Terracon Project No. 60217144

Dear Mr. Lawless:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with our Master Services Agreement dated June 23, 2006, and Terracon Proposal No. P60217144, dated March 3, 2021.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with our Master Services Agreement dated June 23, 2006 and Terracon Proposal No. P60217144, dated March 3, 2021 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Jennifer S. Van, Environmental Professional, who performed the site reconnaissance on March 19, 2021.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is located at 4952 and 4972 Warner Avenue in Huntington Beach, Orange County, California, Orange County, Assessor Parcel Numbers (APNs) 163-281-01 and 163-281-02. The site consists of two contiguous parcels totaling approximately 2.80 acres. The site is improved with two buildings: an approximately 7,285-square-foot (SF) two-story multi-tenant retail building on the northeastern portion of the site, and an approximately 47,488-SF three-story multi-tenant office building located on the western and southern portion of the site. Other site improvements include asphalt-paved parking lot, landscaped areas, and utilities. The 4972 Warner Avenue building was occupied by The OC Spa and Wellness Center, Electric Jiu Jitsu, Little Caesars, The Colour Attic and Kim R. Goyle CPA. The 4952 Warner Avenue building was occupied by multi-tenant offices; insurance, travel agency, accounting, brokerage, attorneys, therapists, marketing, engineering, and finances. Operations on-site consisted of general administration, restaurant, beauty and recreational.

Historical Information

Based on a review of historical information, the site consisted of undeveloped and/or vacant land from as early as 1896 through 1963, when the northeastern portion of the site was developed with a service station, which was cleared by 1978. By 1978 and 1979, the existing three-story multi-tenant commercial office building was developed on the west and southern portions of the site, and the existing two-story multi-tenant retail building was developed on the northeastern portion of the site. The site has remained relatively unchanged from the late 1970s through the present. The former service station (4972 Warner Avenue) is further discussed below. Occupants on-site have consisted of various professional services, restaurants, recreational, beauty salons, retail, and medical offices.

The surrounding properties consisted of undeveloped and/or vacant land from as early as 1896 through the late 1930s, when apparent residences were developed to the west and south of the

site, which were cleared by the 1940s. In the early 1970s, the properties to the adjoining west and south of the site were developed with two apartments complexes and a commercial building. In the early 1940s, the property to the adjacent north of the site was developed with commercial buildings, with several commercial redevelopments in the 1970s and late 2000s. The property to the adjacent east of the site was developed with an apparent commercial/residential building in the early 1950s, with several commercial/residential building additions in the 1960s and early 2010s. Former service stations, located to the adjacent north (across Warner Avenue) and adjacent east (across Bolsa Chica Road) and operated in the 1960s through the early 1990s, were identified in the regulatory database and are further discussed in 4.1.

Prior Report

CBRE, Inc. (CBRE) completed a Phase I ESA in June 2015. The area assessed consisted of the 4942 Warner Avenue parcel located on the west and southern portions of the site. CBRE did not identify HRECs, RECs and/or CRECs associated with the site. CBRE identified two business environmental risks (BERs) associated with the construction date of the site building that asbestos containing materials and lead-based paint may be present on-site. CBRE recommended that the materials to be sampled, managed, removed and handled in accordance with applicable regulation.

Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The following paragraphs summarize the site regulatory database listings:

4952 Warner Avenue: Heritage Park Foundation, Marina Medical Center and Lawrence Twomey, located on-site, is listed in the California Environmental Protection Agency - Facility and Manifest Data (HAZNET) and Department of Toxic Substances Control (DTSC) – Hazardous Waste Tracking System (HWTS) regulatory listings. Based on a review of the listings, waste streams generated on-site included photochemicals/photoprocessing waste, metals sludge, and asbestos containing waste between the years 1994 and 2010. Additional information was not provided. Based on the facility's regulatory status, historical information review, and waste streams identified, the Heritage Park Foundation, Marina Medical Center and Lawrence Twomey facilities do not represent a REC to the site.

4972 Warner Avenue, Suite 101: Marina Breast Center and White Cleaners (4972 Warner Avenue), formerly located on-site, is listed in the HWTS and EDR Hist Cleaner regulatory databases. Based on a review of the HWTS listing and on-line DTSC HWTS database, Marina Breast Center was permitted as a hazardous waste generator with the status of inactive as of June 1998. The type of waste generated was not reported. Based on a review of the EDR Hist Cleaner listing, White Cleaners is listed as a dry-cleaning plant from 1996 through 1998. Based on a review of information provided by the City of Huntington Beach, the former White Cleaners is located on the eastern portion (ground floor) of this 4952 Warner Avenue site building and consisted of a customer service retail facility with no dry-cleaning machines reported. In addition,

this facility was not permitted with the South Coast Air Quality Management District (SCAQMD) or to generate hazardous waste. Terracon researched on-line at the DTSC HWTS database and records of White Cleaners was not identified. In addition, Mr. Jim Filipan, owner, stated White Cleaners consisted of a drop-off station for dry cleaning and was not aware of dry cleaning operations at the site. Based on the facility's regulatory status and apparent operations (medical and dry-cleaning drop-off station), the former Marina Breast Center and White Cleaners facilities do not represent a REC to the site.

Former service station (4972 Warner Avenue): Muzquiz Abel, and Chevron Texaco 21-2242, located on the northeast portion of the site, is listed in the EDR Exclusive Historical Auto Stations (EDR Hist Auto), EPA Facility Index System/Facility Registry System (FINDS), Recovered Government Archive Leaking Underground Storage Tank (RGA LUST), California Environmental Reporting System (CERS), Hazardous Waste & Substances Sites List (Cortese), LUST, HAZNET, and HWTS regulatory databases. Based on a review of historical information and the EDR Hist Auto listing, the former service station was identified on-site from as early as 1963 through 1978. By 1979, this service station was cleared and redeveloped with the existing two-story multi-tenant commercial retail building and has remained relatively unchanged through the present. Based on a review of the FINDS, RGA LUST, CERS, CORTESE and LUST listings, Chevron Texaco is listed with a LUST Cleanup Site with the State Water Resources Control Board (SWRCB) and Orange County Health Care Agency (OCHCA) and the status of the cleanup case is listed as "Completed – Case Closed as of March 16, 2004". Records were obtained from the existing site owner, Mr. Jim Filipan, OCHCA, and Santa Ana Regional Water Quality Control Board (SARWQCB). Based on a review of a review of the March 16, 2014 Case Closure Summary, initial subsurface assessments were completed to evaluate the former service station in 1993 and 1994; however, the analytical results of this assessment were not reported to the OCHCA until 2003. These assessments reported fuel release to have impacted the site soil and groundwater and the responsible party of the fuel release is identified as Chevron Texaco. Additional activities included installation of six groundwater monitoring wells (MW-1 through MW-6) in 2002 and 2003 and quarterly groundwater monitoring in 2003 and 2004. Depth to groundwater was reported to range from 40 to 47 feet below ground surface (bgs) and flowing to the south and southeast. The status of the former USTs was unknown. According to Mr. Filipan, existing owner, the former USTs have been removed; however, documentation of removal was not provided. The maximum documented contaminant of concern concentrations remaining in soil include total petroleum hydrocarbon for gasoline (TPHg; 6,700 milligram per kilogram (mg/kg)), TPH for diesel (TPHd; 1,200 mg/kg), benzene (3.7 mg/kg), toluene (66.2 mg/kg), ethylbenzene (31.5 mg/kg), and xylenes (690 mg/kg). Terracon compared these residual concentrations to the RWQCB – Table 4.1: Maximum Soil Screening Levels (MSSLs) for TPH, BTEX, and MTBE above drinking water aquifers, revised May 2008 and the concentrations of TPHg, benzene, ethylbenzene and xylenes exceed the MSSLs for 20-150 feet distance above groundwater.

The maximum documented contaminant concentrations remaining in groundwater included TPHg (2,300 micrograms per liter (µg/L)), TPHd (510 µg/L), benzene (89 µg/L), toluene (350 µg/L), ethylbenzene (82 µg/L), xylenes (360 µg/L) and tertiary butyl alcohol (TBA; 27 µg/L). Terracon

compared these concentrations of groundwater remaining in-place to the San Francisco Bay RWQCB Environmental Screening Levels (ESLs) – Tier 1 ESLs, dated 2019 (Rev.2) and the concentrations remaining in-place exceeded the ESLs for the abovementioned constituents.

The former service station received no further action based on the following:

- “The known soil contamination is limited in extent in silty clay/clayey soil to the south of the former tank area and on the edge of the southeastern dispenser at depths between 26 to 36 bgs.”
- “The known soil contamination has not significantly impacted groundwater as evident by groundwater results.”
- “The benzene levels seen in well (MW-3), the nearest up-gradient well to the present building, do not provide a vapor intrusion threat.”

As part of the site management requirements, the OCHCA stated the following in the Case Closure Summary: “they must be notified if a structure is going to be placed over the area where high soil contaminants remain in place” and that if land use changes to residential that corrective action should be reviewed. Based on the exceedances in the soil and groundwater above the applicable current screening levels and the regulatory closed LUST status and reported site management requirements by the OCHCA, the former service station represents a controlled REC (CREC) to the site.

Subsurface investigation and groundwater monitoring activities at the site were completed to the satisfaction of the OCHCA and no further action was required for the site for commercial land use. However, soil vapor beneath the site was not reported to be evaluated for the possible presence of VOCs. Although OCHCA stated that vapor intrusion into the existing building in 2004 does not appear to represent a concern, the vapor intrusion and permissible indoor air VOC screening levels have become significantly more stringent for commercial and residential land uses. As such, and despite the OCHCA closure for the former Chevron Texaco service station on the northeastern portion of the site, Terracon considers the likely presence of residual VOCs in soil vapor a REC.

Off-site Lewis Cleaners (4945 Warner Avenue): This facility formerly located approximately 120 feet to the north and in a hydrogeologic up-gradient position relative to the site, is listed in the DRYCLEANERS, RCRA-SQG, and EDR Hist Cleaner regulatory databases. Based on a review of the RCRA-SQG listing, this facility was permitted as a small quantity generator of hazardous waste in 1991. Based on a review of the EDR Hist Cleaner and historical city directories, Lewis Cleaners operated from as early as 1982 through 2007. Based on a review of the DRYCLEANERS listing and the on-line SCAQMD FIND database, this facility operated with dry cleaning equipment using perchloroethylene (PCE) as a solvent in the years 1980, 1990, 2003 and 2007. Based on the facility’s proximity and hydrogeologic up-gradient position relative to the site, facility’s duration of operations (~25 years) and operations identified to utilize PCE as a dry cleaning solvent, the former Lewis Cleaners facility represents a REC to the site.

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, regulatory records review, and/or distance from the site. Refer to Section 4.1 of the report for additional details.

Site Reconnaissance

During the site reconnaissance, two hydraulic elevators, heating ventilation and air conditioning units, one boiler, one cooling tower, water heaters, interior floor drains, 13 five-gallon plastic containers of paint, *di minimis* stained pavement, and three solid waste disposal dumpsters were observed. RECs were not identified.

Adjoining Properties

Warner Avenue abuts the site to the north followed by Walgreens Pharmacy (4935 Warner Avenue), a two story multi-tenant commercial retail building (4911 Warner Avenue) to the northwest and CVS Pharmacy (16922 Bolsa Chica Street) to the northeast of the site. Bolsa Chica Street abuts the site to the east followed by Harbor Tire Pros (5002 Warner Avenue) and single-family residences (17042-17112 Bolsa Chica Street). The property to the adjoining south of the site consists of a commercial building occupied by Frontier Communications (17111 Bolsa Chica Street). The property to the adjoining west of the site consists of the Monticello Apartments (17052 and 17062 Green Lane). Walgreens Pharmacy, CVS Pharmacy and Frontier Communications were listed in the regulatory database and were previously discussed in Section 4.1.

Additional Services

Per the agreed scope of services specified in the proposal, the following additional services (e.g. visual observations for suspect asbestos and visual observations for suspect lead-based paint) were conducted.

- Based on the age of the buildings (1978 and 1979), it is likely that the identified materials are asbestos containing material. Terracon was provided drywall and joint compound asbestos analytical results for 4952 Warner Avenue. Based on a review of the analytical results, a review of previous asbestos sampling activities identified one sample of drywall with joint compound consisting of <1% chrysotile.
- Based on the age of the building (1978 and 1979), it is possible that the identified paints are lead-based paint.

