

## Appendix D: Phase I Environmental Site Assessment

## PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

**APN 245-05-015**

1207 North Capitol Avenue  
San Jose, California 95132

Report Date: July 13, 2022  
Partner Project No. 22-376458.1

Prepared for:

**Capitol Equity, LP**

991 West Hedding Street #103, Suite U26  
San Jose, California 95126

July 13, 2022

Mr. Dan Morrar  
Capitol Equity, LP  
991 West Hedding Street #103, Suite U26  
San Jose, California 95126

Subject: Phase I Environmental Site Assessment  
APN 245-05-015  
1207 North Capitol Avenue  
San Jose, California 95132  
Partner Project No. 22-376458.1

Dear Mr. Morrar:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 and E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 925-9672.

Sincerely,

**DRAFT**

Mark Lambson  
Principal

## EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13 and E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Capitol Equity, LP for the property located at 1207 North Capitol Avenue in San Jose, Santa Clara County, California (the "subject property").

### Property Description

The subject property is located on southwest side of North Capitol Avenue within a mixed commercial and residential area of Santa Clara County. Please refer to the table below for further description of the subject property:

#### **Subject Property Data**

<b>Address:</b>	1207 North Capitol Avenue, San Jose, California
<b>Property Use:</b>	Residential (single-family)
<b>Land Acreage (Ac):</b>	1.5 Ac
<b>Number of Buildings:</b>	One
<b>Number of Floors:</b>	Two
<b>Gross Building Area (SF):</b>	5,626 SF
<b>Net Rentable Area (SF):</b>	Not provided
<b>Date of Construction:</b>	2005
<b>Assessor's Parcel Numbers (APNs):</b>	245-05-015
<b>Type of Construction:</b>	Wood-framed
<b>Current Tenants:</b>	Residential occupants
<b>Site Assessment Performed By:</b>	Marc Hachey of Partner
<b>Site Assessment Conducted On:</b>	July 8, 2022
<b>Regulatory Radius Report Date:</b>	June 21, 2022
<b>Lien Search Date:</b>	NA
<b>Report Date:</b>	July 13, 2022
<b>FOIAs Date:</b>	June 21, 2022

The subject property is currently developed with a single-family residence. The northeastern and southeastern perimeter of the site are used for contractor equipment storage. In addition to the current structure, the subject property is improved with up-paved parking areas, associated landscaping, and drainage features.

According to available historical sources, the subject property was formerly agricultural land (orchards) with up to three former associated buildings as early as 1939 and developed with the current residence in 2005.

The adjoining properties are tabulated below:

#### **Adjoining Properties**

<b>North:</b>	North Capitol Avenue followed by residences (2516 to 2520 Amaryl Drive)
<b>Northeast:</b>	North Capitol Avenue followed by Spa 28 Aesthetic Medical Center (1206 North Capitol Avenue)

### ***Adjoining Properties***

<b>East:</b>	North Capitol Avenue followed by AutoZone Auto Parts (1204 North Capitol Avenue)
<b>Southeast:</b>	AGT Music School (1155 N Capitol Avenue)
<b>South:</b>	Villa Sport Gym (1167 N Capitol Avenue)
<b>Southwest:</b>	Residences (1202 to 1214 Old Forge Lane)
<b>West:</b>	Residences (1218 to 1222 Old Forge Lane)
<b>Northwest:</b>	Residences (2486 to 2496 Battaglia Circle)

According to the Regional Water Quality Control Boards (RWQCB) online Geotracker database and topographic maps, the physical setting features of the subject property identify the terrain as sloping to the west with the depth to groundwater in the vicinity of the subject property inferred to be approximately 80 to 100 feet below ground surface (bgs) and groundwater flow inferred to be toward the northwest.

## **Findings and Opinions**

### ***Recognized Environmental Condition***

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner conducted a Shallow Soil Investigation in September 2020 at the subject property to investigate the potential impact of organochlorine pesticides (OCPs), arsenic, and/or lead to shallow soil as a consequence of a release or releases from historical on-site agricultural-related uses. Four shallow borings were advanced at each corner of the subject property parcel. Eight soil samples were analyzed for arsenic, lead and OCPs.

The results of the investigation indicated lead impacts to the shallow soil beneath the subject property. Lead was detected in two of the eight shallow soil samples at concentrations exceeding residential screening criteria, indicating a potential human health risk for future occupants of the subject property. Based on the findings of this investigation, Partner recommended additional exploration on the subject property to evaluate the full extent of the identified lead impacts.

According to information obtained from the Client and Report User, Mr. Dan Morrar, the subject proposed future development of the subject property consists of a daycare facility. According to Mr. Morrar, redevelopment of the subject property will consist of the demolishing of the existing house and constructing a new building. Mr. Morrar stated that after the redevelopment project begins, further testing will be conducted to identify the extent of the lead in the shallow soil and excavate accordingly. Based on the known lead impacts in shallow soil at the subject property and the proposed development of a daycare facility, this represents a recognized environmental concern (REC).

### ***Controlled Recognized Environmental Condition***

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

### ***Historical Recognized Environmental Condition***

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

### ***Business Environmental Risk***

A *Business Environmental Risks (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- A property, identified as Royal Cleaners at the addresses 1192-1198 North Capitol Avenue, is located approximately 530 feet to the southeast of the subject property across North Capitol Avenue and situated hydrologically up-gradient. According to information obtained from the regulatory database report and regulatory records reviewed, a former release case was closed for a former drycleaner at this property in 1997; however, a case was reopened in 2018 after further investigation indicated that elevated levels of trichloroethylene (TCE) and tetrachloroethylene (PCE) were present in soil, soil vapor, and groundwater. Remediation has been underway in form of a soil vapor extraction (SVE) system; however, regulatory standards have not yet been met.

PCE was detected in 2019 at concentrations below the maximum contaminant limit (MCL) at a well located northeast of the former drycleaner. It was concluded within the 2019 Grab Groundwater Sampling Report obtained from the Regional Water Quality Control Board (RWQCB) GeoTracker website that the PCE release to groundwater has impacted a limited volume of groundwater and does not pose a significant threat to human health or the environment beyond the footprint of the building. As such, groundwater is not a concern to the subject property.

Soil vapor appears to be the main concern at the former drycleaner site; however, off-site soil vapor data has not been collected as of this date. According to the most recent document available on the GeoTracker website, the Department of Environmental Health (DEH) has required

a soil vapor investigation be conducted at the directly adjoining residences (not the subject property). This report was due by May 2022; however, an extension was granted and extended to June 2022. That further investigation report is either not available on GeoTracker or has not been completed yet. It is unlikely, but not impossible that the subject property may need additional investigation once the release case has been delineated further.

Based on the relative distance across a main roadway, the lack of groundwater impact, and the remediation and regulatory oversight in place, the open release case is not expected to represent a significant environmental issue at this time.

- Sanitary discharges from the subject property are directed to an onsite septic system. The septic system is located adjacent to and south of the residence. It is presumed that this system was installed around the time the residence was constructed (circa 2005). Based on the age of the system and the reported regular maintenance of the system, the septic system is not expected to represent a significant environmental concern.
- According to the provided Well Completion Report, dated May 9, 2022, a former 190-foot-deep groundwater well was removed from the southeast portion of the subject property. Based on the regulatory closure of this feature, the former water well does not represent a significant environmental concern.

### ***Significant Data Gaps***

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

### **Conclusions and Recommendations**

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 1207 North Capitol Avenue in San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of RECs in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- Partner recommends that during the redevelopment process, the lead impact soils should be addressed and excavated accordingly.

## 1.0 INTRODUCTION

---

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 1207 North Capitol Avenue in San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

### 1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13 and E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

### 1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-13 and E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal

or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

### **1.3 Limitations**

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

### **1.4 User Reliance**

Capitol Equity, LP engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Capitol Equity, LP. Either verbally or

in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

## **1.5 Limiting Conditions**

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13 and E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner submitted a Freedom of Information Act (FOIA) request to the San Jose Fire Department for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjoining properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical resources, this limitation is not expected to alter the overall findings of this assessment.

## 2.0 SITE DESCRIPTION

---

### 2.1 Site Location and Legal Description

The subject property at 1207 North Capitol Avenue in San Jose, California is located on southwest side of North Capitol Avenue. According to the Santa Clara County Assessor, the subject property is legally described as Assessor Parcel Number (APN) 245-05-015. According to Santa Clara County Assessor, ownership has been vested in Capitol Equity, LP since 2020.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

### 2.2 Current Property Use

The subject property is currently developed with a single-family residence. The northeastern and southeastern perimeter of the site are used for contractor equipment storage. The two-story residence is situated at the northern corner of the subject property. In addition to the current structure, the subject property is improved with up-paved parking areas, associated landscaping, and drainage features.

The subject property is designated for residential development by the City of San Jose.

The subject property was not identified in the regulatory database report of Section 4.2.

### 2.3 Current Use of Adjoining Properties

The subject property is located within a mixed commercial and residential area of Santa Clara County. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM E1527-13 and E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

#### ***Adjoining Properties***

<b>North:</b>	North Capitol Avenue followed by residences (2516 to 2520 Amaryl Drive)
<b>Northeast:</b>	North Capitol Avenue followed by Spa 28 Aesthetic Medical Center (1206 North Capitol Avenue)
<b>East:</b>	North Capitol Avenue followed by AutoZone Auto Parts (1204 North Capitol Avenue)
<b>Southeast:</b>	AGT Music School (1155 N Capitol Avenue)
<b>South:</b>	Villa Sport Gym (1167 N Capitol Avenue)
<b>Southwest:</b>	Residences (1202 to 1214 Old Forge Lane)
<b>West:</b>	Residences (1218 to 1222 Old Forge Lane)
<b>Northwest:</b>	Residences (2486 to 2496 Battaglia Circle)

The adjacent property to the northeast was identified as a Certified Unified Program Agencies Listing (CUPA) Santa Clara, HAZ San Jose, California Environmental Reporting System Hazardous (CERS Haz), and Resource Conservation and Recovery Act-Non-Generator (RCRA-NON GEN) site; the adjacent property to the east was identified as a Construction and Demolition Debris Recyclers (C&D Debris Recy.), CERS HAZ, HAZ San Jose, and CUPA Santa Clara site; The adjoining property to the southeast was identified as a Delisted HAZ, CUPA Santa Clara, and RCRA-NonGen site; the adjoining property to the southeast was identified as a CUPA Santa Clara site; the adjacent property to the south was identified as a CERS HAZ and

CUPA Santa Clara site; the adjacent property to the southwest was identified as a Hazardous Waste Information System (HAZNET) site; and the adjacent property to the southwest was identified as a Facility Index System/Facility Registration System/Facility Registry Service (FINDS/FRS) and RCRA-NonGen site in the regulatory database report, as further discussed in Section 4.2.3.

## **2.4 Physical Setting Sources**

### **2.4.1 Topography**

The 2021 United States Geological Survey (USGS) *Milpitas, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 140 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west-northwest.

A copy of the most recent topographic map is included as Figure 3 of this report.

### **2.4.2 Hydrology**

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. According to the California Regional Water Quality Control Boards online Geotracker database and topographic maps, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the west-northwest.

According to a previous subsurface investigation conducted on a nearby property (1192-1198 North Capitol Avenue and Case #T10000007713), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 80 to 100 feet below ground surface (bgs)

The nearest surface water to the subject property is Penitencia Creek located approximately 0.50 miles and geographical southeast of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by San Jose Water serves the subject property vicinity. According to the 2020 Water Quality Report, the sources of public water for the subject property is groundwater supplied from groundwater wells located at unknown locations in the Santa Clara County.

### **2.4.3 Geology/Soils**

The subject property is located within the Coast Ranges geomorphic province of Northern California. The Coast Ranges are characterized as parallel mountain ranges and valleys displaced by strike-slip earthquake faults. The site is underlain by Holocene-aged alluvial soils consisting of mixed gravel, sand, silt and clay.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Still complex on 0 to 2 percent slope. These complexes consist of well-drained, thick, fine to medium-grained alluvial soil.

#### **2.4.4 Flood Zone Information**

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency (FEMA). According to Community Panel Number 06085C0088J, dated February 19, 2014, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

### 3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

<b>Historical Use Information</b>		
<b>Years</b>	<b>Resource</b>	<b>Description/Use</b>
1889-1899	Topographic Maps	Undeveloped land
1939-2004	Aerial Photographs, Topographic Maps, City Directories	Agricultural land (orchards) with up to three associated buildings
2005-Present	Aerial Photographs, Topographic Maps, Building Records, Interviews, Onsite Observations	Residential and storage yard

The subject property parcel was historically used for agricultural purposes. A Phase II Shallow Soil Investigation was conducted on the subject property in September 2020; this report is further discussed in Section 5.2.6.

#### 3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on June 21, 2022. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

<b>Date:</b>	<b>1939, 1948</b>	<b>Scale:</b>	<b>1"=500'</b>
<b>Subject Property:</b>	Appears to be agricultural land (orchard) and up to three former structures on the eastern portion		
<b>North:</b>	Appears to be agricultural land and a former building across North Capitol Avenue		
<b>Northeast:</b>	Appears to be agricultural land and a former building across North Capitol Avenue		
<b>East:</b>	Appears to be agricultural land and a few former buildings across North Capitol Avenue		
<b>Southeast:</b>	Appears to be agricultural land		
<b>South:</b>	Appears to be agricultural land		
<b>Southwest:</b>	Appears to be agricultural land		
<b>West:</b>	Appears to be agricultural land		
<b>Northwest:</b>	Appears to be agricultural land		

<b>Date:</b>	<b>1956, 1960, 1968</b>	<b>Scale:</b>	<b>1"=500'</b>
<b>Subject Property:</b>	No significant visible changes		
<b>North:</b>	No significant visible changes		
<b>Northeast</b>	No significant visible changes		
<b>East:</b>	No significant visible changes		
<b>Southeast</b>	Developed with what appears to be a few small former buildings		
<b>South:</b>	No significant visible changes		
<b>Southwest:</b>	No significant visible changes

Copies of reviewed aerial photographs are included in Appendix B of this report.

### 3.2 Fire Insurance Maps

Partner reviewed the collection of fire insurance maps (FIMs) from ERIS on June 20, 2022. FIM coverage was not available for the subject property.

### 3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on June 21, 2022 for past names and businesses that were listed for the subject property and adjoining properties. The findings are tabulated below:

#### ***City Directory Search for 1207 North Capitol Avenue (Subject Property)***

<b>Year(s)</b>	<b>Occupant Listed</b>
----------------	------------------------

1925-	No listings (1207 North Capitol Avenue)
2020	

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

#### ***City Directory Search for North Adjoining Properties 2516 to 2520 Amaryl Drive***

<b>Year(s)</b>	<b>Occupant Listed</b>
----------------	------------------------

1925-	Not researched (2516 to 2520 Amaryl Drive)
2020	

#### ***City Directory Search for Northeast Adjoining Properties 1206 North Capitol Avenue***

<b>Year(s)</b>	<b>Occupant Listed</b>
----------------	------------------------

1925-	No listings (1206 North Capitol Avenue)
1971	
1976-	John Ledesma (1206 North Capitol Avenue)
1981	
1987	Wonderland Pre School (1206 North Capitol Avenue)
1990	Terri Hunt (1206 North Capitol Avenue)
1995	Deborah Anderson MD (1206 North Capitol Avenue)
2003-	Dental offices (1206 North Capitol Avenue)
2020	

#### ***City Directory Search for East Adjoining Properties 1204 North Capitol Avenue***

<b>Year(s)</b>	<b>Occupant Listed</b>
----------------	------------------------

***City Directory Search for East Adjoining Properties 1204 North Capitol Avenue***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-1976	No listings (1204 North Capitol Avenue)
1981-1990	Kinney Shoes (1204 North Capitol Avenue)
1995	Steve's Goodtime VDO (1204 North Capitol Avenue)
2008-2020	Auto Zone (1204 North Capitol Avenue)

***City Directory Search for Southeast Adjoining Properties 1155 N Capitol Avenue***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-1987	No listings (1155 N Capitol Avenue)
1990-2020	Multi-tenant commercial listing, mostly dental offices (1155 N Capitol Avenue)

***City Directory Search for South Adjoining Properties 1167 N Capitol Avenue***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-2016	No listings (1167 N Capitol Avenue)
2020	Villa Sport Athletic Club and Spa (1167 N Capitol Avenue)

***City Directory Search for Southwest Adjoining Properties 1202 to 1214 Old Forge Lane***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-1971	No listings (1202 to 1214 Old Forge Lane)
1976-2020	Residential listings (1202 to 1214 Old Forge Lane)

***City Directory Search for West Adjoining Properties 1218 to 1222 Old Forge Lane***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-1971	No listings (1218 to 1222 Old Forge Lane)
1976-2020	Residential listings (1218 to 1222 Old Forge Lane)

***City Directory Search for Northwest Adjoining Properties 2486 to 2496 Battaglia Circle***

<b>Year(s)</b>	<b>Occupant Listed</b>
1925-1971	No listings (2486 to 2496 Battaglia Circle)
1976-2020	Residential listings (2486 to 2496 Battaglia Circle)

Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

### 3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from ERIS on June 20, 2022. The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

<b>Date:</b> 1889, 1897, 1899	
<b>Subject Property:</b>	Depicted as unimproved land
<b>North:</b>	Depicted with structures across North Capitol Avenue
<b>Northeast:</b>	Depicted with structures across North Capitol Avenue
<b>East:</b>	Depicted with structures across North Capitol Avenue
<b>Southeast:</b>	Depicted as unimproved land
<b>South:</b>	Depicted as unimproved land
<b>Southwest:</b>	Depicted as unimproved land
<b>West:</b>	Depicted as unimproved land
<b>Northwest:</b>	Depicted as unimproved land
<b>Date:</b> 1943, 1953, 1961, 1968	
<b>Subject Property:</b>	Depicted with up to three former structures
<b>North:</b>	No significant visible changes
<b>Northeast:</b>	No significant visible changes
<b>East:</b>	No significant visible changes
<b>Southeast:</b>	Depicted with former structures
<b>South:</b>	Depicted as agricultural land
<b>Southwest:</b>	Depicted as agricultural land
<b>West:</b>	Depicted as agricultural land
<b>Northwest:</b>	Depicted as agricultural land
<b>Date:</b> 1973, 1980	
<b>Subject Property:</b>	No significant visible changes
<b>North:</b>	Depicted with the existing residences across North Capitol Avenue
<b>Northeast:</b>	No significant visible changes
<b>East:</b>	No significant visible changes
<b>Southeast:</b>	No significant visible changes
<b>South:</b>	No significant visible changes
<b>Southwest:</b>	Depicted with the existing residences
<b>West:</b>	Depicted with the existing residences
<b>Northwest:</b>	Depicted with the existing residences

Copies of reviewed topographic maps are not included in Appendix B of this report.

## 4.0 REGULATORY RECORDS REVIEW

---

### 4.1 Regulatory Agencies

#### 4.1.1 State Department

##### **Regulatory Agency Data**

**Name of Agency:** California Environmental Protection Agency (CalEPA)

**Point of Contact:** Not applicable

**Agency Address:** 1001 I Street, Sacramento, California

**Agency Phone Number:** (916) 323-2514

**Date of Contact:** June 21, 2022

**Method of Communication:** Online

**Summary of Communication:**

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the CalEPA.

