**Environmental Assessment** 

Barlow Respiratory Hospital 2000 Stadium Way, Los Angeles, California

prepared for Barlow Respiratory Hospital

prepared by Rincon Consultants, Inc.

December 22, 2020

December 22, 2020 Project No.: 20-10647

Amit Mohan, PhD, FACHE, FACMPE Chief Executive Officer Barlow Respiratory Hospital 2000 Stadium Way Los Angeles, California 90026 Via email: amohan@barlowhospital.org

Subject: Phase I Environmental Site Assessment

**Barlow Respiratory Hospital** 

2000 Stadium Way, Los Angeles, California

Dear Dr. Mohan:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. (Rincon) for the Barlow Respiratory Hospital property located at 2000 Stadium Way in Los Angeles, California. The Phase I ESA was performed in accordance with our proposal dated November 13, 2020 and contract dated November 16, 2020.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions in connection with the subject property. Our work program for this project, as referenced in our contract, is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E1527-13). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, vapor intrusion or other indoor air quality, mold, or high-voltage power lines.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,

Rincon Consultants, Inc.

Lisa Bestard

# **Executive Summary**

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the property located at 2000 Stadium Way in Los Angeles, California (Figure 1, Vicinity Map). The Phase I ESA was performed for Barlow Respiratory Hospital (Barlow) by Rincon Consultants, Inc. (Rincon). Barlow has requested this assessment and will use the information for the purpose of a property transaction associated with the subject property. The subject property is currently Barlow Respiratory Hospital.

The subject property is located in an area that is primarily composed of commercial and recreational land uses. Properties in the vicinity of the subject property include a cemetery, a park, and Dodger Stadium.

Rincon performed a reconnaissance of the subject property on November 20, 2020. The purpose of the reconnaissance was to observe existing conditions and to obtain information indicating the presence of recognized environmental conditions (RECs) in connection with the subject property. The use, storage, or disposal of hazardous materials on the subject property was not observed during the site reconnaissance.

A regulatory database search was conducted by Environmental Data Resources (EDR) for sites that generate, store, treat, or dispose of hazardous materials or sites for which a release or incident has occurred. The search was conducted for the subject property and included data from surrounding sites within a specified radius of the property. The subject property was listed on the RCRA NonGen/NLR, HAZNET, HWTS, EMI, UST, FINDS, CERS HAZ WASTE, CERS TANKS, CERS, HAZMAT, and ECHO databases searched by EDR. The listings indicate that the facility has disposed of various hazardous waste, including waste oil and mixed oil, asbestos containing waste, and unspecified oil-containing waste. The facility is also associated with an underground storage Tank (UST). No additional information regarding the UST was publicly available. A records request regarding the tank was submitted to the Los Angeles City Fire Department Health Hazardous Materials Division on November 18, 2020. A response was received on November 19, 2020 indicating that no records were available for the subject property.

Historical sources reviewed as part of the Phase I ESA include aerial photographs, topographic maps, and fire insurance maps. The photos and maps reviewed indicate the subject property was developed with the Barlow Sanatorium by 1919, is associated with an orchard from 1977 through 1979, and 1989 through 1994. The eastern adjacent property was also in use as a sanatorium from 1923 to 1928.

Based on the findings of this Phase I ESA, it is our opinion that no RECs were identified for the subject property. Because the report was conducted for the purpose of financing of the main hospital building, no additional assessment pertaining to the UST is recommended at this time.

Although not considered a REC, based on the age of the onsite structures (constructed as early as 1919), asbestos-containing materials and lead-based paint may be present on the subject property. Therefore, Rincon recommends conducting an asbestos-containing building materials and lead-based paint survey at the subject property prior to demolition or renovation of the structures.

# Introduction

This report presents the findings of a Phase I Environmental Site Assessment (ESA) conducted for the property located at 2000 Stadium Way in Los Angeles, California (Figure 1, Vicinity Map). The Phase I ESA was performed by Rincon Consultants, Inc. (Rincon) for Barlow Respiratory Hospital (Client) in general conformance with American Society for Testing and Materials (ASTM) E1527-13, our proposal dated November 13, 2020, and our contract dated November 16, 2020. The following sections present our findings and provide our opinion as to the presence of recognized environmental conditions (RECs) on the subject property.

## **Purpose**

Barlow Respiratory Hospital has requested this assessment and will use the information for financing for the main hospital building. The purpose of this Phase I ESA was to determine if there are RECs on the subject property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

A REC is defined pursuant to ASTM E1527-13 as,

"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; 3) under conditions that pose a material threat of a future release to the environment".

A Controlled REC is defined pursuant to ASTM E1527-13 as,

"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report".

A Historical REC is defined pursuant to ASTM E1527-13 as,

"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the property to any required controls (for example, use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP [Environmental Professional] considers the past release to be a

recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition".

A de minimis condition is defined pursuant to ASTM E1527-13 as,

"a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions".

## Scope of Services

The scope of services conducted during this study is outlined below:

- Performed a reconnaissance of the subject property to identify obvious indicators of the existence of hazardous materials.
- Observed adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtained and reviewed an environmental records database search to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Reviewed files for the subject property and immediately adjacent properties as identified in the database report, as applicable.
- Reviewed the current United States Geological Survey (USGS) topographic map to obtain information about the subject property and regional topography and uses of the subject property and surrounding sites.
- Reviewed additional pertinent record sources (e.g., California Geologic Energy Management Division [CalGEM] records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.
- Reviewed the California State Water Resources Control Board (SWRCB) 2019 Statewide Per- and Polyfluoroalkyl Substances (PFAS) Investigation online Public Map Viewer regarding current PFAS orders at any facilities located in the vicinity of the subject property.
- Reviewed reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.
- Provided a user interview questionnaire to a representative of the client, the user of the Phase I ESA.
- Provided a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by the client.
- Conducted interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Reviewed available client-provided information (e.g., previous environmental reports, title documentation).

# Significant Assumptions, Limitations, Deviations, Exceptions, Special Terms, and Conditions

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied, are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce Client's risks, but no techniques commonly employed can eliminate these risks altogether.

In addition, pursuant to ASTM E1527-13 practice, our scope of services did not include any inquiries with respect to asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high-voltage power lines.