Significant Data Gaps

Significant data gaps were not identified.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at 4952 and 4972 Warner Avenue, Huntington Beach, Orange County, California, the

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

site. The following Recognized Environmental Conditions (RECs) or Controlled RECs (CREC) were identified in connection with the site:

- **On-site former service station (4972 Warner Avenue) represents a CREC -** Based on the exceedances in soil and groundwater above the applicable current screening levels and the reported regulatory closed LUST status.
- **Potential for Vapor Intrusion associated with on-site former service station (4972 Warner Avenue) represents a REC -** Due to changes in the soil vapor and indoor air screening levels since closure was obtained for the former service station, and based on absence of soil vapor investigation.
- **Off-site former Lewis Cleaners (4945 Warner Avenue) represents a REC -** Based on the facility's proximity and hydrogeologic up-gradient position relative to the site, facility's duration of operations (~25 years) and operations identified to utilize PCE as a dry cleaning solvent

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon recommends the following:

- Terracon recommends conducting additional investigation to evaluate subsurface conditions associated with the identified RECs.
- As part of site management requirements, the site owner/client should contact the OCHCA to inform them of the proposed site development and change in land use prior to site development activities.
- Terracon recommends conducting a thorough asbestos and lead-based paint survey prior to disturbance of suspect asbestos-containing materials (ACM) and lead-based paint (LBP) during planned renovations or building demolition.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Proposed Senior Living Development - HB
Site Location/Address	4952 and 4972 Warner Avenue, Huntington Beach, Orange County, California Orange County Assessor Parcel Numbers (APNs) 163-281-01 and 163-281-02
Land Area	Approximately 2.80 acres
Site Improvements	The site is improved with two buildings; an approximately 7,285-square-foot (SF) two-story multi-tenant retail building on the northeastern portion of the site and an approximately 47,488-SF three-story multi-tenant office building located on the western and southern portion of the site. Other site improvements include asphalt-paved parking lot, landscaped areas, and utilities.
Anticipated Future Site Use	Redevelopment for residential use; senior living facility
Purpose of the ESA	Redevelopment of the site

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with our Master Services Agreement dated June 23, 2006 and Terracon Proposal No. P60217144, dated March 3, 2021, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor

migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

As requested by the client, the following additional services were performed:

- Visual Observations for Suspect Asbestos
- Visual Observations of Suspect Lead-Based Paint

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Hines Interests LP. Use or reliance by any other party is prohibited without the written authorization of Hines Interests LP and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Master Services Agreement. The limitation of liability defined in the Master Services Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the site visit, client's representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.	X		
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.	X		
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.	X		
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.	X		
Obvious Indicators of Contamination at the site.	X		

The client did not provide the requested User's information as of the issuance date of the report. Terracon assumes the client is evaluating the questionnaire information outside the context of Terracon's Phase I ESA scope of work and report.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 40 feet above sea level.	USGS Topographic Map, Seal Beach, California, Dated 2012 (Appendix A)
Topographic Gradient	Sloping towards the north.	
Closest Surface Water	East Garden Grove-Wintersburg Channel, approximately 2,295 southeast of the site.	
Soil Characteristics		
Soil Type	Myford Sandy Loam	Orange County, California USDA, Soil Conservation Services Soil Survey issued May 27, 2020
Description	Parent material consists of alluvium derived from sandstone with 2 to 9 percent slopes. A typical profile consists of 0 to 7 inches of sandy loam; 7 to 11 inches of sandy clay; 11 to 64 inches of sandy clay loam; and 64 to 79 inches of sandy loam.	
Geology/Hydrogeology		
Formation	QOA – Quaternary Deposits	

Physical Setting Information		Source
Description	Alluvium, lake, playa, and terrace deposits.	California Geological Survey, Geologic Data Map No. 2, 2015
Estimated Depth to First Occurrence of Groundwater	Ranging from 39 and 46 feet below grade surface (bgs) on the northeast portion of the site.	Chevron Texaco 21-2242 (T0605940455) LUST Cleanup Site 4972 Warner Huntington Beach, California
*Hydrogeologic Gradient	Reported flowing to the south and southeast on-site.	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10 to 15 year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps:
 - Las Bolsas, California, published in **1896, 1934, 1941, 1943** (1: 62,500)
 - Seal Beach, California, published in **1935** (1: 31,680)
 - Seal Beach, California, published in **1949, 1950, 1965, 1972, 1981** and **2012** (1: 24,000)
- Aerial photographs:
 - FAIR, **1928** and **1947** 1"=500'
 - USDA, **1938, 1952, 1988,** and **1990** 1"=500'
 - USGA, **1963** and **1972** 1"=500'
 - EDR Proprietary Brewster Pacific, **1977** 1"=500'
 - USGS/DOQQ, **1994** and **2002** 1"=500'
 - USDA/NAIP, **2009, 2012,** and **2016** 1"=500'

Historical Maps and Aerial Photographs

Direction	Description
Site	Undeveloped and/or vacant land (1896-1963); developed with a commercial building; indicative of a <u>service station</u> on the northeast portion of the site (1972); developed with existing commercial office building on the west and southern portions of the site (1977); redeveloped with existing commercial retail building on the northeastern portion of the site (1988-2016).
North	Undeveloped land (1896); a road abuts the site followed by undeveloped land (1928-1938), developed with commercial buildings (1947-1952); developed with an apparent commercial building; indicative of a <u>service station</u> (1963-1972); commercial retail redevelopment to the north of the western portion and developed with commercial building to the northeast (1977-2009); service station and commercial retail buildings have been cleared and redeveloped with two existing commercial retail buildings to the north and northeast of the site (2012-2016).
East	Undeveloped land (1892); a road abuts the site followed by undeveloped land (1928-1947); developed with apparent commercial/residential building (1952); commercial/residential buildings (1963); developed with additional commercial building; indicative of a service station (1972-2002); commercial building has been cleared, vacant land and residences (2005-2009); redeveloped with existing commercial building (2012-2016).
South	Undeveloped land (1896-1928), developed with an apparent residential property (1938-1963), developed with existing commercial building (1972-2016).
West	Undeveloped land (1896-1928), developed with apparent residential property (1938-1963), redeveloped with two existing multi-family residential buildings (1972-2016).

A service station, was identified on the northeastern portion of the site in the 1972 historical aerals. A service station was identified to the adjacent north (across Warner Avenue) in the historical aerals from 1963 through 2009. In addition, a service station was identified to the adjacent east (across Bolsa Chica Street in the historical aerals from 1972 through 1994. These facilities were identified in the regulatory database and are further discussed as 4995, 4972 and 5005 Warner Avenue in Section 4.1.

3.2 Historical City Directories

The General Telephone Co., Haines Criss-Cross Directory, and EDR Digital Archive city directories used in this study were made available through EDR (selected years reviewed: 1964 through 2014) and were reviewed at approximate five-year intervals, if readily available. Street listings not available prior to 1964. The current street address for the site was identified as 4952 and 4972 Warner Avenue.

Historical City Directories

Direction	Description
Site	<p>4952 Warner Avenue – No listings (1964-1976); multi-tenant office/retail listings with no suspect listings; medical products, lay offices, beauty salon, investment firms, realtors, bakery, consulting, hair, plumbing (1982-2014).</p> <p>4972 Warner Avenue – No listings (1964); <u>Meadowlark Texaco</u> (1968); <u>Thompson Texaco</u> (1973-1976); multi-tenant commercial listings with no suspect listings; travel, bank, nail, video store, pharmacy (1982-2014).</p>
North	<p>4935 Warner Avenue – No listings (1964-1976); Mccue Robert L. Co, South Coast Financial Service (1982); no listings (1987); Collin's Co., TRH Enterprises, World's Finest Choc (1992-1995); K & K Hansen, Inc. (2005); no listings (2010-2014).</p> <p>4941 Warner Avenue – No listings (1964-1973); Mike's Liquor and Deli (1976-1995); no listings (2002-2014).</p> <p>4943 Warner Avenue – No listings (1964-1973); Fink AI Associates, Inc. (1976); no listings (1976-2014).</p> <p>4945 Warner Avenue – No listings (1964-1976); <u>Lewis Cleaners</u> (1982-2005); no listings (2010-2014).</p> <p>4951 Warner Avenue – No listings (1964-1973); Lewis M. Szallay (1976); Western Mutual Escrow (1982); Harbor 1 Hr. Photo (1987-2010); no listings (2014).</p> <p>4995 Warner Avenue – <u>Mobil Service Station</u> (1964); <u>Joe's Service Station</u> (1968-1976); <u>Ed Bates Mobile</u> (1982); <u>Massim's Mobil</u>, <u>Massim's ARCO</u> (1987); <u>Import Auto Repair</u> (1992-2014).</p> <p>5005 Warner Avenue – No listings (1964-1976); Colonel Sanders (1972); KFC (1982-1995); no listings (2000-2005); Buon Gusto, HB Coin Laundry, Harbor Liquor (2010); no listings (2014).</p>
East	<p>5002 Warner Avenue – <u>Walker Oil Co.</u> (1964); no listings (1968); <u>Econo Self-Serve</u> (1973-1987); Marine Griffith (1992-2005); no listings (2010); Tire Harbour (2014).</p> <p>17042 Bolsa Chica Street – Residential listing (1964-1968); no listings (1973-1987); residential listing (1995-2010); no listings (2014).</p> <p>17062 Bolsa Chica Street – Residential listing (1964-1968); no listings (1973-1995); residential listing (2000-2010); no listings (2014).</p> <p>17082 Bolsa Chica Street – No listings (1964-1968); residential listing (1973-1976); no listings (1982-1987); residential listing (1995-2014).</p> <p>17112 Bolsa Chica Street – Residential listing (1964-1968); residential listing (1973-</p>
South	<p>17111 Bolsa Chica Street – No listings (1964-1968); residential listing (1973-1976); no listings (1982-1987); residential listing (1995-2014).</p>
West	<p>17052 and 17062 Green Lane – Apartment listings (1973-2014).</p>

The above underlined and italicized addresses and facilities are listed in the regulatory database and are further discussed in Section 4.1.

3.3 Site Ownership

Based on information provided by the interview of Mr. Alireza Mirzaei and Mr. Jim Filipan, owner representatives, the current owner of the site is Huntington Harbor Plaza LLC and FKOA LLC.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Jennifer S. Van	Mr. Alireza Mirzaei / 858-705-8184	Acquisition Representative with Khoshbin Company, Inc. (4952 Warner Avenue)	March 19, 2021 / 7:30am
	Mr. Jim Filipan / 714-655-5384	Owner (4972 Warner Avenue)	March 19, 2021 / 8:15am

Terracon interviewed Mr. Alireza Mirzaei during the site reconnaissance. Mr. Mirzaei stated he has been associated with 4952 Warner Avenue of the site for one year. Mr. Mirzaei stated the site building was developed in 1978 and has been occupied by general administration type of operations. Mr. Mirzaei stated there was a prior Phase I ESA completed in 2015, which is further discussed in Section 3.7. Mr. Mirzaei is not aware of ASTs, USTs, petroleum pipelines, or monitoring wells associated with the site. Mr. Mirzaei is not aware of pending, threatened, and/or past environmental litigation and possible violations of environmental laws, liability and/or

potential environmental concerns associated with the site. In addition, Mr. Mirzaei is not aware of environmental concerns associated with the surrounding properties.

Terracon interviewed Mr. Jim Filipan during the site reconnaissance. Mr. Filipan stated he has been associated with the site as the owner of the 4972 Warner Avenue parcel for the past 20 years. Mr. Filipan stated the site building was developed in 1979 and has consisted of retail/restaurant types of operations including; hair salon, pizza restaurant, martial arts studio, accounting, and massage businesses. Mr. Filipan is aware of a former dry cleaners (White Cleaners). Mr. Filipan stated that the dry cleaners consisted of a drop off station and Mr. Filipan was not aware of dry cleaning type of operations conducted. Mr. Filipan stated the site consisted of a former gasoline station with a cleanup case with Orange County Health Care Agency, which has received commercial closure. Mr. Filipan stated he has records associated with the former assessments, which were discussed in Section 4.1. Mr. Filipan is not aware of environmental concerns associated with the surrounding properties.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were provided by the client to Terracon for review.

Phase I ESA, Huntington Marine Executive Center, 4952 Warner Avenue, Huntington Beach, California, prepared by CBRE, Inc., prepared for RAIT Partnership, L.P., dated June 29, 2015.

CBRE, Inc. (CBRE) completed a Phase I ESA in June 2015. The area assessed consisted of the 4942 Warner Avenue parcel located on the west and southern portions of the site. Based on a review of the report, the site consisted of a three-story office building and the operations consisted of general administration. CBRE did not identify HRECs, RECs and/or CRECs associated with the site. CBRE identified two business environmental risks (BERs) associated with the construction date of the site building that asbestos containing materials and lead-based paint may be present on-site. CBRE recommended that the materials to be sampled, managed, removed and handled in accordance with applicable regulation.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site

groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS (SEMS)	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP (SEMS ARCHIVE)	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1.0	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1.0	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	4
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
LUST	Leaking Underground Storage Tanks	0.5	13
SWF/LF	Solid Waste Facilities/Landfills	0.5	1
UST	Underground Storage Tank Facilities	Site and adjoining properties	1
VCP	Voluntary Cleanup Program	0.5	1

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

Database	Description	Distance (miles)	Listings
CA ENVIROSTOR (CALSITE)	California Envirostor database listing	1.0	4
CA CPS-SLIC	California Statewide SLIC Cases	0.5	0
CA AST	California Above-ground Storage Tank listing	0.250	0
CA CERS HAZ WASTE	California Environmental Reporting System on Hazardous Waste	0.250	5
CA SWEEPS UST	California Statewide Environmental and Evaluation Planning System on Underground Storage Tanks	0.250	2
CA HIST UST	California Historical Underground Storage Tank listing	0.250	3
CA CERS TANKS	California Environmental Reporting System on Tanks	0.250	1
CA FID UST	California Facility Information Database on Underground Storage Tanks	0.250	3
CA DEED	Deed Restriction Listing	0.5	0
CA CHMIRS	California Hazardous Material Incident Reporting System	Site	0
RCRA NonGen/NLR	RCRA Non-Generator / No Longer Regulated	0.250	17
DOD	Department of Defense	1.0	1
FINDS	Facility Index System/Facility Registry System	Site	0
ECHO	Enforcement and Compliance History Information	Site	0
CA Cortese	Hazardous Waste and Substance site list	0.5	8
CA DRYCLEANERS	California Dry cleaner listing	0.250	4
CA HAZNET	California Facility and Manifest Data	Site	4
CERS	California Environmental Reporting System	Site	1
CA HWTS	California Hazardous Waste Tracking System	Site	5
EDR Hist Auto	EDR Historical Automotive listing	0.125	3
EDR Hist Cleaner	EDR Historical Cleaner listing	0.125	2
NPDES	National Pollutant Discharge Elimination System	Site	0
CIWQS	State Water Resources Control Board - California Integrated Water Quality System	Site	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The site is identified in the regulatory databases.

