INITIAL STUDY/MITIGATED NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: Diede Pending LLC/O'Reilly Auto Enterprises, LLC.

PROJECT TITLE/FILE NUMBER(S): PA-2200185 (SA)

PROJECT DESCRIPTION: A Site Approval application for a 7,225 square foot auto parts retail store. The project site proposes an access driveway from East Blossom Court, and another driveway from East State Route 88. The project will be served by the Lockeford Community Services District for Water and Wastewater, and County Service Area (CSA) 52 for storm drainage. The project site is not under a Williamson Act contract. (Use Type: Retail and Service-Intermediate)

PROJECT LOCATION: On the northwest corner of East Blossom Court and North State Route 88 Highway, Lockeford.

ASSESSOR PARCEL NO.: 051-310-48

ACRES: 1.98-acres

GENERAL PLAN: C/G (General Commercial)

ZONING: C-G (General Commercial)

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S): 7,225 square foot auto part retail store.

SURROUNDING LAND USES:

NORTH: Agricultural with scattered residences

SOUTH: Commercial

EAST: Commercial/Residential WEST: Commercial/Industrial

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff (Air Impact Assessment from San Joaquin Valley Air Pollution Control District dated November 17, 2022) Copies of these reports can be found by contacting the Community Development Department.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.

<u>No</u>

GENERAL CONSIDERATIONS:

1.	Does it appear that any environmental feature of the project will generate significant public concern or controversy? \square Yes \boxtimes No
	Nature of concern(s): Enter concern(s).
2.	Will the project require approval or permits by agencies other than the County? ☐ Yes ☐ No
	Agency name(s): Enter agency name(s).
3.	Is the project within the Sphere of Influence, or within two miles, of any city? Yes No
	City: None

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

			ould be potentially affected by this pr by the checklist on the following page		t, involving at least one impact that is

EVALUATION OF ENVIRONMENTAL IMPACTS:

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>I. A</u>	ESTHETICS.					
	ept as provided in Public Resources Code Section 21099, and the project:					
a)	Have a substantial adverse effect on a scenic vista?				\boxtimes	
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				\boxtimes	
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?				\boxtimes	
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				\boxtimes	

a-d) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project site is not located along a scenic vista route, and the surrounding area is a mixture of commercial, industrial, agricultural and residential uses. Development Title Section 9-1022.4(d)(1) states if a commercial project abuts a residential zone, an area shown on the General Plan for residential use, or a conforming residential use, a solid masonry wall six (6) to seven (7) feet in height shall be erected along the abutting property line. This requirement will be included in the Conditions of Approval for the project. The proposed project will have no impact on aesthetics.

		Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No	Analyzed In The Prior EIR
In or sign of the	determining whether impacts to agricultural resources are nificant environmental effects, lead agencies may refer to a California Agricultural Land Evaluation and Site sessment Model (1997) prepared by the California Dept. of inservation as an optional model to use in assessing pacts on agriculture and farmland. In determining whether pacts to forest resources, including timberland, are inficant environmental effects, lead agencies may refer to improve the california Department of Forestry define Protection regarding the state's inventory of forest difficulting the Forest and Range Assessment Project and assurement methodology provided in Forest Protocols opted by the California Air Resources Board Would the effect:	Шрасс	Incorporated	Шрасс	ппрасс	FIIOI EIK
	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?			\boxtimes		
b)	Conflict with existing zoning for agricultural use, or a Williamson Act contract?			\boxtimes		
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				\boxtimes	
d)	Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes	
e)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?			\boxtimes		

Less Than

Impact Discussion:

This project is a Site Approval application for a 7,225 square foot auto parts retail store. `The project will be served a-e) by the Lockeford Community Services District for water and wastewater, and County Service Area 52 for storm drainage. Although an agriculturally zoned property is directly adjacent to the north of the project site, that property is currently not in crop projection. Additionally, the nearest property under a Williamson Act contract is approximately 1,500 feet north of the project site. As a result, the proposed project will have a less than significant impact to surrounding agricultural operations and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to non-agricultural uses.

