## **Executive Summary**

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the property referenced above in the City of Orange, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for potential Recognized Environmental Conditions (RECs) that may be present and was conducted as part of your efforts to acquire the Site. The Site is noted to be an approximately 12.69-acre parcel containing the National Oilwell Varco (NOV) facility. The Site has been used for industrial uses by notable facilities including National Oilwell Varco and formerly by Pacific Delivery Services since at least 1985. Prior to development, the Site and the Site vicinity were used as orange groves.

The Site is relatively flat with an elevation of approximately 160 feet above mean sea level (msl) with a regional slope to the south southwest. The Site is located in the City of Orange, Orange County and is set in an area zoned for light manufacturing uses.

The Site is located in an industrial setting and is bound:

- to the north by a railroad across which are industrial buildings;
- on the east by Caliber Collision;
- to the south by the NOV office building and distribution building as well as the Label Impressions facility,
- to the west by North Eckhoff Street across which is Orange County Communications Division, Children and Family Services, and Social Services Agency.

Key findings of this Phase I ESA are as follows:

- The Site was observed to have historically been used for agricultural land since at least 1938 until Site was first seen to be vacant land in the mid-1970's. The Site was then developed with the current facility and was noted with additional development from 1985 until 2016 when the Site was first seen in the approximate orientation it is in today.

- The Site has been used by industrial facilities since its development who have likely used hazardous chemicals at the Site given the nature of the businesses that historically and currently occupy the Site. Of note, the current occupant National Oilwell Varco's activities include the manufacturing of heavy equipment for the oil and gas industry. The Site vicinity was initially seen with agricultural use and then extensive industrial development in later years;
- Buildings 1 through 3 of the NOV facility were noted with significant areas of staining and spills, subsurface piping, trenches, metal plates, concrete patches, and machinery pits. Staining and spills were also noted in the hazardous waste areas along with surface staining seen in various areas around the Site, such as staining in drainage swales lead toward storm drains. What appeared to be oil was seen to be leaking from a refuse bin located in the hazardous waste storage area and entering a drain near the bin;
- A clarifier/sump was reported to be in use in conjunction with the wash pad located at the Site. The wash pad was indicated to be the location of where machined parts are washed and degreased;
- Historic UST files indicate that Pacific Delivery Service formerly located on the eastern side of the Site at Building 3 (752 North Poplar Street), operated three gasoline USTs (two 10,000-gallon and one 1,000-gallon) and one 1,000-gallon waste oil UST. No records indicating confirmation that the tanks were removed or conditions of the surrounding soil were found;
- Based on the review of the available regulatory information, the Site is located in an area with an approximately 30 year history of industrial uses. Several facilities were identified to store and use hazardous chemicals and some have had releases that were subsequently closed with the relative oversight agency. None of these facilities were found to pose an environmental threat to the Site with the exception of the Inland Specialty Chemical Company. This facility has been under investigation and remediation for chlorinated solvents and received closure from the RWQCB in 1995. Given perched groundwater was encountered at 53 feet bgs, the potential for migratory VOCs poses a vapor intrusion condition at the Site, in particular the western portion of the Site given the southerly flow of groundwater

reported at this facility. Review of the records indicate only a closure letter for this facility being available. No data from off-Site investigation into soil vapor was found;

- Given the findings of this Phase I ESA, there is potential for a vapor intrusion condition from on-Site and off-Site sources;
- The Site was developed with the current structures during times when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs should be treated as such until they can be ruled out as asbestos containing through sampling. Suspect ACMs include but are not limited to joint compound, drywall, vinyl floor tiles, mastic, and roofing tar; and,
- Flaking paint was observed at various surfaces at the Site.

### **Conclusions**

We have performed a Phase I Environmental Site Assessment in accordance with ASTM E1527-13 Guidelines for the property located at the 759 North Eckhoff Street and 752 North Poplar Street in Orange, California. **The following RECs were identified during HMC's investigation:**

- The approximately 30 year industrial use of the Site and associated chemical uses;
- Significant areas of staining and spills, subsurface piping, trenches, metal plates, concrete patches, and machinery pits;
- Unknown status of historical USTs in the vicinity of Building 3;
- Potential vapor intrusion condition from on and off-Site facilities; and,
- The reported clarifier/sump below the wash pad.

No CRECs or HRECs were identified during this investigation.

While not an REC by ASTM standards, the Site was developed with the current structures during times when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs should be treated as such until they can be ruled out as asbestos containing through sampling. Suspect ACMs include but are not limited to joint compound, drywall, vinyl floor tiles, mastic, and roofing tar.

Flaking paint was observed at the Site raising lead paste paint concerns given the age of the building.

### **Recommendations**

Based on the findings of this ESA, we recommend the following:

- A Site wide Phase II subsurface survey should be conducted;
- A geophysical survey should be conducted around Building 3 to assess the potential presence of historical USTs;
- A lead based paint survey should be conducted at the Site; and,
- Sample all suspect ACMs prior to any disturbance such as demolition.

**PHASE I ENVIRONMENTAL SITE  
ASSESSMENT  
759 North Eckhoff Street and 752 North Poplar Street  
Orange, California 92868**

**1. INTRODUCTION**

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the property referenced above in the City of Orange, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for potential Recognized Environmental Conditions (RECs) that may be present and was conducted as part of your efforts to acquire the Site. The Site is noted to be an approximately 12.69-acre parcel containing the National Oilwell Varco (NOV) facility. The Site has been used for industrial uses by notable facilities including National Oilwell Varco and formerly by Pacific Delivery Services since at least 1985. Prior to development, the Site and the Site vicinity were used as orange groves.

The Site is relatively flat with an elevation of approximately 160 feet above mean sea level (msl) with a regional slope to the south southwest. The Site is located in the City of Orange, Orange County and is set in an area zoned for light manufacturing uses.

**1.1. Objective**

In accordance with the ASTM E 1527-13 Standard Practice for Environmental Site Assessments, the objective of the ESA is to assess, to the extent feasible under the standard, the likelihood that Recognized Environmental Conditions (RECs), as defined by ASTM, are present at the Site.

A Recognized Environmental Condition “means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies” (ASTM Standard

Practice E1527-13). Performance of a Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property, within reasonable limits of time and cost.

All Appropriate Inquires (AAI) as defined in the Final Rule (40 CFR, Part 312), must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, is to identify releases and threatened releases of hazardous substances, which cause or threaten to cause the incurrence of response costs. The U.S. Environmental Protection Agency (EPA) has stated that ASTM Standard E-1527-13 is consistent with the Standards and Practices for AAI and is compliant with the statutory criteria for AAI.

## **1.2. Scope of Services, Methodology and Limitations**

The findings of this ESA must be viewed in recognition of certain limiting conditions. The scope of work commissioned for this project does not represent an exhaustive study, but rather a reasonable inquiry, consistent with good commercial practice, in general accordance with ASTM Practice E-1527-13.

The scope of work for this ESA included the following activities:

- A Site walk to document the current condition of the Site and neighboring facilities.
- Review of a regulatory database report.
- Review of previously prepared reports for the Site.
- Submittal of questionnaires to the current Owner and User of the report.
- Review of historical references including aerial photographs, city directories, Sanborn Maps and topographic maps.

- On-line research and file review requests concerning the Site and suspect off site sources at the State of California Regional Water Quality Control Board (RWQCB) and Department of Toxic Substances Control (DTSC) websites.
- Review of records maintained by the Orange County Healthcare Agency.
- Review of records kept by the South Coast Air Quality Management District.
- Review of Records kept by the City of Orange.
- Review of Records kept by the Orange City Fire.
- Preparation of this report of findings.

In the course of this assessment, HMC has relied on information provided by outside parties, such as regulatory agencies, previous reports and interview sources. For the purpose of this assessment, such third-party information is assumed to be accurate unless contradictory evidence is noted, and HMC does not express or imply any warranty regarding information provided by third-party sources.

## **2. SITE DESCRIPTION**

### **2.1. Site Setting**

The Site is noted to be an approximately 12.69-acre parcel containing the NOV facility. The Site is relatively flat with an elevation of approximately 160 feet above mean sea level (msl) with a regional slope to the south southwest. The Site is located in the City of Orange, Orange County and is set in an area zoned for light manufacturing uses.

The Site is located in an industrial setting and is bound:

- to the north by a railroad across which are industrial buildings;
- on the east by Caliber Collision;
- to the south by the NOV office building and distribution building as well as the Label Impressions facility,
- to the west by North Eckhoff Street across which is Orange County Communications Division, Children and Family Services, and Social Services Agency.

Utilities at the Site are provided by:

- Electricity: Southern California Edison
- Natural Gas: Southern California Gas Company
- Water: City of Orange
- Sewer: City of Orange

## **2.2. Regional Geology and Hydrogeology**

Information regarding regional geological and hydrogeological conditions was obtained from information included on the California Department of Water Resources website. The Site lies within the Coastal Plain of Orange County Groundwater Basin (Orange County Basin) which underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bound by consolidated rocks exposed on the north in the Puente and Chino Hills, on the east in the Santa Ana Mountains, and on the south in the San Joaquin Hills. The basin is bound by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County - Los Angeles County line on the northwest. The basin underlies the lower Santa Ana River watershed.

The Orange County Basin is dominated by a deep structural depression containing a thick accumulation of fresh water-bearing interbedded marine and continental sand, silt and clay deposits. The proportion of fine material generally increases toward the coast, dividing the basin into forebay and pressure areas. Consequently, most surface waters recharge through the coarser, more interconnected and permeable forebay deposits. Strata in this basin are faulted and folded and may show rapid changes in grain size. The Newport-Inglewood fault zone parallels the coastline and generally forms a barrier to groundwater flow. Erosional channels filled with permeable alluvium break this barrier at the Alamitos and Talbert Gaps, providing an opportunity for saline water to flow inland.

The following groundwater information was found on the Regional Water Quality Control Board's website GeoTracker. Groundwater was reported to have been detected at approximately 91 to 93 feet bgs in a 2019 groundwater monitoring report for the Orange Coast Car Wash, a facility located approximately 4,300 feet south southeast of the Site. The reported direction of groundwater flow is to the southwest (TRG 2019).

### **2.3. Interviews and User Provided Information**

The User of this report is IDI Logistics who is looking to acquire the Site and would be considered a “User” of the report per ASTM definitions. We requested all available information from the User and was provided a Title Report, Owner and User Questionnaires, chemical inventories, and Site maps.

