INITIAL STUDY/NEGATIVE DECLARATION

[Pursuant to Public Resources Code Section 21080(c) and California Code of Regulations, Title 14, Sections 15070-15071]

LEAD AGENCY: San Joaquin County Community Development Department

PROJECT APPLICANT: <u>Dehal/MCR Engineering</u>

PROJECT TITLE/FILE NUMBER(S): PA-2200038 (SA)

PROJECT DESCRIPTION: A Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. A Merger of the 2 lots will be required if this application is approved. No structures are proposed. Water and sewer are not proposed for the unmanned site. A storm water retention pond is proposed. Access to the site is from Manthey Rd. This parcel is not under a Williamson Act Contract. (Use Type: Truck Sales and Service-Truck Parking).

The project site is located on the northeast corner of Manthey Rd. and Roth Rd., in Lathrop.

ASSESSOR PARCEL NO.: 193-330-22 & 193-330-16

ACRES: 0.66-Acres

GENERAL PLAN: I/L

ZONING: I-W

POTENTIAL POPULATION, NUMBER OF DWELLING UNITS, OR SQUARE FOOTAGE OF USE(S): A truck parking facility for a maximum of 10 combined trucks and trailers.

SURROUNDING LAND USES:

NORTH: <u>Industrial/Agricultural with Scattered Residences</u>
SOUTH: City of Lathrop/Agricultural with Scattered Residences

EAST: Interstate 5/City of Lathrop

WEST: Agricultural with scattered residences

REFERENCES AND SOURCES FOR DETERMINING ENVIRONMENTAL IMPACTS:

Original source materials and maps on file in the Community Development Department including: all County and City general plans and community plans; assessor parcel books; various local and FEMA flood zone maps; service district maps; maps of geologic instability; maps and reports on endangered species such as the Natural Diversity Data Base; noise contour maps; specific roadway plans; maps and/or records of archeological/historic resources; soil reports and maps; etc.

Many of these original source materials have been collected from other public agencies or from previously prepared EIR's and other technical studies. Additional standard sources which should be specifically cited below include on-site visits by staff (Air Pollution Control District Air Impact Assessment approval dated September 30, 2022); staff knowledge or experience; and independent environmental studies submitted to the County as part of the project application. Copies of these reports can be found by contacting the Community Development Department.

TRIBAL CULTURAL RESOURCES:

Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

No

GENERAL CONSIDERATIONS:

1.	Does it appear that any environmental feature of the project will generate significant public concern or controversy? Yes No
	Nature of concern(s): Enter concern(s).
2.	Will the project require approval or permits by agencies other than the County? ☐ Yes ☐ No
	Agency name(s): Enter agency name(s).
3.	Is the project within the Sphere of Influence, or within two miles, of any city? Yes No
	City: Stockton, Lathrop

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

			ould be potentially affected by this pr by the checklist on the following pa		, involving at least one impact that is		
	Aesthetics		Agriculture and Forestry Resources	в	Air Quality		
	Biological Resources		Cultural Resources		Energy		
	Geology / Soils		Greenhouse Gas Emissions		Hazards & Hazardous Materials		
	Hydrology / Water Quality		Land Use / Planning		Mineral Resources		
	Noise		Population / Housing		Public Services		
	Recreation		Transportation		Tribal Cultural Resources		
	Utilities / Service Systems		Wildfire		Mandatory Findings of Significance		
DETE	ERMINATION: (To be completed by	the	Lead Agency) On the basis of this ir	nitial	evaluation:		
	find that the proposed project C ECLARATION will be prepared.	OUL	D NOT have a significant effect	on t	he environment, and a NEGATIVE		
е		ns in	the project have been made by o		onment, there will not be a significant reed to by the project proponent. A		
	find that the proposed project MAY EPORT is required.	hav	e a significant effect on the environn	nent,	and an ENVIRONMENTAL IMPACT		
ir a d	npact on the environment, but at le pplicable legal standards, and 2)	ast o has	ne effect 1) has been adequately an been addressed by mitigation mea	alyze asure	etentially significant unless mitigated" ed in an earlier document pursuant to es based on the earlier analysis as ed, but it must analyze only the effects		
s a D	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.						
Signa	ature: Giuseppe Sanfilippo	3	l_		<u> </u>		

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be crossreferenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance.