November 2022 PA-2200185 (SA) 6

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wr apı dis	AIR QUALITY. here available, the significance criteria established by the plicable air quality management or air pollution control trict may be relied upon to make the following the reminations. Would the project:					
a)	Conflict with or obstruct implementation of the applicable air quality plan?			\boxtimes		
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			\boxtimes		
c)	Expose sensitive receptors to substantial pollutant concentrations?			\boxtimes		
d)	Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?			\boxtimes		

- (a-d) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) has been established by the State in an effort to control and minimize air pollution. On November 17, 2022, the SJVAPCD issued the final Air Impact Assessment (AIA) approval for the project. The SJVAPCD determined that the construction and operation for the project will be less than two-tons of NOx per year, and two tons PM10 per year. The SJVAPCD provided the following mitigation measures:
 - For each project phase, within 30-days of issuance of the first certificate of occupancy, if applicable, submit to the District a summary report of the construction start, and end dates, and the date of issuance of the first certificate of occupancy. Otherwise, submit to the District a summary report of the construction start and end dates within 30 days of the end of each phase of construction.
 - For each project phase, all records shall be maintained on site during construction and for a period of ten years
 following either the end of construction or the issuance of the first certificate of occupancy, whichever is later.
 Records shall be made available for District inspection upon request.
 - For each project phase, maintain records of (1) the construction start and end dates and (2) the date of issuance of the first certificate of occupancy, if applicable.

In addition to these measures, the project will be required to file a Dust Control Plan prior to commencing any earth moving activities, and obtain an Authority to Construct prior to the installation of equipment that controls or may emit air contaminants, including but not limited to emergency internal combustion engines, boilers, and bag houses. As a result, air impacts are anticipated to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No	Analyzed In The Prior EIR
	BIOLOGICAL RESOURCES: buld the project:		moorporatou			
	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			\boxtimes		
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?			\boxtimes		
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			\boxtimes		
d)	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			\boxtimes		
e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			\boxtimes		
f)	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?			\boxtimes		

This project is a Site Approval application for a 7,225 square foot auto parts retail store. The Natural Diversity Database lists the Sanford's arrowhead (Sagittaria sanfordii), the tricolored blackbird (Agelaius tricolor), the valley elderberry longhorn beetle (Democerus californicus dimorphus), and the California tiger salamander (Ambystoma califoniese) as rare, endangered, or threatened species as potentially occurring in or near the site. The project would be subject to the San Joaquin Council of Governments (SJCOG) for review and be required to participate in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). The applicant has confirmed participation in the plan, which will address any potential impacts to rare, endangered or threatened species, or habitat located on or near the site. Pursuant to the Final EIR/EIS for the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), dated November 15, 2000, and certified by the San Joaquin Council of Governments on December 7, 2000.

<u>V. (</u>	CULTURAL RESOURCES.	·	·	·	·	
	ould the project:					
a)	Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5?				\boxtimes	
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?				\boxtimes	
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?				\boxtimes	

a–c) This project is a Site Approval application for a 7,225 square foot auto parts retail store. Should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VI.	ENERGY.	·	,	·	·	
	ould the project:					
a)	Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?			\boxtimes		
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			\boxtimes		

a,b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to ensure that any impacts to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be reduced to less than significant and help to prevent any conflict with state or local plans for energy efficiency and renewable energy.

	05	COLOGY AND COLIG	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
		OLOGY AND SOILS. the project:					
a)	Dir	ectly or indirectly cause potential substantial adverse ects, including the risk of loss, injury, or death involving:			\boxtimes		
	i)	Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			\boxtimes		
	ii)	Strong seismic ground shaking?			\boxtimes		
	iii)	Seismic-related ground failure, including liquefaction?			\boxtimes		
	iv)	Landslides?			\boxtimes		
b)	Re	sult in substantial soil erosion or the loss of topsoil?			\boxtimes		
c)	wo pot	located on a geologic unit or soil that is unstable, or that uld become unstable as a result of the project, and tentially result in on- or off-site landslide, lateral reading, subsidence, liquefaction or collapse?			\boxtimes		
d)		located on expansive soil and create direct or indirect as to life or property?			\boxtimes		
e)	sep wh	ve soils incapable of adequately supporting the use of otic tanks or alternative waste water disposal systems ere sewers are not available for the disposal of waste ter?			\boxtimes		
f)		ectly or indirectly destroy a unique paleontological cource or site or unique geologic feature?				\boxtimes	

(a-f) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project site is in an area of expansive soil, with a soil expansive potential of moderate. At the time of future development, the Building Division will require a soils report to be submitted with a Building Permit application. Therefore, the effects of expansive soil to the underlying project are expected to be less than significant.

The proposed project will not cause the risk of injury or death as a result of a rupture of a known earthquake fault, seismic activity, or landslides because there are no faults located near the project site, and the site is relatively flat. The proposed project will not result in substantial soil erosion or the loss of topsoil. The proposed project will not destroy a unique paleontological resource or site or unique geological feature. The proposed project is not located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VIII. GREENHOUSE GAS EMISSIONS.	,				
Would the project: a) Generate greenhouse gas emissions, either directly or					
indirectly, that may have a significant impact on the environment?			\boxtimes		
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			\boxtimes		

a-b) This project is a Site Approval application for a 7,225 square foot auto parts retail store. Emissions of GHG's contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO_2) and, to a lesser extent, other GHG pollutants, such as methane (CH_4) and nitrous oxide (N_2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO_2 equivalents ($MTCO_2e/yr$).