### **2.4. Title Records**

A Title Report (Report) prepared by First American Title Insurance Company dated September 29, 2020 was provided to HMC for review. The Report stated that Title was vested in National Oilwell Varco, L.P., a Delaware Limited Partnership. The report included information regarding tax obligations, mortgage liens, easements for various utilities and related matters but did not contain any information of an environmental nature.

### **2.5. User Knowledge**

We interviewed Mr. Brandon Dickens of IDI who indicated that his firm has no previous knowledge or experience with the property and is unaware of any UST, chemical spills, releases, or other ongoing environmental matters.

### **2.6. Owner/Occupant Knowledge**

Mr. Juan Villa, Director of operations for NOV, completed an Owner Questionnaire and was also interviewed in person during the Site reconnaissance portion of this investigation on September 26, 2020. He indicated that the Site is used for machining, fabricating, painting, assembly, testing, and warehousing of capital equipment and spare parts. He stated that he was unaware of any releases or other ongoing environmental matters. Mr. Villas indicated that waste water from the wash pad is collected and shipped from the Site as waste. Machined parts are reported to be degreased with LPS Multipurpose degreaser at the wash pad. Run off from cooling towers enters municipal water drains. Leaks from hydraulic power units have occurred during product testing however the test is stopped upon discovery of a leak and cleaned up. Mr. Villa also provided chemical and waste inventories as well as facility maps by way of IDI.

### **2.7. Environmental Liens or Activity and Use Limitations**

The best of HMC's knowledge from the review of material provided by third parties, there are no environmental liens or AULs in relation to the Site.

### **3. SITE USE AND HISTORY**

Past usage of the subject Site was assessed through a review of historical aerial photographs, topographic maps and an EDR search of city directories and prior reports. Sanborn maps were not generated for the Site.

#### **3.1. Aerial Photograph Review**

Aerial photographs covering the Site were obtained from Environmental Data Resources, Inc. (EDR). Photographs were available from the period 1938 through 2016. Copies of the aerial photographs are included in Appendix B. A summary of the observations noted from the aerial photographs are as follows:

- |         |   |
|---------|---|
| 1938-66 | The Site and Site vicinity were observed with orange groves with the Santa Ana River located approximately 1,545 feet west of the Site.   |
| 1972    | No changes were observed at the Site. A group of industrial facilities were first seen approximately 1,110 feet east of the Site. Individual industrial buildings were also seen sparsely distributed among the orange groves in other areas of the Site vicinity.  |
| 1977    | The Site was first seen as cleared land. Significant industrial development was noted in the Site vicinity with very few areas of orange groves seen. State Route 57 was first seen approximately 1,812 feet west southwest of the Site.  |
| 1985    | The Site was observed with two large industrial structures, one at the eastern and western ends of the Site, respectively. Several smaller buildings were also noted scattered between the larger buildings. Areas of equipment and/or product storage were also observed. Additional industrial development in the Site vicinity was seen. |
| 1989-95 | No significant changes to the Site or the Site vicinity were observed.  |
| 2005    | An addition was seen to the western building at the Site. No other changes were noted at the Site or the Site vicinity.   |

2009	No significant changes to the Site or the Site vicinity were observed.
2012	A portion of the central area of the Site was noted to be cleared. No other changes to the Site or the Site vicinity were seen.
2016	Two additional structures were seen on the land noted to have been cleared in the previous aerial photograph. No other significant changes were seen at the Site or the Site vicinity.

### **3.2. Topographic Maps**

Historical topographic maps were also reviewed as part of this effort and aided in interpreting the overall Site history. Although, no specific observations were made from the review of these maps.

### **3.3. Sanborn Maps**

Sanborn maps are maps that were created for the insurance industry to document site activities in metropolitan areas of the country and were used in underwriting. They often times contain detailed information about a site. While they were prepared for insurance underwriting and were not environmental maps per se, they often times contain information that is useful in evaluating the historical use of a site. Sanborn maps were not generated for the Site.

### **3.4. EDR City Directory Review**

EDR performed a search of the City Directory records for the Site addresses provided at the initiation of this Phase I ESA and nearby properties at approximately five-year intervals. Review of this report yielded the following findings:

759 North Eckhoff Street

### **3.5. Summary**

The Site was observed to have historically been used for agricultural land since at least 1938 until Site was first seen to be vacant land in the mid-1970's. The Site was then developed with the current facility and was noted with additional development from 1985 until 2016 when the Site was first seen in the approximate orientation it is in today. The Site has been used by industrial facilities since it's development who have likely used hazardous chemicals at the Site given the nature of the businesses that historically and currently occupy the Site. Of note, the current occupant National Oilwell Varco's activities include the manufacturing of heavy equipment for the oil and gas industry. The industrial history of the Site is considered a REC. The Site vicinity was initially seen with agricultural use and then extensive industrial development in later years.

## **4. PRIOR INVESTIGATIONS**

To HMC's knowledge, no previous investigations have been conducted at the Site.

## **5. SITE RECONNAISSANCE**

Mr. Troy Taylor of HMC conducted a Site and Site vicinity reconnaissance on September 26, 2020. The reconnaissance was conducted in order to identify visible evidence of REC's at the Site and to assess possible conditions off Site that may impact the Site. Mr. Taylor was permitted to enter and inspect the facility by Mr. Juan Villa, the Director of Operations of NOV, however he was unescorted during the inspection of the Site.

The Site was observed with five structures at the Site. Uses observed at the Site included offices, storage, and the varying stages of the manufacturing of heavy equipment and components for the oil and gas drilling industry. Drainage at the Site was noted to be directed by sheet flow and drainage swales toward storm drains located throughout the Site. Staining was observed at various locations including the drainage swales entering the storm drains. Chemical storage and hazardous wastes are stored in various containers such as 55-gallon drums, 275-gallon poly totes, and ASTs with capacities noted in the several hundreds of gallons in a covered hazardous materials area located in the

southwest corner of the Site. Storage of chemicals and waste was also seen throughout the Site in 55-gallon drums. Cooling towers were located just east of this storage area as well as in between Buildings 1 and 2. Equipment, supplies, and product storage was seen east of the hazardous waste area as well as in between the buildings and along the borders of the Site. A mock oil and gas drilling platform is located midway along the northern border of the Site. It is used to test products manufactured by NOV. A wash pad located between Building 1 and Building 2 is used to degrease products. Reportedly the water and degreaser is captured and shipped off the Site as hazardous waste. A propane AST was located just south of the wash pad. Several other ASTs were seen at the Site noted to contain compressed air, argon, carbon dioxide, and oxygen.

Buildings 1 through 4 contain offices although they are largely used for the manufacturing process of NOV's products. Building 1 was observed with product storage in the western portion near the offices. The remainder of the warehouse was seen with a manufacturing area that included satellite chemical and chemical waste storage areas. Computer numerical control (CNC) machines were seen and noted with subsurface lines for the recirculation of coolant. The CNC machines were reported to not use subsurface tanks for the storage of coolant/lubricants but rather stored them in the machine above ground. The machines were noted to be set into pits in the concrete slab at varying depths. Evidence of staining and spills were observed in the vicinity of these machines. The entire manufacturing floor was noted to be slick from the mist of coolant. Building 2 was noted with several cranes, product storage, and stations for lighter work on the facility's products. Building 3 was seen with a media blasting booth as well CNC machines, manufacturing equipment, an electroplating dip tank, and transformers. Building 4 and 5 were noted with office and storage uses.

Buildings 1 through 3 were noted with significant areas of staining and spills, subsurface piping, trenches, metal plates, concrete patches, and machinery pits. Staining and spills were also noted in the hazardous waste areas along with surface staining seen in various areas around the Site, such as staining in drainage swales lead toward storm drains. What appeared to be oil was seen to be leaking from a refuse bin and entering a drain near the bin. These findings constitute RECs.

The Site was constructed during a time when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs were observed throughout the facility and included mastic on concrete, vinyl flooring, drywall, joint compound, and ceiling tiles

Selected photographs illustrating the property and nearby off-Site conditions are included in Appendix A. Summaries of the Site and observations are detailed below.

<b>Description and Use of Site:</b>	The Site was noted to be occupied by NOV who manufacture equipment and components for the oil and gas drilling industry.
<b>Underground and Aboveground Storage Tanks:</b>	No evidence of USTs were observed at the Site. Several ASTs were observed along buildings containing compressed gases. ASTs were also noted in the hazardous materials area for the storage of coolants and oils.
<b>Hazardous Materials, Hazardous Wastes or Petroleum Products:</b>	Chemical storage at the facility included a list approximately 174 chemical including oils, coolants, lubricants, solvents, adhesives, and paint as well as their associated wastes.
<b>Drains, Drain lines and Sumps:</b>	There were many features at the Site with included drains and covered trenches.
<b>Pits, Ponds, Lagoons</b>	Machinery pits were observed at the Site.
<b>Industrial Wastewater:</b>	Activities such as the use of the wash pad generate industrial waste water.
<b>Stains:</b>	Stains ranging from de minimis to significant were observed throughout the Site.
<b>Wells:</b>	No wells were observed at the Site.
<b>Transformers:</b>	Several transformers were seen at the Site. No staining or other evidence of a release was observed in connection with these features.

<b>Other Features:</b>	No other features of note were observed.
------------------------	--

### 5.1. Site Vicinity

The Site is located in an industrial setting and is bound:

- to the north by a railroad across which are industrial buildings;
- on the east by Caliber Collision;
- to the south by the NOV office building and distribution building as well as the Label Impressions facility,
- to the west by North Eckhoff Street across which is Orange County Communications Division, Children and Family Services, and Social Services Agency.

## 6. REGULATORY AGENCY DATABASE RESEARCH

Regulatory agency database information was obtained from a standard radius Site Assessment (ASTM) report by Environmental Data Resources, Inc. The center of the search was in the approximate center of the Site. Search distances for specific databases were one-quarter to one mile as specified in the ASTM 1527-13 standard. The database search includes over 70 federal, state, local, and proprietary records. A complete copy of this report is included in Appendix B.

### 6.1. Database Records Concerning the Target Property

The Site was listed on the following databases in the EDR report:

Location	Address	Lists	REC	RATIONALE
National Oilwell Varco	759 N Eckhoff St. and 752 N. Poplar St.	EMI AST FINDS CERS RCRA-LQG EMI NPDES CIWQS HWTS CERS HAZ WASTE CERS TANKS	YES	The records available for this facility detail a long history of chemical uses that involved solvents, VOCs, PCBs, and petroleum products. Given the nature of the facility and chemical records, the possibility for unauthorized releases exists at the Site.

