Code: K020
Waste Description: HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE MONOMER PRODUCTION.

Waste Code: K021
Waste Description: AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.

Waste Code: K022
Waste Description: DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.

Waste Code: K023
Waste Description: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

Waste Code: K024
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

Waste Code: K025
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.

Waste Code: K026
Waste Description: STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.

Waste Code: K027
Waste Description: CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.

Waste Code: K028
Waste Description: SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

Waste Code: K029
Waste Description: WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

Waste Code: K030
Waste Description: COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.

Waste Code: K031
Waste Description: BY-PRODUCT SALTS GENERATED IN THE PRODUCTION OF MSMA AND CACODYLIC ACID.

Waste Code: K032
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHLORDANE.

Waste Code: K033
Waste Description: WASTEWATER AND SCRUB WATER FROM THE CHLORINATION OF CYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

Waste Code: K034

NAVARRO TRUCKING (Continued) **1011488105**

Waste Description: FILTER SOLIDS FROM THE FILTRATION OF HEXACHLOROCYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

Waste Code: K035
Waste Description: WASTEWATER TREATMENT SLUDGES GENERATED IN THE PRODUCTION OF CREOSOTE.

Waste Code: K036
Waste Description: STILL BOTTOMS FROM TOLUENE RECLAMATION DISTILLATION IN THE PRODUCTION OF DISULFOTON.

Waste Code: K037
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF DISULFOTON.

Waste Code: K038
Waste Description: WASTEWATER FROM THE WASHING AND STRIPPING OF PHORATE PRODUCTION.

Waste Code: K039
Waste Description: FILTER CAKE FROM THE FILTRATION OF DIETHYLPHOSPHORODITHIOIC ACID IN THE PRODUCTION OF PHORATE.

Waste Code: K040
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF PHORATE.

Waste Code: K041
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF TOXAPHENE.

Waste Code: K042
Waste Description: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE DISTILLATION OF TETRACHLOROBENZENE IN THE PRODUCTION OF 2,4,5-T.

Waste Code: K043
Waste Description: 2,6-DICHLOROPHENOL WASTE FROM THE PRODUCTION OF 2,4-D.

Waste Code: K044
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING AND PROCESSING OF EXPLOSIVES.

Waste Code: K045
Waste Description: SPENT CARBON FROM THE TREATMENT OF WASTEWATER CONTAINING EXPLOSIVES.

Waste Code: K046
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING, FORMULATION, AND LOADING OF LEAD-BASED INITIATING COMPOUNDS.

Waste Code: K047
Waste Description: PINK/RED WATER FROM TNT OPERATIONS.

Waste Code: K048
Waste Description: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K049
Waste Description: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K050
Waste Description: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K051
Waste Description: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K052
Waste Description: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K060
Waste Description: AMMONIA STILL LIME SLUDGE FROM COKING OPERATIONS.

Waste Code: K061
Waste Description: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

Waste Code: K062
Waste Description: SPENT PICKLE LIQUOR FROM STEEL FINISHING OPERATIONS OF PLANTS THAT PRODUCE IRON OR STEEL.

Waste Code: K064
Waste Description: ACID PLANT BLOWDOWN SLURRY/SLUDGE RESULTING FROM THE THICKENING OF BLOWDOWN SLURRY FROM PRIMARY COPPER PRODUCTION.

Waste Code: K065
Waste Description: SURFACE IMPOUNDMENT SOLIDS CONTAINED IN AND DREDGED FROM SURFACE IMPOUNDMENTS AT PRIMARY LEAD SMELTING FACILITIES.

Waste Code: K066
Waste Description: SLUDGE FROM TREATMENT OF PROCESS WASTEWATER AND/OR ACID PLANT BLOWDOWN FROM PRIMARY ZINC PRODUCTION.

Waste Code: K069
Waste Description: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

Waste Code: K071
Waste Description: BRINE PURIFICATION MUDS FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION, IN WHICH SEPARATELY PREPURIFIED BRINE IS NOT USED.

Waste Code: K073
Waste Description: CHLORINATED HYDROCARBON WASTE FROM THE PURIFICATION STEP OF THE DIAPHRAGM CELL PROCESS USING GRAPHITE ANODES IN CHLORINE PRODUCTION.

Waste Code: K083
Waste Description: DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.

Waste Code: K084
Waste Description: WASTEWATER TREATMENT SLUDGES GENERATED DURING THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

Waste Code: K085
Waste Description: DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.

Waste Code: K086
Waste Description: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K087
Waste Description: DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.

Waste Code: K088
Waste Description: SPENT POTLINERS FROM PRIMARY ALUMINUM REDUCTION.

Waste Code: K090
Waste Description: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUMSILICON PRODUCTION.

Waste Code: K091
Waste Description: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUM PRODUCTION.

Waste Code: K093
Waste Description: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

Waste Code: K094
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

Waste Code: K095
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

Waste Code: K096
Waste Description: HEAVY ENDS FROM THE HEAVY ENDS COLUMN FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

Waste Code: K097
Waste Description: VACUUM STRIPPER DISCHARGE FROM THE CHLORDANE CHLORINATOR IN THE PRODUCTION OF CHLORDANE.

Waste Code: K098
Waste Description: UNTREATED PROCESS WASTEWATER FROM THE PRODUCTION OF TOXAPHENE.

Waste Code: K099
Waste Description: UNTREATED WASTEWATER FROM THE PRODUCTION OF 2,4-D.

Waste Code: K100
Waste Description: WASTE LEACHING SOLUTION FROM ACID LEACHING OF EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

Waste Code: K101
Waste Description: DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

Waste Code: K102
Waste Description: RESIDUE FROM THE USE OF ACTIVATED CARBON FOR DECOLORIZATION IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

Waste Code: K103
Waste Description: PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF ANILINE.