Issu	OC.
1550	25

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>I. A</u>	ESTHETICS.					
	cept as provided in Public Resources Code Section 21099, uld the project:					
a)	Have a substantial adverse effect on a scenic vista?				\boxtimes	
b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				\boxtimes	
c)	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publically accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?					
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			\boxtimes		

a-d) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. A Merger of the 2 lots will be required if this application is approved. No structures are proposed with this application. The project site is not located along a designated scenic route pursuant to 2035 General Plan Figure 12-2, and the surrounding area is a mixture of industrial, commercial, agricultural, and residential uses. As a result, the proposed project is not anticipated to have an impact on aesthetics.

11 2	AGRICULTURE AND FORESTRY RESOURCES.	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
In c sign the Ass Corimppimps sign info ance land the add	eletermining whether impacts to agricultural resources are nificant environmental effects, lead agencies may refer to California Agricultural Land Evaluation and Site resources are not not conservation as an optional model to use in assessing racts on agriculture and farmland. In determining whether racts to forest resources, including timberland, are nificant environmental effects, lead agencies may refer to remation compiled by the California Department of Forestry I Fire Protection regarding the state's inventory of forest d, including the Forest and Range Assessment Project and Forest Legacy Assessment project; and forest carbon assurement methodology provided in Forest Protocols opted by the California Air Resources Board Would the ject:					
a)					\boxtimes	
b)	Conflict with existing zoning for agricultural use, or a Williamson Act contract?				\boxtimes	
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				\boxtimes	
d)	Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes	
e)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				\boxtimes	

a-e) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. The current zoning for the property is I-W (Warehouse). The proposed project will not affect any agricultural uses, nor will it affect existing Williamson Act contracts. Therefore, the proposed application will have no impact on agriculture and forestry resources.

	AUD QUALITY	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
Wh app dis	AIR QUALITY. here available, the significance criteria established by the plicable air quality management or air pollution control trict may be relied upon to make the following the reminations. Would the project:					
a)	Conflict with or obstruct implementation of the applicable air quality plan?				\boxtimes	
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			\boxtimes		
c)	Expose sensitive receptors to substantial pollutant concentrations?			\boxtimes		
d)	Result in substantial emissions (such as those leading to odors) adversely affecting a substantial number of people?			\boxtimes		

a-d) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. This application does not propose the construction of any buildings. The San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) has been established by the State in an effort to control and minimize air pollution. The applicant will be required to meet existing requirements for emissions and dust control as established by SJVAPCD.

The project was referred to the SJVAPCD for review May 26, 2022. On June 23, 2022, the SJVAPCD submitted a response letter which stated an Air Impact Assessment (AIA) application was required prior to project level approval to comply with District Rule 9510. On September 30, 2022, the Community Development Department received the AIA approval letter with a list of District Enforced Emission Reduction Measures. These Measures include:

- For each project phase, within 30-days of issuance of the first certificate of occupancy, if applicable, submit to the District a summary report of the construction start, and end dates, and the date of issuance of the first certificate of occupancy. Otherwise, submit to the District a summary report of the construction start and end dates within 30-days of the end of each phase of construction.
- For each project phase, all records shall be maintained on site during construction and for a period of ten years following either the end of construction or the issuance of the first certificate of occupancy, whichever is later. Records shall be made available for District inspection upon request.
- For each project phase, maintain records of (1) the construction start and end dates and (2) the date of issuance of the first certificate of occupancy, if applicable.