		HAZNET CHMIRS WDS		
Pacific Delivery System	752 N. Poplar St.	CERS HAZ WASTE HIST UST CERS TANKS RCRA NONGEN/NLR FINDS ECHO HAZNET CERS HWTS	YES	Historic UST files indicate that this facility, formerly located on the eastern side of the Site at Building 3, operated three gasoline USTs (two 10,000-gallon and one 1,000-gallon) and one 1,000-gallon waste oil UST. No records indicating confirmation that the tanks were removed or conditions of the surrounding soil were found.
Color Zoo	752 N. Poplar St.	HAZNET HWTS	NO	This former facility has a record for the disposal of almost a quarter ton of asbestos waste. While this is not considered a REC by ASTM standard, if suspect asbestos containing materials (ACMs) remain at the Site, caution should be taken to prevent the disturbance of such materials. If suspect ACMs must be disturbed, sampling and proper removal is strongly recommended.

The unknown status of the USTs and surrounding soil as well as chemical uses and general operations noted above pose as RECs to the Site.

## 6.2. Database Records Concerning the Site Vicinity

We reviewed the database report for off-Site potential sources within the relevant search distance. In review of the many entries on the database, we reviewed the following factors that affect the ability of a facility to affect the Site:

- Distance from the Site,
- Location from the Site with regard to the direction of groundwater flow,
- Nature of the release and whether the release has affected soil, groundwater or both,
- Status of the investigation (e.g. open or closed)

Groundwater was noted to flow to the southwest in a report prepared for a nearby facility, therefore facilities located adjacent to or to the northeast were further considered. Only those facilities judged using these factors are discussed below. The following presents a summary of our findings:

Location	Address	Dist.	Direction	Lists	REC	RATIONALE
King Plastics, Inc.	840 N. Elm St.	211'	E	HIST UST NPDES RCRA SQG CERS HAZ WASTE CERS TANKS FINDS ECHO HAZNET CIWQS CERS HWTS	NO	This facility has records of historical USTs containing waste oil and a petroleum product. A violation notice indicated that chlorinated solvents were used at the Site. No evidence has been presented that indicates this facility poses an environmental threat to the Site.
Inland Specialty Chemical Co.	2023 & 2033 W. Collins Ave.	497'	NNW	ENF CORTESE HIST CORTESE RCRA NONGEN/NLR RCRA SQG HIST UST FINDS ECHO HAZNET HWTS SEMS ARCHIVE ENVIROSTOR CPS-SLIC CERS	YES	VOC soil and groundwater investigations have been conducted at this Site since 1994. PCE and TCE are identified as the primary chemicals of concern. The facility has undergone soil vapor extraction remediation and received closure from the RWQCB in . However, the conditions that the Site has been closed under are close to or exceed screening levels typically used in Southern California. The closure letter also indicated that a perched groundwater layer was encountered at 53 feet bgs. Soil vapor data was not available for review. Given the proximity to the Site and residual chlorinated solvents in groundwater as well as potentially in soil vapor, HMC recognizes

						that this facility may pose a potential vapor intrusion condition.
--	--	--	--	--	--	--

### *Orphan Sites*

Orphan Sites are those properties that are included on various agency lists, but for which the records do not have sufficient address information for the database program to map the site. No orphan sites identified appear to be in the Site vicinity.

### **6.3. Summary of Off-Site Issues**

Based on the review of the available regulatory information, the Site is located in an area with an approximately 30 year history of industrial uses. Several facilities were identified to store and use hazardous chemicals and some have had releases that were subsequently closed with the relative oversight agency. None of these facilities were found to pose an environmental threat to the Site with the exception of the Inland Specialty Chemical Company. This facility has been under investigation and remediation for chlorinated solvents and received closure from the RWQCB in 1995. Given perched groundwater was encountered at 53 feet bgs, the potential for migratory VOCs poses a vapor intrusion condition at the Site, in particular the western portion of the Site given the southerly flow of groundwater reported at this facility.

## **7. LOCAL AGENCY AND OTHER RECORDS REVIEW**

### **7.1. Tribal Records**

The Site is not located in a tribal area therefore there were no tribal records to review.

### **7.2. Oil and Gas Wells**

The State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources online mapping website was reviewed for the location of active, plugged, or abandoned oil and gas wells in the vicinity of the Site. No oil or gas wells were listed as having been drilled on Site.

### **7.3. State of California**

The State of California Geotracker and EnviroStor websites were also reviewed for information on potential on or off-Site facilities that are being remediated under either

RWQCB or DTSC oversight. No active cases were listed on these databases that were not listed in the EDR review.

HMC also submitted public records requests to the DTSC and RWQCB. No responsive documents for the Site were found during the DTSC's record search. The RWQCB provided storm water records for 759 North Eckhoff Street. An entry in a Storm Water Pollution Prevention Plan inspection from 2002 stated that a clarifier and sump was located beneath the wash pad. In HMC's experience, clarifier's integrity are known to degrade over time. The noted use of the wash pad to degrease machined parts and the use of a clarifier/sump present RECs.

#### **7.4. Orange County Health Care Agency**

A public records request (PRR) was submitted online to the OCHCA. Records for the Site included Above Ground storage Tank Facility Statements and RCRA inspection records. The AST records detail inspections and AST inventory at the Site. ASTs containing various oils, coolants, acetone, transmission fluid, diesel, and gasoline have been documented at the Site. Some of the records contained violations from liquid being present in secondary containments for the ASTs. Inspection of RCRA waste provided information that blasting waste generated by NOV contains high amounts of zinc, above the Total Threshold Limit Concentration (TTL) and was considered hazardous waste. No evidence was found that indicate a release of hazardous materials has occurred at the Site.

#### **7.5. South Coast Air Quality Management District**

A review of the SCAQMD Facility Information Detail website indicates that no records were found for the Site.

#### **7.6. Orange City Fire**

A public records request was submitted to the Orange City Fire. The records found for the Site contain department inspection records as well as chemical inventory lists. One violation was found for an out of date chemical inventory. No evidence was found indicating that a release has occurred at the Site.

#### **7.7. City of Orange**

The City of Orange maintains building permits for the Site. The records found detail general tenant improvement projects such as structural additions, electrical, and fire sprinkler upgrades but contained no information of an environmental nature with the

exception of a record pertaining to the removal of two USTs located immediately east of the southeastern corner of Building 3. The permit for the removal was issued in 1989 for the 752 North Poplar Street address. A map of the tank locations was included in the permit and the approximate location of the two 10,000-gallon gasoline USTs shown is represented in Figure 2 of this report. Records for the other USTs, a 1,000 gallon gasoline UST and a 1,000-gallon waste oil UST, were not found.

## **8. VAPOR INTRUSION, ASBESTOS AND OTHER CONCERNS**

### **8.1. Vapor Intrusion**

Given the findings of this Phase I ESA, there is potential for a vapor intrusion condition from on-Site and off-Site sources.

### **8.2. Asbestos**

The Site was developed with the current structures during times when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs should be treated as such until they can be ruled out as asbestos containing through sampling. Suspect ACMs include but are not limited to joint compound, drywall, vinyl floor tiles, mastic, and roofing tar.

### **8.3. Radon**

The Site is listed as being located in Zone 3 with regards to radon indicating that radon maybe present at concentrations less than 2 pico curies / liter.

### **8.4. Mold**

Mold and water damage were not observed during this investigation.

### **8.5. Lead Based Paint**

Flaking paint was observed at various surfaces at the Site. Given the age of the building a lead based paint surface should be conducted.

## **9. SUMMARY OF FINDINGS**

Key findings of this Phase I ESA are as follows:

- The Site was observed to have historically been used for agricultural land since at least 1938 until Site was first seen to be vacant land in the mid-1970's. The Site

was then developed with the current facility and was noted with additional development from 1985 until 2016 when the Site was first seen in the approximate orientation it is in today.

- The Site has been used by industrial facilities since its development who have likely used hazardous chemicals at the Site given the nature of the businesses that historically and currently occupy the Site. Of note, the current occupant National Oilwell Varco's activities include the manufacturing of heavy equipment for the oil and gas industry. The Site vicinity was initially seen with agricultural use and then extensive industrial development in later years;
- Buildings 1 through 3 of the NOV facility were noted with significant areas of staining and spills, subsurface piping, trenches, metal plates, concrete patches, and machinery pits. Staining and spills were also noted in the hazardous waste areas along with surface staining seen in various areas around the Site, such as staining in drainage swales lead toward storm drains. What appeared to be oil was seen to be leaking from a refuse bin located in the hazardous waste storage area and entering a drain near the bin;
- A clarifier/sump was reported to be in use in conjunction with the wash pad located at the Site. The wash pad was indicated to be the location of where machined parts are washed and degreased;
- Historic UST files indicate that Pacific Delivery Service formerly located on the eastern side of the Site at Building 3 (752 North Poplar Street), operated three gasoline USTs (two 10,000-gallon and one 1,000-gallon) and one 1,000-gallon waste oil UST. No records indicating confirmation that the tanks were removed or conditions of the surrounding soil were found;
- Based on the review of the available regulatory information, the Site is located in an area with an approximately 30 year history of industrial uses. Several facilities were identified to store and use hazardous chemicals and some have had releases that were subsequently closed with the relative oversight agency. None of these facilities were found to pose an environmental threat to the Site with the exception of the Inland Specialty Chemical Company. This facility has been under

investigation and remediation for chlorinated solvents and received closure from the RWQCB in 1995. Given perched groundwater was encountered at 53 feet bgs, the potential for migratory VOCs poses a vapor intrusion condition at the Site, in particular the western portion of the Site given the southerly flow of groundwater reported at this facility. Review of the records indicate only a closure letter for this facility being available. No data from off-Site investigation into soil vapor was found;

- Given the findings of this Phase I ESA, there is potential for a vapor intrusion condition from on-Site and off-Site sources;
- The Site was developed with the current structures during times when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs should be treated as such until they can be ruled out as asbestos containing through sampling. Suspect ACMs include but are not limited to joint compound, drywall, vinyl floor tiles, mastic, and roofing tar; and,
- Flaking paint was observed at various surfaces at the Site.

## **10. DATA GAPS**

No confirmatory records for the removal of USTs were found for the historic USTs at the former Pacific Delivery Service facility reported to be located at 752 North Poplar Street.

