SUBJECT: Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources

State Clearinghouse Number: 2023030261

Project Title: Right-of-Way Reinforcement Program

Project Applicant: El Dorado Irrigation District

Project Location: The Project site is located throughout un-incorporated El Dorado County

Project Description:

The program involves vegetation management within the existing utility corridors for seven of the District's approximately 88-mile water transmission pipeline system. Within the utility corridor, crews would remove trees less than 12 inches in diameter at breast height (DBH), and would clear brush, shrubs, and other woody material, with widths ranging up to 60-feet. Hazard trees within the utility corridor would be completely removed. Hazard trees are defined as 12 inches or greater DBH which threaten structures or pipeline, inhibit access to facilities, or are dead or dying. Vegetation treatments consist of mechanical or manual removal of vegetation and then chipping and broadcasting or lopping and scattering material on-site, and occasionally pile burning material where terrain limits equipment access and on-site conditions allow. Initial treatment activities are expected to be completed in approximately 5-years with ongoing maintenance of vegetation ongoing into the future as needed.

This is to advise that the El Dorado Irrigation District (Lead Agency) has approved the above described project on April 24, 2023 and has made the following determinations regarding the above described project.

1. The project [will will not] have a significant effect on the environment.