## User Reliance

Client has requested this assessment and will use the information for financing for the main hospital building. This Phase I ESA was prepared for use solely and exclusively by Barlow Respiratory Hospital. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by the client, and no other person or entity may rely upon the report without the express written consent of Rincon.

## Site Description

#### Location

The subject property is an approximately 10.5-acre parcel located east of Stadium Way and south of Scott Avenue in Los Angeles, California (Figure 2, Site Map). The property is identified as 2000 Stadium Way and Assessor's Parcel Number (APN) 5415-012-001.

### **Subject Property and Vicinity General Characteristics**

The subject property is currently developed with Barlow Respiratory Hospital.

The subject property is located in an area that is primarily composed of commercial, residential and recreational land uses. Adjacent properties include vacant residences, Elysian Park, and Dodger Stadium The current adjacent land uses are described in Table 1 and depicted on Figure 3, Adjacent Land Use Map.

Table 1 Current Uses of Adjacent Properties

Area	Use
Northern and Northeastern Properties	Scott Avenue followed by Elysian Park
Eastern Properties	Vacant land and North Boylston Street followed by parking lots associate with Dodger Stadium (1000 Vin Scully Avenue)
Southwestern Properties	Stadium Way followed by vacant residences and vacant land

## Descriptions of Structures, Roads, Other Improvements on the Subject Property

During the site reconnaissance, multiple structures, landscaped areas and parking lots associated with the Barlow Respiratory Hospital were observed on the subject property.

A chain-link fence was noted around the perimeter of portions of the subject property.

Access to the subject property is available from a driveway on Stadium Way and Scott Avenue.

The following utility providers service the subject property:

- Electrical Service Los Angeles Department of Water and Power
- Natural Gas Service –Southern California Gas Company
- Water Service Los Angeles Department of Water and Power
- Sewer Service Los Angeles Sanitation
- Solid Waste Service Los Angeles Sanitation

# **User-Provided Information**

As described in ASTM E1527-13 Section 6, a User Questionnaire as provided by ASTM E1527-13 Appendix X3 was provided to Client. The purpose of the User Questionnaire is for the User of the Phase I ESA to provide actual knowledge pertaining to the subject property to help identify RECs. As of the date of this report, a completed User Questionnaire has not been returned to Rincon. A copy of the questionnaire form is included as Appendix A.

Mr. Amit Mohan provided the following information pertaining to the subject property in an email dated December 18, 2020:

• A 3,000-gallon diesel UST is located on the south side of the northernmost building, north of the main hospital building. The UST was installed in 1997.

# **Records Review**

## Physical Setting Sources

#### **Topography**

The current USGS topographic map (Los Angeles Quadrangle, 2018) indicates that the subject property is situated at an elevation of approximately 500 feet above mean sea level with topography sloping down to the south. The adjacent topography consists of mountainous topography in the north.

### **Geology and Hydrogeology**

According to the California Geological Survey (CGS), *California Geomorphic Provinces, Note 36*<sup>1</sup>, the subject property is located within the Peninsular Ranges Geomorphic Province. The Peninsular Ranges are a series of ranges separated by northwest trending valleys, subparallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is more similar to the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend into lower California and are bounded on the east by the Colorado Desert. The Los Angeles Basin and the island group (Santa Catalina, Santa Barbara, and the distinctly terraced San Clemente and San Nicolas islands), together with the surrounding continental shelf (cut by deep submarine fault troughs), are included in this province.

### **Site Geology**

According to the current USGS Geologic Map (Geologic map of the Los Angeles quadrangle, Los Angeles County, California, 1989), the subject property is underlain by Tertiary-aged semi-friable arkosic sandstone, including some interbedded silty shale and Quaternary-aged alluvium.

## Regional Groundwater Occurrence and Quality

The subject property is not located within a mapped groundwater basin (California Department of Water Resources, 2003).

During the preparation of this Phase I ESA, we reviewed the California SWRCB's online GeoTracker database to determine groundwater flow direction in the vicinity of the subject property. According to the First Semi-Annual 2020 Groundwater Monitoring Report, Former 75 Station 4962, 1000 Elysian Park Avenue, Los Angeles, California prepared by GHD and dated June 2020, groundwater is reported to be between 39 to 43 feet below ground surface and flow toward the southeast. This property is located approximately 1,500 feet to the northwest of the subject property.

## Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat, or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data

<sup>&</sup>lt;sup>1</sup> https://www.conservation.ca.gov/cgs/Documents/Publications/CGS-Notes/CGS-Note-36.pdf

Rincon Consultants, Inc.

from surrounding sites within specified radii of the property. A copy of the EDR report, which specifies the ASTM E1527-13 search distance for each public list, is included as Appendix B. As shown on the attached EDR report, federal, state, and county lists were reviewed as part of the research effort. Please refer to Appendix B for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the EDR report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the EDR report.

### **Subject Property**

The subject property was listed on the following databases as Barlow Respiratory Hospital at 2000 Stadium Way:

- RCRA NonGen/NLR database
- HAZNET database
- HWTS database
- EMI database
- UST database
- FINDS database
- CERS HAZ WASTE database
- CERS TANKS database
- HAZMAT database
- CERS database

The subject property was also listed on the following databases as Chris Brownlie Hospice at 1300 Scott Avenue:

- RCRA-SQG database
- FINDS database
- ECHO database

Regulatory agency files reviewed for the subject property are discussed in the Additional Environmental Record Sources section of this report.