## **11. CONCLUSIONS**

We have performed a Phase I Environmental Site Assessment in accordance with ASTM E1527-13 Guidelines for the property located at the 759 North Eckhoff Street and 752 North Poplar Street in Orange, California. **The following RECs were identified during HMC's investigation:**

- The approximately 30 year industrial use of the Site and associated chemical uses;
- Significant areas of staining and spills, subsurface piping, trenches, metal plates, concrete patches, and machinery pits;
- Unknown status of historical USTs in the vicinity of Building 3;
- Potential vapor intrusion condition from on and off-Site facilities; and,

- The reported clarifier/sump below the wash pad.

No CRECs or HRECs were identified during this investigation.

While not an REC by ASTM standards, the Site was developed with the current structures during times when asbestos containing materials (ACMs) were commonly used in construction. Suspect ACMs should be treated as such until they can be ruled out as asbestos containing through sampling. Suspect ACMs include but are not limited to joint compound, drywall, vinyl floor tiles, mastic, and roofing tar.

## **12. RECOMMENDATIONS**

Based on the findings of this ESA, we recommend the following:

- A Site wide Phase II subsurface survey should be conducted;
- A geophysical survey should be conducted around Building 3 to assess the potential presence of historical USTs;
- A lead based paint survey should be conducted at the Site; and,
- Sample all suspect ACMs prior to any disturbance such as demolition.

### **13. QUALIFICATIONS**

Mark S. Cousineau, NREP

Mr. Mark S. Cousineau, principal with HMC, has a diverse professional background in environmental management, which includes working as a generator, regulator, consultant, and corporate advisor in hazardous waste and other environmental issues.

Mr. Cousineau's technical background is focused in the area of overseeing large-scale environmental investigations and regulatory compliance management related to site assessments, subsurface investigations, facility surveys, and site remediation. To projects such as these, Mr. Cousineau brings expertise in evaluating complex sites and developing solutions to solve the technical, operational, regulatory, financial and timing issues. In addition, Mr. Cousineau routinely assists clients in developing environmental business plans for single assets and multi-site real estate portfolios and has designed and implemented several tenant audit programs involving the proactive management of environmental risk caused by on-site commercial and industrial tenant activities.

Mr. Cousineau has provided litigation support and has served, as a court-appointed expert on environmental issues, is a Member of the National Registry of Environmental Professionals, holds a M.S. in Environmental Sciences from California State University Fullerton and a B.S. in Chemistry from University California San Diego.

As signatory to this report, I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess the property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

A handwritten signature in black ink, appearing to read 'Mark S. Cousineau', with a stylized, cursive script.

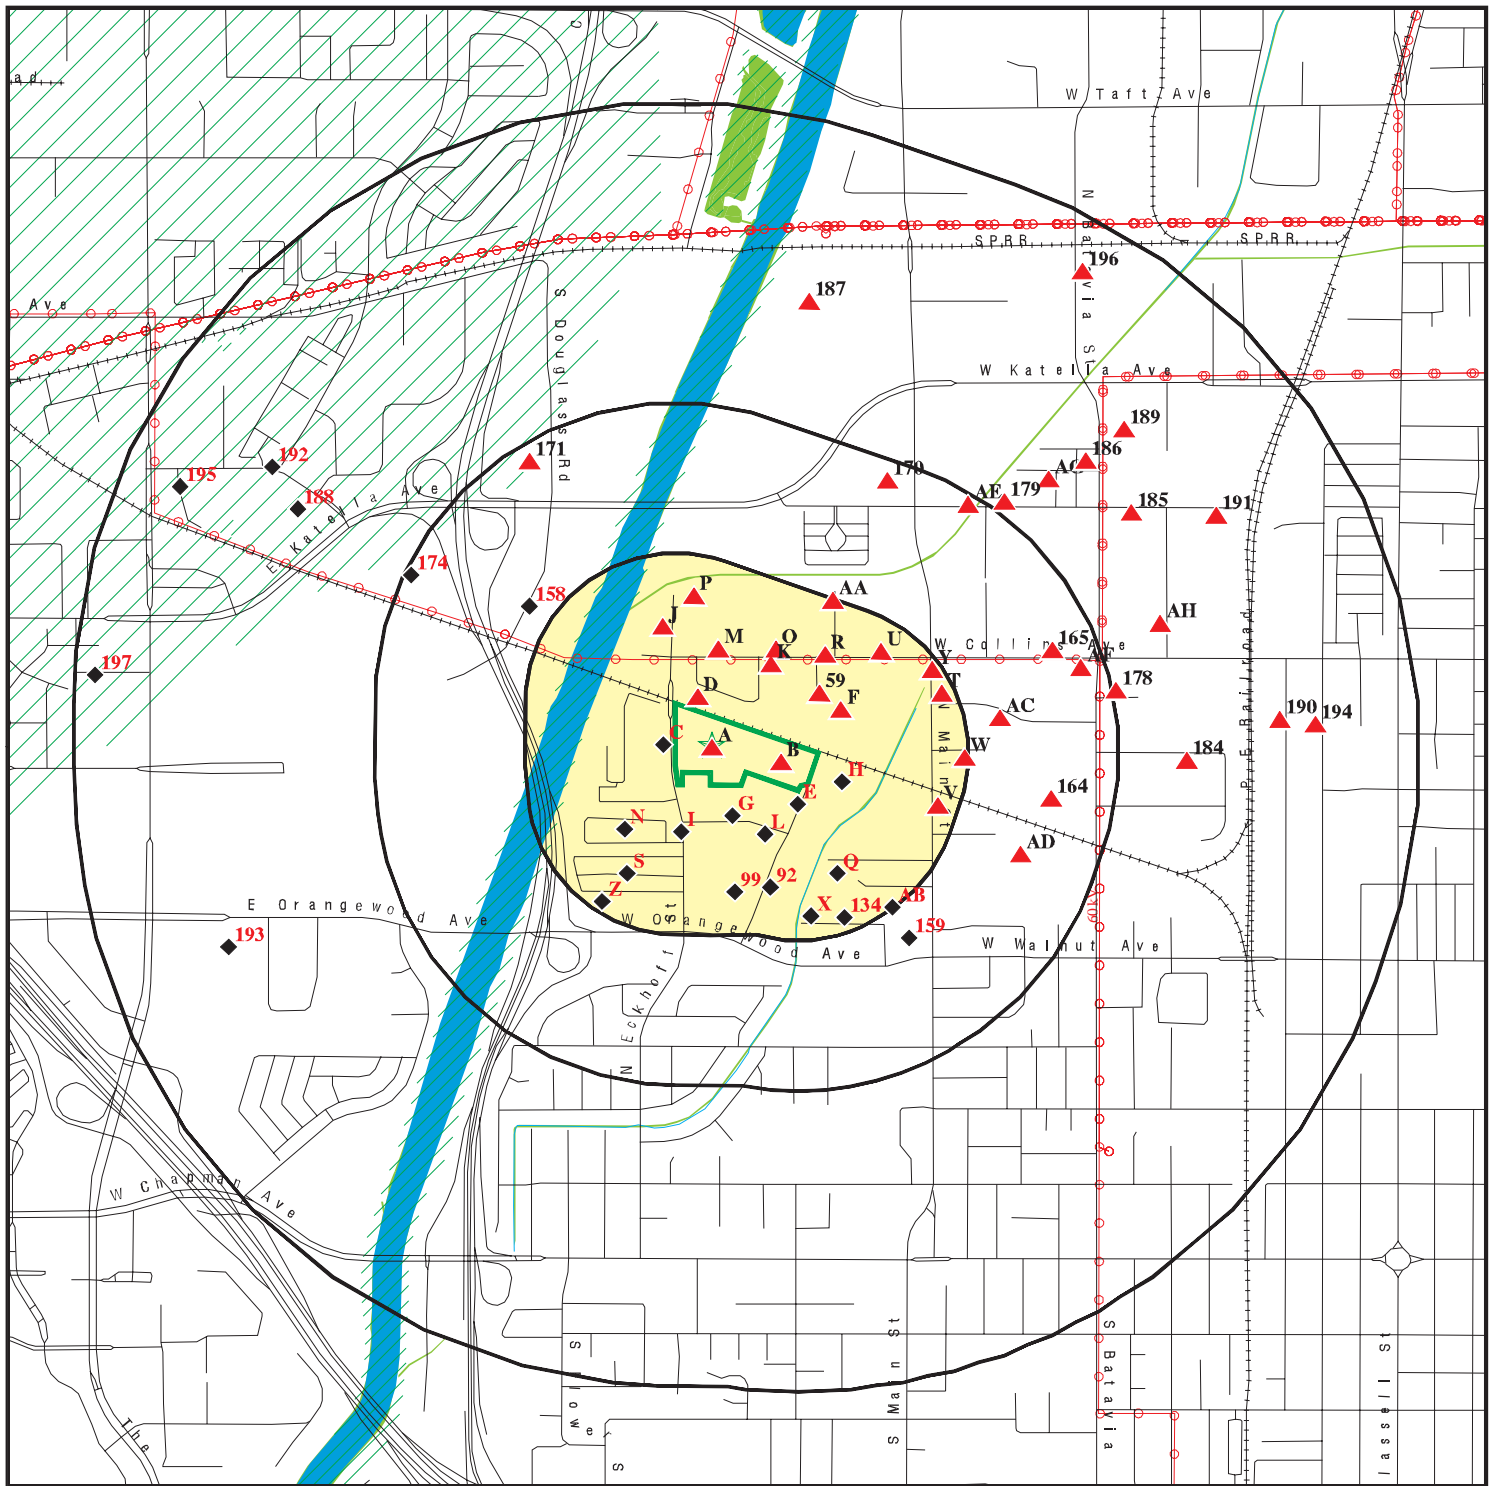

Mark Cousineau, NREP  
Principal

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hazard Management Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Project** IDI - Eckhoff St Orange

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: CDF8-45AA-B4E8

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Hazard Management Consulting (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DATA CIRCUITS Site ID: 0900349 EPA Id: CAD067625129	1607 E ORANGE GROVE	SSE 1/8 - 1/4 (0.216 mi.)	X124	999

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>DATA CIRCUITS INC</b> EPA ID:: CAD067625129	<b>1607 W ORANGE GROVE</b>	<b>SSE 1/8 - 1/4 (0.216 mi.)</b>	<b>X123</b>	<b>992</b>

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 24 RCRA-SQG sites within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

## EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 25 CA ENVIROSTOR sites within approximately 1 mile of the target property.