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities within 500 feet radii of the site. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Marina Breast Center 4972 Warner Avenue, #101	Site	HWTS	REC, discussed below
Muzquiz Abel		EDR Hist Auto	
White Cleaners		EDR Hist Cleaner	
1X First Nationwide Bank		HAZNET, HWTS, LUST	
Chevron Texaco 21-2242 4972 Warner Avenue		FINDS, RGA LUST, CERS, Cortese, LUST	
Heritage Park Foundation 4952 Warner Avenue, Suite 110	Site	HAZNET, HWTS	Not a REC, discussed below.
Marina Medical Center 4952 Warner Avenue #110		HAZNET, HWTS	
Lawrence Twomey 4952 Warner Avenue		HAZNET, HWTS	
Frontier California Inc.	Adjoining / South / Down-gradient	RCRA NonGen / NLR	Not a REC, discussed below
General Telephone Co		Cortese, LUST, CA FID UST, HAZNET, HWTS, UST, RCRA-SQG, CERS, HIST CORTESE, LUST	
Verizon Ca Inc Warner Co 17111 Bolsa Chica Road		UST	
Gw Cleanup-H.B., Warner Avenue	85 feet / East / Cross-gradient	CERS, CERS, CERS TANKS, Cortese, ENF, HIST CORTESE, HWTS, LUST	Not a REC, discussed below
Jet		HIST UST	
Nanek Petrol		UST	
Power Gas Inc 5002 Warner Avenue		EDR Hist Auto	

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Import Auto Repair	120 feet / North / Cross-to-up-gradient	UST, CERS, Cortese, EHAZNET, HWTS, LUST, RCRA-SQG	Not a REC, discussed below.
Mobil #18-D7e		LUST, CA FID UST, HIST CORTESE, SWEEPS UST	
Nassim Jebaii 4995 Warner Avenue		EDR Hist Auto, HIST UST	
Lewis Cleaner 4945 Warner Avenue	120 feet / North / Up-gradient	(2) DRYCLEANERS, RCRA-SQG, EDR Hist Cleaner	REC, discussed below
Walgreens #12140 4935 Warner Avenue	120 feet / North / Up-gradient	CERS HAZ WASTE, HAZNET, HWTS, RCRA-SQG	Not a REC, discussed below
Cvs Pharmacy # 9373 16922 Bolsa Chica Street	195 feet / Northeast / Cross-gradient	CERS HAZ WASTE, HAZNET, HWTS, RCRA-LQG	Not a REC, discussed below
Steverson Bros. Boucher Site Southeast of Bolsa Chica & Dunbar	200 feet / Southeast / Down-gradient	ENVIROSTOR, VCP, WMUDS/SWAT, SWF/LF	Not a REC, discussed below
Landis Family Trust (Formerly Dry Cleaners) 16928 Bolsa Chica Street	340 feet / Northeast / Cross-gradient	Orange Co. Industrial Site	Not a REC, based on closed regulatory status, distance and gradient
Caesar's Cleaners 16922 Bolsa Chica Road	340 feet / Northeast / Cross-gradient	DRYCLEANERS	Not a REC, based on distance and gradient
Scher Tire 5062 Warner Avenue	400 feet / East / Cross-gradient	CA FID UST, CERS, CERS HAZ WASTE, SWEEPS UST, UST	Not a REC, based on distance and gradient
Meadowlark Airport 5141 Warner Avenue	530 feet / Northeast / Cross-gradient	HIST UST, CERS, Cortese, HIST CORTESE, LUST, UST	Not a REC, based on distance and gradient

4952 Warner Avenue

Heritage Park Foundation, Marina Medical Center and Lawrence Twomey, located on-site, is listed in the California Environmental Protection Agency - Facility and Manifest Data (HAZNET) and Department of Toxic Substances Control (DTSC) – Hazardous Waste Tracking System (HWTS) regulatory listings. Based on a review of the listings, waste streams generated on-site

included photochemicals/photoprocessing waste, metals sludge, and asbestos containing waste between the years 1994 and 2010. Additional information was not provided. Based on the facility's regulatory status, historical information review, and waste streams identified, the Heritage Park Foundation, Marina Medical Center and Lawrence Twomey facilities do not represent a REC to the site.

4972 Warner Avenue

Marina Breast Center and White Cleaners (4972 Warner Avenue), formerly located on-site, is listed in the HWTS and EDR Hist Cleaner regulatory databases. Based on a review of the HWTS listing and on-line DTSC HWTS database, Marina Breast Center was permitted as a hazardous waste generator with the status of inactive as of June 1998. The type of waste generated was not reported. Based on a review of the EDR Hist Cleaner listing, White Cleaners is listed as a dry-cleaning plant from 1996 through 1998. Based on a review of information provided by the City of Huntington Beach, the former White Cleaners is located on the eastern portion (ground floor) of this 4952 Warner Avenue site building and consisted of a customer service retail facility with no dry-cleaning machines reported. In addition, this facility was not permitted with the South Coast Air Quality Management District (SCAQMD) or to generate hazardous waste. Terracon researched on-line at the DTSC HWTS database and records of White Cleaners was not identified. In addition, Mr. Jim Filipan, owner, stated White Cleaners consisted of a drop-off station for dry cleaning and was not aware of dry cleaning operations at the site. Based on the facility's regulatory status and apparent operations (medical and dry-cleaning drop-off station), the former Marina Breast Center and White Cleaners facilities do not represent a REC to the site.

Muzquiz Abel, and Chevron Texaco 21-2242, located on the northeast portion of the site, is listed in the EDR Exclusive Historical Auto Stations (EDR Hist Auto), EPA Facility Index System/Facility Registry System (FINDS), Recovered Government Archive Leaking Underground Storage Tank (RGA LUST), California Environmental Reporting System (CERS), Hazardous Waste & Substances Sites List (Cortese), LUST, HAZNET, and HWTS regulatory databases. Based on a review of historical information and the EDR Hist Auto listing, the former service station was identified on-site from as early as 1963 through 1978. By 1979, this service station was cleared and redeveloped with the existing two-story multi-tenant commercial retail building and has remained relatively unchanged through the present. Based on a review of the FINDS, RGA LUST, CERS, CORTESE and LUST listings, Chevron Texaco is listed with a LUST Cleanup Site with the State Water Resources Control Board (SWRCB) and Orange County Health Care Agency (OCHCA) and the status of the cleanup case is listed as "Completed – Case Closed as of March 16, 2004". Records were obtained from the existing site owner, Mr. Jim Filipan, OCHCA, and Santa Ana Regional Water Quality Control Board (SARWQCB). Based on a review of a review of the March 16, 2014 Case Closure Summary, initial subsurface assessments were completed to evaluate the former service station in 1993 and 1994; however, the analytical results of this assessment were not reported to the OCHCA until 2003. These assessments reported fuel release to have impacted the site soil and groundwater and the responsible party of the fuel release is identified as Chevron Texaco. Additional activities included installation of six groundwater monitoring wells (MW-1 through MW-6) in 2002 and 2003 and quarterly groundwater monitoring in 2003 and 2004. Depth to groundwater was reported to range from 40 to 47 feet

below ground surface (bgs) and flowing to the south and southeast. The status of the former USTs was unknown. According to Mr. Filipan, existing owner, the former USTs have been removed; however, documentation of removal was not provided. The maximum documented contaminant of concern concentrations remaining in soil include total petroleum hydrocarbon for gasoline (TPHg; 6,700 milligram per kilogram (mg/kg)), TPH for diesel (TPHd; 1,200 mg/kg), benzene (3.7 mg/kg), toluene (66.2 mg/kg), ethylbenzene (31.5 mg/kg), and xylenes (690 mg/kg). Terracon compared these residual concentrations to the RWQCB – Table 4.1: Maximum Soil Screening Levels (MSSLs) for TPH, BTEX, and MTBE above drinking water aquifers, revised May 2008 and the concentrations of TPHg, benzene, ethylbenzene and xylenes exceed the MSSLs for 20-150 feet distance above groundwater.

The maximum documented contaminant concentrations remaining in groundwater included TPHg (2,300 micrograms per liter (µg/L)), TPHd (510 µg/L), benzene (89 µg/L), toluene (350 µg/L), ethylbenzene (82 µg/L), xylenes (360 µg/L) and tertiary butyl alcohol (TBA; 27 µg/L). Terracon compared these concentrations of groundwater remaining in-place to the San Francisco Bay RWQCB Environmental Screening Levels (ESLs) – Tier 1 ESLs, dated 2019 (Rev.2) and the concentrations remaining in-place exceeded the ESLs for the abovementioned constituents.

The former service station received no further action based on the following:

- “The known soil contamination is limited in extent in silty clay/clayey soil to the south of the former tank area and on the edge of the southeastern dispenser at depths between 26 to 36 bgs.”
- “The known soil contamination has not significantly impacted groundwater as evident by groundwater results.”
- “The benzene levels seen in well (MW-3), the nearest up-gradient well to the present building, do not provide a vapor intrusion threat.”

As part of the site management requirements, the OCHCA stated the following in the Case Closure Summary: “they must be notified if a structure is going to be placed over the area where high soil contaminants remain in place” and that if land use changes to residential that corrective action should be reviewed. Based on the exceedances in the soil and groundwater above the applicable current screening levels and the regulatory closed LUST status and reported site management requirements by the OCHCA, the former service station represents a controlled REC (CREC) to the site.

Subsurface investigation and groundwater monitoring activities at the site were completed to the satisfaction of the OCHCA and no further action was required for the site for commercial land use. However, soil vapor beneath the site was not reported to be evaluated for the possible presence of VOCs. Although OCHCA stated that vapor intrusion into the existing building in 2004 does not appear to represent a concern, the vapor intrusion and permissible indoor air VOC screening levels have become significantly more stringent for commercial and residential land uses. As such, and despite the OCHCA closure for the former Chevron Texaco service station on the

northeastern portion of the site, Terracon considers the likely presence of residual VOCs in soil vapor a REC.

17111 Bolsa Chica Road

Frontier California, Inc., General Telephone Co and Verizon Ca Inc Warner Co., located to the adjoining south and in a hydrogeologic down-gradient position relative to the site, is listed in the RCRA NonGen / NLR, Cortese, LUST, CA FID UST, HAZNET, HWTS, RCRA-SQG, CERS, HIST CORTESE, LUST and UST regulatory databases. Based on a review of the RCRA-SQG, HWTS and HAZNET listing, General Telephone Company was permitted as a small quantity generator in 1996 and a large quantity generator in 1986. Waste streams generated included unspecified oil-containing waste in 2016. Frontier California, Inc. is reported as a non-generator of hazardous waste in 2018 and 2019.

Based on a review of the LUST and CERS listing and on-line State Water Resources Control Board GeoTracker database as a LUST Cleanup Site with the status of "Completed – Case Closed as of October 15, 1990." Based on a review of the case summary and closure rationale, dated October 4, 1990, one 1,000-gallon diesel tank was pulled on August 2, 1985. The remaining total petroleum hydrocarbon remaining at this facility is reported at 2,550 mg/kg at a depth of approximately 25 feet bgs. Groundwater is estimated to be approximately 45 feet bgs and the soil type is reported silty clay from 20 to 41 feet bgs. Additional information was obtained from the OCHCA and the former tank location is approximately 55 feet to the south of the site.

According to records obtained from the OCHCA, a 4,000-gallon diesel UST with double walled construction and interstitial monitoring was installed in 1991. During the adjoining site reconnaissance, the tank hold was observed approximately 25 feet to the south of the site. Based on the facility's hydrogeologic down-gradient position relative to the site, facility's closed LUST status, and facility's regulatory status, the Frontier California, Inc., General Telephone Co and Verizon Ca Inc Warner Co. facility does not represent a REC to the site.

