Bonanni Development 5500 Bolsa Avenue Huntington Beach, California 92649 November 3, 2022 Project No. EN8261

Attention: Chris Segesman

Subject: Phase I Environmental Site Assessment (ESA)

8572 Talbert Avenue Fountain Valley, California

Group Delta Project No. EN8261

Dear Mr. Segesman:

Group Delta Consultants, Inc. is pleased to submit to Bonanni Development this Phase I Environmental Site Assessment report for the property located in Fountain Valley, California. This report discusses our project purpose, scope of work, execution of work, conclusions, and recommendations for the site. This Environmental Site Assessment was performed in general accordance with our proposal submitted on October 18, 2022.

We appreciate your selection of Group Delta Consultants for this project and look forward to assisting you further on this and other projects. If you have any questions, please do not hesitate to contact us.

Should you have any questions regarding this report, please feel free to call us at (949) 450-2100.

Sincerely,

GROUP DELTA CONSULTANTS, INC.

Glenn Burks, Ph.D., P.E.

Principal, Director of Environmental Services

Maps, Aerial Photographs, Topographic Maps & City Directories)

EXECUTIVE SUMMARY

Bonanni Development (herein referred to as Client) has engaged Group Delta Consultants, Inc. (Group Delta) to perform a Phase I Environmental Site Assessment (ESA) for the site at 8572 Talbert Avenue (Site) in Fountain Valley, California (Figure 1). The Site is currently occupied by Courreges Ranch and consists of one single-story residential building and a private auto garage.

This Phase I ESA was performed in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-21. This version of the ASTM standard complies with the Federal All Appropriate Inquiry (AAI) rule (40 Code of Federal Regulations [CFR] Part 312 — Standards and Practices for All Appropriate Inquiries). The purpose of the Phase I ESA is to review, evaluate, and document present and past land use and practices, and visually examine Site conditions to identify Recognized Environmental Conditions (RECs). The Phase I ESA included a Site reconnaissance, observation of adjacent properties, environmental regulatory agency records review, review of available historic documents, and an interview.

A Site reconnaissance was performed on October 26, 2022 as part of the ESA to observe current conditions throughout the Site. No evidence of RECs was identified during the Site reconnaissance.

Based on the date of development, it is possible that the Site was historically equipped with at least one septic system. Based on the residential nature of occupancy, any former, abandoned, or out-of-use on-Site septic systems do not represent a REC to the Site. However, if any septic systems are encountered upon future redevelopment, they should be should be addressed under local regulatory guidelines.

The Site formerly obtained potable water from two private domestic water wells. Based on the nature of use of the wells (domestic use only), the presence of the wells do not represent a REC to the Site. The water wells should be abandoned in accordance with California Department of Water Resources Requirements.

The Site was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on Site. The subject property is planned for redevelopment, and the entire area of the subject property will either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Based on this information and the time elapsed since prior agricultural use as row crops (approximately 45 years), the former agricultural use at the Site does not represent a REC to the Site.

This assessment also included a review of available federal and state data reported by Environmental Data Resources (EDR), available regulatory agency environmental records, and

available site history and records. No environmental concerns were identified for the Site during the regulatory database review. The review also included properties in the vicinity of the Site. Records indicated listed locations within ½ mile of the Site as listed in the EDR report. However, based on type of regulatory listing, regulatory status of the case, and/or location with respect to regional groundwater flow, the likelihood of Site contamination from an off-site source is considered low. The information procured during this investigation was used to identify, to the extent practical and within the limitations of the Scope, RECs associated with the Site due to current or past land use.

This assessment has not revealed evidence of RECs in connection to the Site. No further investigation is recommended at this time.

Based on the age of the existing structure, there is potential for asbestos-containing materials (ACMs) and/or lead-based paint (LBP)-containing materials to be present at the Site. Hazardous material abatement during demolition of existing structures should be performed in accordance with all pertinent regulations and under the guidance of a California Occupational Safety and Health Administration (Cal/OSHA)-Certified Asbestos Consultant (CAC) and/or Lead-Related Construction Inspector/Assessor.

1.0 INTRODUCTION

1.1 Background and Project Description

Bonanni Development (herein referred to as Client) has engaged Group Delta Consultants, Inc. (Group Delta) to perform a Phase I Environmental Site Assessment (ESA) for a 1.4-acre site located at 8572 Talbert Avenue (Site) in Fountain Valley, California. The Site is currently occupied by Courreges Ranch and consists of one single-story residential building and a private auto garage.