#### 4.1.2 Health Department

##### **Regulatory Agency Data**

**Name of Agency:** Santa Clara County Department of Environmental Health (SCCDEH)

**Point of Contact:** Staff

**Agency Address:** 1555 Berger Drive, San Jose, California

**Agency Phone Number:** (408) 918-3400

**Date of Contact:** June 21, 2022

**Method of Communication:** Online request

**Summary of Communication:**

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the SCCDEH.

#### 4.1.3 Fire Department

##### Regulatory Agency Data

**Name of Agency:** San Jose Fire Department (SJFD)  
**Point of Contact:** Not applicable  
**Agency Address:** 1661 Senter Road, San Jose, California  
**Agency Phone Number:** 408-794-7000  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online request

**Summary of Communication:**

As of the date of this report, Partner has not received a response from the SJFD for inclusion in this report.

#### 4.1.4 Air Pollution Control Agency

##### Regulatory Agency Data

**Name of Agency:** Bay Area Air Quality Management District (BAAQMD)  
**Point of Contact:** Ms. Rochelle Henderson  
**Agency Address:** 939 Ellis Street, San Francisco, California  
**Agency Phone Number:** 415-771-6000  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online request

**Summary of Communication:**

No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the BAAQMD.

#### 4.1.5 Regional Water Quality Agency

##### Regulatory Agency Data

**Name of Agency:** Regional Water Quality Control Board (RWQCB)  
**Point of Contact:** Not applicable  
**Agency Address:** 1515 Clay Street, Oakland, California  
**Agency Phone Number:** 510-622-2300  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online

**Summary of Communication:**

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB. The subject property was not identified on the GeoTracker database.

#### 4.1.6 Department of Toxic Substances Control

##### Regulatory Agency Data

**Name of Agency:** California Department of Toxic Substances Control – Berkeley Region (DTSC)  
**Point of Contact:** Not applicable  
**Agency Address:** 700 Heinz Avenue, Berkeley, California  
**Agency Phone Number:** 925-931-5300  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online  
**Summary of Communication:**

#### **Regulatory Agency Data**

The subject property is not listed within the DTSC's online ENVIROSTOR database related to reported spills and leaks.

#### **4.1.7 Building Department**

##### **Regulatory Agency Data**

**Name of Agency:** City of San Jose Planning, Building and Code Enforcement Department (SJPBCED)  
**Point of Contact:** Not applicable  
**Agency Address:** 200 E Santa Clara St, San Jose, California  
**Agency Phone Number:** (408) 535-3555  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online

**Summary of Communication:**

Records were available for review, as further discussed in the following table.

##### **Building Records Reviewed for 1207 North Capitol Avenue (Subject Property)**

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description</b>
2003	Not provided	New residence and attached garage, including new water service and septic tank
2022	Not provided	Demolish existing residence and replace with new day care

#### **4.1.8 Planning Department**

##### **Regulatory Agency Data**

**Name of Agency:** City of San Jose Planning, Building and Code Enforcement Department (SJPBCED)  
**Point of Contact:** Not applicable  
**Agency Address:** 200 E Santa Clara St, San Jose, California  
**Agency Phone Number:** (408) 535-3555  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online

**Summary of Communication:**

According to records reviewed, the subject property is zoned 'R-1-8' for residential development by the City of San Jose.

#### **4.1.9 Oil & Gas Exploration**

##### **Regulatory Agency Data**

**Name of Agency:** California Geologic Energy Management Division (CalGEM)  
**Point of Contact:** Not applicable  
**Agency Address:** 801 K Street, MS 24-01, Sacramento, California  
**Agency Phone Number:** (916) 445-9686  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online

**Summary of Communication:**

According to the CalGEM Well Finder, no oil or gas wells are located on or adjoining to the subject property.

#### 4.1.10 Assessor's Office

##### **Regulatory Agency Data**

**Name of Agency:** Santa Clara County Assessor (SCCA)  
**Point of Contact:** Not provided  
**Agency Address:** 70 W Hedding Street, San Jose, California  
**Agency Phone Number:** (408) 299-5500  
**Date of Contact:** June 21, 2022  
**Method of Communication:** Online

##### **Summary of Communication:**

According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 245-05-015 has been owned by Capitol Equity, LP since 2020. The current building was constructed in 2005 and totals approximately 5,626 square feet on a 1.5-acre lot.

Copies of pertinent documents are included in Appendix B of this report.

## 4.2 Mapped Database Records Search

The regulatory database report provided by ERIS documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM E1527-13 and E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

### 4.2.1 Regulatory Database Summary

The following table lists the number of sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

##### **Radius Report Data**

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	
Federal NPL	1.00	N	N	N
Delisted NPL Site	0.50			
Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N

## Radius Report Data

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	N	N	N/A
Federal IC/EC Registries	Subject Property	N	N/A	N/A
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	N	N	N/A
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N/A
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
Other Databases	Varies	N	Y	Y

### 4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

### 4.2.3 Adjoining Property Listings

The adjacent property to the northeast was identified as a CUPA Santa Clara, HAZ San Jose, CERS HAZ, and RCRA-NonGen site; the adjacent property to the east was identified as a C&D Debris Recycler, CERS HAZ, HAZ San Jose, and CUPA Santa Clara site; the adjoining property to the southeast was identified as a Delisted HAZ, CUPA Santa Clara, and RCRA-NonGen site; the adjoining property to the southeast was identified as a CUPA Santa Clara site; the adjacent property to the south was identified as a CERS HAZ and CUPA Santa Clara site; the adjacent property to the southwest was identified as a HAZNET site; and the adjacent property to the southwest was identified as a FINDS/FRS and RCRA-NonGen site in the regulatory database report, as discussed below:

- The property, identified as Sal E&R Lawnmower Shop at 1191 North Capitol Avenue, is located adjoining to the southeast of the subject property. The site is identified as a CUPA Santa Clara site (generates waste oil only). No significant violations were reported, and no releases to the subsurface were noted.
- The property, identified as Lucerio Corazon at 1214 Old Forge Lane, is located adjoining to the southwest of the subject property. The site is identified as a HAZNET site for the generation of 0.4 tons of Asbestos containing waste in 2014. No significant violations were reported, and no releases to the subsurface were noted.

- The property, identified as Robert Sottardi at 1206 Old Forge Lane, is located adjoining to the southwest of the subject property. The site is identified as RCRA-NonGen and FRS/FINDS site. The RCRA-NonGen listing indicates “Not a Generator, Verified” in 2018. No significant violations were reported, and no releases to the subsurface were noted.
- The property, identified as Villa Sport at 1167 North Capitol Avenue, is located adjoining to the south of the subject property. The site is identified as CERS HAZ and CUPA Santa Clara site. The Chemical Storage Facilities site was inspected by Santa Clara County Environmental Health in 2018 and 2021. No significant violations were reported, and no releases to the subsurface were noted.
- The property, identified as Colin S Ilas MD and Smile Design Dentistry at 1206 North Capitol Avenue, is located adjoining to the northeast of the subject property. The site is identified as CUPA Santa Clara, HAZ San Jose, CERS HAZ, and RCRA-NonGen site. The Hazardous Waste Generator site was inspected by Santa Clara County Environmental Health in 2016 and 2021. No significant violations were reported, and no releases to the subsurface were noted.
- The property, identified as Auto Zone at 1204 North Capitol Avenue, is located adjoining to the east of the subject property. The site is identified as C&D Debris Recycler, CERS HAZ, HAZ San Jose, and CUPA Santa Clara site. The Hazardous Waste Generator site and Chemical Storage Facilities site was inspected by Santa Clara County Environmental Health in 2015. Waste oil is collected onsite for recycling. No significant violations were reported, and no releases to the subsurface were noted.
- The property, identified as various dental offices at 1155 North Capitol Avenue, is located adjoining to the southeast of the subject property. The site is identified as Delisted HAZ, CUPA Santa Clara, and RCRA-NonGen. No significant violations were reported, and no releases to the subsurface were noted.

Based on the above, the adjacent properties are not expected to represent a significant environmental issue.

#### **4.2.4 Surrounding Area Listings of Concern to Subject Property**

- A property, identified as Royal Cleaners at the addresses 1192-1198 North Capitol Avenue, is located approximately 530 feet to the southeast of the subject property across North Capitol Avenue and situated hydrologically up-gradient. According to information obtained from the regulatory database report and regulatory records reviewed, a former release case was closed for a former drycleaner at this property in 1997; however, a case was reopened in 2018 after further investigation indicated that elevated levels of trichloroethylene (TCE) and tetrachloroethylene (PCE) were present in soil, soil vapor, and groundwater. Remediation has been underway in form of a soil vapor extraction (SVE) system; however, regulatory standards have not yet been met. PCE was detected in 2019 at concentrations below the maximum contaminant limit (MCL) at a well located northeast of the former drycleaner. It was concluded within the 2019 Grab Groundwater Sampling Report obtained from the Regional Water Quality Control Board (RWQCB) GeoTracker website that the PCE release to groundwater has impacted a limited volume of

groundwater and does not pose a significant threat to human health or the environment beyond the footprint of the building. As such, groundwater is not a concern to the subject property.

Soil vapor appears to be the main concern at the former drycleaner site; however, off-site soil vapor data has not been collected as of this date. According to the most recent document available on the GeoTracker website, the Department of Environmental Health (DEH) has required a soil vapor investigation be conducted at the directly adjoining residences (not the subject property). This report was due by May 2022; however, an extension was granted and extended to June 2022. That further investigation report is either not available on GeoTracker or has not been completed yet.

It is unlikely, but not impossible that the subject property may need additional investigation once the release case has been delineated further. Based on the relative distance across a main roadway, the lack of groundwater impact, and the remediation and regulatory oversight in place, the open release case is not expected to represent a significant environmental issue at this time.

#### **4.2.5 Unplottable Listings**

No unplottable listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

## 5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13 and E1527-21, Partner requested the following site information from Capitol Equity, LP (User of this report).

### ***User Responsibilities***

<b>Item</b>	<b>Provided By User</b>	<b>Not Provided By User</b>
AAI User Questionnaire	<b>X</b>	
Title Records, Environmental Liens, and AULs		<b>X</b>
Specialized Knowledge		<b>X</b>
Actual Knowledge		<b>X</b>
Valuation Reduction for Environmental Issues		<b>X</b>
Identification of Key Site Manager	<b>X</b>	
Reason for Performing Phase I ESA	<b>X</b>	
Prior Environmental Reports	<b>X</b>	
Other		<b>X</b>

## 5.1 Interviews

### 5.1.1 Interview with Owner

Mr. Dan Morrar, subject property owner representative and report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Morrar, the subject property was developed in 2005 for residential use. Mr. Morrar was unfamiliar with the site history prior to 2005, but indicated Partner performed a shallow subsurface investigation summarized in the report dated September 30, 2020. Related to the results of the 2020 investigation, Mr. Morrar indicated that the minor lead soil contamination will be remediated during grading activities for the proposed future site development. Mr. Morrar further stated that there are no USTs (other than septic), ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

#### **5.1.2 Interview with Report User**

Please see interview above for information obtained from the subject property owner and report user.

#### **5.1.3 Interview with Key Site Manager**

Mr. Jeffrey Woo, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Woo, who provided access to the site, the subject property was developed in 2005 for residential use. Mr. Woo identified the location of the existing septic system to the south of the residence, and that the previous onsite water well that was recently destroyed. Mr. Woo further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

#### **5.1.4 Interviews with Past Owners, Operators, and Occupants**

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

### **5.2 User Provided Information**

#### **5.2.1 Title Records, Environmental Liens, and AULs**

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

#### **5.2.2 Specialized Knowledge**

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

#### **5.2.3 Actual Knowledge of the User**

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

#### **5.2.4 Valuation Reduction for Environmental Issues**

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

#### **5.2.5 Commonly Known or Reasonably Ascertainable Information**

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

#### **5.2.6 Previous Reports and Other Provided Documentation**

The following information was provided to Partner for review during the course of this assessment:

Shallow Soil Investigation Report, Partner Engineering and Science Inc. (September 30, 2020)

Partner Engineering and Science Inc. (Partner) prepared this report on behalf of Peak EF Corp. Partner conducted a Shallow Soil Investigation at the subject property to investigate the potential impact of organochlorine pesticides (OCPs), arsenic, and/or lead to shallow soil as a consequence of a release or releases from historical on-site agricultural-related uses.

Four shallow borings were advanced at each corner of the subject property parcel. Eight soil samples were analyzed for arsenic, lead and OCPs.

The results of the investigation indicated lead impacts to the shallow soil beneath the subject property. Lead was detected in two of the eight shallow soil samples at concentrations exceeding residential screening criteria, indicating a potential human health risk for future occupants of the subject property.

Based on the findings of this investigation, Partner recommended additional exploration on the subject property to evaluate the full extent of the identified lead impacts.

Copies of pertinent pages reviewed are included in Appendix B of this report.

## 6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

### ***Site Assessment Data***

**Site Assessment Performed By:** Marc Hachey  
**Site Assessment Conducted On:** July 8, 2022

The table below provides the subject property personnel interviewed during the field reconnaissance:

### ***Site Visit Personnel for 1207 North Capitol Avenue (Subject Property)***

<b>Name</b>	<b>Title/Role</b>	<b>Contact Number</b>	<b>Site Walk* Yes/No</b>
Mr. Jeffrey Woo	Key Site Manager	510-967-2404	Yes

\* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No environmental concerns were identified during the onsite reconnaissance.

### **6.1 General Site Characteristics**

#### ***6.1.1 Solid Waste Disposal***

Solid waste generated at the subject property is disposed of in waste bins located on the subject property. An independent solid waste disposal contractor, Green Team, removes solid waste from the subject property.

#### ***6.1.2 Sewage Discharge and Disposal***

Sanitary discharges from the subject property are directed to an onsite septic system, as further discussed in Section 6.1.7.

#### ***6.1.3 Stormwater and Surface Water Drainage***

Storm water is removed from the subject property primarily by ground infiltration.

#### ***6.1.4 Source of Heating and Cooling***

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity/natural gas provided by Pacific Gas and Electric. The mechanical system is comprised of electrically operated baseboard heaters. Hot water is provided by central natural gas/electric hot water heaters.

#### ***6.1.5 Wells and Cisterns***

No aboveground evidence of wells or cisterns was observed during the site reconnaissance. According to the provided Well Completion Report, dated May 9, 2022, a former 190-foot-deep groundwater well was removed from the southeast portion of the subject property. Based on the regulatory closure of this feature, the former water well does not represent a significant environmental concern.

### **6.1.6 Wastewater**

Domestic wastewater generated at the subject property is disposed by means of the septic system. No industrial process is currently performed at the subject property.

### **6.1.7 Septic Systems**

Domestic wastewater generated at the subject property is disposed by means of the septic system. The septic system is located adjacent to and south of the residence. It is presumed that this system was installed around the time the residence was constructed (circa 2005). Based on the age of the system and the reported regular maintenance of the system, the septic system is not expected to represent a significant environmental concern.

### **6.1.8 Additional Site Observations**

No additional general site characteristics were observed during the site reconnaissance.

## **6.2 Potential Environmental Hazards**

### **6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site**

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

### **6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)**

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

### **6.2.3 Evidence of Releases**

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

### **6.2.4 Polychlorinated Biphenyls (PCBs)-Containing Items**

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

### **6.2.5 Strong, Pungent, or Noxious Odors**

No strong, pungent or noxious odors were evident during the site reconnaissance.

### **6.2.6 Pools of Liquid**

No pools of liquid were observed on the subject property during the site reconnaissance.

### **6.2.7 Drains, Sumps, and Clarifiers**

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

### **6.2.8 Pits, Ponds, and Lagoons**

No pits, ponds or lagoons were observed on the subject property.

## 6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

## 6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

## 6.3 Non-Scope ASTM Considerations

### 6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 2005. As such, an asbestos evaluation was not required by the scope of services; however, please refer to the table below for observed materials that would be considered suspect ACM in the event of a thorough survey:

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

### 6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm<sup>2</sup> (or 5,000 ug/g or 0.5% by weight) or more of

lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property building, it is unlikely that LBP is present.

### **6.3.3 Radon**

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

<b>EPA Radon Zones</b>		
<b>EPA Zones</b>	<b>Average Predicted Radon Levels</b>	<b>Potential</b>
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

### **6.3.4 Lead in Drinking Water**

According to available information, a public water system operated by San Jose Water serves the subject property vicinity. According to the 2020 Water Quality Report, the sources of public water for the subject property is groundwater supplied from groundwater wells located at unknown locations in the Santa Clara County. According to the San Jose Water and the 2020 Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

### **6.3.5 Mold**

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

#### **6.3.6 Wetlands**

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property.

#### **6.4 Adjoining Property Reconnaissance**

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises. No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

## 7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

<i>Potential for Vapor Encroachment to Impact the Subject Property</i>	
<b>Area of Concern</b>	<b>Likely or Known VEC to Subject Property</b>
Subject Property Existing Operations or Conditions	None identified that impact the subject property
Historical Uses of the Subject Property	None identified that impact the subject property
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property
Historical Uses of Adjoining Properties or Nearby Properties	None identified that impact the subject property
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	None identified that impact the subject property

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern in connection with the existing structures on the subject property. As such, no further assessment is recommended.

## 8.0 FINDINGS AND CONCLUSIONS

---

### Findings and Opinions

#### ***Recognized Environmental Condition***

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner conducted a Shallow Soil Investigation in September 2020 at the subject property to investigate the potential impact of organochlorine pesticides (OCPs), arsenic, and/or lead to shallow soil as a consequence of a release or releases from historical on-site agricultural-related uses. Four shallow borings were advanced at each corner of the subject property parcel. Eight soil samples were analyzed for arsenic, lead and OCPs.

The results of the investigation indicated lead impacts to the shallow soil beneath the subject property. Lead was detected in two of the eight shallow soil samples at concentrations exceeding residential screening criteria, indicating a potential human health risk for future occupants of the subject property. Based on the findings of this investigation, Partner recommended additional exploration on the subject property to evaluate the full extent of the identified lead impacts.

According to information obtained from the Client and Report User, Mr. Dan Morrar, the subject proposed future development of the subject property consists of a daycare facility. According to Mr. Morrar, redevelopment of the subject property will consist of the demolishing of the existing house and constructing a new building. Mr. Morrar stated that after the redevelopment project begins, further testing will be conducted to identify the extent of the lead in the shallow soil and excavate accordingly. Based on the known lead impacts in shallow soil at the subject property and the proposed development of a daycare facility, this represents a recognized environmental concern (REC).

#### ***Controlled Recognized Environmental Condition***

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

#### ***Historical Recognized Environmental Condition***

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the

satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

### ***Business Environmental Risk***

A *Business Environmental Risk (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- A property, identified as Royal Cleaners at the addresses 1192-1198 North Capitol Avenue, is located approximately 530 feet to the southeast of the subject property across North Capitol Avenue and situated hydrologically up-gradient. According to information obtained from the regulatory database report and regulatory records reviewed, a former release case was closed for a former drycleaner at this property in 1997; however, a case was reopened in 2018 after further investigation indicated that elevated levels of trichloroethylene (TCE) and tetrachloroethylene (PCE) were present in soil, soil vapor, and groundwater. Remediation has been underway in form of a soil vapor extraction (SVE) system; however, regulatory standards have not yet been met.

