Form F

Summary Form for Electronic Document Submittal

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title:	Washington Street Sewer Bypass Project	
Lead Agency:	Castroville Community Services District	
Contact Name: Eric Tynan, General Manager		
Email: <u>eric@c</u>	astrovillecsd.org	Phone Number: <u>831-633-2560</u>
Project Locatio	on: <u>community of Castroville (unincorporated)</u>	Monterey
	City	County

Project Description (Proposed actions, location, and/or consequences).

The project site is located in Castroville, a census-designated place in Monterey County, on Assessor's Parcel Numbers 133-143-016, 030-141-022 and -023, and the California Department of Transportation right-of-way that lies between them along State Route (SR) 1. Portions of the project site are within the Coastal Zone, as established by the California Coastal Commission. The project site includes an existing Monterey One Water (M1W) pump station along Watsonville Road near Castroville, portions of Washington Street and Merritt Street/SR 183, and agricultural and undeveloped lands along the pipeline alignment on either side of SR 1. The project site is approximately 1.8 miles east of the Pacific Ocean and approximately 250 feet north of Tembladero Slough.

The proposed project would involve installation of a 24-inch trunk sewer main, approximately 1,400 feet in length, from the intersection of Washington Street and Merritt Street/SR 183 to the corner of Washington Street and Tembladera Street in the unincorporated community of Castroville, then across undeveloped areas and underneath SR 1 to the M1W pump station located at the south end of Watsonville Road. The proposed 24-inch sewer line would bypass the existing 18-inch sewer line within Watsonville Road to 18-inch sewer upstream of the M1W pump station. The purpose of the project is to provide additional conveyance capacity from the District wastewater collection system to the M1W pump station, and to improve the accessibility of the sewer line in this location.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project would result in potentially significant effects to biological, cultural, paleontological, and tribal cultural resources, as well as air quality and noise. However, implementation of the following mitigation measures would reduce these project effects to less-than-significant levels, as determined in the IS-MND.

AQ-1: Construction Emissions Reduction

BIO-1: Western Pond Turtle Avoidance and Minimization

BIO-2: California Red-Legged Frog Avoidance and Minimization

BIO-3: Nesting Bird Avoidance and Minimization Measures

BIO-4: Implement Sensitive Plant Community and Environmentally Sensitive Habitat Area Avoidance and Minimization Measures

BIO-5: Drainage Restoration

CR-1: Unanticipated Discovery of Cultural Resources

GEO-1: Paleontological Resources Monitoring and Mitigation

N-1: Temporary Noise Barriers

TCR-1: Native American Monitoring

The project would also involve implementation of Project Design Feature 1, Construction Best Management Practices, which includes measures to avoid contamination of the nearby Tembladero Slough.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.

- California Coastal Commission
- California State Water Resources Control Board
- County of Monterey
- California Department of Transportation Monterey Bay Air Resources District