1.2 Purpose

The purpose of the Phase I ESA is to review, evaluate, and document present and past land uses and practices, and visually examine Site conditions to identify Recognized Environmental Conditions (RECs). A REC is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of release to the environment, or; (3) under conditions that pose a material threat of a future release to the environment. The REC term does not include de minimis conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.3 Detailed Scope of Work

Group Delta has interpreted American Society for Testing and Materials (ASTM) E1527-21 as the guidance document and used its provisions to the extent deemed appropriate for this report. In general, the scope of work included:

- Review of available information to describe the general geology and hydrogeology at the Site and adjacent areas;
- Search of regulatory records regarding possible hazardous material handling, spills, storage, or production at the Site or in its vicinity;
- Review of on-line available data including databases maintained by the Department of Toxic Substances Control (DTSC) and the State Water Resources Control Board (SWRCB);
- Perform agency records review of available files from the City of Fountain Valley Building Department and Fire Department, Orange County Health Care Agency (OCHCA), Santa Ana Regional Water Quality Control Board (SARWQCB), Department of Toxic Substances Control (DTSC), Department of Transportation Pipeline and Hazardous Materials Administration (PHMSA) National Pipeline Mapping System (NPMS), and California Geologic Energy Management Division (CalGEM) for on-site wells;

- Review of historic aerial photographs, historic topographic maps, Sanborn® fire maps, City Directories, and a radius map database search provided by Environmental Data Resources, Inc. (EDR);
- Reconnaissance of the Site and the immediately surrounding area to identify indicators of the existence of hazardous materials or RECs;
- Interview of an owner representative for the Site;
- Development of conclusions and findings, and;
- Preparation of a report describing the assessment and presenting the results and findings.

A statement of interpretive limitations is contained in Section 1.5 of the report.

1.4 Significant Assumptions

As stated in the previous section, this ESA was conducted in general accordance with ASTM E1527-21 to the extent deemed appropriate. This was done to identify and analyze environmental conditions that constitute existing, past, or potential environmental risks associated with the Site. Performance in accord with this standard is intended to reduce, but not eliminate uncertainty with respect to the potential for RECs associated with the Site.

1.5 Limitations and Exceptions

This ESA report is intended for the sole use of the Client and on the specific project identified. Our services have been performed under mutually agreed-upon terms and conditions. If other parties wish to rely on this report, please have them contact us so that a mutual understanding and agreement of the terms and conditions for our services can be established prior to their use and reliance of this report and the information it contains.

The findings and opinions presented are relative to the dates of our Site work and should not be relied on to represent conditions at substantially later dates. The opinions included herein are based on information obtained during the study and our experience. If additional information becomes available, which might impact our environmental findings, we request the opportunity to review the information, reassess the potential conditions, and modify our opinions, if warranted.

Although this assessment has attempted to identify the potential for environmental impacts to the Site, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, and/or (3) the presence of undetected or unreported environmental incidents.

It was not within the scope of this assessment to address issues not included in ASTM E1527-21 (such as radon, lead in drinking water, naturally-occurring hazardous materials or vegetation, endangered species, wetlands, etc.). Furthermore, it was not the purpose of this study to determine the degree or extent of contamination, if any, at the Site.

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar conditions, by reputable environmental consultants practicing in this or similar localities. No other warranty, expressed or implied, is made regarding the professional information in this report.

1.6 Special Terms and Conditions

All appropriate inquiry (AAI) into the prior uses of the Site was made in accordance with good commercial and customary practices to identify and analyze RECs constituting existing, past or potential environmental conditions in connection with the Site.

There are no special terms and conditions that apply to the preparation of this report.

1.7 User Reliance

This assessment was performed at the request of the Client, utilizing methods and procedures consistent with good commercial or customary practices designed to conform to acceptable industry standards. The assessment and conclusions presented in this report represent the best professional judgment of the Environmental Professional based on the conditions that existed during the assessment and the information and data available to us during the course of this assignment.

Factual information regarding operations and conditions provided by the Client, owner, or their representative has been assumed to be correct and complete.