Waste Code: K104
Waste Description: COMBINED WASTEWATERS GENERATED FROM NITROBENZENE/ANILINE PRODUCTION.

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K105
Waste Description: SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

Waste Code: K106
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION.

Waste Code: K107
Waste Description: COLUMN BOTTOMS FROM PRODUCT SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE (UDMH) FROM CARBOXYLIC ACID HYDRAZIDES.

Waste Code: K108
Waste Description: CONDENSED COLUMN OVERHEADS FROM PRODUCT SEPARATION AND CONDENSED REACTOR VENT GASES FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

Waste Code: K109
Waste Description: SPENT FILTER CARTRIDGES FROM PRODUCT PURIFICATION FROM THE PRODUCT OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

Waste Code: K110
Waste Description: CONDENSED COLUMN OVERHEADS FROM INTERMEDIATE SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

Waste Code: K111
Waste Description: PRODUCT WASHWATERS FROM THE PRODUCTION OF DINITROTOLUENE VIA NITRATION OF TOLUENE.

Waste Code: K112
Waste Description: REACTION BY-PRODUCT WATER FROM THE DRYING COLUMN IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

Waste Code: K113
Waste Description: CONDENSED LIQUID LIGHT ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

Waste Code: K114
Waste Description: VICINALS FROM THE PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

Waste Code: K115
Waste Description: HEAVY ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

Waste Code: K116
Waste Description: ORGANIC CONDENSATE FROM THE SOLVENT RECOVERY COLUMN IN THE PRODUCTION OF TOLUENE DIISOCYANATE VIA PHOSGENATION OF TOLUENEDIAMINE.

Waste Code: K117
Waste Description: WASTEWATER FROM THE REACTOR VENT GAS SCRUBBER IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

Waste Code: K118
Waste Description: SPENT ADSORBENT SOLIDS FROM PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K123
Waste Description: PROCESS WASTEWATER (INCLUDING SUPERNATES, FILTRATES, AND WASHWATERS) FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

Waste Code: K124
Waste Description: REACTOR VENT SCRUBBER WATER FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

Waste Code: K125
Waste Description: FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

Waste Code: K126
Waste Description: BAGHOUSE DUST AND FLOOR SWEEPINGS IN MILLING AND PACKAGING OPERATIONS FROM PRODUCTION OR FORMULATION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

Waste Code: K131
Waste Description: WASTEWATER FROM THE REACTOR AND SPENT SULFURIC ACID FROM THE ACID DRYER FROM THE PRODUCTION OF METHYL BROMIDE.

Waste Code: K132
Waste Description: SPENT ABSORBENT AND WASTEWATER SEPARATOR SOLIDS FROM THE PRODUCTION OF METHYL BROMIDE.

Waste Code: K136
Waste Description: STILL BOTTOMS FROM THE PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

Waste Code: K140
Waste Description: FLOOR SWEEPINGS, OFF-SPECIFICATION PRODUCT AND SPENT FILTER MEDIA FROM THE PRODUCTION OF 2,4,6, TRIBROMPHENOL

Waste Code: K141
Waste Description: PROCESS RESIDUES FROM THE RECOVERY OF COAL TAR, INCLUDING, BUT NOT LIMITED TO, TAR COLLECTING SUMP RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL. THIS LISTING DOES NOT INCLUDE K087 (DECANTER TANK SLUDGE FROM COKING OPERATIONS).

Waste Code: K142
Waste Description: TANK STORAGE RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR FROM THE RECOVERY OF COKE BY-PRODUCTS FROM COAL.

Waste Code: K143
Waste Description: PROCESS RESIDUES FROM THE RECOVERY OF LIGHT OIL, INCLUDING, BUT NOT LIMITED TO, THOSE GENERATED IN STILLS, DECANTERS, AND WASH OIL RECOVERY UNITS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

Waste Code: K144
Waste Description: WASTEWATER SUMP RESIDUES FROM LIGHT OIL REFINING, INCLUDING, BUT NOT LIMITED TO, INTERCEPTING OR CONTAMINATION SUMP SLUDGES FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

Waste Code: K145
Waste Description: RESIDUES FROM NAPHTHALENE COLLECTION AND RECOVERY OPERATIONS FROM THE

NAVARRO TRUCKING (Continued) **1011488105**

RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

Waste Code: K147
Waste Description: TAR STORAGE RESIDUES FROM COAL TAR REFINING.

Waste Code: K148
Waste Description: RESIDUES FROM COAL TAR DISTILLATION, INCLUDING, BUT NOT LIMITED TO, STILL BOTTOMS.

Waste Code: K149
Waste Description: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, RING-CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS. [THIS WASTE DOES NOT INCLUDE STILL BOTTOMS FROM THE DISTILLATION OF BENZOYL CHLORIDE]

Waste Code: K150
Waste Description: ORGANIC RESIDULES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

Waste Code: K151
Waste Description: WASTEWATER TREATMENT SLUDGES, EXCLUDING NEUTRALIZATION AND BIOLOGICAL SLUDGES, GENERATED DURING THE TREATMENT OF WASTEWATERS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

Waste Code: K156
Waste Description: ORGANIC WASTE (INCLUDING HEAVY ENDS, STILL BOTTOMS, LIGHT ENDS, SPENT SOLVENTS, FILTRATES, AND DECANTATES) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

Waste Code: K157
Waste Description: WASTEWATERS (INCLUDING SCRUBBER WATERS, CONDENSER WATERS, WASHWATERS, AND SEPARATION WATERS) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

Waste Code: K158
Waste Description: BAG HOUSE DUSTS AND FILTER/SEPARATION SOLIDS FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

Waste Code: K159
Waste Description: ORGANICS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

Waste Code: K160
Waste Description: SOLIDS (INCLUDING FILTER WASTES, SEPARATION SOLIDS, AND SPENT CATALYSTS) FROM THE PRODUCTION OF THIOCARBAMATES AND SOLIDS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

Waste Code: K161
Waste Description: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE PRODUCTION OF DITHIOCARBAMATE ACIDS AND THEIR SALTS. (THIS LISTING DOES NOT INCLUDE K125 OR K126).