#### Offsite Properties

Offsite properties listed by EDR fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., Leaking Underground Storage Tank [LUST], National Priority List [a.k.a. Superfund sites], and corrective action facilities), and databases of businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the EDR Radius Map and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

Reported distance of the facility from the subject property;

- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes;
- Reported case type (e.g., soil only, failed underground storage tank [UST] test only);
- Reported substance released (e.g., chlorinated solvents, gasoline, metals);
- Reported regulatory agency status (e.g., case closed, "no further action"); and,
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 2. In accordance with ASTM E1527-13, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

Table 2 EDR Listing Summary of the Subject Property and Select Sites Within One-Quarter Mile of the Subject Property

			Distance from	Database	
Site Name	EDR Site ID	Site Address	<b>Subject Property</b>	Reference	Comments
Subject Property	·				
Barlow Respiratory	A1, A2, A3,	2000 Stadium	Subject Property	RCRA	The facility is listed as a non-generator that does
Hospital	A4, A5, A6,	Way		NonGen/NLR	not presently generate hazardous waste.
	A7, A8, A9, A10			HAZNET	The facility disposed of various hazardous waste in the years 1988, 1990, 1991, 1994 through 1999, 2002, through 2010, 2013, 2014, 2015, and 2017, including asbestos containing waste, waste oil and mixed oil, and unspecified oil-containing waste.
				HWTS	The facility is classified as a general medical and surgical hospital and has been inactive as of 2000.
				EMI	The facility is listed as active under the South Coast Air Quality Management District (AQMD).
				UST	The facility is associated with an UST.
				FINDS	Database reveals no pertinent information.
				CERS HAZ WASTE/CERS TANKS/CERS	The facility is classified as a hazardous waste generator, a chemical storage facility, and is associated with a UST. Violations have been reported, but the facility has since, returned to compliance.
				HAZMAT	The status of the facility is listed as active.
				ЕСНО	The facility is listed as active under the Resource Recovery and Conservation Act (RCRA).
Chris Brownlie Hospice	11	1300 Scott Avenue		RCRA-SQG	The facility is classified as a small-quantity generator of hazardous waste.
				FINDS	Database reveals no pertinent information.
				ECHO	Facility is listed as active under the RCRA.

Site Name	EDR Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Nearby Release Sites					
A Quality Auto Service Inc.	C15, C16, C17	1301 West Sunset Boulevard	Approximately 1,050 feet – Southwest	SWEEPS UST/CA FID UST	The facility has zero reported USTs.
				EMI	The facility is listed under the South Coast AQMD
				HIST CORTESE/ Cortese	The facility status is listed as Completed – Case Closed
				LUST	A release of gasoline to soil was reported in 1990. A site assessment was conducted, and the case was closed in 1996.
				CERS	The facility is listed as LUST Cleanup Site.

<sup>\*</sup>Bold listings indicate a release database

Regulatory agency information reviewed for the listings in the table above are summarized in the Additional Environmental Record Sources section of this report.

#### **Orphan Listings**

EDR reported one orphan or unmapped site listing, which EDR is unable to plot due to insufficient address information. Based on Rincon's review of the limited address information or site description for the orphan listing, the listing is expected to impact the subject property.

#### Additional Environmental Record Sources

#### **Review of Agency Files**

As a follow-up to the database search, Rincon reviewed regulatory information for the subject property and facilities within the specified search radii that were interpreted to have the potential to impact the subject property, based on one or more factors previously discussed (e.g., distance, open case status, upgradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from review of online sources (e.g., SWRCB GeoTracker database, Department of Toxic Substances Control [DTSC] EnviroStor database) and/or files requested from the applicable regulatory agency, as described below.

## Subject Property

The subject property was listed in ten databases searched by EDR: RCRA NonGen/NLR, HAZNET, HWTS, EMI, UST, FINDS, CERS HAZ WASTE, CERS TANKS, HAZMAT, and CERS databases. These listings indicate that the facility is classified as a chemical storage facility, has disposed of various hazardous waste, and is associated with a UST. Violations have been reported, but the facility has since returned to compliance. No releases have been reported regarding the UST, but an unreported release may have occurred at the facility. The subject property was also listed as 1300 Scott Avenue and was listed on the RCRA-SQG, FINDS, and ECHO databases. These listings are not indicative of a release. A records request regarding the tank was submitted to the Los Angeles County Fire Department Health Hazardous Materials Division and Los Angeles Water Quality Control Board on November 18, 2020. A response was received on November 19, 2020 indicating that no records were available for the subject property. No public online records were available for the subject property.

## Adjacent Properties

No adjacent properties were listed in databases searched by EDR.

## Nearby Release Site

The following upgradient release site was listed in databases searched by EDR:

A Quality Auto Service Inc. at 1301 West Sunset Boulevard. This property is located approximately 1,050 feet to the southwest of the subject property and is listed on SWEEPS UST, CA FID UST, EMI, HIST CORTESE, Cortese, LUST, and CERS databases. The site is also listed on RWQCB's online database GeoTracker. According to the EDR report, a release of gasoline to soil was reported in 1990. A site assessment was conducted in 1990 and the case was closed in 1996. No additional documents were available in the EDR report or GeoTracker. A records request was submitted to the Los Angeles County Fire Department Health Hazardous Materials

Division and Los Angeles Regional Water Quality Control Board on November 18, 2020. A response was received on November 19, 2020 indicating that no records were available for the subject property. No public online records were available for the nearby release site.

# Review of State of California Geologic Energy Management Division (CalGEM) Records

A review of the State of California Geologic Energy Management Division (CalGEM) Online Mapping System<sup>2</sup> indicates that no oil wells are located on the subject property or adjacent properties, or within one-quarter mile of the subject property.

Furthermore, according to the City of Los Angeles Zoning Information and Map Access System (ZIMAS)<sup>3</sup>, the subject property is not located within a methane zone.

# Review of National Pipeline Mapping System Records

A review of the National Pipeline Mapping System (NPMS) online Public Map Viewer<sup>4</sup> indicates that no natural gas transmission pipelines or hazardous liquid pipelines are located on the subject property or adjacent properties.

## Review of California Statewide PFAS Investigation

In 2019, the California SWRCB sent assessment requirements to property owners of sites that may be potential sources of PFAS. These sites currently include select landfills, airports, and chrome plating facilities. According to the SWRCB, "PFAS are a large group of human-made substances that do not occur naturally in the environment and are resistant to heat, water, and oil" (SWRCB 2019).

Our November 19, 2020 review of the California 2019 Statewide PFAS Investigation online Public Map Viewer<sup>5</sup> indicates that there are no current chrome plating, airport, or landfill PFAS orders at any facilities listed as located within one-half mile of the subject property. Additionally, there are no publicly owned treatment works facilities listed as located within one-half mile of the subject property.