The report may be distributed and relied upon by the Client, its successors and assigns. Reliance on the information and conclusions presented in this report by any other party or parties is not authorized without the written consent of Group Delta.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description of the Site

The Site is comprised of 1.4-acre site located at 8572 Talbert Avenue in the City of Fountain Valley within Orange County, California (Figure 1). The Site is also identified by the Orange County Assessor's Parcel Numbers (APNs): 112-781-73 and 112-781-74.

2.2 Site and Vicinity General Characteristics

The Site is composed of two rectangular-shaped parcels. The Site is currently occupied by Courreges Ranch and consists of one single-story residential building and a private auto garage. The Site is bordered on the north by Talbert Avenue, followed by single-family residential structures; on the south and west by single-family residential structures; and on the east by vacant land.

The Site's vicinity is generally characterized by residential use.

2.3 Current Use of the Site

The Site is currently occupied by two residential structures.

Photographic documentation of the Site is provided in Appendix A.

2.4 Site Geology

The Site is located within the Peninsular Ranges geomorphic province which is characterized by a series of ranges separated by northwest trending valleys, subparallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is more like the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend into lower California and are bound on the east by the Colorado Desert. The Los Angeles Basin and the island group (Santa Catalina, Santa Barbara, and the distinctly terraced San Clemente and San Nicolas Islands), together with the surrounding continental shelf (cut by deep submarine fault troughs), are included in this province.

2.5 Site Hydrology

A paved stormwater channel is located approximately 0.62 mile east of the Site. According to the United States Geologic Survey (USGS) 1981 topographic map of the Site and vicinity and a nearby Leaking Underground Storage Tank (LUST) case (18025 Magnolia Avenue), groundwater is anticipated to flow to the south/southeast and is expected to be encountered at less than 10 feet below ground surface.

2.6 Current Uses of Adjacent Properties

The Site is bordered on the north by Talbert Avenue, followed by single-family residential structures; on the south and west by single-family residential structures; and on the east by vacant land.

3.0 USER PROVIDED INFORMATION

3.1 Title Records

No title records were provided by the User during this ESA.

3.2 Environmental Liens or Activity and Other Use Limitations (AUL)

No reports of environmental liens or AULs were provided by the User during this ESA or identified in the title report.

3.3 Owner/Occupant Interviews

3.3.1 Current Owners

An environmental questionnaire was completed by the property owner, Mr. Ronald L. Courreges, on October 25, 2022. Mr. Courreges was unaware of any environmental concerns in connection with the Site.

3.3.2 Previous Owners

The previous owner of the Site was not identified during this Phase I ESA.

3.4 Reason for Performing ESA

The purpose of the ESA is to identify apparent and potential sources of contamination for the Site that, by their association or proximity to the Site, could represent an REC. This report can serve to identify environmental conditions at the Site that may impact the proposed project and may permit the User to satisfy one of the requirements to qualify for the bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (42 U.S.C. §9601). It was not the purpose of this study to determine the degree or extent of contamination, if any, but rather to identify the potential for contamination or environmental concern.

3.5 Review of Existing Site Reports

No prior environmental reports at the Site were provided by the User.

4.0 ENVIRONMENTAL DATA SEARCH

4.1 Database Information on the Site and the Adjacent Properties

4.1.1 Standard Environmental Record Sources for the Site and Vicinity

Group Delta conducted a review of reasonably ascertainable environmental regulatory agency databases to identify known or suspected environmental concerns or RECs that may be associated with the Site. A search of readily available environmental records was obtained from EDR of Shelton, Connecticut (Appendix B). The purpose of the regulatory database report review was to evaluate to the extent possible whether prior activities, processes, operations, or actions on the Site, adjoining properties, and nearby locations have the potential to adversely impact the environmental integrity of the Site, are suspected sources of environmental contamination, or present RECs for the Site. The regulatory database report provides information regarding current operations and prior regulatory listings for the Site and previous owners and/or operators on the Site. The presence or absence of information about the Site does not necessarily mean that there are or are not environmental issues associated with the Site.

The regulatory database report includes a list of government databases searched, a statistical profile listing the number of properties within ASTM Standard Practice specified search radii, selected detailed information from environmental regulatory agency databases, and a map illustrating the identified properties, sites, or facilities of interest.