PCE was detected in 2019 at concentrations below the maximum contaminant limit (MCL) at a well located northeast of the former drycleaner. It was concluded within the 2019 Grab Groundwater Sampling Report obtained from the Regional Water Quality Control Board (RWQCB) GeoTracker website that the PCE release to groundwater has impacted a limited volume of groundwater and does not pose a significant threat to human health or the environment beyond the footprint of the building. As such, groundwater is not a concern to the subject property.

Soil vapor appears to be the main concern at the former drycleaner site; however, off-site soil vapor data has not been collected as of this date. According to the most recent document available on the GeoTracker website, the Department of Environmental Health (DEH) has required a soil vapor investigation be conducted at the directly adjoining residences (not the subject property). This report was due by May 2022; however, an extension was granted and extended to June 2022. That further investigation report is either not available on GeoTracker or has not been completed yet. It is unlikely, but not impossible that the subject property may need additional investigation once the release case has been delineated further.

Based on the relative distance across a main roadway, the lack of groundwater impact, and the remediation and regulatory oversight in place, the open release case is not expected to represent a significant environmental issue at this time.

- Sanitary discharges from the subject property are directed to an onsite septic system. The septic system is located adjacent to and south of the residence. It is presumed that this system was installed around the time the residence was constructed (circa 2005). Based on the age of the

system and the reported regular maintenance of the system, the septic system is not expected to represent a significant environmental concern.

- According to the provided Well Completion Report, dated May 9, 2022, a former 190-foot-deep groundwater well was removed from the southeast portion of the subject property. Based on the regulatory closure of this feature, the former water well does not represent a significant environmental concern.

### ***Significant Data Gaps***

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

### **Conclusions and Recommendations**

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 1207 North Capitol Avenue in San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of RECs in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- Partner recommends that during the redevelopment process, the lead impact soils should be addressed and excavated accordingly.

## 9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

---

Partner has performed a Phase I Environmental Site Assessment of the property located at 1207 North Capitol Avenue in San Jose, Santa Clara County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH  
1207 North Capitol Ave  
SAN JOSE, CA 95132

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

**Search Criteria:**

2484-2500 of Battaglia Cir  
1155-1276 of N Capitol Ave  
All of Old Forge Ln

**Search Notes:**

SPECIAL FLOOD HAZARD AREAS		Without Base Flood Elevation (BFE) Zone A, V, A99
		With BFE or Depth Zone AE, AO, AH, VE, AR
		Regulatory Floodway
OTHER AREAS OF FLOOD HAZARD		0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile Zone X
		Future Conditions 1% Annual Chance Flood Hazard Zone X
		Area with Reduced Flood Risk due to Levee. See Notes. Zone X
		Area with Flood Risk due to Levee Zone D
OTHER AREAS		NO SCREEN Area of Minimal Flood Hazard Zone X
		Effective LOMRs
GENERAL STRUCTURES		Area of Undetermined Flood Hazard Zone D
		Channel, Culvert, or Storm Sewer
		Levee, Dike, or Floodwall
OTHER FEATURES		20.2 Cross Sections with 1% Annual Chance Water Surface Elevation
		17.5 Cross Sections with 1% Annual Chance Water Surface Elevation
		Coastal Transect
		Base Flood Elevation Line (BFE)
		Limit of Study
		Jurisdiction Boundary
		Coastal Transect Baseline
MAP PANELS		Profile Baseline
		Hydrographic Feature
		Digital Data Available
		No Digital Data Available
		Unmapped

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/10/2022 at 4:01 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Subject: Remedial Progress Report, Former Royal Cleaners, 1192 North Capitol Avenue, San Jose, California

---

### Introduction

In a letter dated June 23, 2020, Mr. Flora of the County of Santa Clara, Department of Environmental Health (DEH) requested a remedial progress report summarizing activities during the second half of 2020 for the Former Royal Cleaners, 1192 North Capitol Avenue, San Jose, California (the Site). The report is due to be uploaded to Geotracker by January 30, 2021.

### Background

A soil vapor extraction (SVE) system was installed at the Site on November 1, 2018. The system is screened from 3 feet below the unit slab to 34 feet below the unit slab. The system is extracting soil gas at 100 standard cubic feet per minute. Three vapor monitoring points are installed inside the tenant space surrounding the extraction well (SV-1). To date four grab groundwater samples have been collected from around the former Royal Cleaners. A nested soil gas well, screened at 5 ft bgs and 15 ft bgs, located along the North edge of the parking lot was sampled on January 15, 2020.

### Remedial Progress

The SVE system has been running since November 1, 2018. The blower hours were reset on November 20, 2020. As of the last sampling event on December 31, 2020 the system had been operating for 17,337 hours. Terraphase monitors the SVE system remotely to confirm the system is running. Terraphase visits the site monthly to collect field measurements using a photoionization detector (PID). PID readings and vacuum measurements from the second half of 2020 are documented in Table 1. A canister sample was collected from SV-1 on January 7, 2020 and transferred, under chain-of-custody (COC) protocol, to a California State certified laboratory and analyzed for VOCs by EPA method TO15. Tetrachloroethene (PCE) was detected at a concentration of 5,300  $\mu\text{g}/\text{m}^3$  (0.78 parts per million by volume (ppmv)) which remains over the commercial environmental screening level (ESL) for PCE in soil gas for a commercial

exposure. The SVE system has been effective and the PCE concentration has decreased by over half from the first sample collected on November 1, 2018 (1.62 ppmv).

As shown on Figure 1, the detections at SV-1 collected in the field using a PID have fallen from 10.9 ppm to 0.2 ppm<sup>1</sup>. The field measurements remained generally consistent over the second half of 2020.

Based on the average volatile organic compound (VOC) in the effluent from the SVE extraction well and correlation between the photoionization detector (PID) and the laboratory results, the SVE system has extracted approximately 36.1 kilograms of PCE from the subsurface - <sup>1</sup>about 16 liters<sup>2</sup>.

Three additional SVE wells were installed in the back of the parking lot on December 4 and December 9, 2020. The PCE concentration in the soil gas extracted from these wells was 1.8 µg /m<sup>3</sup> after three weeks of operation. Field measurements will be taken from these wells moving forward.

### **Future Work**

Terraphase will continue to monitor the system remotely to avoid extended periods of shutdown and visit the system monthly to collect field measurements. Additional sub-slab and soil gas monitoring will be implemented in response to the letter dated June 23, 2020 from Mr. Flora of the County of Santa Clara, Department of Environmental Health (DEH).

### **Closing**

If you have any questions or comments regarding this submittal, please contact Jeff Raines at (510) 645-1853.

I declare, under penalty of perjury, that the information and/or recommendations contained in the attached proposal or report is true and correct to the best of my knowledge.

Jeff Raines, PE (C51120), GE (2762)  
Principal Geotechnical Engineer

---

<sup>1</sup> A correction factor of 0.57 should be applied to these values for a PID calibrated with isobutylene to give PCE concentrations.

<sup>2</sup> 81,504,000.00 cubic feet of soil gas have been extracted with an average PCE concentration of 12.8 milligrams per cubic meter.

**Re: Royal Cleaners**  
**1192 N. Capitol Avenue, San Jose, CA**  
**Site Cleanup Program Case No. 2018-06s**  
**[GeoTracker ID No. T10000011479](#)**

Dear Ms. Geho:

The Department of Environmental Health (DEH) has reviewed the following reports, all of which were prepared by Terraphase Engineering Inc. (Terraphase) and submitted to GeoTracker on February 4, 2022.

1. [Progress Report, January 1 – June 30, 2021](#) (1H21 Report), dated December 17, 2021;
2. [Progress Report, July 1 – December 31, 2021](#) (2H21 Report), dated January 21, 2022; and
3. [Crawlspace Air Sampling Workplan](#) (Work Plan), dated December 17, 2021.

DEH is providing the following technical comments in response to these recently submitted reports.

### TECHNICAL COMMENTS

- General comments:
  - The purpose of the [Indoor Air Response Plan](#), dated September 15, 2020, and approved in the [DEH letter dated September 28, 2020](#), was to avoid unnecessary delays and to proceed with subsequent vapor intrusion assessment if indicated by soil gas data exceeding Regional Water Quality Control Board (RWQCB) environmental screening levels (ESLs).
  - On August 4, 2021, Terraphase sent preliminary soil gas and sub-slab vapor data. DEH responded via email with direction to proceed with the *Indoor Air Response Plan* and begin evaluating residential properties within 100 feet of the currently known extent of the tetrachloroethene (PCE) plume by collecting sub-slab and/or crawl space samples and indoor air and outdoor ambient air samples.

- Given the amount of time that has passed since the soil gas and sub-slab vapor data became available, and as described in the *Indoor Air Response Plan*, and as directed in the DEH email dated August 4, 2021, the additional vapor intrusion assessment should have proceeded and potentially been completed by now. The ongoing vapor intrusion assessment delays are unacceptable, considering the potential human health risks.
- If future soil gas, sub-slab vapor, and/or crawlspace air concentrations exceed respective RWQCB ESLs, progressive contingency sampling shall proceed as described in the *Indoor Air Response Plan*. To avoid subsequent delays, off-site access agreements should include contingencies for all potential sampling scenarios.
- Additional investigation shall proceed until the extent of contamination in soil gas and sub-slab vapor is adequately defined compared to the respective RWQCB commercial/industrial ESLs if on site, or to the RWQCB residential ESLs if off-site in the residential neighborhood. To expedite DEH evaluation of site data and aid in project discussions, please submit copies of laboratory analytical reports and draft data tables via email within two weeks of receipt from the laboratory.
- On-site sub-slab vapor probes shall be resampled to evaluate potential seasonal and temporal fluctuations.
- 1H21 Report:
  - The residential soil gas probes were reportedly installed between 16 and 20 inches below ground surface (bgs) due to cobbles/refusal. This does not adhere to Department of Toxic Substances Control (DTSC) guidance. Due to shallow soil gas probe depths and detected helium in select soil gas samples, the residential soil gas data may not be fully representative but do indicate PCE concentrations in soil gas exceed RWQCB residential ESLs, and the potential vapor intrusion risk requires further investigation. Replacement soil gas probes shall be installed according to DTSC guidance, and additional vertical and lateral soil gas probes shall be installed to evaluate the vertical and lateral extent of PCE in soil gas. Utilize an alternate drilling method if needed.
  - The soil gas samples previously collected at soil gas probes SG-01-5 and SG-01-15, adjacent to the residential neighborhood to the northwest, showed concentrations of PCE increasing with depth. The vertical extent of soil gas contamination shall be defined.
- The 2H21 Report provides a status update including soil vapor extraction (SVE) system field measurements utilizing a photo-ionization detector (PID). To be clear, field measurements using a PID may assist with qualitative SVE system evaluations, but laboratory analysis is required to quantitatively evaluate SVE system mass removal prior to considering SVE system shutdown.
- Work Plan:
  - The number of off-site residential properties included in the proposed Work Plan is insufficient. Additional residential properties northeast and northwest of the proposed locations shall be included in the forthcoming scope of work. All residential properties shall be assessed within 100 feet of the currently known extent of the PCE plume exceeding its RWQCB residential ESL.

- If residential crawlspace air concentrations exceed respective RWQCB residential indoor air ESLs, indoor air sampling shall proceed without delay. Adhere to the contingencies in the *Indoor Air Response Plan*.

## **REQUIRED SUBMITTALS**

You are required to submit the following technical reports to the DEH (Attn: Mr. Travis Flora) via GeoTracker according to the following schedule:

### **Additional Vapor Intrusion Investigation Report – Due by May 20, 2022**

Technical reports are required pursuant to our authority under Section 101480 of the California Health and Safety Code. Each report shall include conclusions and recommendations for the next phases of work required to protect water resources, human health and safety, and the environment at the site. All required work shall be performed in a prompt and timely manner. Revisions to the schedule shall be requested at least two (2) weeks prior to the due date in writing with appropriate justification for the anticipated delays and a proposed revised schedule.

The California Business and Professions Codes (Sections 6735, 7835, and 7835.1) require work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments must be performed under the direction of an appropriately registered or certified professional.

## **PERJURY STATEMENT**

All proposals and reports submitted to this office must be accompanied by a cover letter from the responsible party which states, at a minimum, the following:

"I declare, under penalty of perjury, that the information and/or recommendations contained in the attached proposal or report is true and correct to the best of my knowledge."

This letter must be signed by an officer or legally authorized representative of the Responsible Party.

## **CORONAVIRUS 2019 (COVID-19) PUBLIC HEALTH EMERGENCY**

The County of Santa Clara and State of California have both issued public health orders (Orders) in response to the COVID-19 health emergency. While the Orders are in effect, all businesses and residents are responsible for ensuring that their activities are in compliance with the Orders and all health and safety requirements specified therein. If the restrictions in the two orders are different, you must comply with the stricter of the two Orders. Please note, the current Orders may be updated, and additional Orders may be issued that further restrict work activities and/or provide revised safety requirements. The Responsible Party shall remain alert to changes and modify actions as necessary to maintain compliance with all health Orders. Failure to comply with the Orders is a violation of law. The current Orders and resources for obtaining additional clarification may be found on the following websites:

- [Santa Clara County Novel Coronavirus \(COVID-19\) Resources](#)
- [State of California Coronavirus \(COVID-19\) Response](#)

Subject: Remedial Action Completion Certificate for Royal  
Cleaners/Berryessa Shopping Center, 1192-1198 North  
Capital Avenue, San Jose, CA

Dear Ms. Tam:

This letter confirms the completion of site investigation and remedial action for the solvent release located at the location described above. Enclosed is the Case Closure Summary for the referenced site for your records.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the release is required. If a change in land use is proposed, the owner must promptly notify this agency.

Please contact John West of my staff at (510) 286-1247 if you have any questions regarding this matter.

Sincerely,

Loretta K. Barsamian  
Executive Officer

  
Stephen I. Morse  
Chief, Toxics Division

# SITE CLOSURE SUMMARY

## I. AGENCY INFORMATION

Date: January 28, 1997

Agency Name: S.F.B.R.W.Q.C.B.	Address: 2101 Webster Street
City/State/Zip: Oakland, CA 94612	Phone: (510) 286-1255
Responsible Staff Person: John R. West	Title: Environmental Specialist III

## II. SITE INFORMATION

Site Facility Name: Royal Cleaners/Berryessa Shopping Center				
Site Facility Address: 1192-1198 North Capital Avenue, San Jose, California				
SMS Case No.: (TBA)	Local or LOP Case No.: None	Priority: 3b1		
URF Filing Date:	SWEEPS No.: None			
Responsible Parties (include addresses and phone numbers)				
Ms. Margaret Tam, 381 Birchwood Drive, Moraga, CA 94556 (510) 376-7721				
Tank No.	Size in Gallons	Contents	Closed In—Place/Removed?	Date
None				

## III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Small surface release of solvents (primarily tetrachloroethene [PCE]) to the subsurface in the vicinity of the dry cleaning machine and chemical storage area of the on-site cleaners; Date unknown; the site is currently occupied by the Royal Cleaners		
Site characterization complete? Yes	Date Approved By Oversight Agency:	
Monitoring wells installed? No	Number: 0	Proper screened interval? N/A
Highest GW Depth Below Ground Surface: 80'	Lowest Depth: 100'	Flow Direction: northwest
Most Sensitive Current Use:		
Most Sensitive Potential Use and Probability of Use:		
Are drinking water wells affected? Not likely	Aquifer Name:	
Is surface water affected? No	Nearest/Affected SW Name:	
Off-Site Beneficial Use Impacts (Addresses/Locations): None known		
Report(s) on file? Yes	Where is report(s) filed? SFRWQCB	

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL			
Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
None proposed for soil			
Groundwater not expected to be impacted			

MAXIMUM DOCUMENTED POLLUTANT CONCENTRATIONS—BEFORE AND AFTER CLEANUP									
POLLUTANT	Soil (ppm)		Water (pph)		POLLUTANT	Soil (ppm)		Water (pph)	
	Before	After	Before	After		Before	After	Before	After
TPH Gas					Xylene				
TPH Diesel					Ethylbenzene				
Benzene					Oil & Grease				
Toluene					Heavy Metals				
PCE	2.3	2.3			Motor Oil				

Comments (Depth of Remediation, etc.): The soil affected with VOCs above commonly used cleanup levels appears to be limited laterally to a very small area around the chemical storage area and near a floor sink, and vertically to between 5 and 10 feet below the ground surface.

#### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Yes		
Site Management Requirements:		
Monitoring Wells Decommissioned: Yes No	Number Decommissioned:	Number Retained:
List Enforcement Actions Taken:		
List Enforcement Actions Rescinded:		

V. TECHNICAL REPORTS, CORRESPONDENCE ETC., THAT THIS CLOSURE RECOMMENDATION WAS BASED UPON

Title: Letter Report of Soil Sampling at Royal Cleaners, 1192 North Capital Avenue, San Jose, CA	Date: 5/14/96
Limited Groundwater Investigation, Royal Cleaners, Berryessa Hills Shopping Center, San Jose, CA	1/17/97

VI. ADDITIONAL COMMENTS, DATA, ETC.

PLEASE INCLUDE/ATTACH THE FOLLOWING AS APPROPRIATE:

- 1) SITE MAP INDICATING TANK PIT LOCATION, MONITORING WELL LOCATION, GROUNDWATER GRADIENT, ETC.; AND,
- 2) SITE COMMENTS WORTHY OF NOTICE (E.G., AREA OF RESIDUAL POLLUTION LEFT IN PLACE, DEED NOTICES ETC.)

The greatest concentrations of PCE, 920 micrograms per kilogram (ug/kg) and 2,300 ug/kg, were reported in samples collected from 3 feet below the ground surface in borings installed near the dry cleaning machine and chemical storage area and near a floor sink. The concentrations of PCE decrease in the deeper samples collected from these borings to concentrations of 600 ug/kg and 390 ug/kg, respectively.

Subsurface materials encountered at the site consist predominantly of silt and clay with 3- to 5-foot sand layers present at approximately 15-, 30-, and 58-feet below the ground surface. The CPT investigation conducted at the site was not successful in penetrating the ground surface to depths below 58-feet below the ground surface due to dense soil encountered. Based on subsurface investigations conducted for fuel release cases in the site vicinity, groundwater has been measured between 80- and 100-feet below the ground surface.

Based on the fact that the greatest concentrations of VOCs present in soil are located at 3-feet below the ground surface in a laterally limited area, that the concentrations decrease to below generally accepted cleanup levels within 5- to 10-feet, that the subsurface materials are predominantly silts and clays that impede the vertical movement of contaminants, and that groundwater is likely present at depths greater than 80-feet below the ground surface, the likelihood of impact to groundwater from the operation of the dry cleaners is judged to be low. Additionally, because the concentrations of VOCs decrease to below generally accepted cleanup levels within 5- to 10-feet, and because of the low likelihood of impact to groundwater at the site, it is judged that remediation of the limited amount of soil is not needed.

## PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the ASTM Standard E1527-13 and E1527-21, which adheres to the All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the *"party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice."*

PROPERTY ADDRESS:	1207 N Capitol Avenue
PROPERTY CITY, STATE ZIP:	San Jose, CA 95132

### 1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)

Did a search of land title records (or judicial records) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

☐ YES ☒ NO

### 2. Activity and use limitations (AULs) that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of land title records (or judicial records) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

☐ YES ☒ NO

### 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ YES ☒ NO

**4. Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

☒ YES ☐ NO

**5. Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

☒ YES ☐ NO

Partner Engineering - Shallow Soil Investigation

a. Do you know the past uses of the subject property?

☐ YES ☒ NO

b. Do you know of specific chemicals that are present or once were present at the subject property?

☐ YES ☒ NO

Partner Engineering - Shallow Soil Investigation

c. Do you know of spills or other chemical releases that have taken place at the subject property?

☐ YES ☒ NO

Partner Engineering - Shallow Soil Investigation

d. Do you know of any environmental cleanups that have taken place at the subject property?

☐ YES ☒ NO

e. Do you have any prior knowledge that the subject property was developed as a gas station, drycleaner, manufacturing/industrial facility in the past?

☐ YES ☒ NO

f. Are you aware of historical use of hazardous materials or petroleum products used or present on the subject property?

☐ YES ☒ NO

g. Do you know if the property is currently or was formerly equipped with underground storage tanks (USTs) or septic tanks?

☒ YES ☐ NO

Septic tank

h. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the subject property?

☐ YES ☒ NO

**6. The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

☐ YES ☒ NO

Partner Engineering - Shallow Soil Investigation

**Destruction Details:**

- Destroy 8 inch Steel cable tool constructed Well
- Well & piping were tremie-pipe filled with 21 sack cement grout
- Well casing, pump and pipe were perforated with explosives
- Top off Well with grout up to ground surface
- Remove casing to 5 ft. BGS
- Backfill with native soil & level

Subject: Shallow Soil Investigation Report  
1207 North Capitol Avenue  
San Jose, California 95132  
Partner Project Number: 20-292810.1

Dear Mr. Woo:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the assessment performed at the above-referenced property. The following report describes the field activities, methods, and findings of the Shallow Soil Investigation conducted at the above-referenced property.

This assessment was performed consistent with acceptable industry standards. The independent conclusions represent Partner's best professional judgment based upon existing conditions and the information and data available to us during the course of this assignment.

We appreciate the opportunity to provide these services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mark Lambson at (619) 925-9672.

Sincerely,

Partner Engineering and Science, Inc.

Nathan Maroon  
Project Scientist

Appendix	A. Laboratory Analytical Reports

## **1.0 INTRODUCTION**

---

### **1.1 Purpose**

The purpose of the investigation was to evaluate the potential impact of organochlorine pesticides (OCPs), arsenic, and/or lead to shallow soil as a consequence of a release or releases from historical on-site agricultural-related uses. Peak EF Corp provided project authorization of Partner Proposal Number P20-292810.2.

### **1.2 Limitations**

This report presents a summary of work conducted by Partner. The work includes observations of site conditions encountered and the analytical results provided by an independent third-party laboratory of samples collected during the course of the project. The number and location of samples were selected to provide the required information. However, it cannot be assumed that the limited available data are representative of subsurface conditions in areas not sampled.

Conclusions and/or recommendations are based on the observations, laboratory analyses, and the governing regulations. Conclusions and/or recommendations beyond those stated and reported herein should not be inferred from this document.

Partner warrants that the environmental consulting services contained herein were accomplished in accordance with generally-accepted practices in the environmental engineering, geology, and hydrogeology fields that existed at the time and location of work. No other warranties are implied or expressed.

### **1.3 User Reliance**

Partner was engaged by Peak EF Corp (the Addressee), or their authorized representative, to perform this investigation. The engagement agreement specifically states the scope and purpose of the investigation, as well as the contractual obligations and limitations of both parties. This report and the information therein, are for the exclusive use of the Addressee. This report has no other purpose and may not be relied upon, or used, by any other person or entity without the written consent of Partner. Third parties that obtain this report, or the information therein, shall have no rights of recourse or recovery against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, the Addressee and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this report shall constitute acceptance of, and commitment to, these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted Partner's standard Terms and Conditions, a copy of which can be found at <http://www.partneresi.com/terms-and-conditions.php>.

## **2.0 SITE BACKGROUND**

---

### **2.1 Site Description**

The subject property consists of one parcel of land comprising approximately 1.5 acres located on the southwest side of North Capitol Avenue, east of Highway 680, within a mixed residential and commercial area of San Jose, Santa Clara County, California.

The subject property is bound by commercial and residential properties to the northeast across North Capitol Avenue, commercial property to the southeast, and residential properties to the southwest and northwest. Refer to Figure 1 for a site vicinity map showing site features and surrounding properties.

### **2.2 Site History**

Based on information provided, the subject property was historically utilized for agricultural-related activities.

### **2.3 Geology and Hydrogeology**

Review of the United States Geological Survey (USGS) Calaveras Reservoir, CA Quadrangle topographic map, indicates the subject property is situated approximately 140 feet above mean sea level, and the local topography is sloping gently to the west. Refer to Figure 2 for a topographic map of the site vicinity.

The subject property is situated within the Coast Range physiographic province of the State of California. The Coast Ranges, extend approximately 600 miles from the Oregon Border to the Santa Ynez River near Santa Barbara, are characterized by elongated ranges and narrow valleys that are approximately parallel to the coast. Structural features, including faults and synclinal folds, largely control topography in the province and reflect both previous and existing regional tectonic regimes.

Based on borings advanced during this investigation, the underlying subsurface consists predominantly of brown, medium dense silt with fine gravel from the ground surface to approximately two feet below ground surface (bgs).

## **3.0 FIELD ACTIVITIES**

---

The scope of the Shallow Soil Investigation included the advancement of four shallow borings (S-1 through S-4) for the collection of representative soil samples. Refer to Table 1 for a summary of the borings, sampling schedule and laboratory analyses for this investigation.

### **3.1 Preparatory Activities**

Prior to the initiation of fieldwork, Partner completed the following activities.

#### **3.1.1 Health and Safety Plan**

Partner prepared a site-specific Health and Safety Plan, which was reviewed with on-site personnel involved in the project prior to the commencement of drilling activities.

### **3.2 Sample Locations**

Borings S-1 through S-4 were advanced in the western, northern, eastern, and southern portions of the subject property, respectively.

Refer to Figure 3 for a map indicating sample locations.

### **3.3 Soil Sampling**

Borings S-1 through S-4 were unpaved and advanced using hand auger equipment. Borings S-1 through S-4 were advanced to a terminal depth of two feet bgs.

Samples were prepared for laboratory analysis by placing soil in a single eight-ounce jar. The jars were labeled for identification and stored in an iced cooler.

Soil samples were collected from each boring at 0.5 and 2 feet bgs.

### **3.4 Post-Sampling Activities**

The boreholes were backfilled with dirt following sampling activities. No derived wastes were generated during this investigation.

## **4.0 DATA ANALYSIS**

---

### **4.1 Laboratory Analysis**

Partner collected eight soil samples on September 16, 2020, which were transported in an iced cooler under proper chain-of-custody protocol to SunStar Laboratories Inc., a state-certified laboratory [California Department of Public Health Environmental Laboratory Accreditation Program certificate number 2250] in the City of Lake Forest, California, for analysis on the next day. Each soil sample (eight soil samples total) were analyzed for OCPs in accordance with EPA Method 8081A, and for lead and arsenic in accordance with EPA Method 6010B.

Laboratory analytical results are included in Appendix A and discussed below.

### **4.2 Regulatory Agency Comparison Criteria**

#### 2019 Environmental Screening Levels

The San Francisco Bay Regional Water Quality Control Board (SFRWQCB) has established Environmental Screening Levels (ESLs) as an initial screening level evaluation. ESLs aid in assessing the potential threats to human health, terrestrial/aquatic habitats, and/or drinking water resources due to contaminants in soil, soil gas, and/or groundwater. Under most circumstances, the presence of impacts below applicable ESLs can be assumed to not pose a significant, chronic (i.e., long-term) adverse risk to the applicable receptor of concern. Conversely, sites that exceed ESLs generally require further evaluation and/or remediation. Please note that the ESLs were developed using default assumptions (e.g., standard exposure factors) and, consequently, are only meant for screening level assessments. The ESLs should not be considered enforceable regulatory standards. Cleanup levels are ultimately dependent on site-specific factors and are established by the regulatory agencies on a case-by-case basis.

### **4.3 Soil Sample Data Analysis**

Lead was detected in each of the analyzed soil samples at concentrations above laboratory reporting limits (RLs). Lead was detected in soil samples S3-0.5 and S4-0.5 at concentrations of 155 and 97.2 milligrams per kilogram (mg/kg), respectively. These two detections exceed the residential ESL of 80 mg/kg, but they do not exceed the soluble threshold limit concentration (STLC) for hazardous waste in California. None of the other lead detections exceed the applicable ESLs.

Arsenic was detected in five of the analyzed soil samples at concentrations up to 8.38 mg/kg, which exceed the applicable ESLs; however, the detected arsenic concentrations did not exceed the regional background concentration of 11 mg/kg as based on the Dylan Jacques Duverge December 2011 report Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Region.

Various OCPs were detected in the analyzed soil samples; however, none of the detected OCP concentrations exceed the applicable ESLs.

Refer to Tables 2 and 3 for a summary of the soil sample lead and arsenic, and OCPs laboratory analysis results, respectively.

#### **4.4 Discussion**

Based on the results, there is evidence of lead impacts to shallow soil beneath the property. Lead was detected in two of the eight soil samples (S3-0.5 and S4-0.5) at concentrations exceeding residential screening criteria, indicating a potential human health risk for the future occupants of the subject property.

## 5.0 SUMMARY AND CONCLUSIONS

---

Partner conducted a Shallow Soil Investigation at the subject property to investigate the potential impact of OCPs, arsenic, and/or lead to shallow soil as a consequence of a release or releases from historical on-site agricultural-related uses. The scope of the Shallow Soil Investigation included the advancement of four shallow soil borings. Eight soil samples were analyzed for arsenic, lead, and OCPs.

Based on the Shallow Soil Investigation, there is evidence of lead impacts to shallow soil beneath the subject property. Lead was detected in two of the eight shallow soil samples (S3-0.5 and S4-0.5) at concentrations exceeding residential screening criteria, indicating a potential human health risk for the future occupants of the subject property.

Partner recommends additional investigation to evaluate the extent of the identified lead impacts.

## TABLES

---

Table 1: Summary of Investigation Scope  
 1207 North Capitol Avenue  
 San Jose, California 95132  
 Partner Project Number 20-292810.2  
 September 2020

Boring Identification	Location	Terminal Depth (feet bgs)	Matrix Sampled	Sampling Depths* (feet bgs)	Target Analytes
S1	Western Portion of Property	2	Soil	0.5, 2	OCPs, Arsenic, Lead
S2	Northern Portion of Property	2	Soil	0.5, 2	OCPs, Arsenic, Lead
S3	Eastern Portion of Property	2	Soil	0.5, 2	OCPs, Arsenic, Lead
S4	Southern Portion of Property	2	Soil	0.5, 2	OCPs, Arsenic, Lead

Notes:

\*Depths in bold analyzed for organochlorine pesticides (OCPs) in accordance with United States Environmental Protection Agency (EPA) Method 8081A, and for arsenic and lead via EPA Method 6010B.

bgs = below ground surface

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## Property Information:

**Project Property:** APN 06245-05-015  
1207 North Capitol Ave SAN JOSE CA 95132

**Project No:** 22-376458.1

**Coordinates:**

<b>Latitude:</b>	37.38819523
<b>Longitude:</b>	-121.8630112
<b>UTM Northing:</b>	4,138,543.99
<b>UTM Easting:</b>	600,649.93
<b>UTM Zone:</b>	UTM Zone 10S

**Elevation:** 141 FT

## Order Information:

**Order No:** 22062000270  
**Date Requested:** June 20, 2022  
**Requested by:** Partner Engineering and Science, Inc.  
**Report Type:** Database Report

#### Regulated Programs

**EI ID:** 10761799      **EI Description:** Chemical Storage Facilities

#### Violations

**Violation Date:** 12/17/2021      **Violation Source:** CERS  
**Violation Program:** HMRRP      **Violation Division:** Santa Clara County Environmental Health  
**Citation:** HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)  
**Violation Notes:**

Facility was unable to provide documentation of annual training for employees on emergency response and safety procedures. Within 30 days, provide training as described in the facility's Emergency Response Training Program and maintain documentation for at least three years. Template was emailed to the Facilities Manager, Derek.

#### **Violation Description:**

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

#### Violations

**Violation Date:** 12/15/2021      **Violation Source:** CERS  
**Violation Program:** HMRRP      **Violation Division:** Santa Clara County Environmental Health  
**Citation:** HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2  
**Violation Notes:**

Last complete submittal of a Hazardous Materials Business Plan (HMBP) was 6/29/2020, which is more than one year from today. HMBP must be submitted or certified on an annual basis.

#### **Violation Description:**

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

#### Violations

**Violation Date:** 06/13/2018      **Violation Source:** CERS  
**Violation Program:** HMRRP      **Violation Division:** Santa Clara County Environmental Health  
**Citation:** HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
**Violation Notes:**

Returned to compliance on 06/15/2018. Facility opened in early March 2018, however has failed to submit a hazardous materials business plan (HMBP). Within 30 days, submit a HMBP to CERS or FrontCounter. If you would like to request assistance please contact hazardous materials technician Michelle Santos (email: michelle.santos@cep.sccgov.org).

#### **Violation Description:**

Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

#### Evaluations

**Eval Date:** 06/13/2018

<b>Eval Notes:</b>		<p>Inspection commenced on 12/15/21 and concluded with issuance of the NOI today. Site visit to conduct a routine Hazardous Materials Business Plan (HMBP) inspection. Completed walkthrough with Breanna from the front desk staff. Business operates as an athletic facility with several swimming pools/spas. Most recent HMBP submittal was on 6/29/2020 (CERS ID 10761799). Based on observed chemical inventory, the facility is appropriately permitted. Confirmed that the property owner and business owners are the same entity. The following reportable chemicals were observed: 1) 120 gallons of muriatic acid 2) 500lbs of chlorine tablets; Note: data in [EVAL Notes] field for some records is truncated from the source.</p>				
<b>Eval Date:</b>		03/13/2018

<b>Eval Division:</b>		Santa Clara County Environmental Health				
<b>Eval Program:</b>		HMRRP				
<b>Eval Source:</b>		CERS				
<b>Eval Notes:</b>		<p>On-site to perform a hazardous materials permit investigation. Facility is a fitness center and spa. Facility also has 2 cafes. A walk-through of the facility was conducted with Facilities Director, Derek Warner. Per Mr. Warner, operations started last Monday, 3/5/2018. Facility has a total of 8 indoor/outdoor pools and whirlpools. The following hazardous materials were observed in the chemical storage areas: Chemical Storage/ Housekeeping Room: - 8 x 1 gal plastic containers of Muriatic Acid - approx. 12 gal of each type of cleaning/ disinfecting product used (misc. 1 gal containers) Main Pool Room: - 1 x 10, 1 x 15, and 5 x 5 gal chlorine/water mixing tanks - 1 x 15 gal plastic drum of Muriatic Acid Chemical Storage (H): - 7 x 15 gal plastic drums of Muriatic Acid - &lt;55 gal of Cyanuric Acid (works as sunscreen, prevents chlorine from breaking down) - &lt;500 lb. Chlorine Tablets Mr. Warner stated that all pools and whirlpools are serviced on-site by 4 [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.</p>

<b>Violation Notes:</b>						
Returned to compliance on 02/24/2016. _____ Facility uses Compliance (brand) Sterilizing and Disinfecting Solution to sterilize plastic instruments. Per the product label it contains 7.35% hydrogen peroxide and 0.23% paracetic acid. Facility is currently using the product in an undiluted form per manufacturer instructions, and is disposing of it into the sanitary sewer. CEASE DISPOSAL OF THIS PRODUCT DOWN THE SANITARY SEWER UNTIL A HAZARDOUS WASTE DETERMINATION CAN BE MADE. NOTES: A hazardous waste determination may be made using generator knowledge (ex. referring to safety data sheets that came with the product) or by having a sample of the waste analyzed by a state-certified-laboratory. If found to be hazardous, manage according to all hazardous waste requirements.						
<b>Violation Description:</b>						
Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

**Evaluations**

<b>Eval Date:</b>	02/12/2016
<b>Violations Found:</b>	Yes
<b>Eval General Type:</b>	Compliance Evaluation Inspection
<b>Eval Type:</b>	Routine done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	HW
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

On-site to conduct a hazardous waste inspection. Facility is a dental practice. Observed the following process: -Sterilization is performed using a steam autoclave unit. -Limited cold sterilization is used for plastic instruments. -Cleaning/disinfection is done with an ultrasonic unit using an enzymatic cleaner. -Waste amalgam (and traps) is recycled through EnviroAmerica. -X-rays are performed digitally and no residual silver-containing waste was observed on-site. -Tartar and stain remover (Sparkle Dent Denture Whitener) is used periodically. A pH test of solution produced a pH of between 2-3. NOTES: - CAL000163787 is active. -Fire extinguishers were observed as maintained. -A HHW small business program brochure was provided to the facility. - Based upon this inspection, the facility's hazardous waste permit will be changed from a PE 2202 (27 gallons or less of hazardous waste generated annually) to a PE 2240 (10 gallons or less of hazardous waste generated [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

#### Evaluations

<b>Eval Date:</b>	08/04/2015
<b>Violations Found:</b>	Yes
<b>Eval General Type:</b>	Compliance Evaluation Inspection
<b>Eval Type:</b>	Routine done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	HW
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

On-site to conduct a hazardous waste inspection. Performed a facility walk-through with Venus Ochoa. Facility is an automotive parts retail store and a certified used oil collection center. Observed the following hazardous waste stored in the rear stockroom: -Used oil: 1 x 220 gallon tank -Waste absorbent: 1 x 55 gallon drum -Used oil filters: 1 x 30 gallon drum -Waste flammables/aerosols: 1 x 5 gallon bucket -Waste corrosives/alkaline: 1 x 5 gallon bucket -Waste corrosives/acid: 1 x 5 gallon bucket -non-RCRA hazardous waste liquids: 1 x 5 gallon bucket -Waste organic peroxides: 1 x 1 gallon bucket -Waste coolant: 1 x 5 gallon bucket Per Mr. Ochoa, a staff member performs a property walk-around once per morning to collect any garbage or hazardous waste that was illegally dumped during closing hours. Hazardous waste is taken to hazardous waste storage area in the rear stockroom and sorted. Any damaged or returned retail products are managed as hazardous waste, [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Date:</b>	08/04/2015
<b>Violations Found:</b>	No
<b>Eval General Type:</b>	Compliance Evaluation Inspection
<b>Eval Type:</b>	Routine done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	HMRPP
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

On-site to conduct a hazardous materials business plan (HMBP). Performed a facility walk-through with Venus Ochoa. Facility is a automotive parts retail store and a certified used oil collection center. Observed the following hazardous materials at or above HMBP reporting thresholds stored in west-end of store: -Used oil: 1 x 220 gallon tank -Car Batteries: 1 x pallet NOTES: -CERS ID: 10097590 -HMBP has been annually certified per CERS. -HMBP training log is maintained via Autozone electronic training system. -Facility's HMBP permit will revised from a "BP02" to a "BP01" to reflect number of reportable hazardous materials observed on-site.; Note: data in [EVAL Notes] field for some records is truncated from the source.