Our November 19, 2020 review of the California 2019 Statewide Drinking Water System Quarterly Testing Results online Public Map Viewer indicates that perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were detected in drinking water wells located within three miles to the northwest of the subject property and tested quarterly as part of a PFAS investigative order. No wells contain PFOA and PFOS at concentrations greater than their respective SWRCB notification or response levels.

Because groundwater beneath the subject property is not planned for use onsite, no further assessment of PFAS in groundwater is warranted at this time.

# Known or Suspect Contaminated Release Sites with Potential Vapor Migration

The EDR report was reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby site to be migrating beneath the subject property. Based on the ASTM E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

If known or suspect contaminated sites are located within the above referenced distances from the subject property, online resources are reviewed to determine the extent of the contaminated plume at those sites. The following describes search distances for contaminated plumes of petroleum hydrocarbons (30 feet from the subject property) and other COCs (100 feet from the subject property). Per ASTM E2600-15, vapors associated with impacted soil or groundwater present within these distances have the potential to migrate beneath the subject property.

#### **Petroleum Hydrocarbons**

Based on our review of the EDR report information as indicated above, there are no known or suspect petroleum hydrocarbon-contaminated sites within 528 feet of the subject property. Therefore, per ASTM E2600-15, as this distance exceeds the 30-foot distance considered the critical distance wherein such migration may pose a threat to the subject property, there are no potential threats to the subject property posed by the potential migration of petroleum hydrocarbon vapors from listed sites.

#### Other COCs

Based on our review of the EDR report, no releases on the subject property or adjacent properties have the potential to have soil vapor migrating beneath the subject property.

However, based on our review of the EDR report, known or suspect release sites identified within 1/3 mile of the subject property are as follows:

One downgradient known release site Staples Center (1111 Figueroa)

The property listed at 1111 Figueroa is plotted incorrectly by EDR and is located approximately 2.5 miles from the subject property. Based on the distance from the subject property, this known release site does not have the potential to have soil or groundwater plumes located within 100 feet of the subject property.

# Historical Use Information on the Property and the Adjoining Properties

The historical records review completed for this Phase I ESA includes aerial photographs, topographic maps, fire insurance maps, city directories as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix C.

#### **Review of Aerial Photographs**

Aerial photographs from EDR's aerial photograph collection were obtained. In addition, a current aerial from Google Earth was reviewed. The aerial photographs were reviewed on November 19, 2020.

#### Review of Historical Topographic Maps

Historical topographic maps from EDR's map collection were obtained. The historical topographic maps were reviewed on November 19, 2020.

#### **Review of City Directory Listings**

EDR was contracted to provide copies of city directory listings for the subject property. The city directory listings were reviewed on November 19, 2020.

#### **Review of Fire Insurance Maps**

EDR was contracted to provide copies of fire insurance maps (i.e., Sanborns) for the subject property. The fire insurance maps were reviewed on November 19, 2020.

#### **Review of Los Angeles Building Permit Records**

Based on the sufficient amount of information obtained from the above sources, building permit records were not reviewed.

#### Other Historical Sources

Based on the historical information obtained, no additional historical sources were reviewed.

#### Summary of Historical Uses

#### Subject Property

Based on our review of the documents listed above, it appears that the subject property was developed with the following:

- 1894, 1896, and 1900: Undeveloped land
- 1919: Barlow Sanatorium, including a medical building, infirmary, dormitory, nurse's home, servant's quarters, kitchen, dining room, office, recreation hall, bath, multiple small structures identified as rooms, workshop, forge, and garage
- 1923, 1928, 1938, 1948: Several commercial structures, some of which are existing
- 1950, 1952, 1953, 1957, 1960, 1961, 1964, 1966, 1968, 1969, 1970, and 1972: Barlow Sanatorium, similar to the 1919 description with a few additional structures identified as a

nurse's dormitory, library, doctor's housing, two garages, office/laboratory, storage shed, "guinea pig," hay shed, **laundry**, and employees quarters

- 1961 Sanborn map indicates a new office building present fronting Stadium Way
- 1977: Similar to the 1970 Sanborn map; however, a possible orchard is present in the southeastern portion and a parking lot in the southwest portion
- 1979: Similar to the 1977 photograph; however, the possible orchard appears fallow
- 1981: Similar to the 1979 photograph; however, a large commercial structure is present in the northern portion. General developed in the existing configuration.
- 1989: Similar to the 1981 photo; however, a possible orchard is present in the central portion
- 1991 and 1994: Similar to the 1989 photo; however, the possible **orchard** appears fallow
- 2002, 2005, 2009, 2012, 2016, and present day: Multiple commercial structures in the existing configuration

City directories provided for the subject property indicate that 2000 Stadium Way was occupied by the following:

- Nurses Residence in 1962, 1967, and 1971
- Birge Hall in 1962 and 1967
- Barlow Sanatorium in 1962, 1967, and 1971
- Smith C Richard Clinical Lab in 1967
- Park Clinical Laboratories in 1971, 1976, 1981, 1986, 1990, and 1994
- Loos Adrian Design Studio in 1971
- Barlow Hospital in 1976, 1981, 1986, 1990, 1994, 1999, 2000, 2004, 2006, 2009, and 2015
- Pathology Diagnosis Service in 1986
- Brownlie Hospice in 1990
- AIDS Hospice in 1990
- Care Systems in 1994
- Barlow Guildhouse in 1990, 1994, 1999, 2000, 2004, 2006, and 2009

Northern and Northeastern Adjacent Properties (Elysian Park)

Based on our review of the documents listed above, it appears that the northern adjacent properties were developed with the following:

- 1894, 1896, 1900, and 1923: Undeveloped land
- 1928, 1938, 1948, and 1952: A park, a road, vacant land, and residential
- 1964, 1966, 1972, 1977, 1979, 1981, 1991/1994, 2002, 2005, 2009, 2016, and present day: Scott Avenue followed by a park, a road, two structures, and vacant land (existing configuration)

City directories were not available for the northern adjacent property.

#### Eastern Adjacent Properties (1000 Vin Scully Avenue)

Based on our review of the documents listed above, it appears that the eastern adjacent properties were developed with the following:

- 1894 and 1896: One structure and undeveloped land
- 1900: One structure and undeveloped land
- 1923 and 1928: Unpaved followed by a sanatorium and vacant land
- 1938, 1948, 1952, and 1953: Unpaved road followed by vacant land
- 1964, 1977, 1979, 1981, 1989, 1991/1994, 2002, 2005, 2009, 2012, 2016, and present day: North Boylston Street and vacant land followed by a parking lot associated with the Dodger's Baseball Stadium (existing configuration)

City directories were not available for the eastern adjacent property.