Waste Code: K169
Waste Description: CRUDE OIL STORAGE TANK SEDIMENT FROM PETROLEUM REFINING OPERATIONS

NAVARRO TRUCKING (Continued) **1011488105**

Waste Code: K170
Waste Description: CLARIFIED SLURRY OIL TANK SEDIMENT AND/OR IN-LINE FILTER/SEPARATION SOLIDS FROM PETROLEUM REFINING OPERATIONS

Waste Code: K171
Waste Description: SPENT HYDROTREATING CATALYST FROM PETROLEUM REFINING OPERATIONS,INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

Waste Code: K172
Waste Description: K172

Waste Code: K174
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF ETHLYENE DICHLORIDE OR VINYL CHLORIDE

Waste Code: K175
Waste Description: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF VINYL CHLORIDE MONOMER..

Waste Code: K176
Waste Description: BAGHOUSE FILTERS FROM THE PRODUCTION OF ANTIMONY OXIDE, INCLUDING FILTERS FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

Waste Code: K177
Waste Description: SLAG FROM THE PRODUCTION OF ANTIMONY OXIDE THAT IS SPECULATIVELY ACCUMULATED OR DISPOSED,INCLUDING SLAG FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

Waste Code: K178
Waste Description: RESIDUES FROM MANUFACTURING AND MANUFACTURING-SITE STORAGE OF FERRIC CHLORIDE FROM ACIDS FORMED DURING THE PRODUCTION OF TITANIUM DIOXIDE USING THE CHLORIDE-ILMENITE PROCESS.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: OEM AUTO REPAIR
Violation Date: 10/24/2018
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 10/24/2018. OBSERVATION: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. Observed two 55 gallon drum containing used oil and one 55 gallon drum containing drained used oil/gas filter. CORRECTIVE ACTION: Establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. This item is corrected at the time of field walk-through.

Violation Date:	10/24/2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/08/2019. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed 2 x 55 gallon drum containing used oil without accumulation date. No manifest was available on site at the time of field walk through CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required information. Since it cannot be determined how long the containers of used oil have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit a copy of the manifest via email to the CUPA by 11/23/2018.

CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	392369
Site Name:	F & J MACHINE SHOP
Violation Date:	1/8/2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/11/2019. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed one 30 gallon drum containing used motor oil with a yellow hazardous waste label but missing the name and address of generator, the hazardous properties, physical state, composition, and accumulation start date. CORRECTIVE ACTION: Immediately complete the label on the drum; ensure that all containers are marked with all the required information. Since it cannot be determined how long the containers of used motor oil have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit a copy of the manifest to the CUPA by 2/7/2019.

Violations:
Site ID: 143902
Site Name: PIONEER AUTO DISMANTLING
Violation Date: 1/20/2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 02/16/2017. OBSERVATION: An Emergency Response Plan and procedures has not been completed and submitted electronically to the CUPA. The plans submitted in CERS are incomplete. CORRECTIVE ACTION: Complete the emergency response plan and procedures to include all required content and submit electronically in the California Environmental Reporting System (CERS). Use the template on the CERS website to complete the emergency/contingency plan.

Site ID: 143902
Site Name: PIONEER AUTO DISMANTLING
Violation Date: 1/20/2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/20/2016. OBSERVATION: Observed used oil tank and waste antifreeze containers with faded labels. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. Operator put on new labels for the tank and containers at the time of inspection.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

CAL PLATE (Continued) **1000686351**

requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	101471
Site Name:	CAL PLATE INC
Violation Date:	6/21/2018
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 06/05/2019. OBSERVATION: The business failed

CAL PLATE (Continued) **1000686351**

to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CERS review revealed no submittal for the current and previous years. Observed the following at the time of inspection: 11 / ~200 CF cylinders of Nitrogen 1 / 55 gallon drum for waste solids 6 / 55 gallon drums containing waste solids (bentyl acetate solids) 7 / 55 gallon drums empty 8 / 55 gallon drums Cyrel Cylosol washout solution 4 / 55 gallon drums C-Component 2 / 55 gallon drums of Injection Oil 2 / 55 gallon drums of heat transfer fluid 4 / 5 gallon containers of Acetone CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency.

Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 101471
Site Name: CAL PLATE INC
Violation Date: 6/27/2014
Citation: HSC 6.95 25503.5(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25503.5(a)
Violation Description: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Returned to compliance on 07/21/2018. OBSERVATION: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. CORRECTIVE ACTION: Establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 101471
Site Name: CAL PLATE INC
Violation Date: 6/21/2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/21/2018. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Six 55 gallon drums containing waste heptyl acetate solids located across from the PRI machine was observed without labels. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Operator, Juan, affixed the yellow Haz Waste labels at the time of inspection. This item was corrected on site.
Violation Division: Los Angeles County Fire Department
Violation Program: HW

Violation Date: 4/10/2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

TRUK PROS INC (Continued) **S103996372**

Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes:	Returned to compliance on 01/14/2016. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	163678
Site Name:	TRUK PROS INC
Violation Date:	12/18/2015
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 02/02/2016. OBSERVATION: Copies of hazardous waste disposal records for waste paint booth filters and waste coolant for 2015, 2014 and 2013 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 1/17/16.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	163678
Site Name:	TRUK PROS INC
Violation Date:	4/5/2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 05/03/2019. OBSERVATION: Observed the following: a) 1 x 55 gallon drum containing used oil with accumulation date 11/13/2017 b) 1 x 55 gallon drum containing waste antifreeze with no accumulation date noted c) 1 x 55 gallon drum containing waste paint solvent with accumulation date 8/28/2018 CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste and submit the Certification of Compliance and/or any supporting documentation/photo to CUPA by 5/5/2019
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS

Violation Date:	4/5/2019
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 04/05/2019. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CERS review revealed last submittal dated 7/31/2018. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Owner submitted completed HMBP at the time of inspection. This item is corrected.