The regulatory database report provides a mechanism to evaluate a relatively large number of environmental regulatory agency databases and eliminate many properties, sites, operations, and/or facilities that have a low potential of adversely impacting the Site. However, it should be noted that the information included in the regulatory database report is not necessarily all-inclusive and environmental regulatory agency files may have been purged by public officials prior to release to the public. In addition, mapping errors may not reflect actual distances and directions between the Site and the properties, sites, operations, and/or facilities listed in the regulatory database report.

The regulatory database report includes information from federal, state, local, military, and tribal environmental regulatory agency databases.

4.1.2 Site Records

The Site was not identified in the EDR regulatory database report.

4.1.3 Vicinity Records Search

The following sites were identified in the EDR database radius search for the project area.

Table 1 - Environmental Atlas Findings - Site Vicinity Findings

Fountain Valley School District Maintenance (17890 Newland Street)

Map Key Number 3-5

EDR Listing of Concern and Associated Databases: Multiple

The nearby property to the northwest is listed on multiple regulatory databases. According to the listings and information provided on the SWRCB GeoTracker website, an unauthorized release of gasoline that impacted soil only was discovered on September 30, 1997. The facility contained one 5,000-gallon gasoline underground storage tank (UST), one 4,000-gallon gasoline UST, one 2,000-gallon diesel UST, and one 500-gallon waste oil UST. The case was issued closure by the SARWQCB on October 28, 1997. Based on regulatory status, this former release does not represent a REC to the Site.

Julien Lecrivain (8371 Talbert Avenue)

Map Key Number 15 and 16

EDR Listing of Concern and Associated Databases: Multiple

The property located approximately 0.15 mile west of the Site is listed on multiple regulatory databases. According to the listings and information provided on the SWRCB GeoTracker website, an unauthorized release of gasoline that impacted soil and groundwater was discovered on December 18, 1985 during tank removal activities. The facility contained one 500-gallon gasoline UST. A remedial excavation was performed, and minor contamination levels were detected in soil and groundwater. The case was issued closure by the OCHCA on December 11, 1990. Based on regulatory status, this former release does not represent a REC to the Site.

A copy of the Radius Search Map is provided in Appendix B.

4.2 Historical Use Information on the Site and Adjoining Properties

Group Delta reviewed available historical information to ascertain the historical uses of the Site and the adjoining properties. Reviewed information included Sanborn insurance maps, historic aerial photographs, historic topographic maps, and city directories.

4.2.1 Historical Aerial Photography, Topographic Map Review, Sanborn Map Review

Aerial photographs and historical topographic maps of the Site and adjoining properties were provided by EDR and reviewed to identify historical land development. Aerial photographs and historical topographic maps dating between 1896 and 2018 were reviewed. Tables 2 and 3 summarize the results of the aerial photograph and topographic map reviews. Copies of the aerial photographs and topographic maps provided by EDR are included as Appendix B.

Sanborn Map coverage was not available for the Site and surrounding vicinity. A Letter of No Coverage from EDR is included as Appendix B.

Table 2 – Summary of Aerial Photographs				
Year	Summary			
1938,	The Site appears to be occupied by one residential structure and two associated agricultural			
1947, and 1953	structures in the northern portion, one agricultural structure in the southeastern portion, and agricultural land (row crops) in the southern portion. The surrounding vicinity appears to be agricultural land (row crops) and residential structures.			
1963, 1972, and 1977	The Site appears to be occupied by one residential structure and two associated agricultural structures in the northern portion, one agricultural structure in the southeastern portion, and agricultural land (row crops) in the southern portion. The surrounding vicinity appears to be occupied by the Fountain Valley School District Maintenance Yard to the north, vacant land, and residential structures.			
1987, 1990, 1994, and 2000	The Site appears to be occupied by the existing residential structure and associated private auto garage in the northern portion and vacant land in the southern portion. The surrounding vicinity appears to be occupied by the Fountain Valley School District Maintenance Yard to the north, vacant land, and residential structures.			
2005, 2009, 2012, and 2016	The Site appears to be occupied by the existing residential structure and associated private auto garage in the northern portion and vacant land in the southern portion. The surrounding vicinity appears to be occupied by vacant land and residential structures.			