These Measures will be incorporated into the project's Conditions of Approval, As a result, any impacts to air quality will be reduced to less-than-significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
IV.	BIOLOGICAL RESOURCES:	пправе	moorporated	mpaot	тправа	THOI EIN
	ould the project:					
a)	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?					
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				\boxtimes	
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				\boxtimes	
d)	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				\boxtimes	
e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				\boxtimes	
f)	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				\boxtimes	

a-f) The Natural Diversity Database identifies the Suisun Marsh aster (Aster lentus), burrowing owl (Athene Cunicularia), Tricolored blackbird (Agelaius Tricolor), and the Swainson's Hawk (Buteo Swainsoni) as rare, endangered, or threatened species located on or near the project area. Referrals have been sent to the San Joaquin Council of Governments (SJCOG) for review. SJCOG has determined that the applicant may participate in the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), and the applicant has confirmed participation. As a result, the proposed project is consistent with the SJMSCP, as amended, as reflected in the conditions of project approval for this proposal. Pursuant to the Final EIR/EIS for San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP), dated November 15, 2000, and certified by SJCOG on December 7, 2000, implementation of the SJMSCP is expected to reduce impacts to biological resources resulting from the proposed project to a level of less-than-significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
<u>V.</u>	<u>CULTURAL RESOURCES.</u>			,		
Wc	ould the project:					
a)	Cause a substantial adverse change in the significance of a historical resource pursuant to \$15064.5?			\boxtimes		
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?			\boxtimes		
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?			\boxtimes		

a–c) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. Should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VI.	ENERGY.		and the same of th			
Wc	ould the project:					
a)	Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy, or wasteful use of energy resources, during project construction or operation?				\boxtimes	
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?				\boxtimes	

(a,b) The California Energy Code (also titled The Energy Efficiency Standards for Residential and Non-residential Buildings) was created by the California Building Standards Commission in response to a legislative mandate to reduce California's energy consumption. The code's purpose is to advance the state's energy policy, develop renewable energy sources and prepare for energy emergencies. These standards are updated periodically by the California Energy Commission. The code includes energy conservation standards applicable to most buildings throughout California. These requirements will be applicable to the proposed project ensuring that any impact to the environment due to wasteful, inefficient, or unnecessary consumption of energy will be less than significant and preventing any conflict with state or local plans for energy efficiency and renewable energy.

			Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VII.	GE	OLOGY AND SOILS.		moorporatou			
2		the project:					
a)		ectly or indirectly cause potential substantial adverse ects, including the risk of loss, injury, or death involving:			\boxtimes		
	i)	Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			\boxtimes		
	ii)	Strong seismic ground shaking?			\boxtimes		
	iii)	Seismic-related ground failure, including liquefaction?			\boxtimes		
	iv)	Landslides?			\boxtimes		
b)	Re	sult in substantial soil erosion or the loss of topsoil?			\boxtimes		
c)	wo pot	located on a geologic unit or soil that is unstable, or that uld become unstable as a result of the project, and rentially result in on- or off-site landslide, lateral reading, subsidence, liquefaction or collapse?			\boxtimes		
d)		located on expansive soil and create direct or indirect as to life or property?			\boxtimes		
e)	sep wh	ve soils incapable of adequately supporting the use of otic tanks or alternative waste water disposal systems ere sewers are not available for the disposal of waste ter?			\boxtimes		
f)		ectly or indirectly destroy a unique paleontological ource or site or unique geologic feature?				\boxtimes	

a-f) The proposed the project is not anticipated to cause seismic effects, erosion, safety effects, or impact water and geologic features. The proposed project will not cause the risk of injury or death as a result of a rupture of a known earthquake fault, seismic activity, or landslides because there are no fault lines in the project vicinity. The proposed project will not result in substantial soil erosion or the loss of topsoil. The proposed project will not destroy a unique paleontological resource or site or unique geological feature. The proposed project is not located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.

	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
VIII. GREENHOUSE GAS EMISSIONS.		1	,		
Would the project:					
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			\boxtimes		
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			\boxtimes		

a-b) Emissions of GHGs contributing to global climate change are attributable in large part to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. Therefore, the cumulative global emissions of GHGs contributing to global climate change can be attributed to every nation, region, and city, and virtually every individual on earth. An individual project's GHG emissions are at a micro-scale level relative to global emissions and effects to global climate change; however, an individual project could result in a cumulatively considerable incremental contribution to a significant cumulative macro-scale impact. As such, impacts related to emissions of GHG are inherently considered cumulative impacts.