5002 Warner Avenue

A former service station; Gw Cleanup-H.B., Warner Avenue, Jet, Nanek Petrol, and Power Gas Inc., located approximately 85 feet to the east and in a hydrogeologic cross-gradient position relative to the site, is listed in the CERS, CERS TANKS, Cortese, ENF, HIST CORTESE, HWTS, LUST, HIST UST, UST and EDR Hist Auto regulatory databases. Based on a review of historical information and the EDR Hist Auto listing, this service station operated from as early as 1964 through 1992. Based on a review of the HISTUST listing, this facility is listed with three 10,000-gallon gasoline USTs installed in 1977.

Based on a review of the CERS, CERS TANKS, CORTESE, HIST CORTESE, and LUST listings, Jet Gas Station is listed as a LUST Cleanup Facility with the status of "Completed – Case Closed as of May 6, 2004." Additional information was available on-line at the SWRCB GeoTracker database. Terracon reviewed the Case Closure Summary, dated May 6, 2004. Based on a review of the documents, the three 10,000-gallon gasoline USTs were removed in 1992. The LUST case was open in 1986, when the USTs failed an integrity test. Remedial activities included free product

removal, vapor extraction activities, and dual phase extraction. This facility underwent soil and groundwater assessments. Groundwater is reported ranging from 24 to 59 feet bgs and flowing to the east and southeast. The maximum documented contaminant concentrations remaining in groundwater included TPHg (520 µg/L), benzene (15 µg/L), toluene (5.6 µg/L), ethylbenzene (82 µg/L), xylenes (73 µg/L), MTBE (5 µg/L), and TBA (0.7 µg/L). Terracon compared the concentrations of groundwater remaining in-place to the San Francisco Bay RWQCB Environmental Screening Levels (ESLs) – Tier 1 ESLs, dated 2019 (Rev.2) and the concentrations remaining in-place exceeded the ESLs for TPHg, BTEX, and MTBE. Terracon reviewed the analytical results of the groundwater well (MW-1) located on the eastern portion of 4972 Warner Avenue of the site and a concentration of TPH (0.23 µg/L) was detected. It does not appear that the off-site former service station has impacted the site. Based on the facility's regulatory closed LUST status and groundwater analytical results of the eastern portion of 4972 Warner Avenue, this former service station does not represent a REC to the site.

4995 Warner Avenue

Former service station; Import Auto Repair, Mobil #18-D7e and Nassim Jebaii, located approximately 120 feet to the north and in a hydrogeologic cross- to up-gradient position relative to the site, is listed in the UST, CERS, Cortese, HAZNET, HWTS, LUST, RCRA-SQG, CA FID UST, HIST CORTESE, SWEEPS UST, EDR Hist Auto, and HIST UST regulatory databases. Based on a review of EDR Hist Auto and historical information, this facility operated as a service station from as early as 1964 through 1985. Based on a review of the RCRA-SQG, HAZNET, and HWTS, Import Auto Repair was permitted as a small quantity generator of hazardous waste in 1991. Waste streams generated included waste oil, mixed oil, other organic solids, unspecified oil containing waste, aqueous solution with total organic residues less than 10 percent, and organic liquids with metals between the years 1997 and 2010

Based on a review of the SWEEPS, CA FID UST and HIST UST, this facility is listed with one 280-gallon waste oil UST, one 5,000-gallon motor vehicle fuel UST and one 8,000-gallon motor vehicle fuel UST installed in 1984. Based on a review of the CERS, Cortese, and LUST listings, this facility is listed as a LUST Cleanup Facility with the status of "Completed – Case Closed as of February 22, 2007." Additional information was provided on-line at the SWRCB GeoTracker database. Based on a review of the Case Closure Summary, dated June 29, 2006, three gasoline USTs and one waste oil UST was removed in 1985. In addition, an additional waste oil UST was removed in 1991. Subsequent to the removal of the USTs, soil contamination was observed which opened up the LUST case. Groundwater was reported ranging from 29 to 56 feet bgs and flowing to the west at the upper zone and flowing to the east-southeast at the middle zone. Remedial activities included free product removal and vapor extraction between the years 1989 and 2005. Terracon reviewed the groundwater analytical data of four closest groundwater wells; MW-8, MW-14, MW-19A, and MW19B, formerly located approximately 10 feet to the north of the site. Based on the March 13, 2006 groundwater sampling event, concentrations of TPHg, BTEX and MTBE were not detected above laboratory method detection limits in these groundwater monitoring wells. Based on the facility's regulatory closed LUST status and identified groundwater analytical results, the former Import Auto Repair, Mobil #18-D7e and Nassim Jebaii facility does not represent a REC to the site.

4945 Warner Avenue

Lewis Cleaners, formerly located approximately 120 feet to the north and in a hydrogeologic up-gradient position relative to the site, is listed in the DRYCLEANERS, RCRA-SQG, and EDR Hist Cleaner regulatory databases. Based on a review of the RCRA-SQG listing, this facility was permitted as a small quantity generator of hazardous waste in 1991. Based on a review of the EDR Hist Cleaner and historical city directories, Lewis Cleaners operated from as early as 1982 through 2007. Based on a review of the DRYCLEANERS listing and the on-line SCAQMD FIND database, this facility operated with dry cleaning equipment using perchloroethylene (PCE) as a solvent in the years 1980, 1990, 2003 and 2007. Based on the facility's proximity and hydrogeologic up-gradient position relative to the site, facility's duration of operations (~25 years) and operations identified to utilize PCE as a dry cleaning solvent, the former Lewis Cleaners facility represents a REC to the site.

4935 Warner Avenue

Walgreens #12140, located approximately 120 feet to the north and in a hydrogeologic up-to cross-gradient position relative to the site, is listed in the CERS HAZ WASTE, HAZNET, HWTS, and RCRA-SQG regulatory databases. Based on a review of the listings, this facility is permitted as a small quantity generator of hazardous waste in 2020, with no violations reported. The type of waste generated off-specification, aged or surplus inorganics, pharmaceutical waste, and aqueous solution containing reactive anions between the years 2012 and 2019. This facility operates as a pharmacy and drug store. Based on the facility's apparent operations (pharmacy/drug store), waste streams generated/reported, and regulatory status, the Walgreens #12140 facility does not represent a REC to the site.

16922 Bolsa Chica Street

CVS Pharmacy # 9373, located approximately 195 feet to the northeast and in a hydrogeologic cross-gradient position relative to the site, is listed in the CERS HAZ WASTE, HAZNET, HWTS, and RCRA-LQG regulatory databases. Based on a review of the listings, this facility is permitted as a large quantity generator of hazardous waste in 2020, with no violations reported. This facility operates as a pharmacy and drug store. Waste streams generated included photochemicals/photoprocessing waste, pharmaceutical waste, unspecified solvent mixture, and pesticide waste between the years 2011 and 2019. Based on the facility's apparent operations (pharmacy/drug store), waste streams generated, and regulatory status, the CVS Pharmacy # 9373 facility does not represent a REC to the site.

Southeast of Bolsa Chica & Dunbar

Steverson Bros. Boucher Site, located approximately 200 feet to the southeast and in a topographic down-gradient position relative to the site, is listed in the ENVIROSTOR, VCP, WMUDS/SWAT, and SWF/LF and regulatory databases. Based on a review of the ENVIROSTOR and VCP listings and on-line DTSC ENVIROSTOR database, this facility is listed as a Voluntary Cleanup with the Cleanup Status of "No Further Action as of November 18, 1997." The potential contaminants of concern are listed as drilling mud, hydrocarbon solvents, and unspecified organic liquid mixture. The historical use that caused contamination is listed as an oil field and the potential

media affected was listed as soil. Terracon reviewed the Preliminary Endangerment Assessment for the Boucher Landfill (Cabo Del Mar Condominium Complex), prepared by PRC Environmental Management, Inc., dated January 5, 1995. Based on a review of the history, this property operated as a gravel pit from as early as 1928 through the 1930s, when this property operated as the Boucher Landfill with open ponds that received acidic refinery sludges through the early 1950s. The former disposal operations were on the northeastern portion of the existing condominium complex, approximately 540 feet to the east-southeast of the site. In the 1950s, assessments were completed and chemical wastes were detected in the soil and groundwater in the vicinity of the landfill. The Boucher Landfill operated as a Class III Landfill through the 1970s and by the late 1970s, the existing condominiums were developed. The closest former groundwater monitoring well (MW-5), located approximately 370 feet to the southeast of the site, did not detect purgeable aromatics (EPA Method 8020) in the 1992 groundwater sampling event. Based on the facility's down-gradient position relative to the site, and the facility's "No Further Action" status with the DTSC, the former Steverson Bros. Boucher Site does not represent a REC to the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report did not list facilities in the unmapped section.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Orange County Environmental Health / By online submission https://orangecounty.nextrequest.com/requests/new	On March 27, 2021, Terracon received records for 4952 Warner Avenue, which are further discussed in Section 4.1. Records were not identified for 4972 Warner Avenue.
Department of Toxic Substances Control / By e-mail pubreqact@dtsc.ca.gov	On March 16, 2021, Terracon received a letter response from Choua Her with the Sacramento DTSC and records were not identified for the site addresses.
DTSC Cypress Regional Office / By e-mail CypressFileRoom@dtsc.ca.gov	On March 18, 2021, Terracon received a letter response from Ms. Julie Johnson with the Cypress DTSC, and stated records were not identified for the site addresses.

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

Agency Contacted/ Contact Method	Response
<p>City of Huntington Beach City Clerk / By Online submission https://huntingtonbeachca.mycusthelp.com/webapp/_rs/(S(14tysvhutmug0scxlutrp35b))/supporthome.aspx</p>	<p>On March 30, 2021, Terracon received records for the two site addresses. Pertinent records are discussed below.</p> <p><u>4952 Warner Avenue</u></p> <p>-1/10/1978 – Building Permit Final; three-story office building grading,</p> <p>-9/27/2006 – Building Permit; install unoccupied digital telecommunication facility cell site to existing building.</p> <p>-Terracon reviewed certificates of occupancies and permits (building, electrical, mechanical and plumbing, and concerns were not identified.</p> <p><u>4972 Warner Avenue</u></p> <p>-12/8/1969, Certificate of Occupancy (COO), <u>Abe's Texaco; service station.</u></p> <p>-7/9/1971, COO, <u>Thomson's Texaco; Service Station.</u></p> <p>-11/12/1975, COO, <u>Texaco Service Station.</u></p> <p>-6/28/1978, building permit, demo existing <u>gas station.</u></p> <p>-6/15/1979, COO, newly constructed building.</p> <p>- Based on a review of Certificate of occupancies between 1979 through 2009 included; Nail Salon travel agency; The Meetings Connection; singles organization, Prime Time Video, Marina Brest Center, Fam's Imaging; Diagnostic Radiology & Medical Services; Huntington Harbor Florist. White Cleaners; Dry Cleaners (Agency); customer service, no machines, retail only (1993), Fitness Solutions, personal trainer, Future Image, LLC; physical therapy – injury rehab, Ultra Body Sculpting, The Colour Attic, CPA, The OC Spa and Wellness Center, Electric Jiu Jitsu,</p>
<p>Huntington Beach Fire Department / By online submission https://huntingtonbeachca.mycusthelp.com/webapp/_rs/(S(ui4rd1p0beffwiyshao3p1as))/SupportHome.aspx?sSessionID=10818523142YZX[EXECDVWKZMEWEES[EASEMDKZ</p>	<p>Records were not identified for the site addresses.</p>

Agency Contacted/ Contact Method	Response
Santa Ana Regional Water Quality Control Board / By e-mail FileReview8@waterboards.ca.gov	Records were not identified for 4972 Warner Avenue. Records were identified for 4952 Warner Avenue and were previously discussed in Section 4.1.
South Coast Air Quality Management District / By online submission http://www.aqmd.gov/nav/online-services/public-records	On March 16, 2021, Terracon received an e-mail response from Ms. Lisa Ramos with the SCAQMD stating that notice of violations and asbestos records were not identified for the site addresses.
Orange County Sanitation District / By online submission https://ocsd.mycusthelp.com/WEBAPP	On March 19, 2021, Terracon received an e-mail response from Ms. Tina Knapp with the OCSD, who stated that records were not identified for the site addresses.

Based on a review of records from the City of Huntington Beach, a service station (4972 Warner Avenue) was identified on the northeastern portion of the site from 1969 through 1978. This facility was identified in the regulatory database and was previously discussed in Section 4.1.

4.3 Local Area Knowledge

Based on a review of the California Department of Conservation Division of Oil, Gas, and Geothermal Resource well finder website ([CalGEM](#)), the site is identified as part of the Sunset Beach (ABD) oil field; however, oil/gas production wells were not identified on-site.