#### **Violation Description:**

Failure to obtain and/or maintain an Active EPA ID.

#### **Violations**

**Violation Date:** 01/28/2020  
**Violation Program:** HW  
**Citation:** 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 02/18/2020. Hazardous waste disposal documentation was reviewed for 2019. - Manifest #002165911PSC, ship date: 3/17/19 was missing the TSDf-signed copy. - Manifest #002316597PSC, ship date: 5/12/19 was missing the TSDf-signed copy. - Manifest #002107281PSC, ship date: 1/21/19 and Manifest #002560603PSC, ship date: 11/24/19 were not available for review. - No disposal documentation was available for 2017 and 2018. Within 30 days, obtain TSDf-signed copies of these manifests from your hazardous waste hauler. In the future, retain disposal documentation for 3 years for inspection.

#### **Violation Description:**

Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

#### **Evaluations**

**Eval Date:** 01/28/2020  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to perform a routine Hazardous Waste Generator inspection. dd's Discounts is a retail store that sells clothing, home items, bath & beauty products, etc. A walk-through of the back hazardous waste storage area was conducted with Store Manager, Daniela Duenas. Noted the following: - 1 tote bin for Toxics - 1 tote bin for Oxidizers - 1 tote bin for Flammables/ Aerosols - 1 tote bin for Corrosive Acids - 1 tote bin for Corrosive Bases - 1 approx. 30 gal drum for Universal/ E-waste Per Ms. Duenas, items broken/ damaged on the sales floor or from delivery or returns are brought to the back in bins that are to be sorted by managers on a daily basis. Managers use illustrated reference guides to properly segregate hazardous wastes into the appropriate tote bins. Weekly inspections are conducted and logged. Hazardous waste pick-ups occur approximately every 2 months. Last pick-up: 1/21/2020. Notes: - State ID: CAL000394899 is active. - Fire extinguishers [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 12/28/2015  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a hazardous waste inspection. Performed a facility walk-through with Jacquie and observed the following hazardous waste stored in the rear stock room: -Waste toxic solids: 1 x tote bin -Waste corrosives (acids): 1 x tote bin -Waste corrosives (bases): 1 x tote bin -Waste flammable liquids: 1 x tote bin Any returned or damaged goods are handled by management on the store floor and taken to the hazardous waste storage area in the rear stock room. Spill control is available on the store floor, but not in the hazardous waste storage area. RECOMMENDATION: Also keep spill control (i.e. absorbent) in the rear stock room. NOTES: -CAL000394899 is inactive. -Managers conduct inspections of hazardous waste storage area. - Fire extinguishers were observed as maintained. -Disposal receipts were reviewed. -Hazardous waste shipments occur approximately every 6 months. - Emergency posting was available in the break room. -Contact email per California [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

#### Violations

**Violation Date:** 09/04/2018  
**Violation Program:** HW  
**Citation:** 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
**Violation Notes:**

Returned to compliance on 10/12/2018. The following hazardous waste manifests could not be located at time of inspection. Ensure a copy of these manifests is provided to our agency within 30 days and is retained at the store. -008630509FLE, shipped 1/8/16 -008630510FLE, shipped 1/8/16 -008489664FLE, shipped 5/2/16 -010683504FLE, shipped 11/28/17

#### Violation Description:

Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

#### Evaluations

**Eval Date:** 08/06/2015  
**Violations Found:** No  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

On-site to conduct a hazardous waste inspection. Facility is a retail store. Performed a facility walk-through and observed the following hazardous waste: -1 x plastic tote bin of waste corrosives in rear stockroom (Hazardous waste shipment occurred on 8/3/15 so no other hazardous waste was observed at this time) Hazardous waste shipments occur every 6 months or when 8 x plastic tote bins become full. Assistant Manager Saechao labels tote bins. She stated that only store managers may dispose of garbage, and that garbage is checked for hazardous waste. All managers receive initial training in a classroom setting. All new employees complete training via Dollar Tree online training system. NOTES: -EPA ID number: CAL379391 is active -Fire extinguishers were observed as annually maintained -Absorbent was available in hazardous waste storage area -Hazardous waste manifest were reviewed; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 09/04/2018  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a routine hazardous waste inspection with Ashley Ryder of HMCD. Facility is a retail store that generates hazardous waste in the form of non-saleable merchandise. Observed the following hazardous waste in rear stockroom: -1 x plastic tote bin of waste corrosives (bases) -1 x plastic tote bin of waste aerosols, flammables, combustibles -2 x plastic tote bin of waste "State regulated Toxics, Electronics, OTC Pharmaceuticals, Universal Waste" The following violation was corrected on-site at time of inspection: -G020, accumulation start date on 2 x hazardous waste labels was filled-out NOTES: -CAL000379391 is active -Emergency response equipment was observed -Emergency posting was affixed to wall in office -Training is provided to appropriate staff via an online system -Dumpster was visually verified as not containing any hazardous materials -Hazardous waste manifests were reviewed; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 08/06/2015  
**Violations Found:** No  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility is a retail store. Performed a facility walk-through and observed the following hazardous materials at or above HMBP reporting thresholds: -Helium gas: 13 x 219 cu ft. cylinders (11 in rear stockroom & 2 in balloon retail area) NOTES: -CERS ID: 10397892 -Dollar Tree corporate oversees all electronic reporting; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 09/04/2018  
**Violations Found:** No  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed the following hazardous materials at or above reporting thresholds: -Helium: 7 x 291 cu. ft cylinders NOTES: -CERS ID: 10397872 -A HMBP was submitted to CERS on 2/9/18 and was reviewed as complete.; Note: data in [EVAL Notes] field for some records is truncated from the source.

#### Violations

Violation Date:	12/23/2014	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34		
Violation Notes:			

Returned to compliance on 12/27/2016. \_\_\_\_\_ The CFR submitted to CERS selected coverage for \$500,000 per occurrence. The coverage amount for a petroleum marketer should be \$1 million per occurrence and annual aggregate. Update the form and submit it to CERS. Also on CERS, both "State Fund and CFO Letter" and "Insurance" are selected as Financial Responsibility mechanisms. No insurance policy observed. Either provide the proper insurance documentation or select "No" to insurance.

#### **Violation Description:**

Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.

#### Violations

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

<b>Violation Date:</b>	04/27/2021	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)		
<b>Violation Notes:</b>			

TANK 87-AUX STP SUMP LIQUID SENSOR FAILED TO TRIGGER AN AUDIBLE/VISUAL ALARM AND SHUT DOWN THE PUMP WHEN A LEAK WAS SIMULATED. TECHNICIANS REPLACE THE LIQUID SENSOR LIKE-FOR-LIKE AT THE TIME OF THE INSPECTION. THE SENSOR WAS RE-TESTED AND TRIGGERED AN AUDIBLE/VISUAL ALARM AND SHUT DOWN THE TANK.

#### **Violation Description:**

Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.

#### **Violations**

<b>Violation Date:</b>	12/23/2014	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284		
<b>Violation Notes:</b>			

Returned to compliance on 12/27/2016. \_\_\_\_\_ The facility has not come into compliance in order to receive their UST operating permit. Take actions to correct all open violations and submit responses to the 12/11/2013 report and this Notice of Inspection. Once all violations are corrected and closed, the UST Permit to Operate may be issued.

#### **Violation Description:**

Failure to obtain and maintain a valid operation permit from the CUPA.

#### **Violations**

<b>Violation Date:</b>	12/11/2013	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HW	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
<b>Violation Notes:</b>			

Returned to compliance on 12/24/2016. Facility has not yet obtained an EPA ID number. Complete the form 1358 provided to you and submit it to DTSC to obtain your number.

#### **Violation Description:**

Failure to obtain and/or maintain an Active EPA ID.

#### **Violations**

<b>Violation Date:</b>	12/11/2013	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715		
<b>Violation Notes:</b>			

Returned to compliance on 12/27/2016. Facility has not established a designated operator since taking over the ownership of this site on 3/20/13. Monthly DO inspections have not occurred.

#### **Violation Description:**

Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.

<b>Citation:</b>	23 CCR 16 2715(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(b)		
<b>Violation Notes:</b>			

Returned to compliance on 12/27/2016. Facility has not yet submitted your DUSTO Notification form as required during your previous 4/30/13 inspection. After completing this document, electronically submit it via CERS.

#### **Violation Description:**

Failure to submit statement of UST compliance and/or Designated Operator current certification.

#### Violations

<b>Violation Date:</b>	12/11/2013	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665		
<b>Violation Notes:</b>			

Returned to compliance on 12/11/2013. The 91 Premium spill container failed its one-hour leak test. The drain valve was replaced and the spill bucket was re-tested. Test result = pass. Violation was corrected during the inspection. No further action is required.

#### **Violation Description:**

Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.

#### Violations

<b>Violation Date:</b>	12/14/2016	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34		
<b>Violation Notes:</b>			

Returned to compliance on 12/27/2016. \_\_\_\_\_ The most current CFO Letter as submitted to CERS on 12/21/2015 was signed on 12/18/2014. The CFO Letter must be updated annually. The Certification of Financial Responsibility (CFR) form indicates a coverage amount of \$1,000,000 per occurrence and annual aggregate for the State UST Cleanup Fund. However, the actual coverage amount should be noted as \$995,000 (less the \$5,000 deductible). Additionally, the Chief Financial Officer (CFO) Letter reports rounded numbers for total tangible assets, total liabilities and net worth (i.e. \$2,500,000.00, \$2,150,000.00, and \$350,000.00). If a CFO Letter is used as a Financial Responsibility mechanism, it must include the total tangible assets and total liabilities of the owner or operator that are calculated on the basis of current market value of tangible assets and must reflect the tangible net worth of the owner or operator as of the close of the latest completed [Truncated]

#### **Violation Description:**

Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.

**Eval Program:** UST  
**Eval Source:** CERS  
**Eval Notes:**

Conducted a limited inspection as a result of recent modifications to the UST system, which included relocation of the Veeder-Root monitoring panel from the island kiosk to the convenience store, 5-new Ovation dispensers with conversion frames, 4-Overfill Prevention Valves (testable flapper valves), 4-new spill buckets and a Cold-Start of the monitoring panel. Today's testing was conducted by Elodio Sanchez from Gettler -Ryan, Inc. Mr. Sanchez's ICC and mfg certifications were verified to be current. Please reference Notices of Inspection for (SR0853593, SR0853102 and SR0853054) as to the

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

tests that were conducted on 5/15/17. All sensors functioned as required and all spill buckets held 5-gallons of water for 60-minutes without loss of liquid. Verified DO reports from Dec 2016 to May 2017 were present and all alarms were responded to with maintenance records attached. Employees are current with their DO training that was conducted on 5/11/17. The site's [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 05/15/2017  
**Violations Found:** No  
**Eval General Type:** Other/Unknown  
**Eval Type:** Other, not routine, done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** UST  
**Eval Source:** CERS  
**Eval Notes:**

The modifications to the site's UST systems were completed by Brian Gan from Gettler -Ryan, Inc. Mr. Gan's ICC and mfg. certifications were verified to be current for these modifications. Observed the installation of 5-Ovation 2 dispensers with Bravo conversion frames (CONV-B2000-OPP). The Ovation Deflector Plate Kit was not installed and final approval will not be granted until in-field confirmation is conducted. Verified each Bravo conversion frame was labeled with a Bravo Systems (CONV-B2000-OPP) sticker, fiberglass plates were installed and sealed with supplied epoxy around the electrical conduit pipes. Frame installation bolt protective caps were installed on all frames. The installation of the 5-new Ovation 2 dispensers with new software update, which required a cold start. See Notice of Inspection SR0853054 for details of all sensor testing; all passed. The site is conditionally approved to operate as designed pending an in-field inspection of Ovation [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

On-site to witness monthly Designated UST Operator visual monthly inspection and to complete a paper annual inspection. This year's annual monitoring system certification could not be coordinated with the inspection due to limitations during the COVID19 pandemic. Onsite with DUSTO Andrew Tietze, of Belshire Environmental Services Inc., while he conducts the monthly visual inspection. This included review of the system alarm history (no alarms) and visual inspection of all under dispenser containment and UST fill pipes. The following documents were reviewed at the time of inspection: -12 months of DUSTO monthly visual inspection records and employee training records - 5 years of relevant records for annual monitoring, overfill protection, and secondary containment testing - CERS submittal from 4/29/2020 (reviewed and accepted after inspection) ACTION ITEMS: 1. Correct all violations and submit documentation of corrective actions taken and certification of [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

of the removal of ball floats from all tanks; installation of 4- ea spill buckets (Franklin Fueling 70555101C1-GKT, 5-gallon capacity). The modifications to the site's UST systems were completed by Brian Gan from Gettler -Ryan, Inc. Mr. Gan's ICC and mfg certifications were verified to be current for these modifications. Observed the installation of the new OPV from box to install as well as the removal of the ball floats. Franklin Fueling Defender Series overfill prevention valve (OPV) 708-590 Series were demonstrated to provide positive shut-off at 95% by verifying the measurements of the upper and lower lengths of the drop-tubes, which were compared against the tank charts. Observed that the provided installation information plates were installed around the fill-port. Photos of the installation overview [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

On-site to witness the functional testing of all sensors following the relocation of the UST monitoring panel from the fuel island kiosk to convenience store. Today's testing was conducted by Elodio Sanchez from Gettler -Ryan, Inc. Mr. Sanchez's ICC and mfg certifications were verified to be current. All sensors (STP sumps, Fill Sumps, Annular Sensors and UDC Sensors) are programmed for audible/visual at the monitoring panel and positive shut-down. All sensors were tested in water and functioned as required. Note Fill Sumps and Annular Sensors are not required to be programmed for positive shutdown. Each ATG probe was removed and measured to confirm overfill alarms. Each probe was programmed & measured 81-inches to activate the overfill alarms (external & monitoring panel). Both PLLD (Q1 & Q2) were tested using VMI LDT-890 test system to simulate a 3-gallon per hour leak at 10-psi. Both leak detectors functioned as required (positive shutdown audible & visual [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Notes:</b>		On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Steven Parmenter of Service Station Systems. Annular space, fill sump, piping sump and under dispenser containment (UDC) sensors (VR 407 & 208s) tested in water. All provided audible and visible alarms in the kiosk. All alarms are programmed to provide positive shutdown of all turbines. Positive shutdown functioned as required. Sensor out and power out (failsafe) was also demonstrated. Three tanks dispense regular fuel and are set up as Master, Slave and Auxiliary. They are manifolded together and are monitored by one electronic line leak detector (ELLD). The remaining tank is premium fuel and has a separate ELLD. The ELLDs were tested with a simulated 3.0 gph leak at 10 psi. The ELLDs detected the leak and provided audible and visible alarms as well as positive shutdown. Overfill prevention is provided by the Automatic Tank Gage (ATG). The ATGs were removed and [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

An annual monitoring certification was performed by Steve Parmenter. All of his required certifications were reviewed and were current. The VMI LDT-890 Tester 2-year calibration date = 10/18/13. The system set-up and alarm history reports were reviewed and two alarms were noted. Both alarms were responded to and maintenance records were reviewed that addressed the repair and elimination of alarms in a timely fashion. The following alarms were tested in water: 4 piping sumps provided audible & visual alarms plus positive shut down; 4 fill sumps provided audible & visual alarms plus positive shut down; 5 UDC sumps provided audible & visual alarms plus positive shut down; 4 tank annular space sensor provided audible & visual alarms; 4 tank overfill alarms set at 90% of tank capacity provided audible and visual alarms. All 3 turbines (87 master, 87 slave, 91) properly shut down under conditions of sensor-out and failsafe. Except as noted above, 2 electronic line leak [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

#### Regulated Programs

<b>EI ID:</b>	10737316	<b>EI Description:</b>	Chemical Storage Facilities
---------------	----------	------------------------	-----------------------------

#### Violations

<b>Violation Date:</b>	05/24/2018	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HMRRP	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		
<b>Violation Notes:</b>			

Business electronically submitted on 1/30/2018 and then electronically re-submitted on 3/18/2018 without including the new required federal hazard categories. Remove the obsolete federal hazard categories, replace them with the new federal hazard categories, and then electronically re-submit.

#### **Violation Description:**

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

#### Violations

<b>Violation Date:</b>	05/24/2018	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HMRRP	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		
<b>Violation Notes:</b>			

Your site map is inaccurate. The tank monitor on the site map is still in the old location (kiosk). Relocate the symbol of your tank monitoring panel on your site map into the store building and re-submit the map on CERS.

#### **Violation Description:**

Failure to complete and electronically submit a site map with all required content.

#### Violations

<b>Violation Date:</b>	05/24/2018	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HMRRP	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1		
<b>Violation Notes:</b>			

Handler of hazardous materials is a tenant and HMBP notification letter to property owner was not found on site.

#### **Violation Description:**

Failure to provide a copy of the business plan to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent.

#### Violations

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

**Violation Date:** 05/24/2018  
**Violation Program:** HMRRP  
**Citation:** HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)  
**Violation Notes:**

Provide and document emergency response training for Franklin Lindsey.

#### **Violation Description:**

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

#### **Violations**

**Violation Date:** 05/24/2018  
**Violation Program:** HMRRP  
**Citation:** HSC 6.95 25505(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(c)  
**Violation Notes:**

Visions of Success, Inc. is the permitted handler of hazardous materials at this location but the hazardous materials business plan (HMBP) submitted on CERS account number 10737316 was not found in the orange compliance binder. Add a copy of this HMBP in the compliance binder and familiarize site employees with its contents.

#### **Violation Description:**

Failure to have a business plan readily available to personnel of the business or the unified program facility with responsibilities for emergency response or training.

#### **Evaluations**

**Eval Date:** 04/27/2021  
**Violations Found:** No  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

CERS LAST HAZARDOUS MATERIALS BUSINESS PLAN WAS SUBMITTED 3/5/2021. HAZARDOUS MATERIALS BUSINESS PLAN TRAINING WAS LAST CONDUCTED 4/26/2021. CHEMICAL STORED ON SITE THAT MEET HMBP STORAGE QUANTITIES INCLUDE: -GASOLINE; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 05/24/2018  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

A physical walk-through inspection and paperwork review occurred on this date. An electronic HMBP submittal was provided on CERS on 3/17/2018 and was administratively accepted by our agency on 3/19/2018. The following above-threshold HMBP chemicals were observed: Gasoline Liquid Carbon Dioxide - Facility is properly permitted for the number of reportable chemicals. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

 Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: P001  
 Waste Code Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Hazardous Waste Code: D002  
 Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: U002  
 Waste Code Description: 2-PROPANONE (I) (OR) ACETONE (I)

Hazardous Waste Code: D009  
 Waste Code Description: MERCURY

Hazardous Waste Code: P075  
 Waste Code Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

**Citation:** HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)  
**Violation Notes:**

Returned to compliance on 01/05/2017. . Dispenser # 3/4 was destroyed on December 24, 2014, when a car drove through the dispenser island and hit the dispenser. The dispenser was removed from the location and placed inside the service bay. The pipe within the dispenser is now capped. The UDC is monitored by an electronic sensor (208) same as before. Submit a project scope of work to repair, replace, or close the dispenser at this location within 7 days to this office, c/o Andrew Dyer. A permit may be required. A determination will be made at that time. .