#### Southwestern Adjacent Properties

Based on our review of the documents listed above, it appears that the southwestern adjacent properties were developed with the following:

- 1894, 1896, and 1900: Undeveloped land
- 1919, 1923, 1928, 1938, 1948, 1950, 1952, 1953, 1957, 1960, 1961, and 1964: Chavez Ravine Road, followed by vacant land and at least five rooms and a dormitory that appear to part of the Barlow Sanatorium located across the street (subject property) in the existing configuration
- 1966, 1968, 1969, 1970, 1972, 1977, 1979, 1981, 1989, 1991/1994, 2002, 2005, 2009, 2012, 2016, and present day: Stadium Way (formerly Chavez Ravine Road) followed by eight residential structures (existing configuration)

City directories were not available for the southwestern adjacent properties.

#### Gaps in Historical Sources

Several gaps of greater than five years were identified in the historical records reviewed, from 1902 to 1919, from 1928 to 1938, from 1938 to 1948, from 1981 to 1989, and from 1994 to 2002. These gaps are considered insignificant because the subject property use appears to be similar prior to and following the gaps.

# **Interviews**

Rincon performed interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical conditions and to obtain information indicating the presence of RECs in connection with the subject property.

## Interview with Owner

An interview questionnaire was provided to the property owner prior to the site reconnaissance. Amit Mohan, CEO of Barlow Respiratory Hospital, completed the Owner Questionnaire on November 17, 2020. A copy of the completed questionnaire is included in Appendix A. The following information is based on our review of the completed questionnaire.

Dr. Mohan indicated the following:

- The subject property is currently used for hospital and support services.
- The eastern adjacent properties were formerly used for agricultural purposes.
- The southern adjacent properties were formerly used for residential and agricultural purposes.
- The structure on the subject property was built in about 1902.
- Barlow Group obtained ownership of the subject property in 1901.

The property owner also presented the following information regarding hazardous material and petroleum hydrocarbon storage and waste generation at the subject property.

- One 3,000-gallon diesel fuel tank is located on the subject property for emergency generators
- A transformer is located on the property.

The property owner indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. In addition, he is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the subject property.

## Interview with Site Manager

A site manager was not identified to Rincon.

## Interviews with Occupants

No occupants were interviewed as part of this research effort.

## Interviews with Local Government Officials

Rincon contacted the following agencies for records pertaining to the subject property and/or adjacent properties:

- Los Angeles County Fire Department Public records for the subject property the nearby release site at 1301 West Sunset Boulevard were requested on November 18, 2020. A response was received on November 19, 2020 indicating that no records were available for these properties.
- Los Angeles Water Quality Control Board Public records for the subject property the nearby release site at 1301 West Sunset Boulevard were requested on November 18, 2020. A response has not been received as of the date of this report.

## Interviews with Others

Rincon did not attempt to interview neighboring property owners or others as part of this Phase I ESA.

# Site Reconnaissance

Rincon performed an unaccompanied reconnaissance of the subject property on November 20, 2020. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of RECs in connection with the subject property. Select photographs taken during the site reconnaissance are provide in Figures 4 and 5.

## Methodology and Limiting Conditions

The site reconnaissance was conducted by:

- 1. Observing the subject property from public thoroughfares,
- 2. Observing the adjacent properties from public thoroughfares,
- 3. Observing the exterior of the structures,
- 4. Backtracking to correlate exterior features with interior features, as necessary, and
- 5. Observing the subject property from driveways, roads, and sidewalks.

Due to the COVID-19 pandemic, Rincon was not able to observe the interior of the structures on the subject property.

## Current Use of the Property and Adjacent Properties

The subject property is currently in use as the Barlow Respiratory Hospital. Adjacent properties include vacant residences, Elysian Park, and Dodger Stadium.

## Past Use of the Property and Adjacent Properties

Based on a plaque observed during our site reconnaissance, the property was formerly a sanitorium. Properties adjacent to the west appear to be former residences.

## Current or Past Uses in the Surrounding Areas

The subject property is surrounded by commercial, residential, and recreational land uses as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

# Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in the Physical Settings Section of this report.

## General Description of Structures

The property is developed with multiple buildings that comprise the Barlow Respiratory Hospital.

## Roads

Stadium Way is located adjacent to the southwest of the subject property, Scott Road is adjacent to the north and northeast, and North Boylston Street is adjacent to the south.

## Potable Water Supply

Los Angeles Department of Water and Power currently supplies potable water to the subject property.

## Sewage Disposal System

The subject property is connected to the Los Angeles Sanitation sewer system.

# Interior and/or Exterior Observations

# Hazardous Substances and Petroleum Products in Connection with Identified Uses

One emergency generator was observed on the subject property. The fuel source of the generator is unknown, but emergency generators are typically fueled by either diesel fuel or propane.

## Storage Tanks

During the site reconnaissance, one large oxygen tank was noted on the property. In addition, multiple gas canisters were noted. Although the regulatory records search indicates a UST is associated with the subject property, no other above- or below-ground storage tanks or evidence of USTs were observed on the subject property.

#### **Odors**

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

## **Pools of Liquid**

During the site reconnaissance, no pools of liquid were observed.

#### **Drums**

During the site reconnaissance, no drums were observed on the subject property.

# Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses

No hazardous substances or petroleum products not in connection with identified uses were observed at the subject property.

#### **Unidentified Substance Containers**

No unidentified substance containers or unidentified containers that might contain hazardous substances were observed during the site reconnaissance.

#### Indications of Polychlorinated Biphenyls (PCBs)

During the site reconnaissance, Rincon observed two pad mounted transformers on the subject property. There was no indication of releases in the vicinity of the transformers.

In addition, a hydraulic trash compactor was noted with some staining beneath.