The SJVAPCD has adopted the *Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA* and the *District Policy – Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency.*1 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energy-efficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

San Joaquin Valley Air Pollution Control District. *District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency*. December 17, 2009.

ΙΧ	HAZARDS AND HAZARDOUS MATERIALS.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	ould the project: Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			\boxtimes		
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			\boxtimes		
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			\boxtimes		
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			\boxtimes		
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?			\boxtimes		
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			\boxtimes		
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?			\boxtimes		

a-g) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project site is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would not create a significant hazard to the public or the environment. The proposed project would not result in, create or induce hazards and associated risks to the public. Construction activities related to development projects would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. No significant impacts are anticipated related to the transport, use, or storage of hazardous materials during construction activities are anticipated.

		ROLOGY AND WATER QUALITY.		moo. por atou			
	Vio req	the project: late any water quality standards or waste discharge uirements or otherwise substantially degrade surface or und water quality?				\boxtimes	
b)	sub pro	ostantially decrease groundwater supplies or interfere ostantially with groundwater recharge such that the ject may impede sustainable groundwater nagement of the basin?				\boxtimes	
c)	or a	ostantially alter the existing drainage pattern of the site area, including through the alteration of the course of a eam or river or through the addition of impervious faces, in a manner which would:				\boxtimes	
	i)	result in substantial erosion or siltation on- or off-site;				\boxtimes	
	ii)	substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;				\boxtimes	
	iii)	create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or				\boxtimes	
	iv)	impede or redirect flood flows?				\boxtimes	
d)		flood hazard, tsunami, or seiche zones, risk release of lutants due to project inundation?			\boxtimes		
e)		nflict with or obstruct implementation of a water quality ntrol plan or sustainable groundwater management n?			\boxtimes		

a-e) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project site is located in the Flood Zone X flood designations. A referral was sent to the Department of Public Works Flood Control Division for comments. All new construction, at the time of development, and the substantial improvement of any structure in the area of special flood hazard shall be elevated or flood-proofed in accordance to San Joaquin County Development Title Section 9-1605.12(a),(b), and (c).

The project area is located approximately 1-mile east of the Mokelumne River. The proposed project will not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality, conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	LAND USE AND PLANNING. build the project:	·	·	·	·	
	Physically divide an established community?		\boxtimes			
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?		\boxtimes			

a,b) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The proposed project will have a less than significant impact to surrounding parcels and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to nonagricultural uses. Therefore, this project is not a growth-inducing action. The General Plan and Zoning designations of the project site will not change as a result of the project, and the Retail Sales and Service-Intermediate use type is conditionally permitted in the C-G (General Commercial) zone subject to an approved Site Approval application. The proposed project will not set a significant land use precedent and is consistent with all applicable plans adopted by the County.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XII.	MINERAL RESOURCES.	·	•	·	·	
Wo	ould the project:					
a)	Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state?			\boxtimes		
b)	Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			\boxtimes		

a, b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. Although the project site is in an area designated MRZ-1, there is currently no mining activity in the area. The surrounding area is developed with commercial, industrial, residential, and agricultural uses. Therefore, the proposed project application will have less than a significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

Wc	I. NOISE. ould the project result in: Generation of a substantial temporary or permanent	·	•	·	·	
u)	increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				\boxtimes	
b)	Generation of excessive groundborne vibration or groundborne noise levels?				\boxtimes	
c)	For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				\boxtimes	

a-c) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The nearest single-family residence is located approximately 330 feet northwest of the project site. The applicant has proposed the auto parts store building approximately 158 feet from the northern property line, which is the nearest property line with a residence on an adjacent parcel.

Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part II states that the maximum sound level for stationary noise sources during the daytime is 70 dB and 65dB for nighttime. Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part II states that the maximum sound level for stationary noise sources during the daytime is 70 dB and 65dB for nighttime. This applies to outdoor activity areas of the receiving use or applies at the lot line if no activity area is known. Additionally, noise from construction activities are exempt from noise standards provided the construction occur no earlier than 6:00 A.M. and no later than 9:00 P.M. The proposed project would be subject to these Development Title standards. Therefore, noise impacts from the proposed project are expected to be less than significant.

