Form F

Summary Form for Electronic Document Submittal

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Locatio	on: Elk Grove, Sacramento	
,	City	County

Project Description (Proposed actions, location, and/or consequences).

The Project consists of constructing a multi-functional corridor between East Stockton Boulevard and Camden Park in the City of Elk Grove. The maintenance access road alignment begins at East Stockton Boulevard, approximately 750 feet south of the intersection of East Stockton Boulevard and Cantwell Drive. The Project will include the construction of a 1-mile long multi-functional corridor along the banks adjacent to segments of Laguna Creek and Whitehouse Creek. The Project would be constructed in two phases. Phase I would include construction of a 12- to 16 -foot-wide paved surface (no pavement striping) with 2-3 feet of unpaved shoulders. Pre -fabricated steel or concrete bridges would provide necessary access across Laguna and Whitehouse Creeks.

Phase II of the Project would consist of converting the paved maintenance access road into a Class 1 multi-functional trail corridor connection between East Stockton Boulevard and Camden Park, with pavement striping and trail amenities, such as benches and trash containers. Phase II of the Project would complete a gap within the trail system in accordance with the City's Bicycle, Pedestrian, and Trails Master Plan.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential impacts as a result of the proposed Project include impacts to air quality, biological resources, cultural resources, geology and soils, hazards and hazardous materials, hydrology/floodplain and water quality, and tribal cultural resources. Avoidance, minimization, and mitigation measures would be implemented to reduce any potential impacts to less than significant. No unavoidable and significant impacts would occur as a result of the proposed Project.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

City of Elk Grove.