### **Local Lists of Registered Storage Tanks**

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

**FINDS:** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there are 3 FINDS sites within approximately 0.001 miles of the target property.

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there is 1 CA DRYCLEANERS site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 3 CA HAZNET sites within approximately 0.001 miles of the target property.

VARCO DRILLING SYSTE Facility Status: A Facility Id: 8 30I002812	743 N ECKHOFF ST	0 - 1/8 (0.000 mi.)	B12	174

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 04/20/2020 has revealed that there are 2

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005  
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Description: Chapter 12, Section(s) 66262.34(f)  
Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 09/21/2015. >>>Many (more than 6) containers storing hazardous waste were not marked with the hazardous property of the waste. Containers storing hazardous waste must be marked with the required identifying information. This was corrected during the inspection.

Violation Date: 10-04-2013  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.

Violation Notes: Returned to compliance on 11/01/2013. The SPCC lists the secondary containment for the "evaporation area" as a three walled, sloped containment area and a below grade sump. The secondary containment was determined via volume calculations of the 3 walled containment area, supplemented by volume containment of the below grade sump. The calculations list the single largest container that may fail as a 900 gallon aboveground storage tank (AST) but in fact, there is a 3,000 gallon AST in this area. Also, the containment calculations did not include any allowance for rainwater. Since the below grade sump and 3 walled containment area are subject to rain, the secondary containment calculation needs to include allowances for rainwater. Please resubmit secondary containment calculations that reflect the largest AST and rainwater, in order to determine if the secondary containment is adequate.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 12/11/2018. OBSERVATION: Failure to properly close hazardous waste containers when not in active use. The secondary containment (pallets) at several satellite accumulation areas were filled with liquid and is considered an open container. A 5-gallon bucket (located near the outside testings satellite accumulation area) containing oil was not secured with a lid. CORRECTIVE ACTION: Immediately remove the liquid from the secondary containments and/or provide secured lids for the secondary containment. Provide a lid for the 5 gallon bucket and/or placed the oil in the appropriate hazardous waste drum. Certificate of Return to Compliance (CRC) is being included with this inspection report. Once the violation has been corrected, sign the CRC and return to jwozencraft@ochca.com within 30 days.

Eval Notes: From: Krall, Joyce Sent: Monday, April 14, 2014 3:30 PM To: 'Vaquerano, Edgardo G' Subject: RE: HAZARDOUS WASTE INSPECTION Hello Edgardo, Thank you for your follow up and email update. I appreciate that NOV employees received training and that you are also working to make compliance easier by a change in equipment. The ERM labels in the photos look great (don't forget to identify the hazardous property of the ERM). I will be out to do a routine inspection of NOV's hazardous waste handling within the next month or two. Regards, Joyce Krall, REHS Hazardous Waste Specialist Environmental Health Department Orange County Health Care Agency 1241 E. Dyer Rd., Suite 120 Santa Ana, CA 92705-5611 jkrall@ochca.com 714 640-9685 (cell) 714-754-1768 (FAX)

Eval Notes:	Received calculations for the secondary containment area around the haz mat storage/evaporator area. The new calculations make allowances for the correct, single largest container (3,000 gallons) and for the rainfall. Accepted. Abate violation # AT28 listed on the 10-4-13 inspection. The facility still needs to amend the emergency response phone list to include CALEPA, in order to abate violation # AT25 before 11-7-13.

Eval Notes:	On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with environmental manager David Ramos of National Oilwell Varco (NOV). Consent to enter and collect photos was granted by Mr. Ramos. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the work areas. The following were observed on this date: 1. Proper accumulation time for waste storage was observed. 2. Emptied drums were marked empty and dated. 3. Satellite drums were located throughout the facility and in the control of the operator. All hazardous waste containers were properly stored closed and labeled. Ensure that a second date is placed on the drum once it is placed in the hazardous waste area. Maximum time allowed for a satellite drum to be on [Truncated]

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:  
Description:

Not reported  
Caller states: An employee dumped some metal chips and coolant into the wrong container. The container spilled over and spilled the coolant causing the release. Less than 1/2 gal. possibly made it into a storm drain.

**VARCO INTERNATIONAL (Continued)**

**1016185599**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Source: CERS

Evaluation:

Eval General Type: Other/Unknown  
Eval Date: 10-15-2013  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: violation status checked and updated.  
Eval Division: Orange County Environmental Health  
Eval Program: HW  
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 12-23-2015  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection, Joe Walker, front office, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included the outside lot of the shop. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were stored closed and labeled. We discussed the required information to be marked on containers storing hazardous waste. Required information: >The words "hazardous waste", > Name and address of the generator of the waste (Southwest Refrigeration, Inc., 1844 W Business Center Dr., Orange CA 92867), > Name of the waste (used oil), > Physical property of the waste (liquid), > Hazardous property of the waste (CA regulated toxic) > Accumulation start date. The signed off manifest copies for the removal of the facility's hazardous waste was on [Truncated]

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Date: 07-01-2019  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
Violation Description: Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.  
Violation Notes: The facility has not been conducting periodic inspection of aboveground petroleum storage tanks and containers. Corrective Action: Conduct periodic inspections of petroleum storage tanks as containers as described in the SPCC plan. Within 60 days provide documentation of periodic inspections.

Site ID: 411610  
Site Name: KING PLASTICS INC  
Violation Date: 01-25-2016  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 03/07/2016. The 10 gallon storage container of hazardous metal dust waste in the shop was not marked with the required information. The storage drum of hazardous oily debris waste located outside was unmarked. Mark all containers storing hazardous waste with the required identifying information. Labels were provided for use. Once completed, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Violation Notes: Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years. Returned to compliance on 03/07/2016. Facility was not conducting SPCC plan inspections. Conduct the required SPCC inspections and maintain inspection records available for review. Submit a copy of your first inspection record to this Agency for our review within 30 days.

Violation Program: APSA  
Violation Source: CERS

Site ID: 411610  
Site Name: KING PLASTICS INC  
Violation Date: 07-02-2019  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: The facility was observed to accumulate (2) 15 gallon drums of metal grindings, one 55 gallon drum of waste ink, and 2,000 gallons of waste oil for over 180 days. Corrective Action: Immediately have the waste removed by a registered hazardous waste hauler. Within 60 days provide documentation, in the form of hazardous waste manifests, to this agency.

Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Violation Description: Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.

Violation Notes: The SPCC plan has been reviewed within 5 years of the previous review, 5/17/2013. Corrective Action: Review the SPCC plan and determine if any amendments are required. Within 60 days provide documentation of the review and certification in the 5 year review log provided in the SPCC plan.

Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)  
Violation Description: Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility's discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.  
Violation Notes: The SPCC plan identified thirteen 55 gallon drums used to transfer waste oil but facility was observed to be utilizing two 275 gallon totes. Corrective Action: Amend the SPCC plan to include the two 275 gallon totes observed during the onsite inspection. Within 60 days provide documentation of the amendment to the SPCC plan.

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)  
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.  
Violation Notes: Returned to compliance on 03/07/2016. The 10 gallon container storing hazardous metal dust waste was full and unmarked with an accumulation start date. There were no records for the removal of hazardous metal dust waste removal available for inspection. Hazardous metal dust waste was also noted stored on site 1-13 during routine inspection. The allowable satellite accumulation storage time of one year has been exceeded. In addition, approximately 600 gallons of used oil was on site in a 2,000 gallon AST. There were no records of used oil removal for 2015 to present. The AST was marked with an accumulation start date of 5-11-15. The allowable SQG storage time of 180 days has been exceeded. Have these hazardous wastes removed by a registered hauler

Eval Notes: Emailed Jared Deal of King Plastic in regards to open violations at the facility. Hello Jared, Thank you for sending these manifests. I cannot correct the violation for exceeding accumulation times until you send me the manifest for the grindings so please send that. Also continue to follow up with the APSA violations: The 5 year review must be completed, the tank inspections must be submitted, and the appropriate amendments must be made to update the plan. Provide me documentation of corrective actions as soon as possible so I can close the violations. Thank you

Eval Type: Routine done by local agency  
Eval Notes: Walked the facility with Jered Deal, Compliance Manager. Verified ownership as King Plastic Inc. and the number of employees as 70. Inspected the hazardous waste storage areas, the injection mold machining area, the printing area, the storage area, the maintenance shop, the municipal trash, and the perimeter. No hazardous materials were observed in the municipal trash. Hazardous waste manifests were reviewed from the previous three years. The emergency response plan was observed in the office. A copy of this report was sent to jered.r.deal@kingplastics.com.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-25-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. I noted that the facility's hazardous waste storage drum, which I was informed contained waste compliance thinner (acetone), was marked to contain waste tetrachloroethylene. I also noted that the facility's manifests recorded the removal of waste tetrachloroethylene. We discussed following up on the correct identification of the hazardous waste. We discussed the required information to be marked on storage containers of hazardous waste. We reviewed the allowable accumulation time for the facility's hazardous [Truncated]

Eval Date: 01-25-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 17-20-14. The plan was on site and available for review. >>The SPCC plan did not identify machine reservoirs that store 55 gallons or more of a petroleum product. Confirm storage capacities and revise the SPCC plan to be accurate. SPILL CONTROL: Secondary containment was provided as described in the plan.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: The facility was observed to accumulate (2) 15 gallon drums of metal grindings, one 55 gallon drum of waste ink, and 2,000 gallons of waste oil for over 180 days. Corrective Action: Immediately have the waste removed by a registered hazardous waste hauler. Within 60 days provide documentation, in the form of hazardous waste manifests, to this agency.