Table 3 – Summary of Topographic Maps				
Year	Summary

1932,				
1935,				
1942,	The Site is depicted with two structures. The surrounding vicinity is depicted with structures.			
1949,	The site is depicted with two structures. The surrounding vicinity is depicted with structures.			
and				
1951				
1965,				
1972,	The Site is depicted with three structures. The surrounding vicinity is depicted with			
and	structures. A channel is depicted adjoining the Site to the east.			
1981				
2012,				
2015,	No structures are depicted at the Site or in the Site vicinity.			
and	ind structures are depicted at the site of in the site vicinity.			
2018				

The Site was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on Site. The subject property is planned for redevelopment, and the entire area of the subject property will either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Based on this information and the time elapsed since prior agricultural use as row crops (approximately 45 years), the former agricultural use at the Site does not represent a REC to the Site.

Representative aerial photographs, topographic maps, and Sanborn maps are included in Appendix B.

4.2.2 City Directory Report

The EDR City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. City directories generally include listings of residents or businesses organized both alphabetically and alphanumerically by street names and street addresses and are prepared for many urban and suburban areas of the United States dating back to the early 1900s.

Group Delta reviewed the city directory search prepared by EDR. The search was performed for the Site and the adjacent properties.

According to the city directory, the Site was occupied for residential use in 1964, 1968, 1973, 1976, and 1987.

The surrounding vicinity was occupied mainly for residential use from 1964 to 2014.

The city directory search results prepared by EDR are presented in Appendix B.

5.0 REGULATORY AGENCY RECORDS

5.1 Online Available Records

5.1.1 Department of Toxic Substances Control (DTSC)

Group Delta reviewed available files of the State of California DTSC published on the internet records database Envirostor. The purpose of this search was to identify any evidence of unauthorized releases of hazardous materials to the surface, subsurface soil, and groundwater.

The Site was not identified on the Envirostor database.

No RECs were identified as a result of the Envirostor database review.

5.1.2 State Water Resources Control Board (SWRCB)

Group Delta reviewed available files of the State Water Resources Control Board published on the internet records database GeoTracker. The purpose of this search was to identify any evidence of unauthorized releases of hazardous materials to the surface, subsurface soil, and groundwater.

The Site was not identified on the GeoTracker database.

No RECs were identified as a result of the GeoTracker database review.

5.1.3 California Geologic Energy Management Division (CalGEM)

Group Delta reviewed mapping available on the CalGEM website for oil and gas wells on or in the vicinity of the Project. The purpose of this search was to identify any evidence of oil production activities on or around the Site.

The Site was not identified on the CalGEM database.

No RECs were identified as a result of the CalGEM database review.

5.1.4 Office of California State Fire Marshall

Group Delta reviewed available files through the online National Pipeline Mapping System (NPMS) database maintained by the Office of California State Fire Marshal. NPMS is a Geographic Information System (GIS) database of pipeline information for the specific intent of emergency response. The database does not include natural gas lines or liquefied natural gas facilities.

The Site was not identified on the NPMS database.

No RECs were identified as a result of the NPMS database review.

5.2 Local Department Records

5.2.1 Fountain Valley City Clerk

Records were requested from the Fountain Valley City Clerk, who manages records for the Fountain Valley Building Division and Fountain Valley Fire Department, on October 24, 2022. No response was received prior to issuance of this report.

5.2.2 Orange County Health Care Agency (OCHCA)

According to a response from the OCHCA dated November 1, 2022, no records were found for the Site address.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was performed on October 26, 2022, by Laura Botzong of Group Delta.

The purpose of the Site reconnaissance was to observe the present Site use and conditions as they relate to the possible presence of potentially hazardous substances and petroleum products. In addition, adjoining properties and roads were visually observed from the Site to identify land uses and the potential presence of structures, operations, activities, or environmental conditions that may involve the use, treatment, storage, disposal, or generation of hazardous wastes and/or petroleum products that may pose an environmental concern to the Site. Photographic documentation of the reconnaissance is included in Appendix A.

6.2 General Site Setting

The Site is currently occupied by Courreges Ranch and consists of one single-story residential building and a private auto garage. According to an interview with the property owner, Mr. Ronald Courreges, the Site has been unoccupied since circa 1985. The Site has reportedly been used as a residential farm since circa 1896. The southern portion of the Site was used for row crops and the northern portion contained fruit trees. The former agricultural structures on Site were used to house livestock.

One 5-gallon plastic container of lubricating oil was observed next to the tractor on Site. The tractor and oil appeared to be in good condition, with no leaking or staining observed in the vicinity. Based on the small size of the container and good housekeeping practices observed, the tractor and associated lubricating oil do not represent a REC to the Site.