Based on a review of the City of Huntington Beach Methane Districts Map, dated September 2014, the site is not identified within a designated methane district.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance				
Field Personnel	Jennifer S. Van			
Reconnaissance Date	March 19, 2021			
Weather Conditions	Sunny, 70 °F			
Site Contact/Title	Mr. Alireza Mirzaei / Acquisition Representative with The Khoshbin Company (4952 Warner Avenue) Mr. Jim Filipan / Owner (4972 Warner Avenue)			
Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft²)
Huntington Harbor Plaza (4952 Warner Avenue)	Multi-tenant Office	1978	3	47,888
4972 Warner Avenue	Retail, salon, restaurant, recreational	1979	2	7,285
Site Utilities				
Drinking Water	City of Huntington Beach			
Wastewater	City of Huntington Beach			
Electric	Southern California Edison			
Natural Gas	Southern California Gas			

5.2 Overview of Current Site Occupants

The 4972 Warner Avenue building was occupied by The OC Spa and Wellness Center, Electric Jiu Jitsu, Little Caesars, The Colour Attic and Kim R. Goyle CPA. The 4952 Warner Avenue building was occupied by multi-tenant offices; insurance, travel agency, accounting, brokerage, attorneys, therapists, marketing, engineering, and finances. Operations on-site consisted of general administration, restaurant, beauty and recreational.

5.3 Overview of Current Site Operations

Operations on-site consisted of general administration, restaurant, beauty and recreational.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

**Site Characteristics**

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	X
	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	X
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels and/or containers ≥ 5 gallons	X
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	X
Electrical Transformers/PCBs	Transformers and/or capacitors	
	Other equipment	

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California

April 2, 2021 ■ Terracon Project No. 60217144

Category	Item or Feature	Observed or Identified
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

Site Operations, Processes, and EquipmentElevators

Two hydraulic elevators were observed at building 4952 Warner Avenue of the site. The base of the elevator pit was not observed. The hydraulic reservoirs were located in the adjoining closets to the elevator. Staining, approximately 4 SF, was observed in the elevator equipment room located in the southern portion of the building. The concrete appeared to be in a good condition and the staining appeared to be in a *de minimis* condition. According to Mr. Alireza Mirzaei, site acquisition representative, the elevator is serviced by Amtech on a monthly basis. Mr. Mirzaei is not aware of a piston/jack assembly replacement or other service activities that resulted in significant hydraulic oil releases. Based on the location of the observed staining within concrete containment, the observed area of staining does not appear to constitute a REC at this time. However, improved maintenance activities should be implemented to minimize the potential for future releases and spills in this area.

Heating and/or cooling systems

The building at 4952 Warner Avenue is equipped with heating, ventilation and air conditioning units (HVAC), water heaters, a boiler and cooling tower. The building at 4972 Warner Avenue is equipped with HVAC and water heaters. Staining, approximately 4 SF was observed in the vicinity of the boiler. The concrete appeared to be in a good condition and the staining appeared to be in a *de minimis* condition. The floor drain in the vicinity of the boiler appeared to be in a good condition as well.

Aboveground Chemical or Waste Storage

Drums, barrels, and/or containers ≥ 5 gallons

Ten five-gallons plastic containers of paint and one 15-gallon container of cooling water treatment were observed at building 4952 Warner Avenue. In addition, three five-gallon plastic containers of paint were observed on the south site of the 4972 Warner Avenue building. Floor drains or sumps floor were not observed in the vicinity of the containers. Staining and/or releases were not observed. Based on site observations the five and 15-gallon containers do not represent a REC to the site.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Interior floor drains

Interior floor drains were observed in the restrooms and boiler room at building 4952 Warner Avenue. According to Mr. Mirzaei, the floor drains discharge to the city sanitary sewer. Potentially hazardous materials and/or petroleum products hazardous were not observed stored in the vicinity of the floor drains at the time of the site reconnaissance. Staining and/or releases to the floor drains were not observed during the site reconnaissance. Based on site observations, the interior floor drains do not represent a REC to the site.

Releases or Potential Releases

Stained pavement or similar surfaces

Stained pavement was observed in the elevator equipment room and boiler area located at the 4952 Warner Avenue building, which was previously discussed above.

Trash, debris and/or other waste materials

A total of three solid waste disposal dumpsters, serviced by Rainbow Disposal, were observed throughout the site. No evidence of staining, noxious odors or hazardous waste disposal was observed within or in the vicinity of the on-site dumpsters. Based on site observations, the three dumpsters do not represent a REC to the site.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Warner Avenue abuts the site to the north followed by <u>Walgreens Pharmacy</u> (4935 Warner Avenue), a two story multi-tenant commercial retail building (4911 Warner Avenue) to the northwest and <u>CVS Pharmacy</u> (16922 Bolsa Chica Street) to the northeast of the site.

Direction	Description
East	Bolsa Chica Street abuts the site to the east followed by Harbor Tire Pros (5002 Warner Avenue) and single-family residences (17042-17112 Bolsa Chica Street).
South	The property to the adjoining south of the site consists of a commercial building occupied by <i>Frontier Communications</i> (17111 Bolsa Chica Street).
West	The property to the adjoining west of the site consists of the Monticello Apartments (17052 and 17062 Green Lane).

Walgreens Pharmacy, CVS Pharmacy and Frontier Communications were listed in the regulatory database are were previously discussed in Section 4.1.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services (e.g. visual observations for suspect asbestos and visual observations for suspect lead-based paint) were conducted.

7.1 Visual Observations for Suspect Asbestos

Terracon visually assessed the interior of the on-site buildings for suspect asbestos-containing materials (ACM). The limited visual observations were performed by Jennifer Van. No samples of suspect ACM were collected or analyzed as part of the observations. The visual observations for suspect ACM were restricted to readily visible and accessible building materials.

The following suspect ACM was observed:

Summary of Suspect ACM

Material	Location	Friable / Non-friable
Dry wall and joint compound	4952 and 4972 Warner Avenue	Non-friable
Window and door caulking	4952 and 4972 Warner Avenue	Non-friable
Carpet adhesive	4952 and 4972 Warner Avenue	Non-friable
12" x12" vinyl floor tile and adhesive	4952 Warner Avenue	Non-friable
2' x4' suspended ceiling tile	4952 and 4972 Warner Avenue	Friable
2' x2' suspended ceiling tile	4952 Warner Avenue	Friable
Cove base adhesive	4952 and 4972 Warner Avenue	Non-friable
Acoustic ceiling texture	4972 Warner Avenue	Friable

According to Mr. Alireza Mirzaei, previous asbestos sampling activities have been conducted at the 4952 Warner Avenue building. Based on a review of the asbestos analytical results, materials including dry wall and joint compound were sampled and analyzed.

A review of previous asbestos sampling activities identified one sample with <1% chrysotile.

Summary of ACM – 4952 Warner Avenue

Material	Location	Friable / Non- friable
Drywall with joint compound	Stairway ceiling between 2 nd and 3 rd floor	Non-friable

Based on the age of the buildings (1978 and 1979), it is likely that the identified materials are ACM. Limited visual observations for asbestos is not intended to serve as a comprehensive building asbestos survey, comprehensive inspection or comprehensive assessment for the presence of ACM in all or most of the building systems, nor will it serve to adequately assess the presence of ACM in a building or portions thereof for pre-demolition or pre-renovation purposes. Terracon recommends conducting a thorough asbestos survey prior to disturbance of suspect ACM during planned renovations or building demolition.

7.2 Visual Observations of Suspect Lead-Based Paint

Terracon visually assessed the interior of the on-site buildings for suspect Lead-Based Paint (LBP). No samples of suspect LBP were collected or analyzed as part of the observations. The visual observations for suspect LBP were restricted to readily visible and accessible building materials.

The following suspect LBP was observed:

Summary of Suspect LBP

Material	Location	Condition
Gray blue paint on drywall	4952 and 4972 Warner Avenue	Good
White paint on drywall	4952 and 4972 Warner Avenue	Good
Yellow paint on drywall	4952 Warner Avenue	Good
Brown paint on drywall	4972 Warner Avenue	Good

Based on the age of the building (1978 and 1979), it is possible that the identified paints are LBP. The visual observations for LBP were limited to readily observable and accessible surfaces. Terracon cannot guarantee a building or property to be LBP free as the possibility exists that LBP coated surfaces may be hidden from sight or in inaccessible locations, or the homogeneous construction areas identified may not be truly homogeneous. It should be understood that these

Phase I Environmental Site Assessment

Proposed Senior Living Development - HB ■ Huntington Beach, California
April 2, 2021 ■ Terracon Project No. 60217144

limited visual observations for LBP should not be considered to be comprehensive in nature, and the results are not intended to be used to determine lead hazards, develop abatement plans, or prepare detailed cost estimates for abatement.