Eval Date: 01-25-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency

On site for a routine hazardous waste inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. I noted that the facility's hazardous waste storage drum, which I was informed contained waste compliance thinner (acetone), was marked to contain waste tetrachloroethylene. I also noted that the facility's manifests recorded the removal of waste tetrachloroethylene. We discussed following up on the correct identification of the hazardous waste. We discussed the required information to be marked on storage containers of hazardous waste. We reviewed the allowable accumulation time for the facility's hazardous [Truncated]

Eval Date: 01-25-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency

On site for a routine above ground petroleum storage tank (APST) inspection. Jered Deal, compliance manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included shop machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 17-20-14. The plan was on site and available for review. >>The SPCC plan did not identify machine reservoirs that store 55 gallons or more of a petroleum product. Confirm storage capacities and revise the SPCC plan to be accurate. SPILL CONTROL: Secondary containment was provided as described in the plan. INSPECTIONS: We discussed [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-18-2016  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. John Wohrman, president, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We discussed identifying and marking the hazardous property of the waste on its storage container. The records for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. The facility provided written spill response directions and emergency contact numbers for their employees. report PDF to John Wohrman

CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 408691  
Site Name: LABEL IMPRESSIONS INC  
Violation Date: 05-25-2016  
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)  
Violation Description: Failure to properly dispose of hazardous waste at an authorized location.  
Violation Notes: Returned to compliance on 07/14/2016. Numerous containers sized 5 gallon and less were open and "air drying" behind the facility prior to disposal via the trash. The containers were marked laminating adhesive, gloss UV, matte UV, tints, etc.. In several of the containers, I observed dried shriveled pucks of the container's former contents. The hazardous liquids within the containers had been hazardous waste. The treatment of hazardous waste by evaporation into the air is not allowed. Cease this practice. Prior to open container storage and disposal via the trash, pour-able liquid waste must be removed from these small containers and added to the proper hazardous waste storage containers. On site I was informed by management that the violation would be corrected immediately.

Site ID: 408691  
Site Name: LABEL IMPRESSIONS INC  
Violation Date: 05-25-2016  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 07/14/2016. All containers storing the facility's hazardous waste were not marked with the required information. All containers storing hazardous waste must be marked with the required identifying information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Violation Program: HW  
Violation Source: CERS

Site ID: 408691  
Site Name: LABEL IMPRESSIONS INC  
Violation Date: 05-25-2016  
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)  
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.  
Violation Notes: Returned to compliance on 07/14/2016. The hazardous waste accumulated and stored on site had exceeded its allowable storage time. The last documented removal was over 9 months ago. Approximately ten 55 gallon drums of hazardous waste was on site this date. Have the hazardous waste removed by a registered hauler for proper recycling/disposal. Submit a copy of the removal records to this Agency within 30 days.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with George Van Over, General Manager. The facility conducts flexography printing. Operations routinely generate small quantity amounts of waste alcohol for cleaning ink off equipment, and waste ink. The facility has a laundering service for waste rags used to clean ink off parts with alcohol. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site, spill response notification was discussed. Annual employee training records were available for review. No hazardous waste violations were observed this date. This inspection report was [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-25-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Mike Ornelas, director of production, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. We discussed the required information to be marked on containers storing hazardous waste, universal waste, and excluded recyclable material (ERM). The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records were reviewed. We reviewed the proper storage times for a small quantity hazardous waste generator (SQG). We discussed the allowable storage time for satellite hazardous waste accumulation. We discussed the handling of the shop's used oil. We discussed the self-transport of the [Truncated]

Eval Notes: From: Krall, Joyce Sent: Thursday, July 14, 2016 3:17 PM To: 'Mike Ornelas' Subject: RE: HAZARDOUS WASTE INSPECTION Hello Mike, Thank you for your follow up. Attached is the report acknowledging Label ImpressionsG compliance. IG ve also attached a StateG s fact sheet regarding emptied containers simply as a FYI. It talks about handling containers sized less than 5 gallons. For what an empty container is G refer to page 2. For how to dispose of the container G refer to pages 3-4. Please contact me if you should have any questions. Regards, Joyce Krall, REHS

Site Name: JEZOWSKI AND MARKEL CONTRACTORS INC  
Violation Date: 01-28-2016  
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)  
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.  
Violation Notes: Returned to compliance on 06/01/2016. The waste sludge removed from the rooftop evaporator unit was being handled as non hazardous waste and disposed of via the trash. The evaporator unit reduces collected waste water generated from maintenance shop (includes steel grinding) wash down and the disposal of the shop hot tankG s contaminated cleaning solution. In 2015 the evaporator's waste water was removed under manifest as hazardous oily water. However, each year, the evaporatorG s sludge is cleaned out and disposed of via the trash. Cease disposal of the evaporator's sludge waste via the trash until it is demonstrated to be non hazardous. In order to make a hazardous waste determination, have a representative sample of the waste analyzed by a state certified lab for fish toxicity and California regulated heavy metals (Title 22, CCR). Perform a Total Threshold Limit Concentration (TTLC) analysis and if necessary, a Soluble Threshold Limit Concentration (STLC) analysis. Submit a copy of the lab analysis to [Truncated]

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 08/19/2013. The designated storage area for accumulated universal waste was not marked with the required identifying information. Labels were provided for use. Once corrected, please submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Eval Type: Other, not routine, done by local agency  
Eval Notes: On site for a follow up APSA inspection. Bob Baldwin, yard supervisor, provided access to inspect. The facility has closed its maintenance department. Its bulk petroleum storage containers and tanks has been removed except for one duo compartment 1000 gallon diesel / 1000 gallon gasoline AST. The AST had been emptied of fuel and was marked empty. The facility's qualifying APSA storage is below program threshold of 1325 gallons. Facility is inactivated from program. report PDF to Yesenia Martinez

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-28-2016  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Bob Baldwin, yard superintendent, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included APSTs and 55 gallon drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 9-15-12. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill pallets was provided as described in the plan. INSPECTIONS: Monthly inspections were conducted as described in the plan. Inspection records were on site and available for inspection. EMPLOYEE TRAINING: Annual employee SPCC training was records [Truncated]

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-03-2016  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Karen Thoemmes, office manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk the facility's outside lot and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We reviewed the required information to be marked on containers storing hazardous waste. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility provided written spill response directions and emergency contact numbers for their employees. report PDF to karen@thoemmescabinet.com

Eval Date: 08-07-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Karen McEuen and Roy Krieger. The facility is a Small Quantity Generator of waste oil and paint from manufacturing cabinetry and furniture. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Waste oil containers were observed properly labeled and stored closed. Ten, five gallon buckets of waste paint were observed stored open. Consent to take a photograph was denied. Mr. Krieger stated the paint was being allowed to air dry into a solid so it could be disposed of into the municipal trash. The facility is currently not managing the waste paint properly. I discussed with Mr. Krieger the proper management of the waste and to discontinue allowing the paint to air dry for disposal. This activity is being evaluated by this Agency. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. [Truncated]

Environmental Interest/Information System:

HAZARDOUS AIR POLLUTANT MAJOR  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 410865  
Site Name: CAL WEST MACHINING INC  
Violation Date: 09-20-2016  
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 10/24/2016. The facility had accumulated hazardous waste on site for over the allowable accumulation storage time. The facility's removal records showed that the last removal of hazardous waste was on 1-8-15. Have the waste removed by a registered hauler by a registered hauler for recycling / disposal immediately. Submit a copy of the removal record to this Agency within 30 days.

Eval Notes:	Email correspondence with Robert Tintelnot - Bob, If I remember correctly, these waste are being managed as satellite accumulation and must be disposed within 1 year of accumulation start date. If this is the only waste you generated, then you may qualify as conditionally exempt small quantity generator (CESQG) and could take as long as you need to accumulate 100 kg (27 gals. or 220 pounds), then once you reach that amount you have 180 days to dispose. However, in your case you generate drums of methanol or acetone waste, therefore you are not a CESQG, and the only option would be to continue with disposal within a year of accumulation. Remember, the accumulation start date is when waste is initially placed in the storage container, at which time you would date the container. You would not need to have a pickup each year, only within a year of the accumulation start date. Do not predate the container prior to accumulation. Another option would be

Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Angela Watkins, vice president finance, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The facility consists of 3 buildings operating under one EPA ID #. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. The signed off manifests for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. The facility had a business emergency plan, which contained spill response directions and emergency contact numbers. report PDF to terrywatkins@ussensor.com

Eval Date: 08-13-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Hector Castro, Manager. The facility is a Small Quantity Generator of isopropyl alcohol (IPA) and silver debris waste generated from manufacturing sensors. Manufacturing and waste generation processes were discussed. Sensor formulations are made in one gallon sized jugs and cured in an oven. The jugs are rinsed with IPA and the rinsate is managed as hazardous waste. The product is cut to size and cured again in an oven, and once more at high temperatures at which point it becomes a ceramic. The ceramic material is sprayed with silver inside a spray booth and cured in an oven. Spray booth filters as well as any debris containing silver is managed as hazardous waste. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was [Truncated]

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with facility Supervisor Huan "Denny" Nguyen. Consent was provided to enter and conduct inspection activities. Hazardous waste observed included:  
- Wipes, rags, filters, and ceramic wafers containing silver, - Solder Dross, - Spent Isopropyl Alcohol. All waste and waste containers were properly managed. Hazardous waste manifests for the hazardous waste streams were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Name: OC FLEET SERVICES  
Address: 2023 W COLLINS AVE  
City,State,Zip: ORANGE, CA 92867  
Site ID: 411914  
CERS ID: 10712401  
CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 411914  
Site Name: OC Fleet Services  
Violation Date: 07-24-2019  
Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)  
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.  
Violation Notes: Returned to compliance on 07/24/2019. OBSERVATION: Daily inspections of the following tank systems have not been conducted and documented: -500 gallon used oil tank -280 gallon spent antifreeze tank  
CORRECTIVE ACTION: Conduct and document daily inspections of all hazardous waste tank systems. Submit inspection records to this agency after one week of conducting daily inspections within 30 days.  
Violation Division: Orange County Environmental Health

Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Facility employees had not received hazardous waste handling and spill response training within the last year. Training for the employees is to be provided annually. Conduct the required annual training and maintain training records to show compliance. Submit a copy of the training outline and attendee roster to this Agency for our review within 30 days.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, and either the type of oil and storage capacity for each mobile or portable container, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.

Violation Notes: Returned to compliance on 09/19/2019. OBSERVATION: Observed that the facility did not properly address the type and storage capacity of all fixed, portable and/or mobile containers, including an estimate of the number of portable or mobile containers: -The facility changed from twenty 55-gallon drums to twenty-nine 55-gallon drums. -The correct tank size for all of the listed petroleum product tanks is 280 gallons not 250 gallons. CORRECTIVE ACTION: Amend the SPCC Plan to properly address the type and storage capacity of all fixed, portable and/or mobile containers, including an estimate of the number of portable or mobile containers. Submit proof of amendments to this agency within 30 days.