<u> XI</u> \	/. POPULATION AND HOUSING.	·	•	•	·	
Wo	ould the project:					
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				\boxtimes	
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				\boxtimes	

Loca Than

Impact Discussion:

a-b) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The nearest single-family residence is located approximately 330 feet northwest of the project site. The applicant has proposed the auto parts store building approximately 158 feet from the northern property line, which is the nearest property line with a residence on an adjacent parcel. Development Title Section 9-410.5(b)(2) states that if a proposed commercial building abuts property developed with conforming residential uses, property zoned residentially, or property shown on the General Plan Map for residential development, said rear yard shall be increased to twenty (20) feet in depth. Therefore, the location of the proposed building meets this requirement.

The proposed project will not result in displacement of the population and affect the amount of proposed or existing housing in the vicinity. The project site is currently vacant, and no impacts to population and housing are anticipated if this application is approved.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XV. PUBLIC SERVICES. a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:			\boxtimes		
Fire protection?			\boxtimes		
Police protection?			\boxtimes		
Schools?			\boxtimes		
Parks?			\boxtimes		
Other public facilities?			\boxtimes		

a) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The existing fire protection is provided by the Mokelumne Fire District, existing law enforcement protection is provided by the San Joaquin County Sheriff's Department, and the existing school services are provided by the Lodi Unified School District. There are no parks in the vicinity, and none are required to be provided. Therefore, the project will not result in the need for additional fire protection, police protection, schools, parks, or other public facilities.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XVI. RECREATION.					
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				\boxtimes	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				\boxtimes	

a-b) The proposed project will not substantially increase the use of existing neighborhood and regional parks because no increase in housing or people is associated with this application. Additionally, the project does not include recreation facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment. Impacts to recreation opportunities are anticipated to be less than significant.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	II. TRANSPORTATION.	·	,	•	·	
	ould the project:					
a)	Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?			\boxtimes		
b)	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?			\boxtimes		
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			\boxtimes		
d)	Result in inadequate emergency access?			\boxtimes		

a,c) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project was referred to the Department of Public Works on August 19, 2022, for review. Retail projects less than 50,000 square feet of floor area are considered locally serving retail and are presumed to have a less than significant impact on Vehicle Miles Traveled (VMT) and are screened out from requiring a full VMT analysis. San Joaquin County has determined the project will generate less than 110 automobile trips per day and, therefore, is considered a small project according to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018. According to this OPR guidance, a small project that generates or attracts "fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact" with regards to VMT.

The project is not expected to conflict with any program plans, ordinances, or policies addressing the vehicle circulation system. The project proposes an access driveway from Blossom Court, and another driveway off State Route 88 highway. As a Condition of Approval, the project proponent will be required to obtain an encroachment permit from the San Joaquin County Department of Public Works for the Blossom Court driveway, and an encroachment permit from Caltrans for the State Route 88 highway driveway. This ensures each driveway will be developed to the applicable agency's standards for access. As a result, proposed project will have adequate emergency access.

WALL TRIPAL OUT TURAL RECOUR		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No	Analyzed In The Prior EIR
a) Would the project cause a subsithe significance of a tribal cultipublic Resources Code section feature, place, cultural landscal defined in terms of the size and sacred place, or object with cultipublic American tribe, and that it	tantial adverse change in ural resource, defined in 21074 as either a site, pe that is geographically scope of the landscape, tural value to a California

ii) A resource determined by discretion and supported by be significant pursuant to subdivision (c) of Public F 5024.1. In applying the criter (c) of Public Resource Code agency shall consider the sign to a California Native America	r substantial evidence, to o criteria set forth in Resources Code Section ria set forth in subdivision e Section 5024.1, the lead gnificance of the resource			\boxtimes		

a) This project is General Plan Map Amendment and Zone Reclassification application to change the General Plan designation of two parcels totaling 10.69-acres from R/L (Low Density Residential) to R/R (Rural Residential) and to change the zoning designation from R-L (Low Density Residential) to R-R (Rural Residential). A referral was sent to the United Auburn Indian Community (UAIC), North Valley Yokuts Tribe, and the Buena Vista Rancheria for review.

If any suspected Tribal Cultural Resources (TCR) are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find. A Tribal Representative from culturally affiliated tribes shall be immediately notified and shall determine if the find is a TCR pursuant to Public Resources Code Section 21074. The Tribal Representative will make recommendations regarding the treatment of the discovery. Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of CEQA, including AB 52, has been satisfied. The contractor shall implement any measures deemed by the lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including but not limited to, facilitating the appropriate tribal treatment of the find, as necessary. This has been incorporated into the project's Conditions of Approval.