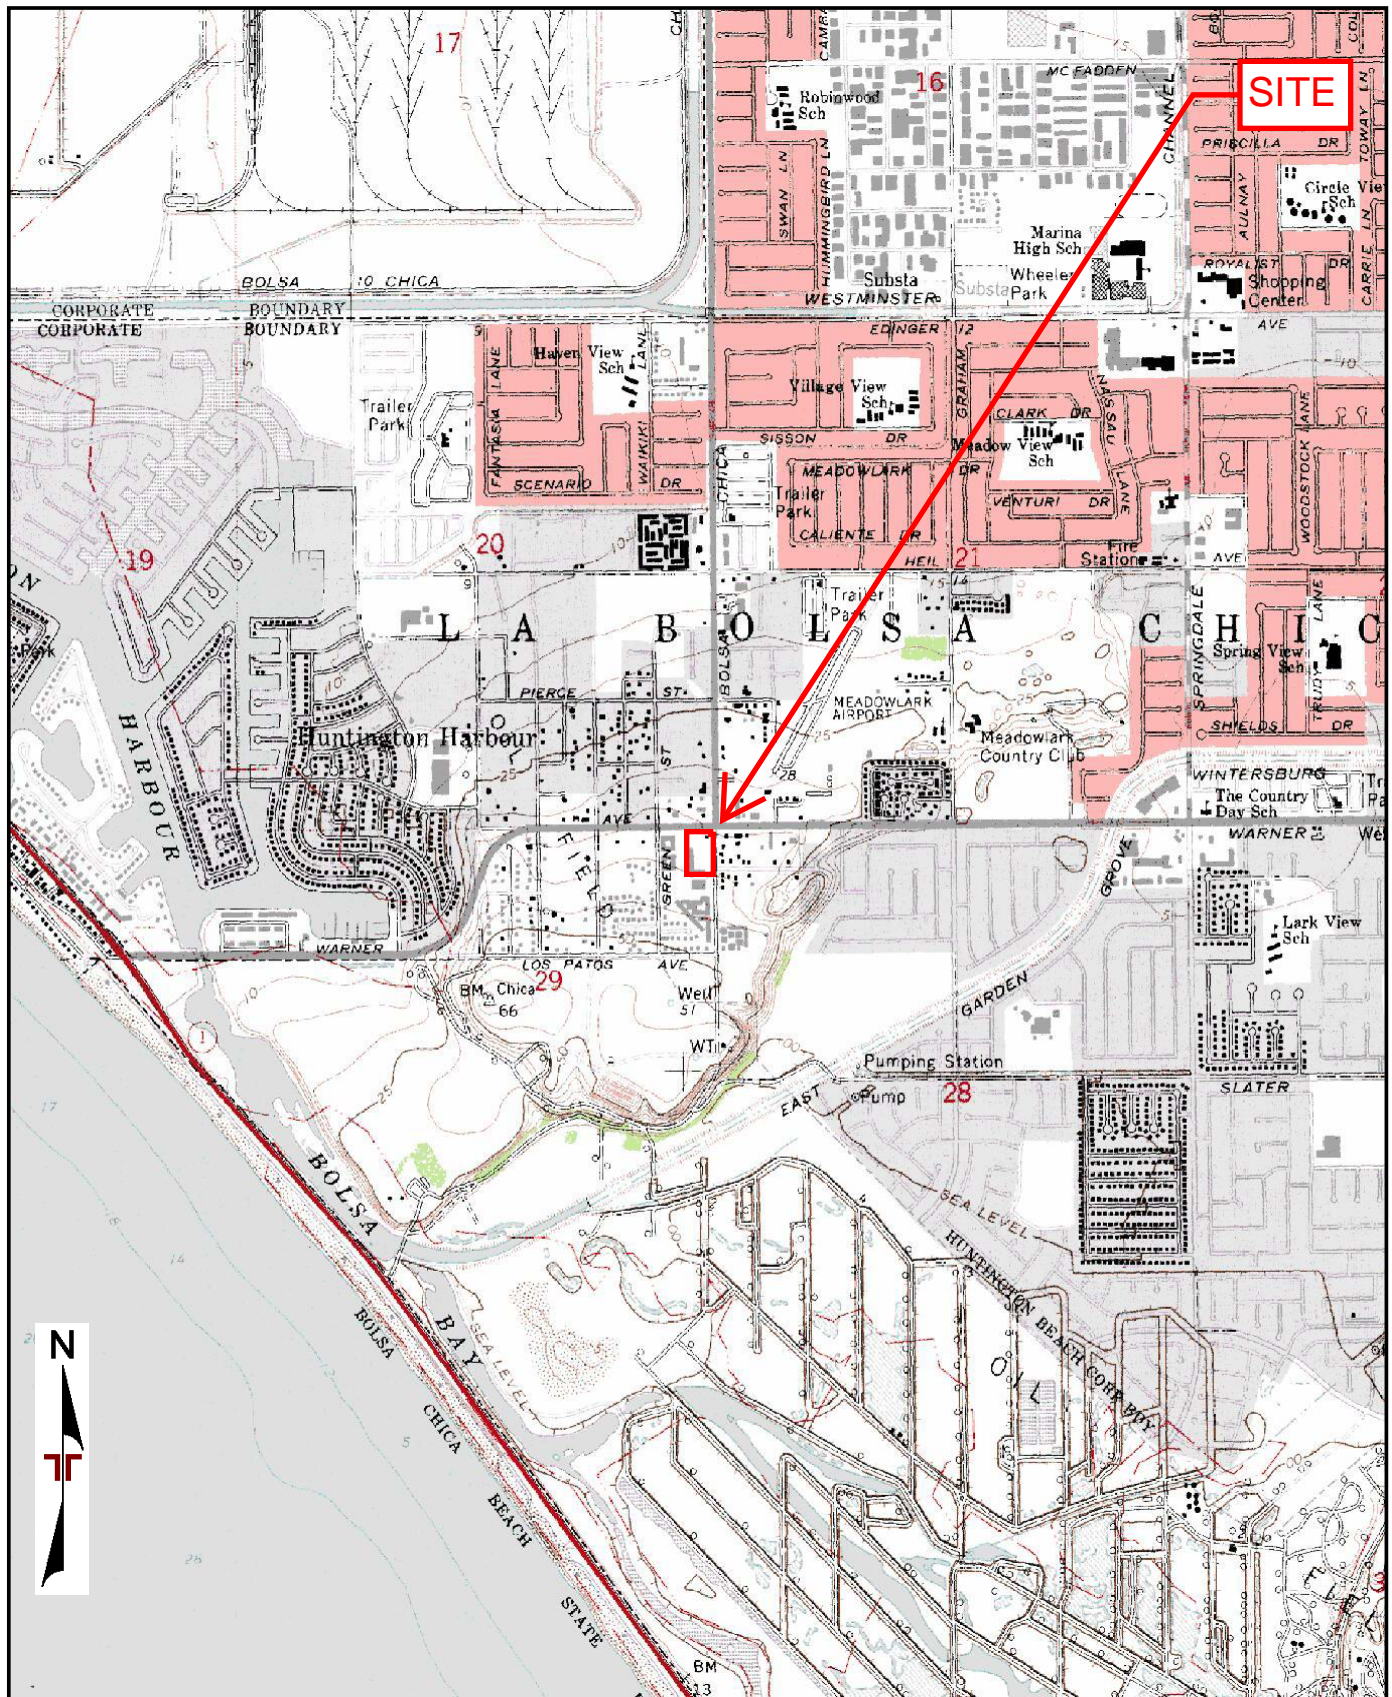

8.0 DECLARATION

I, Jennifer S. Van, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Re: Underground Storage Tank (UST) Case
ChevronTexaco Heritage Site #21-2242
4972 Warner Avenue
Huntington Beach, CA 92649
OCHCA Case #03UT18

Dear Ms. Molla:

This letter confirms the completion of site investigation and corrective action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this Agency was accurate and representative of site conditions, this Agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25296.10 of the Health and Safety Code.

Please contact Arghavan Rashidi-Fard of our office at (714) 667-3713 if you have any questions regarding this matter.

Sincerely,

Steven K. Wong, REHS, MPH, Director
Environmental Health Division

Attachment: Case Closure Summary

Case Closure Summary

Leaking Underground Fuel Tank Program

I. Agency Information

Date: **March 16, 2004**

Agency Name: Orange County Health Care Agency	Address: 2009 East Edinger Avenue
City/State/Zip: Santa Ana, CA 92705	Phone: (714) 667-3713
Responsible staff person: Arghavan Rashidi-Fard	Title: Hazardous Waste Specialist

II. Case Information

Site Facility Name: ChevronTexaco Heritage Site #21-2242				
Site Facility Address: 4972 Warner Avenue, Huntington Beach 92649				
RB LUSTIS Case No.:		Local Case No.: 03UT18		LOP Case No.:
Responsible Party		Address		Phone Number
Natasha Molla Chevron Environmental Management Co		145 S. State College Blvd. Brea, CA 92822-2292		(714) 671-3537
Tank No	Size in Gal.	Contents	Closed in-Place/Removed?	Date
1	Not Known			
2				
3				

III. Release and Site Characterization Information

Cause and type of release: Not known			
Site characterization complete? Yes		Date approved by oversight agency: 9-23-03	
Monitoring wells installed? Yes		Number: 6	Proper screened interval? Yes
Highest GW depth BGS: 40.34'		Lowest depth: 47.67'	Flow direction: South/southeast
Most sensitive current use: Domestic and Municipal Supply			
Are drinking water wells affected? No		Aquifer name:	
Is surface water affected? No		Nearest/affected SW name	
Off-site beneficial use impacts (addresses/locations): None			
Report(s) on file? Yes		Where is report(s) filed? OCHCA	
Treatment and Disposal of Affected Material			
Material	Amount (include Units)	Action (treatment or disposal/destination)	Date
Tank	NA		
Piping			
Soil			
Groundwater			

Case Closure Summary

Case Closure Summary

Leaking Underground Fuel Storage Tank Program

Case#: 03UT018

Date: March 16, 2004

III. Release and Site Characterization Information (Continued)

Maximum Documented Contaminant Concentrations - - Before and After Cleanup										
Contaminant	Soil (ppm)		Water (ppm)			Contaminant	Soil (ppm)		Water (ppm)	
	Before	After	Before	After	Grab Sample		Before	After	Before	After
TPH (gas)	6700	same	2.340	2.300	53	MTBE	NA	ND	ND	ND
TPH (diesel)	1200	same	.860	.510	44	TBA	NA	ND	.018	.027
Benzene	3.7	same	.084	.089	9.2	DIPE	NA	ND	ND	ND
Toluene	66.2	same	.140	.350	8.1	TAME	NA	ND	ND	ND
Ethylbenzene	31.5	same	.078	.082	2.2	ETBE	NA	ND	ND	ND
Xylenes	690	same	.217	.360	4.6					

Comments (Depth of Remediation, etc.): The site was operated as a gas station from 1963 to 1977. Site assessment activities consisting of nine borings and one well were conducted in 1993 and 1994 for a property transaction for a bank. Soil and groundwater contamination was detected during those site assessment activities; however, the results were not reported to this Agency until 2003 when Chevron's legal department reviewed the findings and decided further site assessment was necessary. Additional site assessment including installation of five additional wells was conducted to delineate the extent of the plume in 11-02 and 7-03. The highest soil contamination listed in the table above was detected in borings FNB-B6 and MW-3 drilled in the south end of the former tank excavation between 26 and 36 feet below grade (fbg) in borings that are approximately 20 feet apart. FNB-B6 was drilled in November 1993 while MW-3 was installed in November 2002.

During the initial assessment in November 1993, one grab groundwater sample was collected from the worst case boring FNB-B6. The results of the grab groundwater sample are listed in the table above. The BTEX in groundwater samples collected from the six wells have been below the MCLs or Santa Ana Regional Water Quality Control Board's "low-risk" concentrations, except for toluene at 350 ppb detected in well MW-3 on in December 2003. Well MW-2 located downgradient of the MW-3 and boring FNB-B6 and former tank excavation was dry for three quarters. Results from December 2003 sampling showed 2.6 ppb benzene, 1.6 ppb xylenes, and non-detect for toluene and ethylbenzene.

No further work is recommended for the site with the following considerations:

- The known soil contamination is limited in extent in silty clay/clayey soil to the south of the former tank area and on the edge of a southeastern dispenser at depths between 26 to 36 fbg.
- The known soil contamination has not significantly impacted groundwater as evident by groundwater results.
- The benzene levels seen in well MW-3, the nearest upgradient well to the present building, do not provide a vapor intrusion threat.

IV. Closure

Does completed corrective action protect <i>existing</i> beneficial uses per the Regional Board Basin Plan?			Yes
Does completed corrective action protect <i>potential</i> beneficial uses per the Regional Board Basin Plan?			
Does corrective action protect public health for current land use?			Yes
Site management requirements: OCHCA must be notified if a structure is going to be place over the area where high soil contaminants remain in place.			
Should corrective action be reviewed if land use changes?			Yes, if land use changes to residential.
Monitoring wells decommissioned	No	Number decommissioned:	Number Retained:
List enforcement actions taken			
List enforcement actions rescinded			

Case Closure Summary

Leaking Underground Fuel Storage Tank Program

Case#: 03UT018

Date: March 15, 2004

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Huntington Beach, CA 92649
EDR Inquiry # 6404402.3

Client Name:

Terracon
1421 Edinger Avenue
Tustin, CA 92780
Contact: Meg Haile

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 3907-473A-A5A3

PO # NA

Project 60217144

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 3907-473A-A5A3

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Terracon (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Case Closure Summary

Leaking Underground Fuel Tank Program

I. Agency Information

Date: **March 16, 2004**

Agency Name: Orange County Health Care Agency	Address: 2009 East Edinger Avenue
City/State/Zip: Santa Ana, CA 92705	Phone: (714) 667-3713
Responsible staff person: Arghavan Rashidi-Fard	Title: Hazardous Waste Specialist

II. Case Information

Site Facility Name: ChevronTexaco Heritage Site #21-2242				
Site Facility Address: 4972 Warner Avenue, Huntington Beach 92649				
RB LUSTIS Case No.:		Local Case No.: 03UT18		LOP Case No.:
Responsible Party		Address		Phone Number
Natasha Molla Chevron Environmental Management Co		145 S. State College Blvd. Brea, CA 92822-2292		(714) 671-3537
Tank No	Size in Gal.	Contents	Closed in-Place/Removed?	Date
1	Not Known			
2				
3				

III. Release and Site Characterization Information

Cause and type of release: Not known			
Site characterization complete? Yes		Date approved by oversight agency: 9-23-03	
Monitoring wells installed? Yes		Number: 6	Proper screened interval? Yes
Highest GW depth BGS: 40.34'		Lowest depth: 47.67'	Flow direction: South/southeast
Most sensitive current use: Domestic and Municipal Supply			
Are drinking water wells affected? No		Aquifer name:	
Is surface water affected? No		Nearest/affected SW name	
Off-site beneficial use impacts (addresses/locations): None			
Report(s) on file? Yes		Where is report(s) filed? OCHCA	
Treatment and Disposal of Affected Material			
Material	Amount (include Units)	Action (treatment or disposal/destination)	Date

Case Closure Summary

Leaking Underground Fuel Tank Program

I. Agency Information

Date: **March 16, 2004**

Agency Name: Orange County Health Care Agency	Address: 2009 East Edinger Avenue
City/State/Zip: Santa Ana, CA 92705	Phone: (714) 667-3713
Responsible staff person: Arghavan Rashidi-Fard	Title: Hazardous Waste Specialist

II. Case Information

Site Facility Name: ChevronTexaco Heritage Site #21-2242				
Site Facility Address: 4972 Warner Avenue, Huntington Beach 92649				
RB LUSTIS Case No.:		Local Case No.: 03UT18		LOP Case No.:
Responsible Party		Address		Phone Number
Natasha Molla Chevron Environmental Management Co		145 S. State College Blvd. Brea, CA 92822-2292		(714) 671-3537
Tank No	Size in Gal.	Contents	Closed in-Place/Removed?	Date
1	Not Known			
2				
3				

III. Release and Site Characterization Information

Cause and type of release: Not known			
Site characterization complete? Yes		Date approved by oversight agency: 9-23-03	
Monitoring wells installed? Yes		Number: 6	Proper screened interval? Yes
Highest GW depth BGS: 40.34'		Lowest depth: 47.67'	Flow direction: South/southeast
Most sensitive current use: Domestic and Municipal Supply			
Are drinking water wells affected? No		Aquifer name: 	
Is surface water affected? No		Nearest/affected SW name: 	
Off-site beneficial use impacts (addresses/locations): None			
Report(s) on file? Yes		Where is report(s) filed? OCHCA	
Treatment and Disposal of Affected Material			
Material	Amount (include Units)	Action (treatment or disposal/destination)	Date
Tank	NA		
Piping			
Soil			
Groundwater			

Case Closure Summary

Leaking Underground Fuel Storage Tank Program

Case#: 03UT018

Date: March 16, 2004

III. Release and Site Characterization Information (Continued)

Maximum Documented Contaminant Concentrations - - Before and After Cleanup										
Contaminant	Soil (ppm)		Water (ppm)			Contaminant	Soil (ppm)		Water (ppm)	
	Before	After	Before	After	Grab Sample		Before	After	Before	After
TPH (gas)	6700	same	2.340	2.300	53	MTBE	NA	ND	ND	ND
TPH (diesel)	1200	same	.860	.510	44	TBA	NA	ND	.018	.027
Benzene	3.7	same	.084	.089	9.2	DIPE	NA	ND	ND	ND
Toluene	66.2	same	.140	.350	8.1	TAME	NA	ND	ND	ND
Ethylbenzene	31.5	same	.078	.082	2.2	ETBE	NA	ND	ND	ND
Xylenes	690	same	.217	.360	4.6					

Comments (Depth of Remediation, etc.): The site was operated as a gas station from 1963 to 1977. Site assessment activities consisting of nine borings and one well were conducted in 1993 and 1994 for a property transaction for a bank. Soil and groundwater contamination was detected during those site assessment activities; however, the results were not reported to this Agency until 2003 when Chevron's legal department reviewed the findings and decided further site assessment was necessary. Additional site assessment including installation of five additional wells was conducted to delineate the extent of the plume in 11-02 and 7-03. The highest soil contamination listed in the table above was detected in borings FNB-B6 and MW-3 drilled in the south end of the former tank excavation between 26 and 36 feet below grade (fbg) in borings that are approximately 20 feet apart. FNB-B6 was drilled in November 1993 while MW-3 was installed in November 2002.