Violation Date:	12/18/2015
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..
Violation Notes:	Returned to compliance on 01/14/2016. OBSERVATION: Observed the top of the used oil and waste coolant 55-gallon drums accumulated with used oil and waste antifreeze. Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface water which could threaten human health or the environment. CORRECTIVE ACTION: Immediately clean the waste accumulation on top of the drums and manage according to Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed by 1/17/16.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW

WDS:
Name: CALIFORNIA DAIRIES INC.
Address: 11709 E Artesia Blvd
City: ARTESIA
Facility ID: Los Angeles River 192454001
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CA0057371 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 4
Facility Telephone: 5628651291
Facility Contact: Randy Ellis
Agency Name: CALIFORNIA DAIRIES INC.
Agency Address: Not reported
Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 2023
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

CALIFORNIA DAIRIES, INC (Continued) **1000853746**

Primary Waste:	MISCEL
Waste Type2:	D
Waste2:	Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Process Waste (Waste produced as part of the industrial/manufacturing process)
Secondary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 05/17/2018. OBSERVATION: Observed missing covers to (5 out of 10) drums of used oil. All containers of hazardous wastes shall have approved covers except for adding or removing wastes. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed by 05/18/18.

Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2020

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

South Map:	5633745 LOS ALAMITOS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

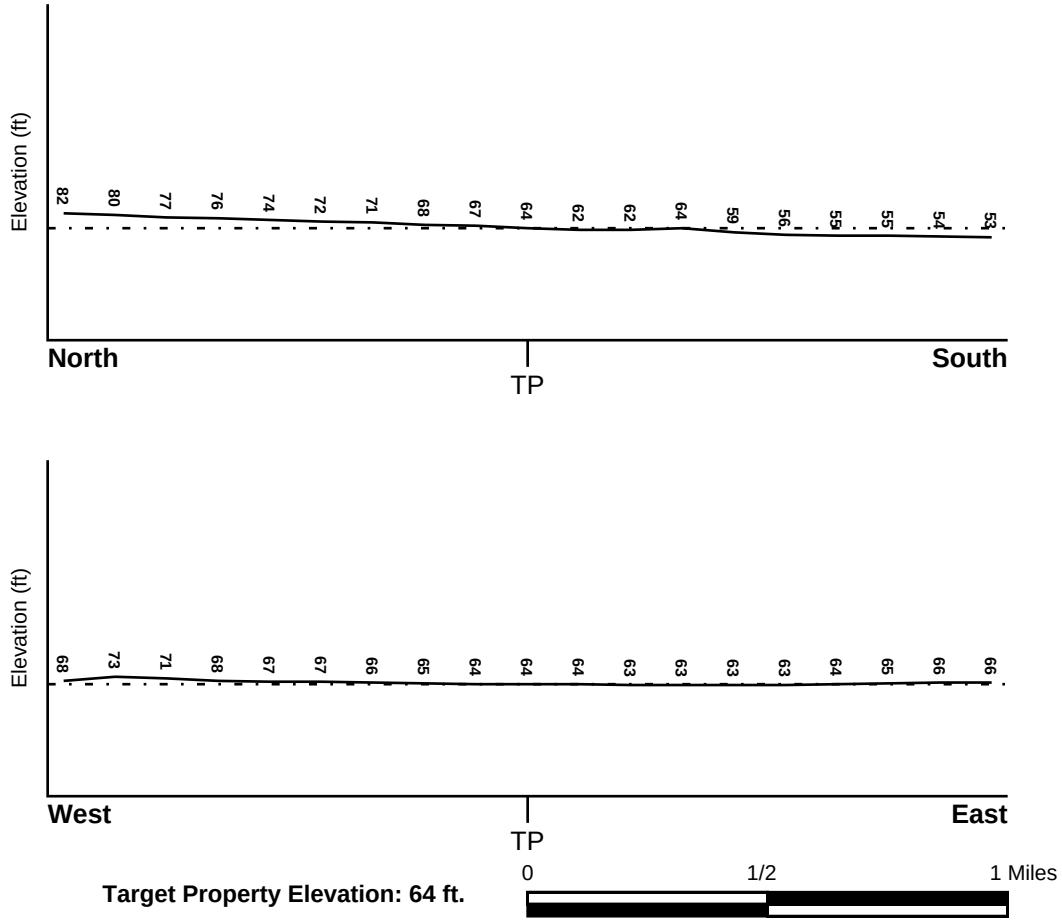
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 64 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1839F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1840F	FEMA FIRM Flood data
06037C1980F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
WHITTIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NE
Site Name:	DEFENSE FUEL SUPPORT POINT NORWALK
Site EPA ID Number:	CA8971524360
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	approximately 30 feet in the semi-perched aquifer.
Hydraulic Connection:	The Bellflower aquiclude is approximately 50 feet thick at the site and is present at a depth of approximately 50 feet. The aquiclude appears to separate the semi-perched and underlying aquifers within a two mile radius of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Dear Requestor:

We have received your Public Records Act Request from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs Data Management System. It tracks our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714-4845337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Julie Johnson

RE: PRA of October 08, 2020, Reference # H029126-100820.

Dear Geologist Joshua Sargent,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 11700 arkansas street
artesia CA

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

Subject: Public Records Request - Arkansas Street, Artesia

Good morning David,

I am conducting an environmental assessment and would like to request any available records (i.e. inspection notes, notices of violation, hazardous materials business plans/permits, underground storage tank permits, groundwater monitoring reports, soil vapor reports, etc) for the following Property addresses:

11700 Arkansas Street, Artesia, CA
11708 Arkansas Street, Artesia, CA
11718 Arkansas Street, Artesia, CA
11722 Arkansas Street, Artesia, CA
11728 Arkansas Street, Artesia, CA
16703 Pioneer Boulevard, Artesia, CA

Please let me know if you need anything else to process this request.