#### Other Conditions of Concern

During the site reconnaissance, Rincon did not note any of the following:

- Clarifiers and sumps
- Degreasers/parts washers
- Pools of liquid
- Pits, ponds, and lagoons
- Stained soil or stained pavement
- Stressed vegetation
- Solid waste/debris
- Wastewater
- Wells
- Septic systems/effluent disposal system

Stains or corrosion. Stains surrounding the hydraulic trash compactor were observed.

# **Evaluation**

## **Findings**

Known or suspect RECs associated with the subject property include the following:

- Onsite laundry building
- Onsite UST
- Onsite emergency generator
- Onsite hydraulic trash compactor
- Former agricultural use of the subject property
- Former agricultural use of the eastern adjacent property

## **Opinions**

- A. **Onsite laundry building**. According to the historical resources reviewed, an onsite laundry building was present on the eastern subject property boundary from as early as 1919 until at least 1970. The building is existing today; however, onsite laundry operations have relocated to the central portion of the subject property. Volatile organic compounds are typically associated with dry cleaners; however, the facility was not identified as a dry cleaner in other historical sources reviewed. Based on the lack of evidence the facility was utilized as a dry cleaner, the onsite laundry building is considered *de minimis*.
- B. **Onsite UST.** According to the EDR report, the subject property is associated with a UST. No additional information was available in the EDR report. According to information provided by Client, a 3,000-gallon diesel UST is located north of the main hospital building, on the southern side of the northernmost onsite building. Because this report is being prepared for financing for the main hospital building only, which does not include the onsite UST, no additional assessment pertaining to the onsite UST is recommended at this time.
- C. Onsite emergency generator. During the site reconnaissance, an emergency generator was observed on the eastern portion of the subject property. The fuel source of the generator is unknown, but emergency generators are typically fueled by either diesel fuel or propane. No indications of release were observed from the emergency generator. Therefore, the onsite emergency generator on the subject property is considered *de minimis*.
- D. **Onsite hydraulic trash compactor.** During the site reconnaissance, a hydraulic trash compactor was observed on the eastern portion of the subject property. Minor staining was observed on the ground surrounding the trash compactor. However, the trash compactor and surrounding concrete appear to be in good condition. Therefore, the onsite hydraulic trash compactor on the subject property is considered *de minimis*.
- E. **Former agricultural use of the subject property**. According to the historical resources reviewed, the subject property appears to have been used for agricultural purposes from as early as 1977 through at least 1994. One possible orchard was present in the southeastern portion of the property from 1977 to 1979 and one possible orchard was present in the central portion of the property from 1989 and 1994. Agricultural land use is typically associated with the use of

pesticides and arsenic. However, based on site activities and the size of the possible orchard, the former use of the subject property for agricultural purposes is considered *de minimis*.

## Conclusions

Rincon has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 for the subject property located at 2000 Stadium Way, Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Deviations section of this report. This assessment has revealed no evidence of RECs in connection with the subject property.

### Recommendations

Based on the findings of this Phase I ESA, it is our opinion that no RECs were identified for the subject property. Because the report was conducted for the purpose of financing of the main hospital building only, which does not include the onsite UST, no additional assessment pertaining to the UST is recommended at this time.

Although not considered a REC, based on the age of the onsite structures (constructed as early as 1919), asbestos-containing materials and lead-based paint may be present on the subject property. Therefore, Rincon recommends conducting an asbestos-containing building materials and lead-based paint survey at the subject property prior to demolition or renovation of the structures.

## **Deviations**

Deviations from ASTM E1527-13 practice were encountered during the completion of this Phase I ESA. A completed user questionnaire was not returned as of the date of this report. In addition, a lien search was not completed as part of this assessment; however, one was requested from the user.

# Signatures of Environmental Professionals

The qualified environmental professionals that are responsible for preparing the report include Walt Hamann and Lisa Bestard. Their qualifications are summarized in the following section.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

# **Qualifications of Environmental Consultants**

The environmental consultants responsible for conducting this Phase I ESA and preparing the report include Walt Hamann, Lisa, Bestard, Devin Dinapoli, and Amanda Duval. Their qualifications are summarized below.

Environmental Professional Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Walt Hamann	PG, CHG, CEG		MS Geology	30 years
Lisa Bestard			BA Biology	18 years
Devin DiNapoli			BS Earth Science	6 years
Amanda Duval			BS Earth Science	1 year

Walt Hamann, PG, CEG, CHG, is a Principal and Senior Geologist with Rincon Consultants. He holds a Bachelor of Arts degree in geology from the University of California, Santa Barbara and a Master of Science degree in geology from the University of California, Los Angeles. He has over 30 years of experience conducting assessment and remediation projects and has prepared or overseen the preparation of hundreds of Phase I and Phase II Environmental Site Assessments throughout California. Mr. Hamann is a Professional Geologist (#4742), Certified Engineering Geologist (#1635), and Certified Hydrogeologist (#208) with the State of California.

**Lisa Bestard** is a Senior Environmental Scientist with Rincon Consultants. She holds a Bachelor of Arts degree in biology from University of San Diego, San Diego, California. Ms. Bestard has extensive experience performing Due Diligence Phase I and Phase II Environmental Site Assessments and various remediation projects and providing soil and waste management services. She has 18 years of experience conducting research, assessment, and remediation projects in California. Ms. Bestard's responsibilities at Rincon include implementation of site assessments and development of site remediation programs within the Environmental Site Assessment and Remediation Group.

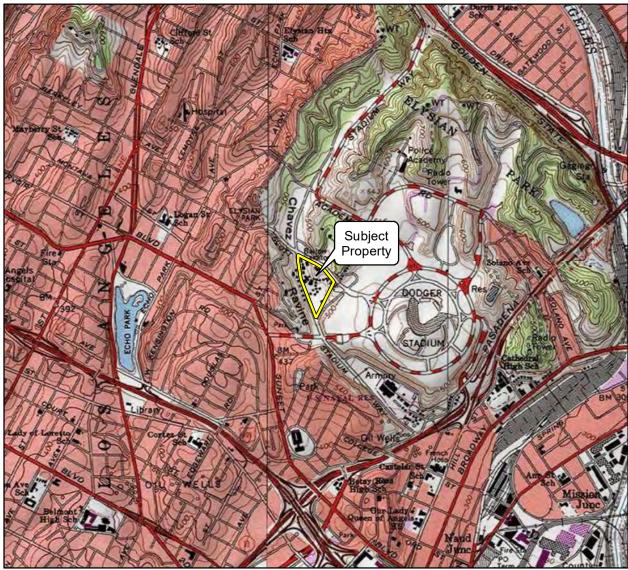

**Devin DiNapoli** is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Science Degree in Earth Science from the University of Southern California. Ms. DiNapoli has experience working on Phase I Environmental Site Assessments for a variety of commercial, rural, and industrial properties. She also has experience conducting Phase II projects including soil and soil vapor assessments. Ms. DiNapoli's responsibilities at Rincon include implementation of Phase I and Phase II Environmental Site Assessments and preparing environmental reports.