Implementation of the underlying project would cumulatively contribute to increases of GHG emissions. Estimated GHG emissions attributable to future development would be primarily associated with increases of carbon dioxide (CO_2) and, to a lesser extent, other GHG pollutants, such as methane (CH_4) and nitrous oxide (N_2O) associated with area sources, mobile sources or vehicles, utilities (electricity and natural gas), water usage, wastewater generation, and the generation of solid waste. The primary source of GHG emissions for the project would be mobile source emissions. The common unit of measurement for GHG is expressed in terms of annual metric tons of CO_2 equivalents ($MTCO_2e/yr$).

As noted previously, the underlying project will be subject to the rules and regulations of the SJVAPCD. The SJVAPCD has adopted the Guidance for Valley Land- use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA and the District Policy - Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. 11 The guidance and policy rely on the use of performance-based standards, otherwise known as Best Performance Standards (BPS) to assess significance of project specific greenhouse gas emissions on global climate change during the environmental review process, as required by CEQA. To be determined to have a less-than-significant individual and cumulative impact with regard to GHG emissions, projects must include BPS sufficient to reduce GHG emissions by 29 percent when compared to Business As Usual (BAU) GHG emissions. Per the SJVAPCD, BAU is defined as projected emissions for the 2002-2004 baseline period. Projects which do not achieve a 29 percent reduction from BAU levels with BPS alone are required to quantify additional project-specific reductions demonstrating a combined reduction of 29 percent. Potential mitigation measures may include, but not limited to: on-site renewable energy (e.g. solar photovoltaic systems), electric vehicle charging stations, the use of alternative-fueled vehicles, exceeding Title 24 energy efficiency standards, the installation of energy-efficient lighting and control systems, the installation of energyefficient mechanical systems, the installation of drought-tolerant landscaping, efficient irrigation systems, and the use of low-flow plumbing fixtures.

It should be noted that neither the SJVAPCD nor the County provide project-level thresholds for construction-related GHG emissions. Construction GHG emissions are a one-time release and are, therefore, not typically expected to generate a significant contribution to global climate change.

¹¹ San Joaquin Valley Air Pollution Control District. Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. December 17, 2009. San Joaquin Valley Air Pollution Control District. District Policy Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency. December 17, 2009.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
IX.	HAZARDS AND HAZARDOUS MATERIALS.		moorporatou			
	ould the project: Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			\boxtimes		
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			\boxtimes		
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			\boxtimes		
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			\boxtimes		
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?			\boxtimes		
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			\boxtimes		
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?			\boxtimes		

a-g) The proposed application would not result in, create or induce hazards and associated risks to the public. Construction activities for the project typically involve the use of toxic or hazardous materials such as paint, fuels, and solvents. Construction activities would be subject to federal, state, and local laws and requirements designed to minimize and avoid potential health and safety risks associated with hazardous materials. No significant impacts are anticipated related to the transport, use, or storage of hazardous materials during construction activities are anticipated.

The project site falls within Zone 8 of the Airport Influence Area the comprehensive Airport Land Use Plan boundaries for the Stockton Metropolitan Airport. The project site is located approximately 3.5 miles southwest of the nearest runway. The project shall abide by the applicable Airport Land Use Plan for the Stockton Metropolitan Airport. A referral was sent to the Airport Land Use Commission and the Stockton Metropolitan Airport on May 26, 2022, for review. As a Condition of Approval, the project will be subject to the Airport Land Use Commission's rules and regulations. As a result, impacts to airport flight paths will be reduced to less than significant.

			Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
		PROLOGY AND WATER QUALITY.			,		
	Vio req	the project: blate any water quality standards or waste discharge puirements or otherwise substantially degrade surface or bund water quality?				\boxtimes	
b)	sub pro	bstantially decrease groundwater supplies or interfere ostantially with groundwater recharge such that the bject may impede sustainable groundwater inagement of the basin?				\boxtimes	
c)	or a	bstantially alter the existing drainage pattern of the site area, including through the alteration of the course of a eam or river or through the addition of impervious faces, in a manner which would:				\boxtimes	
	i)	result in substantial erosion or siltation on- or off-site;				\boxtimes	
	ii)	substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;				\boxtimes	
	iii)	create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or				\boxtimes	
	iv)	impede or redirect flood flows?					
d)		flood hazard, tsunami, or seiche zones, risk release of lutants due to project inundation?			\boxtimes		
e)		nflict with or obstruct implementation of a water quality ntrol plan or sustainable groundwater management n?			\boxtimes		

a-e) The project site is located in the Flood Zone X, 0.2 percent annual chance of flood designations. A referral has been sent to the Department of Public Works, Flood Control Division for comments. If approved, any new developments will have to comply with Development Title Section 9-1605 regarding flood hazards.