#### **Violation Description:**

Failure to operate the UST system to prevent spills and/or overfills.

**Violation Notes:**

Returned to compliance on 01/04/2019. Based upon observations made during the site walk-through, facility personnel are not managing fuel-contaminated absorbent as a hazardous waste. Instead, contaminated absorbent is left to dry in the sun until any fuel present has evaporated. Once dry, absorbent is placed back into gated enclosure for future use. Note that this practice of evaporating fuel constitutes illegal treatment of a hazardous waste. Immediately cease this practice and begin containerizing all waste absorbent.

**Citation:** HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)  
**Violation Notes:**

Returned to compliance on 10/31/2018. Interstitial sensor reservoir and associated manometer in UDC 9/10 were observed as completely dry, and as a result, the interstitial sensor was non-functional. Within 30 days, troubleshoot the source of the releases, and notify our agency of any repairs. Note that a repair permit may be required. Interstitial sensor reservoir for 91 fill sump sensor was dry yet failed to alarm. Within 30 days, troubleshoot the source of the releases, why sensor is non-functional, and notify our agency of any repairs. Note that a repair permit may be required.

#### Violation Description:

Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.

**Violation Notes:**

Owner/operator failed to indicate in section V, corrective actions taken to address compliance issues identified in section III, and/or failed to print sign, and date section VI of the report: DO inspection report dated 7-17-2019 - no printed name or date signed. DO inspection report dated 4-20-2019 - no printed name, signature, or date signed. DO inspection report dated 3-21-2019 - no printed name, signature, or date signed. DO inspection report dated 12-22-2018 - no printed name, signature, or date signed. DO inspection report dated 11-23-2018 - no printed name, signature, or date signed.

#### Violation Description:

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

The Diesel and 87 spill buckets failed hydrostatic testing after 60 minutes as evidenced by the drop in liquid level. Within 30 days, investigate the cause of the failure and provide a written description as to how this is resolved. Obtain a permit from our office if necessary. \*Note: The diesel spill bucket was cited as failing this test on the 9/29/2020 Official Notice of Inspection.

**Violation Description:**

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

**Violation Notes:**

Returned to compliance on 09/26/2019. Overfill prevention equipment was not inspected as required on or before 10-13-2018. Repeat violation from inspection performed on 1-4-2019. Inspection performed today, NO FURTHER ACTION REQUIRED.

**Violation Description:**

Failure to comply with one or more of the following overfill prevention equipment requirements:  
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or  
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or  
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or  
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Not addressed in DO inspection on 7-17-19 S15 91 Vacuum Product - high liquid, sensor fault alarm 7-3-19. Not addressed in DO [Truncated]

#### **Violation Description:**

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:  
 Be performed by an ICC certified DO.  
 Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.  
 Inspect for the presence of liquid/debris in spill containers.  
 Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.  
 Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.  
 Check that all testing and maintenance has been completed and documented.  
 Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).  
 For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Returned to compliance on 09/26/2019. 91 tank utilizes a flapper valve as a means of overflow; however, technician determined it is currently set to provide restriction at 96.5% fullness. Submit a permit application to repair or replace this flapper valve to ensure it initiates restriction no later than 95% fullness.

#### **Violation Description:**

Failure to comply with one or more of the following overflow prevention equipment requirements:  
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or  
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or  
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or  
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overflow prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Returned to compliance on 09/17/2014. THE SECONDARY CONTAINMENT TESTING (SB-989) CONDUCTED ON MAY 27, 2014, BY BRYAN SELF OF CONFIDENCE UST SERVICES (THE CONTRACTOR) IDENTIFIED THAT MULTIPLE COMPONENTS OF THE UNDERGROUND STORAGE TANK (UST) SYSTEM FAILED DURING THAT TESTING. THESE INCLUDE; THE UNDER DISPENSER CONTAINMENT (UDC) FOR DISPENSERS #1/2, #3/4, #5/6, #7/8, AND #9,10. FAILED THE WATER TEST, THE 87 GASOLINE SUBMERSIBLE TURBINE PUMP (STP) SUMP FAILED THE WATER TEST. THE 87 GASOLINE AND DIESEL SECONDARY PIPING LINES FROM THE TANKS TO THE DISPENSERS FAILED THE AIR PRESSURE TEST. IMMEDIATELY, THE OWNERS/OPERATORS OF BERRY BLUE VALERO, SHALL DETERMINE THE CAUSE OF THE FAILURES, SHALL IDENTIFY A PLAN OF ACTION TO CORRECT THESE FAILURES, AND SHALL SUBMIT A WORK PLAN AND PERMIT APPLICATION, AS MAY BE REQUIRED, TO SERVICE, REPAIR, REPLACE, OR REMOVE FROM SERVICE EACH FAILED COMPONENT.

#### **Violation Description:**

Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.

the next test is conducted in or before September 2022. Notify our office at least 2 business days prior to conducting the test.

**Violation Description:**

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Returned to compliance on 09/26/2019. Facility has not tested overfill prevention equipment.

**Violation Description:**

Failure to comply with one or more of the following overfill prevention equipment requirements:  
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or  
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or  
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or  
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

**Eval Notes:**

On-site today to oversee annual monitoring certification testing. Technician Jeff Conger with Pinnacle Fuel Compliance Service has valid ICC, Veeder Root, and VMI certifications. Site consists of: 1 Regular (87) tank 1 Diesel tank - non operable due to compromised primary steel tank 1 Premium (91) tank 5 dispenser pairs Regular Tank annular space is dry and monitored by Veeder-Root 420 sensor. Premium tank is monitored by a Veeder-Root 344 sensor. Sensors triggered audible and visual alarms. UDC and STP sumps are monitored by Veeder-Root 208 sensors and performed as designed. Sensors provided positive shutdown in addition to audible and visual alarms. Mechanical line leak detectors provided slow flow when a simulated leak of 3 gallons per hour at 10 PSI was detected. Sensor Out/Power out provided positive shutdown of turbines. Overfill is provided by flapper valves inside the drop tubes. Note: Upon arrival observed approximately 25 gallons of fuel/water in the [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Capitol Ave, San Jose, for Final Monitoring System Certification, and to confirm final issues for testing and confirmation prior to final sign-off of the UST installation permit requirements. On site today is; Byron Molina, W&M Inc. ICC Service Tech, 5268627, exp. 5/18/2018 Veeder-Root, A27999, exp. 10/31/2018 Incon #1014143708, exp. 9/29/2018 VMI #2770, exp. 3/5/2019, verified with Vaporless Manufacturing via email today. Testing done today; PLLD, 87, 89, and Diesel were tested at dispenser 7/8. All 3 were calibrated, tested, 87 and 91 functioned properly. The Diesel was not functioning properly, FAIL. The liquid sensors were tested at dispenser 1/2. The set up identification was reversed between L-1 and L-2. FAIL. Correctly identify each sensor in the system and verify correct functionality. The Spill buckets were verified to hold 5 gallons capacity. - OK NOTE: The spill bucket integrity testing shall be done when [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

I was on site to confirm the permitted underground storage tank removal and soil sampling. Willie Molina was on site to identify the sample locations. Don Kellar and Tiffany Tona of FR were on site to perform the soil sampling. Brass sleeves were used to collect samples at 7 locations. See Map as drawn (attached). Soil samples were collected, identified, tracked on chain of custody, and delivered to the lab for analysis by the end of day. See permit and chain of custody for sampling analysis details. All tanks was flushed and washed free of gasoline and diesel, confirmed cleaned (see Haz Waste Tank Closure Cert. attached.). All tanks loaded and hauled as non-hazardous.; Note: data in [EVAL Notes] field for some records is truncated from the source.

I am on site, 1111 N Capitol, today to confirm the liquid in the UDCs. Liquid is full, with air trapped in lines to system risers. These riser connections are connected in reverse order as shown in the manufacturers installation instructions. The manufacturer shows the sensor riser attached to the upper port and the confirmation riser "narrow riser tube" attached at the bottom port within the UDC. Confirm the proper connection, with minimal sags and no looping, as required by the manufacturer. Re-connect as needed. After confirmation as installed per manufacturers directions, contact this office for confirmation inspection of this UDC system. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

On-site to conduct a UST follow-up inspection. Annual monitoring certification was partially performed on 9/20/18 but could not be completed due to the presence of fuel in the STP sumps as well as repeated alarms associated with recurring monitoring fluid losses. Mr. Byron Molina, a technician with the UST installer (W & M Inc.) was met on-site on 10/30 & 10/31/18 to troubleshoot the recurring monitoring fluid loss issue and to perform associated repairs. Mr. Aneil Chand was on-site today to attempt to complete the annual monitoring system certification testing. The following monitoring equipment was tested: -Annular sensors for 87, 91, and Diesel tank (see violation T240). -Smart sensors for 87, 91, and Diesel product lines as well as vent and vapor recovery lines. -Vacuum zone communication for 91, Diesel, and vapor recovery. 87 line could not be tested due to non-functional sensors (see violation T240). The following violations cited on 9/20/18 were observed [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Notes:</b>		On-site today to witness annual monitoring certification, spill bucket testing, and to perform an inspection of the underground storage tank system. Testing performed by Aneil Chand with Pinnacle Fuel Compliance. Mr. Chand has all required certifications. Site is not currently in operation due to numerous secondary containment piping/udc failures and a compromised primary diesel tank (currently in temporary closure). Testing entire system with exception of line leak detectors and fail-safe shutdown (sensor out and power out conditions). Point of sale has been removed and dispensers do not operate. All components tested performed as designed. Paperwork was not available for review. NOTE 1: UST system is no longer capable of demonstrating fail-safe shutdown (exemption condition from annual pipe tightness testing) as turbines cannot be powered on. NOTE 2: Secondary containment not product tight violations (T530) remains active. Contractor Aneil Chand states [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Notes:</b>		Inspection began 8-16-16 to follow up on inspection performed by Matthew Burge on 8-11-16. Inspection completed and report issued today, 8-26-16. Prior violations: T200/T300 Tank and Piping Monitoring: Inspection report from 8-11-16 indicated that the underground storage tank systems were not monitored. This was due to tampering/vandalism to the TLS 350 monitoring panel. Contractor, Aneil Chand, obtained a used panel and restored operation August 13th, 2016. Obtain a permit for this already performed repair. T530 Secondary Containment: Inspection report from 8-11-16 indicated that all three annular spaces failed secondary containment testing. On 8-16-16, contractor Aneil Chand was able to pull 5.5 inches of hg vacuum on the 91 tank annular and the vacuum had no loss over a 1 hour test. 87 Annular was unable to hold vacuum. Due to continued failure of the owner/operator of the underground storage tanks (USTs) at this facility to correct significant UST violations [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

current. 3 tanks: 87, 91 and diesel. (91 and diesel are compartmentalized) This system is monitored hydrostatically (sumps, UDC's and vent box) and by vacuum (product lines, vent lines, vapor return lines, tank annular spaces). Note\* - some vaccum sensors were in "fault" mode. Per service technician, Veeder Root said this may be fixed via a cold start. System was cold started on site. The following components were tested and functioned as required: -3 STP sump liquid sensors; positive shutdown was observed -3 fill sump liquid sensors -2 tank annular space sensors; audible and visual alarm -1 vent box liquid sensor -7 Vacuum sensors with corresponding liquid sensors (Vacuum monitoring of tanks/piping giving "No Vacuum" & "High Liquid" alarms for each) except as noted above. -6 under dispenser containment pan [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Date:</b>	09/06/2017
<b>Violations Found:</b>	No
<b>Eval General Type:</b>	Other/Unknown
<b>Eval Type:</b>	Other, not routine, done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	UST
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

I am on site, 1111 N. Capitol Ave, San Jose, to identify final issues for testing and confirmation prior to final sign-off of the UST installation permit. NOTE: The Monitoring System Testing to be done will require Confined Space Entry. This Confined Space issue was discussed between Byron and Angel Molina and myself. NOTE: The testing and working valve rack for the vacuum monitoring system is located deep within the sumps, to the point where the UST Service Tech, that is conducting annual testing, must enter the Confined Space to conduct the work. Outstanding Issues; The dispenser frames need to have filler around the electrical conduit to provide the slope into the UDC. The bulkheads are to be used as off-set guides to establish the correct slope. This detail was discussed with Byron Molina. The Veeder-Root, PLLD sensors,Q1, Q2, Q3. were set with 100 feet as the piping length. This was changed to 180 feet to reflect the actual piping system length. The [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Notes:</b>	

I am on site, 1111 N. Capitol Ave, San Jose, for Final Monitoring System Certification, and to confirm final issues for testing and confirmation prior to final sign-off of the UST installation permit requirements. On site today is; Byron Molina, W&M Inc. ICC Service Tech, 5268627, exp. 5/18/2018 Veeder-Root, A27999, exp. 10/31/2018 Incon #1014143708, exp. 9/29/2018 VMI #2770, exp. 3/5/2019, verified with Vaporless Manufacturing. Testing done today; Overfill Prevention Probes set to 90% Tank Capacity., 3 UST probes, OK Functional Testing of liquid sensors L-1 through L-26, see below, OK Communication Testing of all vacuum zones, s-9 through s-16, see below, OK Zone Map received (attched), OK, this will be modified for clarity. Issues identified today; The sumps shall have a means of testing liquid communication installed and finished. The San Jose Fire Department, Hazardous Materials Division shall be contacted to confirm permit [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Violation Notes:**

Returned to compliance on 08/26/2014. THE FACILITY WAS NOT ABLE TO PROVIDE SUFFICIENT DETAIL THAT EMPLOYEES RESPONSIBLE FOR HAZARDOUS WASTE MANAGEMENT OR OPERATIONS WERE TRAINED IN THE RELATED ISSUES.

#### **Violation Description:**

Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.

#### Violations

**Violation Date:** 07/05/2016  
**Violation Program:** UST  
**Citation:** 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)  
**Violation Notes:**

Returned to compliance on 07/21/2016. The 5/9/2016 CERS submittal reports that all three tank systems have a PLLD (electronic line leak detector). Only the Regular Unleaded Gasoline tank system has a PLLD as observed on 7/5/2016. The correct line leak detector installed on each tank system as observed on 7/5/2016 is as follows: Tank 1 (Regular Unleaded Gasoline) = PLLD (Veeder Root electronic line leak detector) Tank 2 (Premium Unleaded Gasoline) = FX1V (Red Jacket mechanical line leak detector for gasoline) Tank 3 (Diesel) = FX2DV (Red Jacket mechanical line leak detector for diesel) \*Update the line leak detector equipment for the Premium Unleaded Gasoline and Diesel tank systems and resubmit to CERS.

#### **Violation Description:**

Failure to have a UST Monitoring Plan available on site.

#### Violations

**Violation Date:** 07/05/2017  
**Violation Program:** HW  
**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health

**Violation Notes:**

Returned to compliance on 07/11/2017. Observed 1 x 55 gallon drum of fuel-contaminated water in dumpster enclosure that did not have sufficient aisle space.

**Violation Description:**

Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.

**Violations**

<b>Violation Date:</b>	07/27/2016	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section (s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)		

**Violation Notes:**

Returned to compliance on 09/07/2016. The following components failed SB989 testing today: -Regular Unleaded STP sump -Premium Unleaded STP sump -Regular Unleaded piping -Premium Unleaded piping \*Investigate and repair as necessary. Follow corrective actions noted below.

**Violation Description:**

Failure to maintain secondary containment (e.g. failure of secondary containment testing).

**Violations**

<b>Violation Date:</b>	07/21/2021	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)		

**Violation Notes:**

Returned to compliance on 07/21/2021. The 91 mechanical line leak detector failed to function as required when a 3 gallon per hour leak at 10 psi was simulated. After purging approximately 40 gallons of fuel to get the air out of the lines, it was re-tested and passed after 4 attempts. NO FURTHER ACTION IS REQUIRED, THIS VIOLATION WILL BE CLOSED.

**Violation Description:**

Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.

**Violations**

**Citation:** 23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)  
**Violation Notes:**

Returned to compliance on 08/19/2021. Cashier Marina Reodica stated that she started working at this location about one month ago and has only received online training. Designated UST Operator Facility Training Certificates also indicate that she has not received DUSTO training. Within 30 days, ensure Marina receives the required DUSTO training and retain training records for at least 3 years.

**Violation Description:**

Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO).

**Violations**

**Violation Date:** 07/20/2020  
**Violation Program:** UST  
**Citation:** HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2  
**Violation Notes:**

Returned to compliance on 08/05/2020. Spill bucket for 91 has noted loss of liquid at interface between bellow and gasket to sump lid. Tested below gasket, bucket is liquid tight, but can not hold a full 5 gallons. Tested at 5 gallons, leakage noted at interface. Please repair interface and retest.

**Violation Description:**

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

<b>Violation Notes:</b>			

Returned to compliance on 07/24/2016. \_\_\_\_\_ The TLS-350 tank monitoring console is blocked by a tobacco stand. This stand was pulled back in order to access the monitoring panel for testing today. \*The monitoring panel must be accessible at all times. Blocking the monitoring panel may delay identification of a leak alarm as well as alarm response. Do not block the monitoring panel. Relocate the tobacco stand or use a smaller stand that will fit underneath the monitoring panel and allow for clear access to it. (pictures taken) \_\_\_\_\_

#### **Violation Description:**

Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

#### **Violations**

<b>Violation Date:</b>	07/22/2019	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	UST	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)		
<b>Violation Notes:</b>			

Returned to compliance on 07/22/2019. The annular sensor on the 87 tank failed to come out of alarm after being tested in water. The sensor was determined to be faulty and was replaced like-for-like. The new sensor functioned as required when tested. THIS VIOLATION WAS CORRECTED AT TIME OF INSPECTION WITH NO FURTHER ACTION REQUIRED.

#### **Violation Description:**

Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.