Thank you,

Joshua Sargent PG
Geologist

REQUIRED RELOCATION CORRECTION LIST

Dist. No. 4.09

Application Receipt No. 1746

This is a copy of the corrections and work to be accomplished to the building you propose to relocate. It will serve to inform you of the required work to be done before said building can be occupied at the new address. These corrections are the terms and conditions of the Relocation Permit and are required to be completed within 120 days from the date the permit is issued..

NOTE: This is not a permit. Do not move the building or start any work until you have posted the required bond and obtained the Relocation Permit. ITEMS CHECKED ARE YOUR CORRECTIONS.

Proposed Address 11700 E. Arkansas Locality Artesia

Size of Building (36-3 x 46-3) Gar-18-3 x 20-3

Floor Joists 2"x 6"-16" OC, Studs 2"x 4"-16" OC, Rafters 2"x 4"-24" OC,

SITE: Approved By _____, Denied By _____

BUILDING:

- ✓ 1. New (one, ~~two~~-story) foundation and under-pinning to comply with Building Code. Heat Gar
- ✓ 2. Locate building on lot to provide 30" eave clearance from property line.
- ✓ 3. Provide under-floor ventilation in exterior wall of building to comply.
- ✓ 4. Remove termite and/or dry rotted lumber and replace with sound timber.
- ___ 5. Repair floor of _____
- ___ 6. Remove _____ porch.
- ✓ 7. Remove brick chimneys.
- ✓ 8. Remove loose plaster and refinish.
- ___ 9. Minimum wall construction to be 2x4'-16" o.c.
  - ___ (a) Provide studding for interior and exterior walls.
  - ___ (b) Add _____ between existing studs.
- ___ 10. Unable to inspect ceiling joists and roof rafters; they may be overspanned. District Inspector will check for Code requirements at new site.
- ___ 11. Ceiling joists overspanned. Provide strong back or other means of support.
- ___ 12. Roof rafters overspanned. Additional bracing required to bearing partitions.
- ___ 13. Access to attic required. Provide 18"x18" scuttle.
- ___ 14. Door from bathroom not permitted to open directly into kitchen. Close this door and provide an opening into another room.
- ___ 15. Minimum ceiling height is 7'-6". Raise ceiling in _____
- ___ 16. Window area in _____ insufficient. Add _____
- ___ 17. Minimum area for _____ room is _____ sq. ft.
- ___ 18. Range vent (6"x8") required to outside air in kitchen.
- ✓ 19. Replace stucco (siding) damaged or removed by relocation to match existing.
- ___ 20. Stucco exterior of building.
- ___ 21. Building to be of one-hour fire resistive construction throughout. Alter building to comply. Consult with Inspector for details.
- ✓ 22. Building will require new (fire retardant) ___, (roof covering) ___, (roof repair) ✓, (composition shingles) ___, (wood shingles) ✓, (rolled roofing) and (gravel) ___.
- ✓ 23. Install landings and steps at all exterior doors to provide ingress and egress from building (3)
- ✓ 24. Install landings at all exit doors which are within 2" of top of threshold and of a size to comply with Code.
- ✓ 25. Brush coat entire exterior stucco.
- ✓ 26. Paint exterior wood and (trim) with two coats of oil paint (light in color).
- ___ 27. Shower walls (stall) (over tub) to comply with Code.
- ___ 28. _____

ELECTRICAL:

- ✓ 1. Separate Electric permit required.
- ___ 2. Completely rewire this building to meet Electrical Code.
- ___ 3. Remove non-complying electrical wiring in _____
- ___ 4. Remove electrical cord wiring in _____
- ___ 5. Remove noncomplying electrical service equipment and install new electrical service.
- ✓ 6. Repair and/or revamp electrical wiring which has been damaged or is in hazardous condition.
- ✓ 7. Move electrical service entrance fitting and service conduit to meet with the requirements for the new location of this building.
- ___ 8. Install convenience outlets to comply with Electrical Code.
- ___ 9. _____

PLUMBING:

- ✓ 1. Separate Plumbing or Sewer permit required.
- ✓ 2. Remove noncomplying pipe and fittings from gas piping system. Test gas piping after relocation. ~~Repair~~
- ✓ 3. All existing plumbing to be made sanitary and all new work to comply with Plumbing Code. WASTE
- ✓ 4. Install a (kitchen sink) and water closet) to comply with dwelling house requirements. (Two PART WASTE)
- ✓ 5. Plumbing vent terminals required to be 10 ft. from property line.
- ___ 6. Vent required for _____ plumbing fixtures.
- ___ 7. One full size vent required for building.
- ___ 8. Install approved gas vent for (water heater ___) & (furnace ___).
- ___ 9. Antisiphon ball cock required on toilet tank.
- ___ 10. Water supply to _____ must be above the flood rim of fixture.
- ✓ 11. Connect house drain to sewer (if available) or to approved private sewage disposal system.
- ✓ 12. Remove all gas piping outlets in rooms except to vented appliances and kitchen range.
- ✓ 13. Provide water test on drainage and vent system to roof.
- ✓ 14. Cap abandoned house sewers or backfill abandoned private sewage disposal facilities in an approved manner.
- ✓ 15. Provide Approved Gas Connectors W/ Furnace

ZONING:

- ___ 1. Proposed use is not permitted in the present zone.
- ___ 2. Proposed location does not comply with the setback requirements.
- ✓ 3. Off-street parking required for each residential unit in a garage or carport.
- ✓ 4. Provide 3" asphaltic or concrete driveway to garage or carport.