The project site is located approximately 2.7 miles south of French Camp Slough, and approximately 2.0 miles east of the San Joaquin River. The proposed project will not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality, conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.

The project will not substantially decrease groundwater supplies or interfere substantially with groundwater recharge because operations are unmanned and very little water will be used. The project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site; substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site; create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or impede or redirect flood flows. Additionally, the proposed project would not risk release of pollutants in flood hazard, tsunami, or seiche zones.

_	LAND USE AND PLANNING. build the project:	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The t Prior EIR
a)	Physically divide an established community?				\boxtimes	
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			\boxtimes		

a,b) A truck parking operation is classified under the Truck Sales and Service, Parking use type, and may be a conditionally permitted use in the I-W (Warehouse) zone subject to an approved Site Approval application. The project does not propose the construction of any buildings. The project site is surrounded by industrial, residential, commercial, and agricultural uses. Therefore, the project will not physically divide an established community and is consistent with surrounding land uses.

The zoning and the General Plan for the project site will remain the same if the project is approved. Additionally, the proposed project will have a less than significant impact to surrounding parcels and will not create premature development pressure on surrounding agricultural lands to convert land from agricultural uses to non-agricultural uses. Therefore, this project is not a growth-inducing action.

The City of Lathrop has an approved plan called the North Lathrop Transportation Fee (NLTF), a fee based on new vehicle trips associated with new development projects. This fee was adopted by the City of Lathrop City Council. However, the fee was never adopted by the San Joaquin County Board of Supervisors. As a result, the NLTF is not applicable to development projects within the boundaries of unincorporated San Joaquin County. The proposed project will not be a conflict with any existing or planned uses or set a significant land use precedent. The proposed project is not in conflict with any Master Plans, Specific Plans, or Special Purpose Plans, or any other applicable plan adopted by the County.

C

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XII.	MINERAL RESOURCES.	,		3		
Wo	ould the project:					
a)	Result in the loss of availability of a known_mineral resource that would be of value to the region and the residents of the state?	,		\boxtimes		
b)	Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			\boxtimes		

a, b) The proposed project will not result in the loss of availability of a known mineral resource of a resource recovery site because the site does not contain minerals of significance or known mineral resources. San Joaquin County applies a mineral resource zone (MRZ) designation to land that meets the significant mineral deposits definition by the State Division of Mines and Geology. Although the project site is in an area designated MRZ-1, there is currently no mining activity in the area, and the surrounding area is developed with residential, industrial, and commercial uses. Therefore, the proposed project applications will have less than a significant impact on the availability of mineral resources or mineral resource recovery sites within San Joaquin County.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	. NOISE.					
	ould the project result in:					
a)	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			\boxtimes		
b)	Generation of excessive groundborne vibration or groundborne noise levels?					
c)	For a project within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			\boxtimes		

a-c) The proposed project is for truck and trailer parking for a maximum of 10 combined trucks and trailers. No buildings are proposed with this application, and the site will be unmanned once the parking area is constructed. Additionally, the nearest single family residence is located approximately 210 feet west of the project site. Development Title Section 9-1025.9 lists the Residential use type as a noise sensitive land use. Development Title Section Table 9-1025.9 Part II states that the maximum sound level for stationary noise sources during the daytime is 70 dB and 65dB for nighttime. This applies to outdoor activity areas of the receiving use, or applies at the lot line if no activity area is known. Additionally, noise from construction activities are exempt from noise standards provided the construction occurs no earlier than 6:00 A.M. and no later than 9:00 P.M. The proposed project would be subject to these Development Title standards. Therefore, noise impacts from the proposed project are expected to be less than significant.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
ΧIV	<u> POPULATION AND HOUSING.</u>					
Wo	ould the project:					
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			\boxtimes		
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?			\boxtimes		