During the initial assessment in November 1993, one grab groundwater sample was collected from the worst case boring FNB-B6. The results of the grab groundwater sample are listed in the table above. The BTEX in groundwater samples collected from the six wells have been below the MCLs or Santa Ana Regional Water Quality Control Board's "low-risk" concentrations, except for toluene at 350 ppb detected in well MW-3 on in December 2003. Well MW-2 located downgradient of the MW-3 and boring FNB-B6 and former tank excavation was dry for three quarters. Results from December 2003 sampling showed 2.6 ppb benzene, 1.6 ppb xylenes, and non-detect for toluene and ethylbenzene.

No further work is recommended for the site with the following considerations:

- The known soil contamination is limited in extent in silty clay/clayey soil to the south of the former tank area and on the edge of a southeastern dispenser at depths between 26 to 36 fbg.
- The known soil contamination has not significantly impacted groundwater as evident by groundwater results.
- The benzene levels seen in well MW-3, the nearest upgradient well to the present building, do not provide a vapor intrusion threat.

IV. Closure

Does completed corrective action protect <i>existing</i> beneficial uses per the Regional Board Basin Plan?			Yes
Does completed corrective action protect <i>potential</i> beneficial uses per the Regional Board Basin Plan?			
Does corrective action protect public health for current land use?			Yes
Site management requirements: OCHCA must be notified if a structure is going to be place over the area where high soil contaminants remain in place.			
Should corrective action be reviewed if land use changes?			Yes, if land use changes to residential.
Monitoring wells decommissioned	No	Number decommissioned:	Number Retained:
List enforcement actions taken			
List enforcement actions rescinded

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 10-08-2013

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Kevin who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: 3-tanks of used oil and 1-55 gallon drum of used oil filters. Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words G HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. G toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste [Truncated]

Eval Notes: RTC Qualifier and Occurred on Date added to filters and filled out on this date - Violation List

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-15-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met with Bob Lauter of Harbour Tire. The following were observed: Hazardous waste was stored properly labeled and closed. Documentation was available for review. The facility is in compliance.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 08-23-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Corrected violation in EC. Violation was previously abated by Susan Burg on 10/17/12

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 09-08-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Certified Letter/Final Notice mailed on 9/8/14 ref Hazmat Disclosure thru ESubmit.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met with Mohammed Qaspers of Walgreens. The following were observed:
Hazardous waste was stored properly with containers closed and labeled properly. Hazardous waste manifests were available for review.
Employee training is conducted via online and a refresher of hazardous materials and communication is done annually. The facility is in compliance.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-27-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a Hazardous Waste Inspection. Met with Daren Shell who explained the process, escorted me through the site and gave consent to enter/inspect. Facility contains: Totes of hazardous waste located in the rear of store. Facility contracts with stericycle
Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words G HAZARDOUS WasteG 2. Waste (name) 3. Hazardous property of the waste (e.g. G toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Josh Darrow of Tire Choice. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated is kept labeled and stored closed. -- Waste manifests for all waste streams were available for review. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-01-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with manager Cesar Sanchez of Ralphs. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored and labeled. -- Waste manifests for all waste streams were available for review. -- Training is conducted internally via a Ralphs online computer program. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

quantities.
Returned to compliance on 02/11/2015.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 173898
Site Name: HUNTINGTON HARBOUR CAR WASH
Violation Date: 08-30-2017
Citation: 22 CCR 15 66265.171 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.
Violation Notes: 2- full 55 gallon drums on site . Last manifest was for 8/24/16. The label does not indicate a accumulation start date. To abate this violation have the drums picked up and send the receipt to this agency within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 173898
Site Name: HUNTINGTON HARBOUR CAR WASH
Violation Date: 11-21-2014
Citation: 23 CCR 16 2638(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(f)
Violation Description: Failure to properly affix tag/sticker on monitoring equipment being certified, repaired, or replaced.
Violation Notes: Returned to compliance on 01/07/2015. The Veeder Root TLS 350 monitoring panel did not have a tag or sticker indicating the last certification test. Affix tag/sticker on monitoring equipment being certified, repaired, or replaced. The tester provided a new sticker to the monitoring panel after the test was completed today. This is proof of compliance, therefore this violation was corrected today.

U003659641

Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)

Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the underground storage tank and/or failure to maintain written monitoring and maintenance records on site, or off site if approved by the CUPA, for a period of 3 years, 6 1/2 years for cathodic protection, and 5 years for written performance claims pertaining to release detection systems and calibration and maintenance records for such systems.

Violation Notes: Returned to compliance on 01/07/2015. The original compliance binder is missing and the replacement binder did not have the written monitoring and maintenance records for a period of 3 years, and 5 years for written performance claims pertaining to release detection systems. Maintain written monitoring and maintenance records for a period of 3 years, and 5 years for written performance claims pertaining to release detection systems.

Violation Date: 11-21-2014
Citation: 23 CCR 16 2666(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(c)

Violation Description: Failure of line leak detector to detect a leak and/or failure of audible and visual alarm.

Violation Notes: Returned to compliance on 01/07/2015. The 91 grade line leak detector failed to detect a leak when tested. All line leak detectors shall be capable of detecting a 3-gallon per hour leak at 10 psi. The leak detector was not replaced during the inspection. Immediately have a properly licensed, trained, and certified contractor repair or replace the failed leak detector (LG 113-x listed, if applicable) and obtain a permit within one business day from the CUPA. If the failed leak detector can't be replaced immediately, there is a possibility that the 91 grade UST system may be red tagged to prevent fuel inputs.

Violation Notes: (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test Returned to compliance on 01/07/2015. The Owner/Operator did not test leak detection equipment every 12 months (VPH, sensor, LLD, ATG, etc.). The last monitoring system certification was conducted on 9-18-13 according to the Veeder Root Alarm history. However the stickers on the sensors indicated the last test was conducted on 9-17-13. Photos taken. Test leak detection equipment every 12 months (VPH, sensor, LLD, ATG, etc.) and submit monitoring system certification within 30 days of completion of the test. The annual monitoring system certification testing was completed today by MIT and all components passed testing. This is proof of compliance, therefore this violation is corrected today. Ensure the test results are forwarded to this agency with-in 30 days.

Site ID: 173898
Site Name: HUNTINGTON HARBOUR CAR WASH
Violation Date: 08-12-2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected. end a copy of the manifest to mescobedo@ochca.com or 714-586-6185.

Violation Date: 11-21-2014
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Description: The owner/operator has failed to comply with one or more of the following: to maintain a copy of the designated operator monthly inspections for the last 12 months and/or maintain a list of trained employees on-site or off-site at a readily available location, if approved by the CUPA.
Violation Notes: Returned to compliance on 01/07/2015. The designated operator monthly inspection report(s) from 5/14 to 12/13 were not found on site. Designated operator monthly inspection reports for the previous twelve months shall be retained on site. I spoke with the Designated Operator Paul Vidakovich and he stated that the original compliance binder was lost. A partial compliance binder was available for review. Locate and ensure that copies of the previous twelve months of designated operator monthly inspection reports are maintained on site. Submit copies to the CUPA by 12-21-14 or with-in 30 days from now.

Eval Notes: Onsite to conduct routine UST inspection. The Monitoring System Certification testing was conducted by Jesse Kirk of MIT and his certifications and licenses are current and valid. The Veeder-Root TLS-350 monitoring panel displayed "all functions normal" and audible and visual alarms were demonstrated operational. The panel was noted marked with a sticker from the most recent monitoring certification (8/27/13). The tester provided a copy of the Alarm History and the VR Tape indicated the last monitoring certification was 9/18/13 and the sticker on the sensors indicated the last test was 9/17/13. This yearG s monitoring system certification test was due by 9/18/14 (see violation). The tester provided updated certification sticker to all components tested today, therefore violation _____ is abated today. The following Observations were made: The test boots of the piping was pulled back allowing the interstitial space of the piping to be monitored by the STP sump [Truncated]

Violation Notes: audible and visual alarm.
Returned to compliance on 01/07/2015. The 91 grade line leak detector failed to detect a leak when tested. All line leak detectors shall be capable of detecting a 3-gallon per hour leak at 10 psi. The leak detector was not replaced during the inspection. Immediately have a properly licensed, trained, and certified contractor repair or replace the failed leak detector (LG 113-x listed, if applicable) and obtain a permit within one business day from the CUPA. If the failed leak detector can't be replaced immediately, there is a possibility that the 91 grade UST system may be red tagged to prevent fuel inputs.

Violation Date: 08-12-2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected. end a copy of the manifest to mescobedo@ochca.com or 714-586-6185.

Eval Notes: Onsite to conduct routine UST inspection. The Monitoring System Certification testing was conducted by Jesse Kirk of MIT and his certifications and licenses are current and valid. The Veeder-Root TLS-350 monitoring panel displayed "all functions normal" and audible and visual alarms were demonstrated operational. The panel was noted marked with a sticker from the most recent monitoring certification (8/27/13). The tester provided a copy of the Alarm History and the VR Tape indicated the last monitoring certification was 9/18/13 and the sticker on the sensors indicated the last test was 9/17/13. This yearG s monitoring system certification test was due by 9/18/14 (see violation). The tester provided updated certification sticker to all components tested today, therefore violation _____ is abated today. The following Observations were made: The test boots of the piping was pulled back allowing the interstitial space of the piping to be monitored by the STP sump [Truncated]

City: HUNTINGTON BEACH
Facility ID: Santa Ana River 303370001
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG918001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 9493605788
Facility Contact: DINESH RAO DELTA
Agency Name: ARCO
Agency Address: 4 CENTERPOINTE DRIVE
Agency City,St,Zip: LA PALMA 906231066
Agency Contact: DARREL FAH
Agency Telephone: 7143785105
Agency Type: Private
SIC Code: 4959
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Primary Waste: CNWTRS
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Document Type: Removal Action Workplan
Completed Date: 12/23/2004
Comments: DTSC approved the Final Removal Action Workplan on December 23, 2004. The selected removal action is excavation of about 7,000 cubic yards of PCB contaminated soil in a 2-acre area of the Site and disposal of the soil to landfills. The State Lands Commission is in the process of purchasing the Site from Hearthside Residential Corporation so it can be included in the Bolsa Chica Wetlands Restoration Project. U.S. Fish and Wildlife Service is directing the Restoration Project and plans to have its contractors perform the cleanup early in 2005. DTSC determined that the selected removal action will have no impact on the environment due to the small volume, the limited area, and the short duration of the project. This finding was documented in a Notice of Exemption which was approved on December 23, 2004.

Completed Area Name: PROJECT WIDE
Completed Document Type: Removal Action Completion Report
Completed Date: 12/02/2005
Comments: DTSC approved the Removal Action Completion Report, which documents the excavation and offsite disposal of 8,645 cubic yards of PCB-contaminated soil.

Completed Area Name: PROJECT WIDE
Completed Document Type: Remedial Investigation Report
Completed Date: 07/23/2004
Comments: DTSC approved the Remedial Investigation Report

Completed Area Name: PROJECT WIDE
Completed Document Type: Fact Sheets
Completed Date: 10/18/2004

Completed Area Name: PROJECT WIDE
Completed Document Type: Removal Action Completion Report
Completed Date: 06/30/2006
Comments: Residential area removal action completion report finalized. Based on PCB concentrations found in the residential area adjacent to the site, an emergency removal action was conducted in which soil in excess of risk-based PCB concentrations was excavated and disposed of

Background Info: The 42-acre Site is adjacent to the 1200-acre Bolsa Chica Ecological Preserve which is being investigated and restored by the Bolsa Chica Wetlands Steering Committee consisting of eight state and federal regulatory agencies headed by the United States Fish and Wildlife Service (USFWS) and the California State Lands Commission (SLC). The Site is owned by Hearthside Residential Corporation since 1997. Negotiations are underway to transfer ownership of the Site to SLC for incorporation into the Bolsa Chica Ecological Preserve.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PROPOSED SENIOR LIVING DEVELOPMENT - HB
4952 AND 4972 WARNER AVENUE
HUNTINGTON BEACH, CA 92649

TARGET PROPERTY COORDINATES

Latitude (North):	33.714457 - 33° 42' 52.05"
Longitude (West):	118.042063 - 118° 2' 31.43"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	403442.7
UTM Y (Meters):	3730790.2
Elevation:	40 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5633763 SEAL BEACH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

6G	0 - 1/8 Mile ENE	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	7 inches	11 inches	sandy clay	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
3	11 inches	20 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	20 inches	64 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
5	64 inches	79 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1

Soil Map ID: 2

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	7 inches	11 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
3	11 inches	20 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	20 inches	64 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

APPENDIX E CREDENTIALS

Resumes

Jennifer S. Van

Project Manager

PROFESSIONAL EXPERIENCE

Ms. Van is an Environmental Group Manager in Terracon's Orange County, California Office. She has over seven years of experience in Environmental Services; Phase I Environmental Site Assessments (ESAs), Limited Subsurface Investigations (LSIs), Spill Prevention, Control and Countermeasure Plans, Radon Measurement Provider. In addition, Ms. Van has some experience with regulatory compliance. Ms. Van assists with client and team management.