RELOCATION PERMIT BOND

BOND NUMBER 1528507

KNOW ALL MEN BY THESE PRESENTS

That we, EVERETT L. HODGES, INC. of FULLERTON California, as Principal, and CONTINENTAL CASUALTY COMPANY a corporation, as surety, are held and firmly bound unto the CITY OF ARTESIA, a body politic and corporate of the State of California, in the sum of FOUR THOUSAND SEVENTY AND NO/100 - - - - - $ 4,070.00 lawful money of the United States, we hereby bind ourselves, jointly and severally, firmly by these presents.

Signed, sealed and dated this 14th day of DECEMBER 1961

WHEREAS, an application of the above-named principal, has been made to City of ARTESIA for the issuance to the said principal, of a permit to relocate a building or structure within the incorporated territory of the City of ARTESIA upon property owned by the principal known as lot ____ block ____ tract _____ or as street address of 11700 E. Arkansas Street, Artesia, California

WHEREAS, as a condition precedent to the issuance of said Permit, the principal is required to furnish a bond in the sum above named to the City of ARTESIA conditioned as follows:

1. It is understood that the liability of the principal and surety upon this bond shall be in effect from the date hereof and remain in effect until the completion, to the satisfaction of the Building Official, of the performances of all of the terms and conditions of said Relocation Permit; and that

2. The time limit hereinabove specified, or the time limit specified in the permit above mentioned, may be extended for limited periods from time to time for good and sufficient cause by the Building Official, without notice to, or consent of, the surety. No such extension of time shall be valid unless the same be in writing and no such extension of time shall release the principal or surety from the obligations of this bond; and that

3. The Building Official, the surety and the duly authorized representative of either shall have access to the premises described in the relocation permit for the purpose of inspecting the progress of the work; and that

4. Whenever the Building Official finds that a default has occurred in the performance of any term or condition of any relocation permit he shall give written notice thereof to the principal and to the surety on the bond.

The principal hereby agrees that in the event of any default in the performance of any term or condition of the relocation permit, he will permit the surety or any person employed or engaged on its behalf, to go upon the premises and to complete the required work, or, at the option of said surety to remove or demolish the building or structure.

The surety agrees that in the event of any such default in the performance of any term or condition of the relocation permit, the surety shall cause the required work to be performed or remove or demolish the building or structure, and clear, clean and restore the site.

THEREFORE,

If the principal shall well and truly comply with all of the provisions of the City Building Code, and all other City ordinances and State Laws; and

If all of the work required to be done pursuant to the conditions of the Relocation Permit shall be fully performed and completed within the time limit specified in the Relocation Permit, or, if no time limit is specified, within one hundred and twenty (120) days after the date of the issuance of the Relocation Permit, then this obligation shall be void; otherwise, it shall remain in full force and effect.

IN WITNESS WHEREOF the principal and surety caused this bond to be executed the day and year first above written.

LOS ANGELES COUNTY

LETTERGRAM

To MR. M.D. McKEOWN From Lea Renison Date August 21, 1973

Subject 11700 Arkansas No.

Talked to owners wife and she thought an attached garage at the south end of the structure would be satisfactory with them. It would solve the zoning violation. The conversion of the existing garage to a commercial use could be done by making a fire wall out of the east and west sides by adding 5/8" sheet rock to the inside walls.

See attached plot plan.

Re: 11700 E. Arkansas Street, Artesia

Attention: City Manager

Dear Sir:

We propose that the use of this property to be both a home and a business facility. The house which consist of approximately 2,800 square feet we are planning an office and administration use of one (1) room approximately 180 square feet. The garage consisting of approximately 350 square feet we plan to use approximately 300 square feet. The work that we have planned to do in the garage is the repair, rebuilding, and manufacturing of equipment that is used in the metal finishing industry. This equipment presently includes rectifiers, hoists, control boxes, and spin dryers. This work, however, is not the mainstay of our business at this time. We presently have many customers under maintenance contracts for "numerical control" equipment used in the automatic process of electro plating. This equipment(due to its bulky nature) necessitates the repair and service at the customers plant.

The only worth of this property to us would be in the combined use of home and business.

Sincerely,

Larry N. Sapp

APPLICATION FOR SEWER CONNECTION

File No.: 2,739

(To Be Completed By Applicant—PLEASE TYPE OR PRINT)

REFER TO INSTRUCTIONS FOR COMPLETING THIS FORM AND FOR MAILING THE APPLICATION MATERIAL AND FEE PAYMENT TO THE DISTRICTS.

Date: 2 / 29 / 84 (MONTH / DAY / YEAR)

PART I

1. Name of Applicant Bernard E. Blume
2. Address of Property 11708 Arkansas (STREET) Artesia (CITY) Calif (STATE) (ZIP)
3. Property Located in Sanitation District No. 2
4. Contact Habib, David Phone Number: (213) 921-3568 (714) 521-2485
5. Mailing Address (IF DIFFERENT FROM ABOVE) 11003 Valley View (STREET) Santa Fe Springs (CITY) Calif (STATE) 90638 (ZIP)
6. County Assessor Map Book, Page, and Parcel Number: ____ - ____ - ____
7. Proposed Property Use: Warehouse
8. User Category and Units of Usage: *(Check the appropriate box and provide the applicable information)*

a. Residential:	☐ Single Family Home(s)	▸	Number of Units:
	☐ Duplex ☐ Triplex ☐ Fourplex	▸	Number:
	☐ Five Units or More	▸	Number of Units:
	☐ Mobile Home Park	▸	Number of Spaces:
	☐ Condominium	▸	Number of Units:
b. Commercial:	☐ Hotel/Motel	▸	Number of Rooms:
	☐ Convalescent Hospital/ Home for the Aged	▸	Number of Beds:
	☒ Other (Specify): Warehouse	▸	Improvement Square Footage: 6,336
c. Institutional:	☐ College/University	▸	Number of Students:
	☐ Private School	▸	Improvement Square Footage:
	☐ Church	▸	Improvement Square Footage:
d. Industrial*	☐ All Categories		