a-b) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. The project does not propose housing within the project boundary. Therefore, the project will not induce substantial unplanned population growth in the area. The proposed project will not result in displacement of the population and affect the amount of proposed or existing housing in the vicinity. Therefore, the project's impact on population and housing will be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XV. PUBLIC SERVICES. a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:			\boxtimes		
Fire protection?			\boxtimes		
Police protection?			\boxtimes		
Schools?			\boxtimes		
Parks?			\boxtimes		
Other public facilities?			\boxtimes		

a) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. The French Camp-McKinley Fire District provides the existing fire protection. Existing law enforcement protection is provided by the San Joaquin County Sheriff's Department, and the existing school services are provided by the Manteca Unified School District with the nearest school located approximately 1.95-miles north of the project site. No parks are impacted as a result of this project. Impacts to public services are also anticipated to be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
XVI. RECREATION.					
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				\boxtimes	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				\boxtimes	

a-b) The proposed project will not substantially increase the use of existing neighborhood and regional parks because no increase in housing or people is associated with this application. Additionally, the project does not include recreation facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment. No impacts to recreation opportunities are anticipated.

		Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	II. TRANSPORTATION. buld the project:		ŗ			
a)	Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities?			\boxtimes		
b)	Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?				\boxtimes	
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			\boxtimes		
d)	Result in inadequate emergency access?				\boxtimes	

Lasa Than

Impact Discussion:

The Department of Public Works has reviewed the Vehicle Miles Traveled (VMT) for the proposed project and has determined the project will generate less than 110 vehicle trips per day. Therefore, the project is considered a small project according to the Technical Advisory on Evaluating Transportation Impacts in CEQA, as published by the California Office of Planning and Research (OPR) in December 2018. According to this OPR guidance, a small project that generates or attracts "fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact" with regards to Vehicle Miles Traveled (VMT). Thus, the proposed project is presumed to have a less than significant impact on VMT.

The project site falls within Zone 8 of the Airport Influence Area the comprehensive Airport Land Use Plan boundaries for the Stockton Metropolitan Airport. The project site is located approximately 3.47 miles southwest of the nearest runway. The project shall abide by the applicable Airport Land Use Plan for the Stockton Metropolitan Airport. A referral was sent to the Airport Land Use Commission and the Stockton Metropolitan Airport on May 26, 2022 for review. As a Condition of Approval, the project will be subject to the Airport Land Use Commission's rules and regulations. As a result, impacts to airport flight paths will be reduced to less than significant.

V th P fe d s	TRIBAL CULTURAL RESOURCES. Vould the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in the sublic Resources Code section 21074 as either a site, the study of the size and scope of the landscape, acred place, or object with cultural value to a California lative American tribe, and that is:	Potentially Significant Impact	Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
i)	Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or				\boxtimes	
ji)	A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.				\boxtimes	

Loce Than

Impact Discussion:

a) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. A referral was sent to the United Auburn Indian Community (UAIC), North Valley Yokuts Tribe, and the Buena Vista Rancheria for review.

If any suspected Tribal Cultural Resources (TCR) are discovered during ground disturbing construction activities, all work shall cease within 100 feet of the find. A Tribal Representative from culturally affiliated tribes shall be immediately notified and shall determine if the find is a TCR pursuant to Public Resources Code Section 21074. The Tribal Representative will make recommendations regarding the treatment of the discovery. Preservation in place is the preferred alternative under CEQA and UAIC protocols, and every effort must be made to preserve the resources in place, including through project redesign. Work at the discovery location cannot resume until all necessary investigation and evaluation of the discovery under the requirements of CEQA, including AB 52, has been satisfied. The contractor shall implement any measures deemed by the lead agency to be necessary and feasible to preserve in place, avoid, or minimize impacts to the resource, including but not limited to, facilitating the appropriate tribal treatment of the find, as necessary. This has been incorporated into the project's Conditions of Approval.