PROJECT EXPERIENCE

Environmental Site Assessment (ESAs):

Performed and managed hundreds of ESAs in California and several in Hawaii and Alaska for industrial, commercial, residential, and agricultural properties. Managed long-term national accounts for financial institutions (equity and loan portfolios), real estate investment trusts, developers and other real property owners. Understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water and groundwater. Is experienced in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13), and meets the requirements of an Environmental Professional as defined in Section 312.10 of 40 CFR 312.

Radon Assessments

Performed and managed over 10 radon assessments including commercial and residential in California.

Limited Subsurface Investigations (LSIs):

Performed and managed over 10 LSI's in California. Investigated environmental conditions in soils and groundwater as a result of releases from a variety of sources, including service stations, dry cleaners, and a wide range of industrial and manufacturing operations. Specialized in collection and interpretation of data.

Spill Prevention, Control And Countermeasure Plans (SPCCs)

Ms. Van has experience with federal and state requirements for Spill Prevention, Control and Countermeasure Plans for Tier I and II qualified facilities.

EDUCATION

Bachelor of Science,
Environmental Sciences: Natural
Sciences.
Minor: Business Administration
University of California Riverside,
California, 2011.

Masters: Environmental Engineering

August 2011 to 2014

Resumes

Regulatory Compliance, Buena Park and Tipton, California

Project Manager for two regulatory compliance projects in Buena Park and Tipton, California, which included refrigeration and multiple dairy facilities.

Military Base Phase I ESAs and Soil Management Plans – San Diego County, California

Project Manager of ESAs and SMPs of over 100 sites for proposed telecommunication small cell locations within naval bases located within the San Diego County. Findings of the ESAs were utilized in creation of the SMPs, which was implemented at the installation of telecommunications utilities on the various bases.

Automotive Body Shop Portfolio, California

Portfolio assistant manager of environmental consulting services including Phase I ESA. The purpose of the services were to assist a client with a large acquisition of properties.

Resumes

Islam (Sami) R. Noaman, EIT

Senior Associate / Senior Project Manager

PROFESSIONAL EXPERIENCE

Mr. Noaman is an Environmental Department Manager with track record in client management, management of phases of environmental site assessments (ESAs), industrial hygiene services, business environmental risk reviews, site characterizations, regulatory compliance services, and remedial investigation. He possesses excellent analytical, problem solving, advisory, and team management skills.

PROJECT EXPERIENCE

Stormwater Prevention and Pollution Control Plan (SWPPP):

Managed SWPPP for numerous industrial sites in Southern California. Scope of the work typically included client and agency coordination, implementation of guidelines required by the state of California Water Resources Board (SWRB), and preparation of documentations for submittals to the SWRB. In addition, I have managed several limited regulatory compliance projects (annual submittals and Level 1 ERA reporting) for industrial stormwater, to achieve compliance in accordance with the NPDES general permit requirements.

Limited Subsurface Investigations (LSIs):

Performed and managed hundreds of LSIs in California, New Jersey, and New York. Investigated environmental conditions in soils and groundwater as a result of releases from a variety of sources, including service stations, dry cleaners, and a wide range of industrial and manufacturing operations. Specialized in collection and interpretation of data to pursue closure through state and federal programs including Los Angeles County Site Mitigation Unit, the California Regional Water Quality Control Board, and the Department Of Toxic Substances Control Voluntary Cleanup Programs (VCP).

Hazardous Materials Surveys:

Mr. Noaman is the Industrial Hygiene Manager in the Orange County, California office. He managed numerous hazardous materials surveys in the state of California including, but not limited to, asbestos, lead in paint, mold, pcbs, and mercury-containing equipment.

Islam (Sami) R. Noaman, EIT (continued)

Major Department Store Commercial Retail Portfolio:

Environmental team lead for evaluating environmental site conditions and due diligence review, including overseeing Phase I Environmental Site Assessments and Phase II Environmental Site Investigations for over thirty retail facilities with automotive maintenance across California. Findings from subsurface investigations were used to support regulatory closure of select facilities to facilitate a real estate transaction across the United States.

Industrial Facility – Land-use Change/Private School, Los Angeles, CA:

Environmental consulting services including Phase I Environmental Site Assessments (ESA) due diligence support, subsurface investigation activities to evaluate environmental media including soil, soil gas and indoor / outdoor air. Services included a land-use change from an industrial facility to a private school. Prepared environmental investigation reports, regulatory interaction, corrective action design for indoor air mitigation, and work plan for management of environmental media.

Retail Shopping Center – Former Dry Cleaners Facility – DTSC, Fremont, CA:

Conducted extensive site investigation activities to evaluate the magnitude and extent of chlorinated solvents identified in the vicinity of a former dry cleaners facility, including an evaluation of groundwater, soil, soil-gas and indoor vapors as a result of a chlorinated solvent plume. Project responsibilities consisted of direct support and interaction with client, client legal team and DTSC representatives to manage the closure process, including the preparation of work plans and environmental investigation reports, risk-based human health evaluation, and response actions.

Underground Storage Tank Assessment and Monitoring – West Los Angeles, CA:

Assisted property owner with the regulatory closure of former underground storage tank (UST) site located in West Los Angeles, California. The project scope included historical research of past site use and site characterization, including soil, groundwater and soil gas assessments, followed by groundwater monitoring until closure was achieved.

Automated Fuel Dispensing Facilities – Camp Pendleton, California:

Project scope included environmental and geotechnical investigations at six fueling existing/proposed facilities within Camp Pendleton, California. The project consisted of construction of new buildings, canopies, pavements, retaining walls, slopes, and installation of underground storage tanks (USTs), and other site facilities. Served as the environmental group leader.

Emerson College, Hollywood, California:

Conducted comprehensive investigation and assisted the client through enrolling and interacting with the LAFD regarding USTs found during construction activities. Provided construction management oversight to manage impacted soils and assisted the client in waste disposition, permitting and regulatory compliance interaction. A total of 45,000 cubic yards of soil was removed from the site and disposed at an off-site facility, prior to the construction of a mid-rise school complex. Support services allowed for significant savings in construction, on an expedited timeline in concert with the construction schedule.

Los Angeles Unified School District (LAUSD Sites):

Managed soil characterization for export/import soils for over nine Los Angeles Unified School District (LAUSD) sites. Prepared Sample Strategy Plans (SSP) for stockpiled and in-place soils, oversaw the sampling, and prepared soil certification reports under the supervision of a professional geologist for submittal to the LAUSD Office of Environmental Health.

Resumes

Islam (Sami) R. Noaman, EIT (continued)

Newton Plastics, Newton, NJ:

Managed the removal of two 12,000-gallon (solvents & gasoline containing) USTs from a plastic products manufacturing facility as a part of transaction deal. Project tasks included, work plan preparation, regulatory officials interface, client contact/coordination, oversight of removal activities, and report preparation. No further action letter from NJDEP was obtained for the client. The property value was retained for the client with our consulting services.

Eagle Electric, Queens, NY:

Responsibilities were to manage the cleanup of former Coal storage rooms in basement of a landmark building in Queens, NY. The cleanup activities included, hauling of approximately 425 tons of Class N-1 Hazardous materials, managed and ensured safety of eight to twelve crew, handling of waste manifests, and coordination for transportation / disposal and client interface.

AROL Chemicals, Newark, NJ:

Managed Phase I and Phase II ESA of chemical manufacturing facility. Scope of Phase II ESA included, the removal of three 12,000-gallon USTs, excavation and disposal of impacted soils.

KeySpan Energy, NY:

Responsibilities include inspection and maintenance of client boilers and tanks systems. Objectives were to prevent scaling/rusting in the boiler systems resulting from the plant operations to maintain operations efficiency. Goals were achieved for the client by developing environmentally friendly chemical reagents (pH controlled) to mitigate the concerns at the plant, boilers maintenance issues were resolved and steady business was created for the company.

The HACH Company, OH:

Implementing unique techniques producing Ferrozine - Iron- reagent for determining trace levels of iron in chemical reagents and glycols. Ferrozine can also be used to analyze samples containing magnetite (black iron oxide) or ferrites.

KIWA of The Netherlands:

Research and development of new synthetic methods of alkali Ferrates including, Potassium, Sodium, and Barium ferrates, an environmentally friendly oxidative reagents used in wastewater treatment for municipal and industrial facilities.

BRIAN CAREY, PG.

SENIOR GEOLOGIST, ENVIRONMENTAL DEPARTMENT

PROFESSIONAL EXPERIENCE

Brian P. Carey has managed various soil/groundwater investigation projects and portfolios, ranging from small gas stations to regional, active bulk-fuel terminals. This work involved detailed management of hazardous waste generation, disposal, and various waste streams to keep clients in regulatory compliance. He has extensive training in health and safety compliance regarding hazardous materials handling, generation, disposal, and permitting compliance.

PROJECT EXPERIENCE

Oil & Gas

Environmental Due Diligence – Major Oil merger, Western United States. Program Manager for Real Property Portfolio disposal resulting from the merger of real property assets in California, Washington, Oregon, Arizona, Utah and Nevada. Managed multiple concurrent Phase I and Phase II *Environmental Site Assessments* (ESAs) with staff in multiple locations to meet stringent deadlines with the 3rd party real property managers to support purchase and sale agreements.

Performance-Based Remediation and Site Closure - Western United States. Senior Geologist for Performance-Based Site Closure Portfolio in Northern California. Managed multiple concurrent remedial systems operations & maintenance (O&M), low-threat/risk closure petitions, groundwater monitoring program, monitored natural attenuation (MNA) projects for light non-aqueous phase liquids (LNAPL), and soil and groundwater impacted by petroleum hydrocarbons and methyl-tert butyl ether (MTBE) and related oxygenates.

Site Investigation – Bulk Plant/Tank Farm, Richmond, California. Project Manager for site investigation of MTBE impacts under consent decree by the California Regional Water Quality Control Board, Central Valley Region.

Remediation System Design, Installation, and Operations & Maintenance – Multiple locations, northern and central California. Portfolio Manager for remedial systems including soil vapor extraction (SVE), dual-phase and multi-phase (DP/MPE) extraction, groundwater pumping wells, and LNAPL collection. Treatment systems included granular activated carbon (GAC), air stripping, and vapor phase controls. Performed pump tests, vapor source/influence tests and other feasibility studies.

Retail Petroleum Site Investigation and Remediation – Northern California. Portfolio Manager, multiple locations. Managed the soil investigation and remediation system O&M at multiple retail petroleum station and bulk fuel terminals impacted by petroleum hydrocarbons and MTBE and related oxygenates.

Education

Bachelors - Geology, California State University Sacramento, 1997

Registrations

California Professional Geologist # 7820, Expires January 2020

Certifications

HAZWOPER (40-hour, Supervisor, 8-hour), Expires December 2018

Work History

Terracon Consultants, Inc. Senior Geologist, December 2018-Present

Carey Environmental Owner/Principal, April 2013-November 2018

Sivunig, Inc Senior Geologist, July 2011 – November 2012

Malama Environmental Senior Geologist, September 2009 – June 2011

Conestoga Rovers and Associates Senior Geologist, April 2007 – August 2009

SECOR International, Inc. Associate Geologist, August 2000-April 2007

Anderson Consulting Group Staff Geologist, July 1997 – August 2000

Stormwater

Compliance Support – Hawaiian Cement, Wailuku, Maui, Hawaii. Program Manager, monitoring stream locations to ensure compliance with environmental conditions in permit for widening of a bridge roadway over Iao Stream. Project manager for NPDES compliance, runoff and ocean discharge from former agricultural fields on the Island of Kauai.

Technical Support – Field investigations and author of SPCCPs and SWPCPs for the State of Hawaii Department of Transportation.

Federal Services

United States Army, Kwajalein Atoll - Project Manager for Kwajalein Tank Farm, an active bulk fuel terminal, and Roi Drinking Water Well 8151, a contaminated freshwater drinking water supply well on Roi-Namur Island, Kwajalein Atoll, Republic of Marshall Islands. Successful implementation of a 50-well monitoring and remediation well network and remediation pilot test on a remote international island nation. Technical support on atoll-wide site investigations for oil and gas and PCBs in buildings and storm drains.

Landfill

Central Maui Landfill, Maui, Hawaii - Managed the safe monthly monitoring and annual sampling of 47 landfill gas wells to meet EPA compliance, and weekly monitoring and maintenance of a landfill gas flare unit. Technical support to identify asbestos-containing materials during the installation of boreholes in landfill waste.

APPENDIX F
DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave'). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