**NOTE: The connection fee for an industrial discharger will be calculated by the Districts. INDUSTRIAL DISCHARGERS SHOULD NOT COMPLETE PART II OF THIS FORM. In addition, all industrial dischargers to be served by the County Sanitation Districts must obtain a PERMIT FOR INDUSTRIAL WASTEWATER DISCHARGE. An industrial discharger is one who generally discharges wastewater from any producing, manufacturing, processing, institutional, commercial, agricultural, or other operation where the wastewater discharged includes significant quantities of wastes of non-human origin.*

9. Please submit along with this application a **copy of the floor plan or subdivision map** of the facilities to be connected to the sewerage system. This is not required if only one single family home is being connected. **Your application cannot be processed without this information.**

PART II: FEE CALCULATION FOR RESIDENTIAL, COMMERCIAL, AND INSTITUTIONAL CATEGORIES

1. Find your appropriate unit of usage and connection fee per unit of usage in the Connection Fee Schedule for the District in which the property is located. The Connection Fee shall be calculated as follows:

6,336 (Number of Units of Usage) × $39.00 (Connection Fee Per Unit of Usage) = $ 247.10 (Connection Fee)

SPECIAL CREDITS (Only if Applicable)			
Please refer to the instructions to determine whether these credits apply and to calculate the amount of each credit. If applicable these credits will reduce the amount of the connection fee due.	☐ DEMOLITION CREDIT* ☐ CHANGE IN USE CREDIT	— $	1.a.
	AD VALOREM TAX CREDIT	— $	1.b.

*Proof of demolition must be submitted with your application (e.g. Demolition Permits)

(If Less Than Zero, Enter Zero) $ 247.10 (Connection Fee Due)

Please make checks payable to: COUNTY SANITATION DISTRICTS OF LOS ANGELES COUNTY (Do not send cash)

CERTIFICATION

I certify that the information provided in this application is true and correct to the best of my knowledge.

LEGAL DESCRIPTION

LOT- 38 & 1/2 OF LOT 39

TRACT- 7991
CITY OF ARTESIA
BOOK 115, PAGES 7 & 8

December 16, 1969

Mr. Paul Fuentez
11708 Arkansas Avenue
Artesia, California 90701

Dear Mr. Fuentez:

At this time your building located at above address is not completed as per approved plan. The outstanding items yet to be completed are:

1. Installation of all plumbing fixtures
2. A gas test on gas system
3. Complete stucco of building exterior
4. Instdl approved landing at all exit doors
5. Pave and strip parking area as per approved plan
6. Complete off-site improvements

On August 25, 1969 the power was authorized to your single phase lighting service in order for you to complete the building. Since that date you have initiated a manufacturing process without City approval. If the building is not complete by January 1, 1970 the City of Artesia will expire the building permit and order Southern California Edison to disconnect power from the building under authority of section 208 of the Artesia City Uniform Building Code.

Sincerely yours.

Robert J. Eppstein
Chief Building Official

Wed. 12-17-69
11708 Arkansas St.
Artesia, Calif. 907[illegible]

Mr. Robert Epstein
11729 E. 183rd St.
Artesia, Calif. 90701

Dear Mr. Epstein:

Sir I would like for you to give me an extension of 45 more days to Complet the building at 11708 Arkansas St.

The reason why it was not Completed is because I got ill from my eye and I was very short on money. My eye has not healed and my Dr. said I will have to go to [illegible] and see a Specialist, he recc. I will return by 1-5-70.

I thank You Kindly.

Paul M. Fuentes

P.S. please call me if I am granted this extension. so I can know.

December 19, 1969

Mr. Paul Fuentez
11708 Arkansas Avenue
Artesia, California

Dear Mr. Fuentez:

Upon consideration of the circumstances which have befallen you, the City of Artesia is granting you the forty-five (45) day extension which you requested in your letter of December 17, 1969. Which this agreement in mind, the City of Artesia shall expect the building and all on and off site improvements to be completed by February 2, 1970 and shall so order the Southern California Edison Company to disconnect power to the building upon that date if compliance is not met.

Sincerely,

Robert J. Eppstein
Chief Building Official

THAT WE, JOHN FEA
OF 13964 E. Imperial, Norwalk, CALIFORNIA, AS PRINCIPAL, AND THE TRAVELERS INDEMNITY INSURANCE COMPANY OF HARTFORD, CONNECTICUT A CORPORATION, AS SURETY, ARE HELD AND FIRMLY BOUND UNTO THE COUNTY OF LOS ANGELES, A BODY POLITIC AND CORPORATE OF THE STATE OF CALIFORNIA, IN THE SUM OF TWO THOUSAND THREE HUNDRED AND TEN DOLLARS AND NO/100 - $ (2,310.00) LAWFUL MONEY OF THE UNITED STATES, FOR THE PAYMENT OF WHICH WELL AND TRULY TO BE MADE WE HEREBY BIND OURSELVES, JOINTLY AND SEVERALLY, FIRMLY BY THESE PRESENTS.

SIGNED, SEALED AND DATED THIS 23rd DAY OF JUNE, 1953

WHEREAS, AN APPLICATION, BY OR ON BEHALF OF THE ABOVE-NAMED PRINCIPAL, HAS BEEN MADE TO THE CHIEF ENGINEER OF THE DEPARTMENT OF BUILDING AND SAFETY, COUNTY OF LOS ANGELES, FOR THE ISSUANCE, TO THE SAID PRINCIPAL, OF A PERMIT TO RELOCATE A BUILDING OR STRUCTURE WITHIN THE UNINCORPORATED TERRITORY OF THE COUNTY OF LOS ANGELES UPON A LOCATION OWNED BY OR UNDER THE CONTROL OF SAID PRINCIPAL, MORE SPECIFICALLY DESCRIBED IN THE APPLICATION OF A RELOCATION PERMIT, IN ACCORDANCE WITH THE PROVISIONS OF CHAPTER 58 OF THE LOS ANGELES COUNTY BUILDING CODE; AND

WHEREAS, AS A CONDITION PRECEDENT TO THE ISSUANCE OF SAID PERMIT, THE PRINCIPAL IS REQUIRED TO FURNISH A BOND IN THE SUM ABOVE NAMED TO THE COUNTY OF LOS ANGELES, CONDITIONED AS HEREINAFTER SET FORTH.