Additionally, should human remains be discovered during any ground disturbing activities, all work shall stop immediately in the vicinity (e.g. 100 feet) of the finds until they can be verified. The County coroner shall be immediately contacted in accordance with Health and Safety Code section 7050.5(b). Protocol and requirements outlined in Health and Safety Code sections 7050.5(b) and 7050.5(c) as well as Public Resources Code section 5097.98 shall be followed.

As a result of the Condition and existing Health and Safety Code regulations, any impact to tribal cultural resources is anticipated to be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
	(. UTILITIES AND SERVICE SYSTEMS.	,	,	,	•	
150	build the project:					
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?				\boxtimes	
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			\boxtimes		
c)	Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			\boxtimes		
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?				\boxtimes	
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?				\boxtimes	

a-e) This project site is currently not served by public services and will not require new connections. Since the proposed project is unmanned, restrooms are not required. As a result, a septic system is not required. The project site will be required to keep all storm drainage on site, and the Department of Public Works will determine the appropriate size of the proposed storm drainage retention pond. Therefore, the impact on public services will be less than significant.

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	Analyzed In The Prior EIR
If cla	. WILDFIRE. located in or near state responsibility areas or lands ssified as very high fire hazard severity zones, would the ject:	·		,		
200	Substantially impair an adopted emergency response plan or emergency evacuation plan?				\boxtimes	
b)	Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?				\boxtimes	
c)	Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				\boxtimes	
d)	Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				\boxtimes	

a-d) This project is a Site Approval application for an unmanned truck parking site for a maximum of 10 combined trucks and trailers located on 2 lots totaling 0.66 acres. The rest of the parcel is developed with an existing truck and trailer parking use and heavy equipment sales use. Pursuant to the San Joaquin Fire Severity Zone map, the project site is in an area with non-wildland/non-urban fire zone designation.

Proposed access for the project site is off South Manthey Road, a County maintained road. The project will not require the installation or maintenance of additional infrastructure to mitigate fire risk or may result in impacts to the environment. As a result, the proposed project will have a less than significant impact on potential wildfire hazards.

VVI. MANDATORY FINDINGS OF GIONIFICANICE	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impac	Analyzed In The Prior EIR
XXI. MANDATORY FINDINGS OF SIGNIFICANCE a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				\boxtimes	
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				\boxtimes	
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				\boxtimes	

a-c). The proposed application does not have the potential to degrade the environment or eliminate a plant or animal community. The project would not result in significant cumulative impacts or cause substantial adverse effects on human beings, either directly or indirectly.

Planning Department San Joaquin County 1810 E Hazelton Ave Stockton, CA 9520

Re: Air Impact Assessment (AIA) Application Approval

ISR Project Number: C-20220374

Land Use Agency: San Joaquin County Land Use Agency ID Number: Unknown

To Whom It May Concern:

The San Joaquin Valley Air Pollution Control District (District) has approved the Air Impact Assessment (AIA) application for the Inderjit Dehal Truck Parking project, located at 11100 and 11140 S. Manthey Road in Lathrop, California. The Project consists of constructing a truck parking lot located on 0.65 acres. The District has determined that the mitigated baseline emissions for construction and operation will be less than two tons NOx per year and two tons PM10 per year. Pursuant to District Rule 9510 Section 4.3, this project is exempt from the requirements of Section 6.0 (General Mitigation Requirements) and Section 7.0 (Off-site Emission Reduction Fee Calculations and Fee Schedules) of the rule. As such, the District has determined that this project complies with the emission reduction requirements of District Rule 9510 and is not subject to payment of off-site fees.

Pursuant to District Rule 9510, Section 8.4, the District is providing you with the following information:

- A notification of AIA approval (this letter)
- A statement of tentative rule compliance (this letter)
- An approved Monitoring and Reporting Schedule
- A copy of the Air Impact Assessment Application

Certain emission mitigation measures proposed by the applicant may be subject to approval or enforcement by San Joaquin County. No provision of District Rule 9510 requires action on the part of San Joaquin County, however, please review the enclosed list of mitigation measures and notify the District if the proposed mitigation measures are inconsistent with your agency's requirements for this project. The District can provide the detailed emissions analysis upon request.

> Samir Sheikh Executive Director/Air Pollution Control Officer