Additionally, should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g., 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

As a result of the Condition and existing Health and Safety Code regulations, any impact to tribal cultural resources is anticipated to be less than significant.

ΧI>	(, UTILITIES AND SERVICE SYSTEMS.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wo	ould the project:					
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			\boxtimes		
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			\boxtimes		
c)	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			\boxtimes		
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?				\boxtimes	
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?				\boxtimes	

a-c) This project is a Site Approval application for a 7,225 square foot auto parts retail store. The project will be served by the Lockeford Community Services District for water and wastewater services, and County Service Agency 52 for terminal stormwater service. As a result, project impacts to utilities and service systems are anticipated to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	. WILDFIRE.					
cla	ocated in or near state responsibility areas or lands ssified as very high fire hazard severity zones, would the					
	ject: Substantially impair an adopted emergency response plan or emergency evacuation plan?				\boxtimes	
b)	Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?		. 🗆		\boxtimes	
c)	Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				\boxtimes	
d)	Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				\boxtimes	

a-d) This project is a Site Approval application for a 7,225 square foot auto parts retail store. Pursuant to the San Joaquin Fire Severity Zone map, the project site is located in local responsibility fire zone designation. The project utilizes proposed roadway access in conformance with San Joaquin County and fire road standards. Therefore, the proposed project will have a less that significant impact wildfire hazards.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR

Re: Air Impact Assessment (AIA) Application Approval

ISR Project Number: C-20220467

Land Use Agency: San Joaquin Community Development Land Use Agency ID Number: Site Approval Application

Dear Mr. Kraus:

The San Joaquin Valley Air Pollution Control District (District) has approved your Air Impact Assessment (AIA) for the New O'Reilly Auto Parts Store project, located at 12999 Blossom CT in Lockeford, California. The project consists of a 7,225 square foot auto parts store. The District has determined that the mitigated baseline emissions for construction and operation will be less than two tons NOx per year and two tons PM10 per year. Pursuant to District Rule 9510 Section 4.3, this project is exempt from the requirements of Section 6.0 (General Mitigation Requirements) and Section 7.0 (Off-site Emission Reduction Fee Calculations and Fee Schedules) of the rule. As such, the District has determined that this project complies with the emission reduction requirements of District Rule 9510 and is not subject to payment of off-site fees. The determination is based on the project construction details provided with the application. Changes in the construction details may result in increased project related emissions and loss of this exemption.

Pursuant to District Rule 9510, Section 8.4, the District is providing you with the following information:

- A notification of AIA approval (this letter)
- A statement of tentative rule compliance (this letter)
- An approved Monitoring and Reporting Schedule

In addition, to maintain this exemption you must comply with all mitigation measures identified in the enclosed Monitoring and Reporting Schedule. Please notify the District of any changes to the project as identified in the approved Air Impact Assessment for this project.

Sarnir Sheikh
Executive Director/Air Pollution Control Officer

Change in Developer Form

If all or a portion of the project changes ownership, a completed Change in Developer form must be submitted to the District within thirty (30) days following the date of transfer.

Additional Requirements

- Dust Control Plan. Please be aware that you may be required to submit a Construction Notification Form or submit and receive approval of a Dust Control Plan prior to commencing any earthmoving activities as described in District Rule 8021 - Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.
- Asbestos Requirements for Demolitions. If demolition is involved, a Certified Asbestos Consultant will need to perform an asbestos survey prior to the demolition of a regulated facility. Following the completion of an asbestos survey; the asbestos survey, Asbestos Notification, Demolition Permit Release, and the proper fees are to be submitted to the District 10 working days prior to the removal of the Regulated Asbestos Containing Material and/or the demolition when no asbestos is present.
- Permits. Per District Rule 2010 (Permits Required), you may be required to obtain a District Authority to Construct prior to installation of equipment that controls or may emit air contaminants, including but not limited to emergency internal combustion engines, boilers, and baghouses.

To identify other District rules or regulations that apply to this project or to obtain information about District rules and permit requirements, the applicant is strongly encouraged to visit www.valleyair.org or contact the District's Small Business Assistance office nearest you:

Fresno office: Modesto office: (209) 557-6446

Bakersfield office:

(661) 392-5665

Mr. Kraus Page 3

Thank you for your cooperation in this matter. Please note the District also issued a letter to the land-use agency notifying the agency of this AIA approval. If you have any questions, please contact Mr. Patrick C Chimienti by telephone at (559) 230-6139 or by email at patrick.chimienti@valleyair.org.

Sincerely,

Brian Clements