#### **Violations**

<b>Eval Notes:</b>		On-site to witness the every-36-month overfill prevention equipment testing in accordance with 23 CCR 2637.2 and the PEI/RP1200-17 industry standard. The lead UST service technician conducting testing today was Marcus Garcia of Service Station Systems, Inc. Mr. Garcia had the following required certifications: - OPW EVR UST certification (exp. 3/26/2023) - Emco Wheaton Phase I/II ASC (exp. 5/4/2023) Facility has 3 USTs: 1 x 20,000 gal Regular (87) Gasoline, 1 x 15,000 gal Premium (91) Gasoline, and 1 x 8,000 gal Diesel. All have a reported install date of September 1999. Modern Welding Tank Chart for a 114" diameter (20,148 gallon) 456" length tank was used for the 87 UST. Modern Welding Tank Chart for a 114" diameter (15,023 gallon) 340" length tank was used for the 91 UST. Modern Welding Tank Chart for a 96" diameter (8,021 gallon) 256" length tank was used for the Diesel UST. [87] - Shut-off was verified to be at 18,744 gallons at 99.875" fuel height. This [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Onsite to oversee annual Monitoring system certification testing conducted by Service Station Systems, technician Marcus Mercado. Mr. Mercado has valid ICC, Veeder Root, Red Jacket and VMI certs as of date of testing. Site is branded "Speedway" Of note: 87 tank has two turbines, manifolded together to one pipe prior to being split to three piping runs to feed dispensers. Only one turbine is fitted with a ELLD. All three tank annular sensors provided audible alarms All three tank fill sump sensors provided audible alarms. Of note, the 91 tank sensor originally failed to alarm and when shaken to check float functionality, set off the Veeder Root controlled external overfill alarm. STP sumps provided audible alarms and shutdown of turbines. UDCs provided audible alarms and shutdown of turbines. Mechanical LLDs (Diesel and 91) both provided restricted/slow flow upon detection of simulated leak. PLLD (87) provided shutdown upon detection of simulated leak at 3gph, [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Onsite to oversee annual UST monitoring system certification conducted by Service Station Systems Inc, technician Israel Santillan. Mr. Santillan holds current ICC ( ), Veeder Root ( ), Veeder Root Red Jacket MLLD ( ), and VMI ( ) certifications. The following sensors were tested and shown to provide audible and visual alarms at the Veeder Root TLS 350 monitoring panel: 87, 91, diesel tank annular sensors 87, 91 and diesel STP sump sensors. Also provided positive shutdown of turbines. 87, 91 and diesel fill sump sensors. Also provided positive shutdown of turbines. UDC sensors at dispensers (8 dispenser/UDCs). Also provided positive shutdown of turbines. MLLDs were tested and shown to be able to detect a simulated 3gph, 10psi leak. Fill buckets were hydro statically tested for one hour without loss of water-- Drain valve on 87 bucket not functional, will not hold liquid. REPLACE SPILL BUCKET AND RETEST. Overfill prevention is provided by ATG monitoring. ATGuage [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Site History:</b>			

In May 2005 Terrasearch collected 8 discrete soil samples (S-1 through S-8) at depth from 0.5 to 2 feet below ground surface (bgs) and analyzed for organochloride pesticides and the metals arsenic, lead and mercury. In addition Terrasearch collected 4 discrete soil samples (M1- through M-4) from approximately 0.5 ft bgs and analyzed for CAM 17 Metals. Note that residual levels of pesticides and metals will be referred to the Department of Toxic Substances Control. In July 2005 Terrasearch drilled four borings (B1 to B4) at the Site to evaluate soil and ground water quality in the approximate area of each former UST (Terrasearch, 2005b). Confirmation soil samples (T1 and T2) also were collected beneath the 500- or 550- gallon gasoline UST (13060 Berryessa Road) following its removal. Based on the results, no gasoline- (TPHg), diesel- (TPHd), oil-range hydrocarbons (TPHo), volatile organic compounds (VOCs), benzene, toluene, ethylbenzene, xylenes (BTEX), and MTBE were detected above reporting limits in the soil samples. Laboratory analyses of the grab ground water samples revealed diesel- (up to 150 parts per billion [ppb]) and oil-range hydrocarbons (up to 1,200 ppb) in water samples collected from borings B1 (13120 Berryessa Rd) and B2 (13100 Berryessa Rd). No silica gel cleanup was performed prior to TPHd/o analyses. With exception of low concentrations (below residential environmental screening levels [ESLs] and drinking water maximum contaminant levels [MCLs]) of four VOCs detected in the B1 water sample, no VOCs, BTEX, or MTBE were detected above reporting limits in the ground water samples. In May 2006 Engeo drilled four borings (1-B1 to 1-B4) at the Site to better evaluate soil and ground water quality conditions (Engeo, 2006). Borings 1-B1, 1-B2, and 1-B3 were drilled within approximately 50 feet of Terrasearch's B2 boring where slightly elevated oil-range hydrocarbons were detected in ground water; and boring 1-B4 was drilled in the assumed down-gradient ground water flow direction (assumed flow direction is southwest) from Terrasearch's B1 boring where low concentrations of VOCs and diesel-range hydrocarbons were detected in ground water. Based on the results, no gasoline-, diesel-, and oil-range hydrocarbons, VOCs, BTEX, and MTBE were detected in the soil and ground water samples. A silica-gel cleanup was not performed for the TPHd and TPHo analysis. Engeo concluded the petroleum hydrocarbon and VOC concentrations detected in ground water were limited in extent and did not pose a significant risk to human health and the environment. In August 2006 ERM drilled four borings (B-1 to B-4) at the Site to further evaluate soil and ground water conditions (ERM, 2006). Borings B-1 and B-3 were drilled near previous Terrasearch borings B4 and B2; and borings B-2 and B-4 were drilled within approximately 75 feet of Terrasearch's B2 location where slightly elevated oil-range hydrocarbons were

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

detected in ground water. Based on the results, no gasoline-, diesel-, oil-range hydrocarbons, BTEX, and MTBE were detected in the soil and ground water samples with exception of oil-range hydrocarbons detected in ground water from B-1 and B-3 (up to 1,400 ppb). Although oil-range hydrocarbons were detected in the B-1 boring, previous ground water samples collected from borings drilled within approximately 10 feet of the B-1 location did not reveal oil-range hydrocarbons. The oil-range hydrocarbons in the B-3 boring were similar in magnitude to concentrations found during the Terrasearch investigation. No silica gel cleanup was performed prior to TPHd/o analyses. In August 2008, to further evaluate the lateral extent of soil and ground water impacts in the presumed down-gradient ground water flow direction (reported west-southwest), three exploratory borings were drilled to a depth of approximately 45 feet. Exploratory borings EB-1, EB-2 and EB-3 were advanced west-southwest of the reported former UST areas. Soil samples were collected from each boring at approximately 5-foot intervals and were screened in the field using an organic vapor meter (OVM). OVM measurements ranged from 0 ppm to 0.1 ppm and appeared typical of background conditions. Ground water was encountered in exploratory borings EB-1 and EB-3 at approximately 41 feet. Ground water was not encountered in boring EB-2 to a maximum depth explored of 45 feet. Soil samples submitted for analyses were collected from the upper approximately 10 feet of soil and from immediately above the water table surface. These samples were analyzed for BTEX, TPHg, and fuel oxygenates including MTBE, 1,2-dibromoethane (EDB), 1,2-dichloroethane (EDC), ethyl tert-butyl ether (ETBE), tert-butyl alcohol (TBA) and tert-amyl methyl ether (TAME) (EPA Test Method 8260B). Since ground water was not encountered in EB-2, an additional three soil samples were collected from the presumed approximate depth of the water-bearing zone (approximately 30 to 40 feet). The samples were collected from approximate depths of 29½-30 feet, 34½-35 feet and 39½-40 feet) and were analyzed for TPHd and TPHo (EPA Test Method 8015M), and VOCs including fuel oxygenates and BTEX compounds (EPA Test Method 8260). A silica gel cleanup was performed for the TPHd and TPHo analyses. Based on the results, with exception TPHd detected in one soil sample at 2.15 ppm, no petroleum hydrocarbons or VOCs were detected in the selected soil samples. In addition, laboratory analyses of the grab ground water samples did not detect petroleum hydrocarbons or VOCs above their respective laboratory detection limits.

<b>Gndwater Monitoring Freque:</b>			
<b>Designated Beneficial Use Desc:</b>	Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply		
<b>Site History:</b>			

In May 2005 Terrasearch collected 8 discrete soil samples (S-1 through S-8) at depth from 0.5 to 2 feet below ground surface (bgs) and analyzed for organochloride pesticides and the metals arsenic, lead and mercury. In addition Terrasearch collected 4 discrete soil samples (M1- through M-4) from approximately 0.5 ft bgs and analyzed for CAM 17 Metals. Note that residual levels of pesticides and metals will be referred to the Department of Toxic Substances Control.

In July 2005 Terrasearch drilled four borings (B1 to B4) at the Site to evaluate soil and ground water quality in the approximate area of each former UST (Terrasearch, 2005b). Confirmation soil samples (T1 and T2) also were collected beneath the 500- or 550- gallon gasoline UST (13060 Berryessa Road) following its removal. Based on the results, no gasoline- (TPHg), diesel- (TPHd), oil-range hydrocarbons (TPHo), volatile organic compounds (VOCs), benzene, toluene, ethylbenzene, xylenes (BTEX), and MTBE were detected above reporting limits in the soil samples. Laboratory analyses of the grab ground water samples revealed diesel- (up to 150 parts per billion [ppb]) and oil-range hydrocarbons (up to 1,200 ppb) in water samples collected from borings B1 (13120 Berryessa Rd) and B2 (13100 Berryessa Rd). No silica gel cleanup was performed prior to TPHd/o analyses. With exception of low concentrations (below residential environmental screening levels [ESLs] and drinking water maximum contaminant levels [MCLs]) of four VOCs detected in the B1 water sample, no VOCs, BTEX, or MTBE were detected above reporting limits in the ground water samples.

In May 2006 Engeo drilled four borings (1-B1 to 1-B4) at the Site to better evaluate soil and ground water quality conditions (Engeo, 2006). Borings 1-B1, 1-B2, and 1-B3 were drilled within approximately 50 feet of Terrasearch's B2 boring where slightly elevated oil-range hydrocarbons were detected in ground water; and boring 1-B4 was drilled in the assumed down-gradient ground water flow direction (assumed flow direction is southwest) from Terrasearch's B1 boring where low concentrations of VOCs and diesel-range hydrocarbons were detected in ground water. Based on the results, no gasoline-, diesel-, and oil-range hydrocarbons, VOCs, BTEX, and MTBE were detected in the soil and ground water samples. A silica-gel cleanup was not performed for the TPHd and TPHo analysis. Engeo concluded the petroleum hydrocarbon and VOC concentrations detected in ground water were limited in extent and did not pose a significant risk to human health and the environment.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

In August 2006 ERM drilled four borings (B-1 to B-4) at the Site to further evaluate soil and ground water conditions (ERM, 2006). Borings B-1 and B-3 were drilled near previous Terrasearch borings B4 and B2; and borings B-2 and B-4 were drilled within approximately 75 feet of Terrasearch's B2 location where slightly elevated oil-range hydrocarbons were detected in ground water. Based on the results, no gasoline-, diesel-, oil-range hydrocarbons, BTEX, and MTBE were detected in the soil and ground water samples with exception of oil-range hydrocarbons detected in ground water from B-1 and B-3 (up to 1,400 ppb). Although oil-range hydrocarbons were detected in the B-1 boring, previous ground water samples collected from borings drilled within approximately 10 feet of the B-1 location did not reveal oil-range hydrocarbons. The oil-range hydrocarbons in the B-3 boring were similar in magnitude to concentrations found during the Terrasearch investigation. No silica gel cleanup was performed prior to TPHd/o analyses.

In August 2008, to further evaluate the lateral extent of soil and ground water impacts in the presumed down-gradient ground water flow direction (reported west-southwest), three exploratory borings were drilled to a depth of approximately 45 feet. Exploratory borings EB-1, EB-2 and EB-3 were advanced west-southwest of the reported former UST areas. Soil samples were collected from each boring at approximately 5-foot intervals and were screened in the field using an organic vapor meter (OVM). OVM measurements ranged from 0 ppm to 0.1 ppm and appeared typical of background conditions. Ground water was encountered in exploratory borings EB-1 and EB-3 at approximately 41 feet. Ground water was not encountered in boring EB-2 to a maximum depth explored of 45 feet. Soil samples submitted for analyses were collected from the upper approximately 10 feet of soil and from immediately above the water table surface. These samples were analyzed for BTEX, TPHg, and fuel oxygenates including MTBE, 1,2-dibromoethane (EDB), 1,2-dichloroethane (EDC), ethyl tert-butyl ether (ETBE), tert-butyl alcohol (TBA) and tert-amyl methyl ether (TAME) (EPA Test Method 8260B). Since ground water was not encountered in EB-2, an additional three soil samples were collected from the presumed approximate depth of the water-bearing zone (approximately 30 to 40 feet). The samples were collected from approximate depths of 29½-30 feet, 34½-35 feet and 39½-40 feet) and were analyzed for TPHd and TPHo (EPA Test Method 8015M), and VOCs including fuel oxygenates and BTEX compounds (EPA Test Method 8260). A silica gel cleanup was performed for the TPHd and TPHo analyses. Based on the results, with exception TPHd detected in one soil sample at 2.15 ppm, no petroleum hydrocarbons or VOCs were detected in the selected soil samples. In addition, laboratory analyses of the grab ground water samples did not detect petroleum hydrocarbons or VOCs above their respective laboratory detection limits.

State Waste Code:  
State Waste Code Desc:  
Tsd Epa ID: ARO069748192

**Tanner Information**

Method Description:  
Tons: 37.65  
Year: 1991  
Generator County Code: 43  
Generator County: Santa Clara  
Method Code: H01  
Tsd County Code: 43  
Tsd County: Santa Clara  
State Waste Code: 223  
State Waste Code Desc: Unspecified oil-containing waste  
Tsd Epa ID: CAD000628149

**Tanner Information**

Method Description:  
Tons: 2.62  
Year: 1991  
Generator County Code: 43  
Generator County: Santa Clara  
Method Code: 14  
Tsd County Code: 43  
Tsd County: Santa Clara  
State Waste Code: 352  
State Waste Code Desc: Other organic solids  
Tsd Epa ID: CAD000628149

**Tanner Information**

Method Description:  
Tons: 1  
Year: 1991  
Generator County Code: 43  
Generator County: Santa Clara  
Method Code: H01  
Tsd County Code: 43  
Tsd County: Santa Clara  
State Waste Code: 461  
State Waste Code Desc: Paint sludge  
Tsd Epa ID: CAD000628149

**Tanner Information**

Method Description:  
Tons: 0  
Year: 1991  
Generator County Code: 43  
Generator County: Santa Clara

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

### Standard Environmental Record Sources

#### Federal

##### Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date: Mar 4, 2017**

##### National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

##### National Priority List - Proposed:

PROPOSED NPL

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

##### Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Mar 30, 2022**

**SEMS List 8R Active Site Inventory:**

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date:** Apr 27, 2022

**SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date:** Apr 27, 2022

**Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date:** Jun 1985

**Comprehensive Environmental Response, Compensation and Liability Information System -**

CERCLIS

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date:** Oct 25, 2013

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date:** Dec 31, 1998

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date:** Oct 25, 2013

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

**Government Publication Date:** Jan 30, 2014

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date:** Apr 11, 2022

**RCRA non-CORRACTS TSD Facilities:**[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Apr 11, 2022**

**RCRA Generator List:**[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Apr 11, 2022**

**RCRA Small Quantity Generators List:**[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Apr 11, 2022**

**RCRA Very Small Quantity Generators List:**[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Apr 11, 2022**

**RCRA Non-Generators:**[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Apr 11, 2022**

**RCRA Sites with Controls:**[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Apr 11, 2022**

**Federal Engineering Controls-ECs:**[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Dec 30, 2021**

**Federal Institutional Controls- ICs:**[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Dec 30, 2021**

**Land Use Control Information System:**

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date:** Sep 1, 2006

**Institutional Control Boundaries at NPL sites:**

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date:** Mar 30, 2022

**Emergency Response Notification System:**

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1982-1986

**Emergency Response Notification System:**

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1987-1989

**Emergency Response Notification System:**

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date:** Dec 31, 2021

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date:** Aug 20, 2021

**FEMA Underground Storage Tank Listing:**

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date:** Dec 31, 2017

**Facility Response Plan:**

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Delisted Facility Response Plans:**

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Historical Gas Stations:**[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date:** Jul 1, 1930

**Petroleum Refineries:**[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**Petroleum Product and Crude Oil Rail Terminals:**[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**LIEN on Property:**[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date:** Apr 27, 2022

**Superfund Decision Documents:**[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date:** May 3, 2022

**State****State Response Sites:**[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

**Government Publication Date:** May 30, 2022

**EnviroStor Database:**[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

**Government Publication Date:** May 30, 2022

**Delisted State Response Sites:**[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

**Government Publication Date:** May 30, 2022

**Solid Waste Information System (SWIS):**[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

**Government Publication Date:** Feb 2, 2022

**Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:**[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

**Government Publication Date:** Sep 20, 2006

**Waste Management Unit Database:**

WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

**Government Publication Date:** Jan 1, 2000

**EnviroStor Hazardous Waste Facilities:**

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

**Government Publication Date:** May 30, 2022

**Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:**

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

**Government Publication Date:** Dec 31, 1995

**Construction and Demolition Debris Recyclers:**

C&amp;D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

**Government Publication Date:** Jun 20, 2018

**Recycling Centers:**

RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Listing of Certified Processors:**

PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Listing of Certified Dropoff, Collection, and Community Service Programs:**

CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**Land Disposal Sites:**

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

**Government Publication Date:** Feb 15, 2022

**Leaking Underground Fuel Tank Reports:**

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

**Government Publication Date:** Feb 15, 2022

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

**Permitted Underground Storage Tank (UST) in GeoTracker:**

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Apr 25, 2022

**Proposed Closure of Underground Storage Tank Cases:**

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

**Historical Hazardous Substance Storage Information Database:**

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

**Statewide Environmental Evaluation and Planning System:**

UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

**Aboveground Storage Tanks:**

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

**SWRCB Historical Aboveground Storage Tanks:**

AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

**Oil and Gas Facility Tanks:**

TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 4, 2022

**Delisted Storage Tanks:**

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: May 25, 2022

**California Environmental Reporting System (CERS) Tanks:**

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 5, 2022

**Delisted California Environmental Reporting System (CERS) Tanks:**

DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 5, 2022

**Historical Hazardous Substance Storage Container Information - Facility Summary:**[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