NOW, THEREFORE,

(1) IF THE PRINCIPAL SHALL WELL AND TRULY COMPLY WITH ALL OF THE PROVISIONS OF CHAPTER 58 OF THE LOS ANGELES COUNTY BUILDING CODE, AND

(2) IF ALL OF THE WORK REQUIRED TO BE DONE PURSUANT TO THE CONDITIONS OF THE RELOCATION PERMIT SHALL BE FULLY PERFORMED AND COMPLETED WITHIN THE TIME LIMIT SPECIFIED IN THE RELOCATION PERMIT, OR, IF NO TIME LIMIT IS SPECIFIED, WITHIN NINETY (90) DAYS AFTER THE DATE OF THE ISSUANCE OF THE RELOCATION PERMIT, THEN THIS OBLIGATION SHALL BE VOID; OTHERWISE, IT SHALL REMAIN IN FULL FORCE AND EFFECT.

IT IS UNDERSTOOD THAT THE LIABILITY OF THE PRINCIPAL AND SURETY UPON THIS BOND SHALL BE IN EFFECT FROM THE DATE HEREOF AND REMAIN IN EFFECT UNTIL THE COMPLETION, TO THE SATISFACTION OF THE CHIEF ENGINEER, OF THE PERFORMANCE OF ALL OF THE TERMS AND CONDITIONS OF SAID RELOCATION PERMIT.

IT IS FURTHER UNDERSTOOD THAT THE TIME LIMIT HEREINABOVE SPECIFIED, OR THE TIME LIMIT SPECIFIED IN THE PERMIT ABOVE MENTIONED, MAY BE EXTENDED FOR LIMITED PERIODS FROM TIME TO TIME FOR GOOD AND SUFFICIENT CAUSE BY THE CHIEF ENGINEER, WITHOUT NOTICE TO, OR CONSENT OF, THE SURETY. NO SUCH EXTENSION OF TIME SHALL BE VALID UNLESS THE SAME BE IN WRITING AND NO SUCH EXTENSION OF TIME SHALL RELEASE THE PRINCIPAL OR SURETY FROM THE OBLIGATIONS OF THIS BOND.

IN WITNESS WHEREOF THE PRINCIPAL AND SURETY CAUSED THIS BOND TO BE EXECUTED THE DAY AND YEAR

CONSULTANT STATEMENT

Job Address or Tract No. 16703 PIONEER Locality ARTESIA Permit No. _____

Owner WKS RESTAURANT CORP Contractor AUSTIN-JONES

☐ ROUGH GRADING

☐ BY FIELD ENGINEER

Based upon observations, rough grading of the lots listed below has been completed in conformance with plans therefor marked "APPROVED" by the County, and Building Code Chapter 70. The Work includes but is not limited to the following: grading to approximate final elevations; staking of property lines; location and gradient of cut and fill slopes; location, cross-sectional configuration and flow-line gradient of drainage swales and terraces (graded ready for paving); berms installed where indicated; and required drainage slopes provided on building pads.

LOT NOS. _____

As-built plans have been prepared
Latest Plan revision date _____.

Remarks: _____

_____

Engineer _____ Reg. No. _____ Date _____
(Signature)

☐ BY SOIL ENGINEER

Based upon tests and observations, the earth fills placed on the following lots were installed upon properly prepared base material and compacted in compliance with requirements of Building Code Section 7016. Fill slope surfaces have been compacted and buttress fills or similar stabilization measures have been installed in accordance with my recommendations as approved by the Building Official. Sub-drains have been provided where required and locations of said sub-drains are shown on plans dated _____.

LOT NOS. _____

See report dated _____ for compaction test data and procedure, recommended allowable soil bearing values and other special recommendations.

EXPANSIVE SOILS (YES) (NO) LOT NOS. _____

Re: ATL Work Order Number : 2002343
Client Reference : 185804917

Enclosed are the results for sample(s) received on October 20, 2020 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

Dr. Reza Karimi
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Certificate of Analysis

Stantec		Project Number :	185804917
735 E. Carnegie Drive, Suite 280		Report To :	Joshua Sargent
San Bernardino , CA 92408		Reported :	10/27/2020

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
M1	Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample.
L5	Laboratory Control Sample high biased. Sample result/s was non-detect (ND) for the target analyte; therefore reanalysis was not necessary.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)

Notes:
(1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
(2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
(3) Results are wet unless otherwise specified.

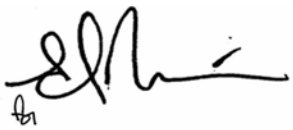
Re: ATL Work Order Number : 2002778
Client Reference : 185804917, 11700 Arkansas St. Artesia,

Enclosed are the results for sample(s) received on December 23, 2020 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,



Edgar P. Caballero
Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Notes and Definitions

ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)

Notes:
(1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
(2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
(3) Results are wet unless otherwise specified.

ANALYSES REQUESTED

1. EPA TO-15 – Volatile Organics by GC/MS

Analytical – Soil Gas samples were analyzed using EPA Method TO-15. Instrument Continuing Calibration Verification (CCV) and Instrument Blanks were analyzed every 24 hours as prescribed by the method. In addition, a Continuing Calibration Verificatio n Duplicate (CCVD) was analyzed with each batch of Soil Gas samples.