**Amanda Duval** is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Science degree in Earth Science from the University of California, San Diego. Ms. Duval's

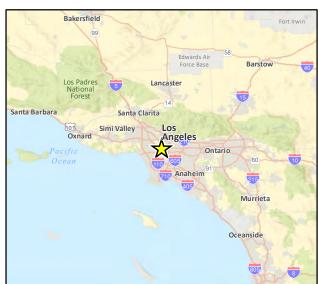

responsibilities at Rincon include implementation of Phase I Environmental Site Assessment reports for a variety of commercial, rural, and industrial properties. She also has experience with Phase II Environmental Site Assessments, which involve soil, groundwater, and soil vapor assessments.

Rin	con Project Number:
Site	e Name and Full Address:
4.	Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
	Please mark the box with the most appropriate response:  No, I do not have any specialized knowledge and/or experience related to the property or nearby properties.  Yes, I do have specialized knowledge and/or experience related to the property or nearby properties. Explain:
5.	As the user of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?
	Please mark the box with the most appropriate response:  No, I do not have any information about a reduction in property value relative to environmental issues.  Yes, I do have information about a reduction in property value relative to environmental issues. Explain:
6.	Does the purchase price being paid for this property reasonably reflect the fair market value of the property?
	Please mark the box with the most appropriate response:  Yes, I do believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.  No, I do not believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.  a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29)  Please mark the box with the most appropriate response  No, I have not considered the idea that known or believed contamination at the site has caused the lower purchase price.  Yes, I have considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain:

	Rincon Project Number:  iite Name and Full Address:					
7.	7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative or releases or threatened releases? For example:					
	Please mark the box with the most appropriate response:					
a. Do you know the past uses of the property?						
		I <u>do not</u> know.  I <u>do know</u> . Explain:				
		Tao know. Explain.				
	b.	Do you know of specific chemicals are present or once were present at the property?  I do not know.  I do know. Explain:				
	C.	Do you know of any spills or other chemical releases that have taken place at the property?				
		I do not know.				
		I <u>do</u> know. Explain:				
	d.	Do you know of any environmental cleanups have taken place at the property?  I do not know.  I do know. Explain:				
8.		sed on your knowledge and experience related to the property are there any obvious icators that point to the presence or likely presence of releases at the property?				
	Ple	ase mark the box with the most appropriate response:				
		<b>No</b> , I do not know and/or do not have any experience with any obvious indicators that point to the presence or likely presence of contamination at the property.				
		Yes, I do know of and/or do have experience with obvious indicators that point to the presence or likely presence of contamination at the property. Explain:				

	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site?			
Ī	Please mark the box with the most appropriate response:			
	No, I am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.			
	Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:			
	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site?			
	Please mark the box with the most appropriate response:			
	No, I am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.			
	Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:			
	Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?			
	Please mark the box with the most appropriate response:			
	No, I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or			
	petroleum products

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

#### State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CITY OF LA, LAFD FRA	1700 STADIUM WAY	SSE 1/4 - 1/2 (0.438 mi.)	G34	122
Database: RESPONSE, Da	te of Government Version: 07/27/2020			

Status: Refer: RWQCB Facility Id: 19970021

#### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are

13 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 4 CPS-SLIC sites within approximately 0.5 miles of the target property.

## State and tribal registered storage tank lists

Global Id: SL0603767361

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within

approximately 0.25 miles of the target property.

#### State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 07/27/2020 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/01/2020 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

#### Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

### Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Eval General Type: Compliance Evaluation Inspection

Eval Date: 10-23-2018 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: Inspection Report Consent to enter, inspect and take photographs was

given by: Documents uploaded to CERS were reviewed and field verified.
The following is a list items that need to be corrected: 1. PLEASE

RE-SUBMIT TO CERS. SUBMITTALS ARE DUE BETWEEN JANUARY 1ST AND MARCH

1ST OF EACH YEAR. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business

that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: \*\*\*\* Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the procedures below: 1. Log in to http://cers.calepa.ca.gov to

create a user [Truncated]

Violations:

Site ID: 146073

Site Name: RADI'S MECHANIC SERVICE INC.

Violation Date: 8/15/2018

Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter

1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the

possibility of a fire, explosion, or any unplanned sudden or

non-sudden release of hazardous waste or hazardous waste constituents

to air, soil, or surface water which could threaten human health or

the environment.

Violation Notes: Returned to compliance on 08/29/2018. OBSERVATION: Facilities shall be

maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface

water which could threaten human health or the environment. -Observed a minor pool of used oil accumulating inside the secondary containment for the used oil drums. CORRECTIVE ACTION: Immediately clean up the

Background Info: The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA)

consists of approximately 6 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer cond ucted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide a

dministrative, training, and logistics support to reserve units. The facility has one Installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service Station was built in 1943 and was used for fuelin a vehicles on site. The aboveground portion of the station has be en removed. Adjacent to the former Service Station, the Vehicle L

**EDR ID Number** 

ube Rack was used for vehicle maintenance and drained directly to a waste of oil underground storage tank(UST). Between 1987 to 19 89, hazardous substances (including used oil, solvents, hydraulic, fluid, and other new and used vehicle maintenance products) wer e stored in 55-gallon drums on the Vehicl Lube Rack. In Novembe r 1994, the waste oil UST was removed in 1994 under supervision of the Los Angeles Fire Department. Soil with detected levels of total recoverable petroleum hydrocarbons was excavated and disposed off site. In 1995, an Environmental Baseline Study (EBS) was conducted. The EBS identified the Vehicle Lube Rack and the form er Service Station gasoline UST as areas requiring further invest igation. In 1996, a subsurface soil investigation conducted for Site 1 indicated the presence of gasoline-range hydrocarbons, be nzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroetha

Completed Document Type: Monitoring Plan
Completed Date: 12/16/2014
Comments: Not reported

Completed Area Name: Sites With No Operable Unit

Completed Sub Area Name:

Completed Document Type: Monitoring Report
Completed Date: 09/22/2015
Comments: Not reported

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 01/18/2005

Comments: The SI included Geophysical survey; soil sampling and analysis;

groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program. DTSC concurs with

this recommendation.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Next Scheduled EDR Contact: 01/11/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

#### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Source: EPA Telephone: N/A

Last EDR Contact: 11/05/2020

Next Scheduled EDR Contact: 01/11/2021 Data Release Frequency: Quarterly

#### Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019

Number of Days to Update: 39

Last EDR Contact: 10/02/2020

Next Scheduled EDR Contact: 01/11/2021 Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/29/2020 Date Data Arrived at EDR: 08/03/2020 Date Made Active in Reports: 08/25/2020

Number of Days to Update: 22

Telephone: 800-424-9346 Last EDR Contact: 11/05/2020

Next Scheduled EDR Contact: 01/25/2021 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020 Date Data Arrived at EDR: 08/03/2020 Date Made Active in Reports: 08/25/2020

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020 Date Data Arrived at EDR: 06/22/2020 Date Made Active in Reports: 09/18/2020

### Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2020 Date Data Arrived at EDR: 06/22/2020 Date Made Active in Reports: 09/18/2020

Number of Days to Update: 88

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2020 Date Data Arrived at EDR: 06/22/2020 Date Made Active in Reports: 09/18/2020

Number of Days to Update: 88

Source: Environmental Protection Agency

Telephone: (415) 495-8895 Last EDR Contact: 09/22/2020

Next Scheduled EDR Contact: 01/04/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2020 Date Data Arrived at EDR: 06/22/2020 Date Made Active in Reports: 09/18/2020

Number of Days to Update: 88

Source: Environmental Protection Agency

Source: Department of the Navy Telephone: 843-820-7326 Last EDR Contact: 11/05/2020

Next Scheduled EDR Contact: 02/22/2021 Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2020 Date Data Arrived at EDR: 02/20/2020 Date Made Active in Reports: 05/15/2020

Number of Days to Update: 85

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 11/05/2020

Next Scheduled EDR Contact: 12/07/2020 Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2020 Date Data Arrived at EDR: 02/20/2020 Date Made Active in Reports: 05/15/2020

#### State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 07/27/2020 Date Data Arrived at EDR: 07/27/2020 Date Made Active in Reports: 10/08/2020

Number of Days to Update: 73

Source: Department of Toxic Substances Control

Telephone: 916-323-3400 Last EDR Contact: 10/26/2020

Next Scheduled EDR Contact: 02/08/2021 Data Release Frequency: Quarterly

### State- and tribal - equivalent CERCLIS

**ENVIROSTOR:** EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

#### State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process

Date of Government Version: 06/22/2020 Date Data Arrived at EDR: 06/22/2020 Date Made Active in Reports: 09/04/2020

Number of Days to Update: 74

Source: State Water Resources Control Board

Telephone: 916-323-7905 Last EDR Contact: 09/22/2020

Next Scheduled EDR Contact: 01/04/2021 Data Release Frequency: Quarterly

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/01/2020 Date Data Arrived at EDR: 06/02/2020 Date Made Active in Reports: 06/09/2020

Next Scheduled EDR Contact: 01/11/2021 Data Release Frequency: Semi-Annually

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/01/2020 Date Data Arrived at EDR: 06/02/2020 Date Made Active in Reports: 08/14/2020

Next Scheduled EDR Contact: 01/04/2021 Data Release Frequency: Quarterly

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

#### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

# **GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM**

#### **TARGET PROPERTY ADDRESS**

BARLOW RESPIRATORY HOSPITAL 2000 STADIUM WAY LOS ANGELES, CA 90012

#### TARGET PROPERTY COORDINATES

Latitude (North): 34.075427 - 34° 4' 31.54" Longitude (West): 118.247535 - 118° 14' 51.13"

Universal Tranverse Mercator: Zone 11 UTM X (Meters): 384888.8 UTM Y (Meters): 3771026.8

Elevation: 442 ft. above sea level

## **USGS TOPOGRAPHIC MAP**

Target Property Map: 5630795 LOS ANGELES, CA

Version Date: 2012

West Map: 5630741 HOLLYWOOD, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

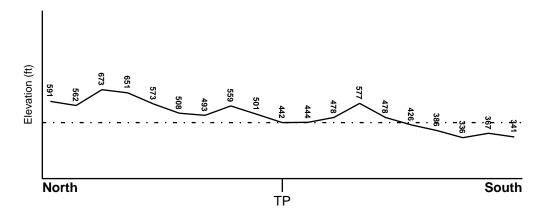

## **TOPOGRAPHIC INFORMATION**

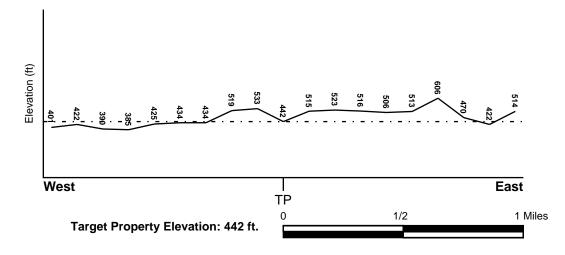

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

LOS ANGELES YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

## **AQUIFLOW**®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Cenozoic Category: Stratified Sequence

System: Tertiary Series: Miocene

Code: Tm (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HAMBRIGHT

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 20 inches

	Soil Layer Information						
	Воц	ındary		Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	gravelly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
2	7 inches	16 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
3	16 inches	20 inches	unweathered bedrock	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Surficial Soil Types: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Shallow Soil Types: silty clay

Deeper Soil Types: weathered bedrock

clay loam

LOCATION

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

DATABASE SEARCH DISTANCE (miles)

### PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Rincon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### **EXECUTIVE SUMMARY**

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