Based on the date of development, it is possible that the Site was historically equipped with at least one septic system. Based on the residential nature of occupancy, any former, abandoned, or out-of-use on-Site septic systems do not represent a REC to the Site. However, if any septic systems are encountered upon future redevelopment, they should be should be addressed under local regulatory guidelines.

The Site formerly obtained potable water from two private domestic water wells, one installed circa 1896 and the second installed in 1975. According to the property owner, the 1975-era water well is screened at approximately 200 feet below ground surface. The wells are reportedly sampled by the Orange County Water District (OCWD) at their discretion. A request for water quality records was submitted to OCWD, but a response has not been received prior to issuance of the report. Based on the nature of use of the wells (domestic use only), the presence of the wells do not represent a REC to the Site. The water wells should be abandoned in accordance with California Department of Water Resources Requirements.

Painted surfaces appeared to be in poor condition at the Site, with areas of chipping or peeling visible.

6.3 Adjacent Properties Site Observations

The properties adjacent to the Site were observed from the Site to assess if they had potential to present RECs for the Site. The Site is bordered on the north by Talbert Avenue, followed by single-family residential structures; on the south and west by single-family residential structures; and on the east by vacant land. No evidence of RECs was identified on the adjacent properties.

6.4 Site Visit Findings

No evidence of RECs was identified during the Site reconnaissance.

7.0 SIGNIFICANT DATA GAPS

7.1 Data Gaps

In general, a Data Gap is the inability to gather information as prescribed in the ASTM Standard Practice despite good faith efforts. This may include, but not be limited to, a lack of historical information, inability to interview knowledgeable individuals, or inspect portions of the Site.

Records were requested from the Fountain Valley City Clerk on October 24, 2022, and from OCWD on October 31, 2022. Responses were not received prior to issuance of this report.

No other data gaps were encountered during this assessment.

7.2 Data Failures

The objective of reviewing historical information is to identify all obvious uses of the Site from first developed use or 1940, whichever is earlier, to identify the likelihood of previous uses resulting in an REC(s). Generally, a Data Failure is when all obvious uses of the site cannot be determined despite gathering and reviewing all of the standard historical sources that are reasonably ascertainable. A historical source is considered reasonably ascertainable if it is (1) publicly available, (2) obtainable within a reasonable period and at a reasonable cost, and (3) practically reviewable.

The Site uses were identified back to 1896. Therefore, data failure was not encountered during this this assessment.

8.0 FINDINGS AND CONCLUSIONS

Group Delta has performed a Phase I ESA for the site at 8572 Talbert Avenue in Fountain Valley, California. This ESA was conducted in general accordance with the scope of work, under guidance provided by the ASTM E1527-21 standard, and in a manner generally consistent with the agreement between the Client and Group Delta for this type of report.

The information procured during this investigation was used to identify, to the extent practical and within the limitations of the Scope, RECs associated with the Site due to current or past land use.

Based on the date of development, it is possible that the Site was historically equipped with at least one septic system. Based on the residential nature of occupancy, any former, abandoned, or out-of-use on-Site septic systems do not represent a REC to the Site. However, if any septic systems are encountered upon future redevelopment, they should be should be addressed under local regulatory guidelines.

The Site formerly obtained potable water from two private domestic water wells. Based on the nature of use of the wells (domestic use only), the presence of the wells do not represent a REC to the Site. The water wells should be abandoned in accordance with California Department of Water Resources Requirements.

The Site was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on Site. The subject property is planned for redevelopment, and the entire area of the subject property will either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Based on this information and the time elapsed since prior agricultural use as row crops (approximately 45 years), the former agricultural use at the Site does not represent a REC to the Site.

This assessment has not revealed evidence of RECs in connection to the Site. No further investigation is recommended at this time.

Based on the age of the existing structures, there is potential for ACM and/or lead-based paint (LBP)-containing materials to be present at the Site. Hazardous material abatement during demolition of existing structures should be performed in accordance with all pertinent regulations and under the guidance of a California Occupational Safety and Health Administration (Cal/OSHA)-Certified Asbestos Consultant (CAC) and/or Lead-Related Construction Inspector/Assessor.

9.0 **DEVIATIONS**

There were no deviations to the ASTM Standard Practice associated with the preparation and development of this Phase I ESA.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Group Delta Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