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.  
Violation Notes: Records for the removal of the facility's hazardous waste were provided for inspection. I reviewed the records for this last year. This facility had been a non RCRA hazardous waste large quantity generator (LQG). However, the shop's records for the last year showed no removal of used antifreeze or parts washer hazardous waste. The provided records showed that the facility had removed a total of 250 pounds of oily absorbents (2-24-25), 50 gallons of fuel (D001) waste (2-24-25), 55 gallons of used oil (2-11-15), and a drum of used oil filters (2-24-15) during 2015. The facility's records appear incomplete. These records contradict the accumulation starting dates marked on the hazardous waste storage containers and the shop's history as a hazardous waste LQG. Please contact your registered transporter and obtain a complete history for the removal of your facility's hazardous waste for the last 2 years. Provide a copy of the removal records to this Agency for our review. [Truncated]

Eval Program: HMRRP  
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-22-2019  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Frank Avalos, the Fleet Maintenance Manager was present for the inspection. The following APSTs with storage capacity greater than 55 gallons were observed: -Used oil - 500 gallon tank -Hydraulic oil ISO 46 - 280 gallon tank -Motor oil 15W-40 - 280 gallon tank -Delo NG 1540 oil - 280 gallon tank -Automatic transmission fluid - 280 gallon tank -Gear oil, ATF, hydraulic oil, and/or motor oil - twenty-nine 55-gallon drums -Diesel waste - 55 gallon drum -Used oil - 55 gallon drum Reviewed the self-certified Spill Prevention, Control and Countermeasure (SPCC) Plan last reviewed by the facility in 2016. Did a walk-through of the facility to verify implementation of the SPCC Plan. Observed all tanks to be double walled and all drums storing petroleum products in the lube room had secondary containment provided by a 100 gallon sump. This inspection report was emailed [Truncated]

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 12-10-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine non-RCRA LQG hazardous waste inspection. Ceasar Grijalva, supervising equipment mechanic 1, was present for the inspection and provided consent to inspect and obtain photos if necessary. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. We reviewed the required information to be marked on containers storing hazardous waste. The records for the removal of the facility's hazardous waste were requested for inspection. The records for the last year were reviewed. We discussed the requirement to maintain records of hazardous waste removal for 3 years from the date of removal and have available for inspection. The facility had a business [Truncated]

Eval General Type: Other/Unknown  
Eval Date: 10-01-2019  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: The following documents were received by this agency: -Spill Prevention Control and Countermeasure Plan created on August 2019 and self certified by Cesar B. Grijalva, the Supervising Fleet Technician, on September 19, 2019. The following violations were observed corrected and will be abated: I016, I249, I011, I320, The following CLASS II violations remain uncorrected: 1) I036 OBSERVATION: Observed one used oil 55-gallon drum to be stored at the shop area. The SPCC plan did not account for any drums at or above 55 gallons to be stored at the shop area. The used oil drum did not have sized secondary containment. CORRECTIVE ACTION: Amend the SPCC plan to include the shop area and provide sized secondary containment for the used oil drum. Alternatively, remove the 55-gallon drum from the shop area. Provide proof of either corrective action in the form of an amended SPCC plan, a picture, and/or a written statement of compliance to this agency immediately. 2) [Truncated]

Eval Date: 12-10-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Ceasar Grijalva, supervising equipment mechanic 1, was present and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products and waste in 55 gallon drums or tanks on site. The APST inspection program and Spill Control and Countermeasure Plan (SPCC) requirements were discussed. We discussed its qualifying petroleum storage and secondary containment methods. Orange County Environmental Health's website offers information regarding the APST program and its requirements for your use. You may access [www.occupainfo.com](http://www.occupainfo.com) for your use as needed. report PDF to; Ceasar.grijalva@ocpwocgov.com

Eval Notes: The following documents were received by this agency: -Proof of SPCC staff training dated August 21, 2018. The following violations were observed corrected and will be abated: I009 and I035. Please continue to correct the remaining violations: 1) I016 OBSERVATION: SPCC Plan has not been properly self certified by management. CORRECTIVE ACTION: Please self-certify the SPCC plan by completing the certification page at the beginning of the plan. Submit proof that the plan has been certified to this agency within 30 days. 2) I249 OBSERVATION: Observed that the facility did not amend the SPCC Plan within 6 months of when the following changes occurred: -The facility changed from twenty 55-gallon drums to twenty-nine 55-gallon drums of petroleum products. -The correct tank size for all of the listed petroleum product tanks is 280 gallons not 250 gallons. CORRECTIVE ACTION: Amend the SPCC Plan to include all petroleum product 55 gallon+ containers and to

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to implement the SPCC Plan.  
Violation Notes: Returned to compliance on 05/24/2019. The facility's SPCC Plan dated 2/11/13 is not being properly implemented. Note, your plan must be certified every 5 years. Your facility meets the conditions of a Tier I qualified facility which means the plan can be self certified, however please note your plan contains a 5 year review log. If nothing in the plan has changed you may use the 5 year review log to recertify the plan. Annual employee training records and monthly inspection logs were not available for review and are required to be done per your SPCC Plan. Please conduct employee training and document employee name, signature, topic of training and date, and begin conducting monthly inspections of all aboveground petroleum tanks. Please complete these items within 30 days.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage area. An oil water separator and clarifier were observed. The facility has a clarifier drain in the yard which is plumbed to a tank in the shop. The tank is plumbed to an oil water separator at which point oil is skimmed off the top and added to the waste oil tank and water on the bottom is filtered prior to draining to the sewer. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is active. Employees are reported to be trained. The facility has a Spill Prevention Control & Countermeasures (SPCC) Plan which contains emergency response notification and spill procedures. No hazardous waste violations [Truncated]

Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Jody Bonner, office manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled. The records for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. Written spill response directions and emergency contact numbers must be provided for the employees. A hazardous waste emergency response card was provided for use if needed. report PDF to Jody Bonner

Site Name: CRANE RENTAL SERVICE INC  
Violation Date: 02-05-2019  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to provide bulk storage containers with adequate secondary containment large enough to contain the entire capacity of the largest container plus additional capacity to contain precipitation when applicable, and/or failure to position/locate mobile or portable containers to prevent a discharge.

Violation Notes: Returned to compliance on 05/24/2019. The 300 gallon waste oil tank is single-walled and does not have secondary containment to contain the capacity of the container plus capacity for precipitation since the tank is located outside. Please obtain a means of secondary containment for the tank large enough to account for the tanks capacity plus capacity for rainwater within 60 days.

Evaluation:  
Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-28-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Jody Bonner, office manager, was present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included two 1000 gallon diesel, one 500 gallon red diesel, and one 300 gallon waste oil above ground tanks, along with oil product 55 gallon drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 2-11-13. The plan was on site and available for review. SPILL CONTROL: Secondary containment and spill response equipment was provided as described in the plan. INSPECTIONS: Inspections were reportedly conducted as described in the plan. [Truncated]

Eval Notes:

On site to conduct a routine Hazardous Waste inspection. Walked throughout the facility and observed the facility's Hazardous Waste storage area. An oil water separator and clarifier were observed. The facility has a clarifier drain in the yard which is plumbed to a tank in the shop. The tank is plumbed to an oil water separator at which point oil is skimmed off the top and added to the waste oil tank and water on the bottom is filtered prior to draining to the sewer. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Manifests were available for review. The facility's EPA ID number is active. Employees are reported to be trained. The facility has a Spill Prevention Control & Countermeasures (SPCC) Plan which contains emergency response notification and spill procedures. No hazardous waste violations [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 01/20/2016. The facility's removal records did not appear complete when compared to history. The records for the last year documented the removal of 145 gallons used oil, no used antifreeze, no used oil filters, no brake fluid waste, no used grease pads, no parts washer waste. In addition, I reviewed the state's hazardous waste tracker information and found 4 manifests for 2015 removals which they did not have in their records. Maintain accurate records for the removal of the facility's hazardous waste and have available for inspection.

**Evaluation:**

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-06-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Dominic DeSantis, terminal manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a review of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the facility's hazardous waste and damaged packages of hazardous material under evaluation for salvage was inspected. The storage containers were closed and labeled with the required information. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility explained their handling of return to vendor (RTV) damaged packaged hazardous materials and provided their handling records for inspection. The records for the last year [Truncated]

Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Mark Link, terminal manager of the site. Also present was Janice Rodgers, environmental monitoring specialist, consultant of the site. Walked the facility, perimeter, and inspected the hazardous waste storage area. Observed the municipal trash. No signs of illegal disposal observed. Discussed hazardous waste management with Mr. Link. Manifests and emergency response plan were reviewed. A copy of this report will be sent to mark.link@yrcfreight.com.

Violations:

Site ID:	402597
Site Name:	Southern Counties Lubricants LLC
Violation Date:	06-19-2014
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to adequately discuss facility tank car and tank truck loading/unloading rack within the plan.
Violation Notes:	Returned to compliance on 07/08/2014. The SPCC states that "spill kits" are to be used in all "loading and unloading areas". There are two kits located inside the building. One of these kits had no absorbent equipment. Also, the outside loading area (east driveway) where tankers unload their petroleum, has no spill kits available on the outside. Immediately have the one kit resupplied and have a new kit placed near the east driveway.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS
Site ID:	402597
Site Name:	Southern Counties Lubricants LLC
Violation Date:	10-11-2019
Citation:	HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description:	Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.
Violation Notes:	The SPCC Plan was last certified 12/11/12 and is no longer current. Plans must be recertified by a Professional Engineer every 5 years. Within 60 days implement and have available for review a current PE Certified SPCC Plan.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS
Site ID:	402597
Site Name:	Southern Counties Lubricants LLC
Violation Date:	09-23-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/17/2016. Two unmarked 5 gallon containers were in use to store hazardous waste oil in the warehouse. Four unmarked drums were in use to store hazardous oily absorbents waste. Containers storing hazardous waste must be marked with the required information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Violation Date: 09-23-2016  
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
Violation Notes: Returned to compliance on 10/17/2016. Open 5 gallon containers were in use to store hazardous waste oil in the warehouse. Containers storing hazardous waste must be stored closed except when active additions or removals are being made. Provide closed storage containers. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Eval Date: 09-20-2017  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine aboveground petroleum storage tank (APST) inspection. Met with Operations manager James Gibson and Director of Safety and Compliance Dean Moss. Consent was given to inspect and take photos (if necessary) of the facility. The facility is regulated under the Aboveground Storage Tank Act (APSA) for having greater than 10,000 gallons of regulated petroleum products. An SPCC plan was prepared and certified by a PE on 12/11/2012. . The SPCC re-certification will be due on 12/11/2017. All required elements of the SPCC program were in the Plan. 1) The certification of Applicability of Substantial Harm Criteria was signed and verified (12/11/2012). 2) The SPCC plan was reviewed: a. The SPCC plan states that weekly facility inspections are conducted. Tank inspection documentation was available and verified. b. The SPCC plan states that annual employee training sessions are conducted. Training documents with training topic and employee [Truncated]

Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. James Gibson, operations manager, and Dean Moss, director of safety, compliance and transportation, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the outside lot. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The records for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had a written contingency plan for the employees both in the warehouse and reportedly in the trucks. report PDF to gibsonj@scoil.com

Eval Type: Routine done by local agency  
Eval Notes: On site to conduct the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Southern Counties Lubricants/Gibson and Moss. Covered the following SPCC elements: SPCC was on site and available for review. It was written on 12-2-2012. The 5-year re certification is due on/before 12-2-2017. Technical amendments were made to add secondary containment and the amendment section was completed. The facility is planning on adding 4 more 3,000 gallon, double walled ASTs. Be sure to have the PE review these ASTs and amend the SPCC prior to being put into use. Management support and Substantial Harm forms were signed by management. The facility has 30 aboveground storage tanks (ASTs) on site. All are inside the building. AST #1-22 are single walled tanks located in a concrete berm for secondary containment. Tanks #23-30 are double walled and also located inside the concrete berm for tertiary containment. The AST sizes from [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 09-12-2013  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Dan Perez, director of operations, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage container was closed and labeled with the required information. The signed off manifests and receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. We discussed the maintenance of records for the removal of water and wash water (handled as non hazardous waste) collected from the loading dock. The facility had a SPCC plan and a business emergency plan, both of which contained spill response directions and emergency [Truncated]

Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jeffrey Lee, Director of Safety and Compliance. The facility is an oil distributor, and generates Small Quantities of hazardous waste. Walked throughout the facility and observed the facility's Hazardous Waste storage areas. There is one 180 day storage location, and the facility has satellite waste drums within the warehouse. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to

Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Jeffrey Lee, Director of Safety and Compliance. The facility is an oil distributor, with aboveground petroleum storage capacity exceeding 9,999 gallons. Within the building, the facility has 33 APSTs with a matrix of distribution piping for filling pales, drums and totes. All APSTs are located within concrete bermed areas. Tanks 1-22 and 30-33 are single-walled. Tanks 23-29 are double-walled tanks. Tanks have capacities ranging from 2,500 to 6,000 gallons. Outside, the facility has concrete bermed storage areas with roofs for 270 gallon totes and 55 gallon drums. The warehouse storage consists of 270 gallon totes and 55 gallon drums. On average, the facility stores 1,540 drums and 37 totes inside the warehouse, and 450 drums and 420 totes outside the warehouse. Grated trenches at each bay door of the warehouse provides secondary containment. Containment areas were [Truncated]

The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside work and trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste, including universal waste, was inspected. The storage containers were closed and labeled with the required information, except as noted above. The facility handles its dispenser nozzles as excluded recyclable materials (ERM). The storage of the shop's ERM was inspected. The signed off manifests and receipts for the removal of the facility's hazardous waste was on site and available for inspection. The records for the last year were reviewed. The facility had a written emergency response [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Edward Wheat, Facilities Services Manager. The facility is an unmanned fueling station. Hazardous waste was not observed on site at this time. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to wheate@scfuels.com

CORRECTED ON SITE: The glass bottles were immediately remove from the trash and will be re-rinse before disposal. According to Eileen Oblea (Environmental Health and Safety Manager) all empty containers containing chemicals are to be triple rinsed and glass containers broken placed in the glass disposal bin and the other containers return to the manufacturer. Ms. Oblea will conduct a housekeeping/container handling and disposal briefing with the staff to ensure the facility's procedures are being followed.

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 06/19/2014. Several drums of hazardous waste liquids were stored open with funnels positioned in their openings. The drums were unattended. Containers storing hazardous waste must be stored closed, except during the addition or removal of waste. The funnels were removed during the inspection, their caps used, and the drums made closed. Violation was corrected during the inspection.

Violation Description: Failure to properly dispose of hazardous waste at an authorized location.

Violation Notes: Returned to compliance on 09/14/2015. Dust generated by operations within Filler Room 1 is collected by the dust collector. The dust collector's waste was determined to be hazardous waste by laboratory analysis. Laboratory analysis of the dust collector's waste reported barium at 7,100 mg/kg and silver at 620 mg/kg. Inspection today observed hazardous dust waste generated by operations within Filler Room 1 was in the trash can within the room. Approximately 1/8 cup of dust was visible on top of the trash. Photo was obtained. Photo is attached. The dust waste in the trash can was generated from the same materials and processes as the dust collected by the room's dust collector system. The facility must cease disposal of hazardous waste within the trash. The hazardous dust observed within the trash must be removed and handled correctly. The director informed me that this practice would cease. He informed me that the hazardous dust that was in the trash can, apparently from cleaning of the room, would be [Truncated]

Evaluation:

Eval General Type: Other/Unknown  
Eval Date: 06-17-2014  
Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: Edwin called to discuss the report. He wants to know when and how the violation will be "taken off". I clarified that my inspection yesterday found that they had corrected the violation. I will provide him a F03 for the re-inspection. The hazardous waste determination is what they are now electing to do. I asked him the composition of the material used in the processes that generate the powder. He claims that it is only glass, methanol, and water. He does not know why heavy metals were detected in the powder waste. I asked for a copy of the initial report showing Ba and Ag HW.

Hazardous waste was not observed in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area and satellite accumulation storage locations in the work areas. The storage containers were closed and labeled with the required information, except as noted above. Proper accumulation time for waste storage was observed. Adequate aisle space was observed. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The bill of ladings for the removal of the facility's [Truncated]

Eval Notes: reviewed HW determination lab report results of impression material with sup. From: Krall, Joyce Sent: Tuesday, July 09, 2013 2:40 PM To: 'edwin.varela@sybrondental.com' Subject: HAZARDOUS WASTE DETERMINATION OF IMPRESSION MATERIAL Hello Edwin, Thank you for taking the time to work with me on KerrG s hazardous waste inspection. I have a question. For the hazardous waste determination of the impression material, which is being removed as non-hazardous waste, laboratory analysis of EPA method 8260B was conducted, correct? Your facilityG s file reported that for the hazardous waste determination; generatorG s knowledge regarding regulated metals, reactivity, and flammability was also used. Did you conduct a fish toxicity test? Please advise. Thank you, Joyce Krall, REHS

Eval Notes: On site for a routine RCRA large quantity generator (LQG) hazardous waste generator inspection. Met with environmental manager Eileen Oblea and Lisa Cortez of Kerr. Consent to enter and collect photos was granted by Ms. Oblea/Cortez. The facility's operations and the waste generated were discussed. The storage of the facility's hazardous waste was inspected. Hazardous waste is stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the work areas. The following were observed on this date: 1. Proper accumulation time for waste storage was observed. 2. Satellite drums were located throughout the facility and in the control of the operator. All hazardous waste containers were properly stored closed and labeled. Ensure that a second date is placed on the drum once it is deemed full. Maximum time allowed for a satellite drum to be on site is 360 days from the accumulation start date. The inspection [Truncated]

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 126771.8

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 34582.4

- Waste code: D003
- Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

Amount (Lbs): 67

- Waste code: D005
- Waste name: BARIUM
- Amount (Lbs): 2950

- Waste code: D007

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-31-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Creig Prosser, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside lot and dumpster area. I did not observe hazardous waste in the facility's trash or as run off on the ground. A hazardous waste large quantity generator (LQG) is any business that generates greater than 1000 kg (roughly 275 gallons) of hazardous waste in any month. During the last year, this facility had generated over 275 gallons of hazardous waste during a month period several times. The storage of the facility's hazardous waste was inspected. Used absorbents, fuel liquid waste, used oil, used antifreeze, and used oil filters were in storage on site this date. Adequate aisle space was observed. The receipts for the removal of the facility's hazardous waste [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 09-27-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Marc Jessner, Division Manager. The facility is a Tier I Qualified Facility of aboveground petroleum storage. The following petroleum storage capacity was observed: - 500 gallon split tank of motor oil - 500 gallon tank of waste oil - (x4) 55 gallon drums of various motor oils - 55 gallon drum of waste fuel - 1,500 gallon diesel belly tank for backup generator The APSTs on site have secondary containment. The split motor oil, waste oil, and belly tanks are double-walled, and the 55 gallon drums are stored on secondary containment pallets, which were observed free of liquid and debris. Absorbent material is stored near APSTs for emergency. The facility's

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Marc Jessner, Division Manager. The facility is a Small Quantity Generator of automotive repair wastes generated from maintenance of the facility's ambulance fleet. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to marcj@careambulance.net.

Eval Program: HW  
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-31-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Creig Prosser, maintenance manager, was present and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There is equal to or greater than 1,320 but less than 9,999 gallons of regulated petroleum products and waste in 55 gallon drums or tanks on site. The APST inspection program and Spill Control and Countermeasure Plan (SPCC) requirements were discussed. We discussed its qualifying petroleum storage and secondary containment methods. Facilities that are a qualified Tier I (less than 10,000 gallons and no single container greater than 5,000 gallons) can create and self certify a SPCC Plan using the federal template. Orange County Environmental Health has created a website that contains information regarding the APST program and its requirements. The SPCC Plan requirements have also been provided. We reviewed the APST forms on website [Truncated]

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Date: 09-18-2013  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site for a routine hazardous waste inspection. Doug Riley,  
mechanic, was present for the inspection and provided consent to  
inspect. I did not observe hazardous waste in the facility's trash or  
as run off on the ground. The storage of the shop's hazardous waste  
was inspected. The storage containers were closed and labeled with the  
required information. The signed off manifests and receipts for the  
removal of the facility's hazardous waste was on site and available  
for inspection. The records for the last year were reviewed. The  
facility had a business emergency plan, which contained spill response  
directions and emergency contact numbers. report PDF to

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 09-09-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Jennifer Abernethy, Manager. The facility is a Small Quantity Generator of automotive repair wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is NOT active. Please complete DTSC Form 1358 to reactivate your EPA ID number (attached with report). Send the form to DTSC as provided in the instructions. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to 1fleetmaster@gmail.com.