**Government Publication Date: May 27, 1988**

**Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:**[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

**Government Publication Date: May 30, 2022**

**CALSITES Database:**[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

**Government Publication Date: May 1, 2004**

**Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:**[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

**Government Publication Date: Feb 18, 2021**

**Deed Restrictions and Land Use Restrictions:**[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

**Government Publication Date: Feb 15, 2022**

**Voluntary Cleanup Program:**[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

**Government Publication Date: May 30, 2022**

**GeoTracker Cleanup Program Sites:**[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

**Government Publication Date: Feb 15, 2022**

**Delisted Cleanup Program Sites:**[DELISTED CLEANUP](#)

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

**Government Publication Date: Feb 15, 2022**

**Delisted County Records:**[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date: May 26, 2022**

## **Tribal**

### **Leaking Underground Storage Tanks (LUSTs) on Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

**Government Publication Date: Oct 12, 2021**

### **Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

**Government Publication Date: Oct 12, 2021**

### **Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date: Jan 31, 2022**

### **Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date: Oct 13, 2021**

## **County**

### **Santa Clara County - Historic Solvent Case Listing:**

HSOL SANTA CLARA

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

**Government Publication Date: Aug 22, 2016**

### **Santa Clara County - Local Oversight Program Listing:**

LOP SANTA CLARA

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

**Government Publication Date: Jun 14, 2017**

### **Santa Clara County - Underground Storage Tanks:**

UST SANTA CLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

**Government Publication Date: Apr 28, 2022**

### **Santa Clara County - CUPA Facilities List:**

CUPA SANTA CLARA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

**Government Publication Date: Mar 13, 2021**

### **Santa Clara County - City of San Jose Hazardous Material Facilities:**

HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

**Government Publication Date: Oct 15, 2020**

### **Santa Clara County - Gilroy City CUPA Facilities List:**

CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

**Government Publication Date: Jun 3, 2022**

### **Santa Clara County - Sunnyvale City CUPA List:**

CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

**Government Publication Date: Jun 10, 2022**

## ***Additional Environmental Record Sources***

### **Federal**

#### **Facility Registry Service/Facility Index:**

**FINDS/FRS**

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

**Government Publication Date: Nov 2, 2020**

#### **Toxics Release Inventory (TRI) Program:**

**TRIS**

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date: Aug 24, 2021**

#### **Perfluorinated Alkyl Substances (PFAS) Releases:**

**PFAS TRI**

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

**Government Publication Date: Aug 24, 2021**

#### **PFOA/PFOS Contaminated Sites:**

**PFAS NPL**

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

**Government Publication Date: Apr 15, 2022**

#### **Perfluorinated Alkyl Substances (PFAS) Water Quality:**

**PFAS WATER**

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date: Jul 20, 2020**

#### **SSEHRI PFAS Contamination Sites:**

**PFAS SSEHRI**

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

**Government Publication Date: Dec 12, 2019**

#### **National Response Center PFAS Spills:**

**ERNS PFAS**

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

**Government Publication Date: Feb 23, 2022**

#### **Hazardous Materials Information Reporting System:**

**HMIRS**

**Government Publication Date:** Sep 1, 2020

**National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date:** Nov 22, 2021

**Toxic Substances Control Act:**

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

**Government Publication Date:** Apr 11, 2019

**Hist TSCA:**

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date:** Dec 31, 2006

**FTTS Administrative Case Listing:**

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date:** Jan 19, 2007

**FTTS Inspection Case Listing:**

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date:** Jan 19, 2007

**Potentially Responsible Parties List:**

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

**Government Publication Date:** Mar 30, 2022

**State Coalition for Remediation of Drycleaners Listing:**

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

**Government Publication Date:** Nov 08, 2017

**Integrated Compliance Information System (ICIS):**

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date:** Apr 30, 2022

**Drycleaner Facilities:**

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: May 5, 2021**

**Delisted Drycleaner Facilities:**

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: May 5, 2021**

**Formerly Used Defense Sites:**

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: May 26, 2021**

**Former Military Nike Missile Sites:**

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

**Government Publication Date: Dec 2, 1984**

**PHMSA Pipeline Safety Flagged Incidents:**

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

**Government Publication Date: Jul 7, 2020**

**Material Licensing Tracking System (MLTS):**

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

**Historic Material Licensing Tracking System (MLTS) sites:**

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

**Mines Master Index File:**

MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Government Publication Date: Feb 1, 2022**

**Surface Mining Control and Reclamation Act Sites:**

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**Government Publication Date: Dec 18, 2020**

**Mineral Resource Data System:**

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

**Government Publication Date:** Mar 15, 2016

**Uranium Mill Tailings Radiation Control Act Sites:**

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

**Government Publication Date:** Mar 4, 2017

**Alternative Fueling Stations:**

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

**Government Publication Date:** May 16, 2022

**Air Facility System:**

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

**Government Publication Date:** Oct 17, 2014

**Superfunds Consent Decrees:**

CONSENT DECREES

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

**Government Publication Date:** May 18, 2022

**Registered Pesticide Establishments:**

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

**Government Publication Date:** Mar 30, 2022

**Polychlorinated Biphenyl (PCB) Transformers:**

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

**Government Publication Date:** Oct 15, 2019

**Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date:** Jan 20, 2022

**State****Dry Cleaning Facilities:**

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

**Delisted Drycleaners:**

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 28, 2020

**Non-Toxic Dry Cleaning Incentive Program:**

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2020

**Per- and Polyfluoroalkyl Substances (PFAS):**

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Feb 15, 2022

**PFOA/PFOS Groundwater:**

[PFAS GW](#)

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Apr 27, 2022

**Hazardous Waste and Substances Site List - Site Cleanup:**

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

**Toxic Pit Cleanup Act Sites:**

[TOXIC PITS](#)

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

**List of Hazardous Waste Facilities Subject to Corrective Action:**

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

**EnviroStor Inspection, Compliance, and Enforcement:**

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 29, 2021

**School Property Evaluation Program Sites:**

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: May 30, 2022

**California Hazardous Material Incident Report System (CHMIRS):**

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Feb 8, 2022

**Historical California Hazardous Material Incident Report System (CHMIRS):**

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date:** Jan 1, 1993

**Hazardous Waste Manifest Data:**

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date:** Oct 24, 2016

**Historical Hazardous Waste Manifest Data:**

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date:** Dec 31, 1992

**DTSC Registered Hazardous Waste Transporters:**

[HW TRANSPORT](#)

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

**Government Publication Date:** Oct 19, 2020

**Registered Waste Tire Haulers:**

[WASTE TIRE](#)

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

**Government Publication Date:** Apr 12, 2022

**California Medical Waste Management Program Facility List:**

[MEDICAL WASTE](#)

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

**Government Publication Date:** Dec 31, 2020

**Historical Cortese List:**

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

**Government Publication Date:** Nov 13, 2008

**Cease and Desist Orders and Cleanup and Abatement Orders:**

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

**Government Publication Date:** Dec 6, 2021

**California Environmental Reporting System (CERS) Hazardous Waste Sites:**

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Government Publication Date:** Apr 5, 2022

**Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:**

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

**Government Publication Date:** Nov 29, 2018

**Sites in GeoTracker:**

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

**Government Publication Date: Feb 15, 2022**

**Mines Listing:**

**MINE**

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

**Government Publication Date: Dec 17, 2021**

**Recorded Environmental Cleanup Liens:**

**LIEN**

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

**Government Publication Date: May 4, 2022**

**Waste Discharge Requirements:**

**WASTE DISCHG**

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**Government Publication Date: Feb 15, 2022**

**Toxic Pollutant Emissions Facilities:**

**EMISSIONS**

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

**Government Publication Date: Dec 31, 2019**

**Clandestine Drug Lab Sites:**

**CDL**

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

**Government Publication Date: Jan 19, 2021**

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

**No County additional environmental databases were selected to be included in the search.**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## **APPENDIX D: QUALIFICATIONS**

---

## Education

M.E. in Geological Engineering, Missouri University of Science and Technology, Rolla, MO  
B.A. in Geology - Colby College, Waterville, ME

## Registrations

Professional Geologist – CA  
Certified Engineering Geologist – CA  
40 Hour Haz. Mat. Certified

## Highlights

Mr. Hachey has over 20 years of professional experience in the geotechnical engineering, engineering geology, and environmental consulting fields. Mr. Hachey is a licensed professional geologist and certified engineering geologist in the State of California. He holds a Bachelor's of Science degree in Geology and holds a Master's in Geological Engineering.

## Experience Summary

Geotechnical capabilities include pier drilling and foundation excavation observation, geotechnical investigations including soil bore and test pit logging, shoring installation observation and testing, report preparation and drafting, field mapping and landslide investigations, fault investigations, and grading observation and testing.

Environmental capabilities including preparation of Transaction Screen Assessments, preparation of Phase I Environmental Site Assessments, and fieldwork for Phase II and Phase III Environmental Site Assessments.

## Project Experience

*Diablo Grande Solar Array Project, Patterson, CA.* Performed large-scale geologic mapping and geotechnical field investigation for a proposed solar array project near Patterson, California. The arrays were proposed within hilly, wooded land surrounding the Diablo Grande community. Geologic mapping was performed over a one month period, and included dozens of test pit excavations and hand-dug pits. A geologic hazards summary report was prepared containing grading and foundation recommendations for the solar arrays.

*Crystal Springs Watershed, San Mateo, CA.* Performed a large-scale geologic mapping and subsurface sampling investigation for a proposed land rehabilitation project proposed by the San Francisco Public Utilities Commission. The mapping and sampling was performed to determine the presence of naturally occurring asbestos contained within the Franciscan Formation bedrock underlying the site in San Mateo County, California. Extensive sampling was conducted, and the results were presented on aerial photograph site plans to ensure worker safety during excavation activities.

Association of Engineering Geologists and Northern California Geological Survey

## Education

BS, Earth and Environmental Science, with a concentration in Law and Policy, Arizona State University, Tempe, AZ

## Highlights

Phase I Environmental Site Assessments  
Transaction Screen Assessments  
Environmental Desktop Reports

## Experience Summary

Ms. Thurman currently serves as a Project Scientist at Partner Engineering and Science, Inc. (Partner), where she is responsible for completing and finalizing specific environmental project tasks, while sustaining deadlines and budgets. Ms. Thurman performs Phase I Environmental Site Assessments (ESAs), per the American Society of Testing and Materials Standard (ASTM E 1527-13) and US Environmental Protection Agency's All Appropriate Inquiry (AAI), as well as customized client formats. Duties include site inspections, regulatory review, historical research, file review, and technical writing. She also performs Transaction Screen Assessments (TSAs) and conducts research for Desktop Environmental Reports for customized client due diligence reporting needs. Ms. Thurman has often received great verbal and written feedback from both Project Managers and Clients for her thorough and well-written reports.

While attending Arizona State University, Ms. Thurman's courses included subjects such as: Geology, Chemistry, Environmental Law, Hydro-Geology, Water Policy, etc. She was a member of Dean's List for Outstanding Scholars due to having an exceptional grade point average. While working and volunteering with the National Audubon Society (a non-profit bird and wildlife conservation organization that emphasizes the importance of environmental education, outreach, and monitoring), Ms. Thurman would lead students through the Audubon Center, teaching them about the wildlife native to Arizona, how to monitor the water quality of rivers and ponds, as well as other various environmental topics.

Ms. Thurman also has experience working in the public sector as a Community Involvement Coordinator with the State of Arizona; where she worked with the legal team to carry out community involvement activities, required by Arizona Law, to the communities affected by the state's Water Quality Assurance Revolving Fund and Federal Superfund sites. These activities included attending outreach events, public hearings, report writing, generating and publishing public notices, etc. Ms. Thurman was also a committee chair for the professional organization, the Environmental Professionals of Arizona (EPAZ). EPAZ is an environmental professional organization, comprised of state, industry, and business leaders including: regulatory, academia, environmental consultants and engineers, as well as environmental services companies dedicated to promoting environmental stewardship.

## Project Experience

*Gasoline Station, Imperial Beach, California* - Ms. Thurman conducted a Phase I ESA on a gasoline station in Imperial Beach that had a lengthy history of environmentally sensitive operations dating back to the 1960s. This Phase I addressed various generations of underground storage tanks (USTs), historical release cases on the property, filtered through hundreds of agency records, etc. Ms. Thurman was able to compile all research on this property in a way that made the report easy to read, despite the complexities. Ms. Thurman received

the following feedback from the Project Manager and Reviewer on the report: "Thank you for such a well-prepared report. It read nicely and was a straightforward review. This was a complicated site and Tara really did a good job of breaking it down and laying out the history in a clear way".

*Mixed-Use Facility, Catalina Island, California* - Ms. Thurman conducted a Phase I ESA for mixed-use facility (commercial, auto-repair, retail, and residential uses) on Catalina Island. This property also involved a rich history dating back to the 1890s. Ms. Thurman travelled out to Catalina Island to conduct the site walk, which involved the on-site assessment of above-ground hydraulic and pneumatic lifts, various hazardous materials, etc. Ms. Thurman received positive feedback on this report via the Client: "Thank you for all your work on this. I'm not too familiar with environmental reports, but this seems very detailed and thorough, and provided interesting history on the property."

*Dual Scope, Downtown High-Rise Hotel, Phoenix, Arizona* - Ms. Thurman conducted a Phase I ESA for an upscale, 32-floor hotel in downtown Phoenix, Arizona. Ms. Thurman reviewed records, historical aerials, Sanborn maps, etc. to mark the historical use of the site throughout history. This site had various components such as, grease interceptors, a diesel generator, cooling tower, elevators, etc.; all of which had to be inspected for compliance and written up within the final Phase I Report.

## Education

Environmental Science, Management Course Work, Portland Community College  
Political Science, University of Oregon

## Registrations

Environmental Professional – Phase I ESA  
EPA AHERA Asbestos Inspector  
EPA AHERA Asbestos Management Planner  
Confined Space Entry

## Training

Radiation Safety, X-Ray Fluorescence Operator  
Indoor Air Quality Assessment  
Introduction to Property Condition Assessment  
Commercial Real Estate Appraisal  
Project Manager and Profit Center Management, PSI University

## Highlights

23 years of experience in the environmental due diligence industry  
26 years performing asbestos, lead-in-paint, radon consulting  
8 years as a working CEO and Principal for environmental consulting company, *Chugwater Due Diligence*

## Experience Summary

Mr. Bettelyoun is currently a Senior Project Assessor for Partner Engineering and Science, Inc. (Partner). His responsibilities include site assessments and technical report writing in line with the American Society of Testing and Materials (ASTM) standards and US Environmental Protection Agency's All Appropriate Inquiry (AAI), as well as, customized client formats. In addition, Mr. Bettelyoun performs limited and complete asbestos surveys, lead-based paint surveys and radon testing as required per scope of work. He is also the asbestos Management Planner (AHERA) for the Tigard-Tualatin School District. Responsibilities include semi-annual and 3-Year re- inspections in the districts campuses and buildings.

Mr. Bettelyoun has participated in a variety of due diligence and environmental consulting projects throughout his career. These projects include real estate acquisition and refinancing portfolios, gasoline stations, drycleaners, bulk petroleum plants, high-rise urban developments, the electronics industry, equity lending projects, multi-family housing financing, electronic manufacturing campuses, HUD, FNMA and Freddie Mac projects (UST identification, radon measurement, LBP and asbestos identification) Port Districts, NEPA/SEPA assessments, cell tower portfolios, wetland reclamation projects, the acquisition of large tracts of undeveloped land and forest tracts, utility companies, and military installations. In addition, Mr. Bettelyoun has been involved in UST decommissioning projects, construction monitoring projects and multi-disciplined environmental investigations.

## Leonard (Sonny) Bettelyoun

---

Mr. Bettelyoun successfully managed an environmental division for a national engineering firm for more than six years. He was recently a Co-Principal in an environmental consulting firm, and enjoyed a successful relationship with a variety of developers, financial institutions and professional firms. Mr. Bettelyoun's diversity across industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's team in the Pacific Northwest region of the United States and Canada.

### Project Experience

#### Due Diligence Project Experience

*Marine Midland Bank, New York.* Project engineer for Phase I ESA on 13,000-acre farm/ranch in Southern Oregon, including aerial overflight, field reconnaissance, records review, and reporting, with emphasis on adjoining property use and identification of wetlands. The site was purchased by the Nature Conservancy and set aside for natural reclamation by their Board.

*City of Milwaukie, Oregon.* Due diligence and environmental assessment for the acquisition of multiple private and industrial use properties along the Willamette River for riverfront municipal development.

*Freddie Mac and FNMA projects, Various Northwest Sites.* Phase I Environmental Assessments for numerous multi-family apartment complexes. The projects often included visual assessments or sampling for asbestos, lead paint, radon and drinking water.

#### Asbestos/Lead-in-Paint Project Experience

*New York City School System.* Manager in charge of various asbestos re-inspection teams for the New York school system campuses. Duties included managing the team schedules, assessment for asbestos materials, sampling materials where required, and providing drawings for each building. The project was under a time line that required all schools to be assessed in a 4-week window prior to the beginning of the school year.

*Port of Portland, Oregon.* Conducted numerous asbestos and lead-in-paint surveys for the Port as part of their acquisition/liquidation and facility management programs.

*US Coast Guard; Various housing facilities in Oregon, Washington, Alaska and Hawaii.* Managed teams of environmental professionals that performed asbestos/lead-in-paint and drinking water assessments.

#### Multi-Disciplined Project Experience

*Balzheiser Hubbard Architects, Eugene, Oregon.* Project manager for the environmental aspect of the site acquisition for new Eugene Water and Electric Board campus. Multi-disciplinary studies included Natural Resources, Environmental Due Diligence, and Public Testimony.

*(Oregon Bridge Delivery Partners (Oregon DOT).* Project manager for the environmental aspect of a "Bridge Bundle" as part of the design team that replaced 3 interstate highway bridges and repaired a 4<sup>th</sup> bridge. Studies for the project included environmental permitting, environmental justice, lead/asbestos, wetlands, endangered species, land use, contaminants, archeology/cultural resources, and noise evaluations.

## Education

Bachelor of Arts Degree, Public Administration & Economics, San Diego State University  
Executive MBA Program, 2000-2003

## Highlights

Over 25 years of experience in the environmental and engineering consulting industry.  
Deep understanding of the Commercial Real Estate business process.  
Nationwide capabilities and expertise.  
Vast experience in managing and delivering multi-site portfolio projects.

## Experience Summary

Mark Lambson is a true veteran of the commercial real estate services industry. He has over 25 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for PARTNER and is located in PARTNER's San Diego County office. Mr. Lambson's team currently provides client management and consulting to a nationwide client base and specializes in advising "Equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 25,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels. This includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing + Fire/Life Safety (MEP+FLS), Elevator, Structure, Façade, Building Technology, and ADA/Accessibility
- Facility Condition Assessments (FCAs)
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil, soil-vapor, and groundwater sampling and analysis)
- Phase III Environmental Remediation Services & Cost Estimates
- Asbestos, Lead, Radon, Mold Sampling
- Seismic Risk Assessments and Structural Assessments (Seismic PMLs)
- Energy Audits, Benchmarking, ESG, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Construction Services (Doc & Cost Review, Progress Monitoring, Funds Control)
- Zoning Reports
- ALTA Surveys

### Building Sciences

*The One, Bel Air, California* – Performed Geotechnical/Soils, Engineering, Environmental and Land Surveying for record-setting 74,000 square foot mega-mansion development that listed for \$500 million. The highest residential price tag in Los Angeles County history.

*Class A Office Campus Acquisition in the San Francisco Bay Area* – Performed Property Condition Assessment, MEP+FLS Report, Roof Report, Elevator Report, Structural and Seismic Assessment.

*National Bank Branch Locations* - ADA Compliance and Accessibility Reviews.

### Environmental Assessments

*Phase I and Phase II Environmental Site Assessments for a 75-acre aerospace facility in the Northwest U.S.*

*Over 500 Phase I Environmental Site Assessments for a national fast-food chain*

*Dry Cleaner Remediation projects in California, Washington, Hawaii, Arizona, Texas, Nevada, and Florida.*

*Environmental consulting for over 2 million acres of desert land in California, Nevada, and Arizona*

### Land Surveys

*ALTA Surveys for 2400-unit apartment portfolio in the Midwest*

### Multi-Site Portfolios

*113-site office portfolio acquisition for a national REIT*

*122-site hotel portfolio for a national lending institution*

*77-site grocery-anchored shopping center portfolio for prominent retail chain*

*55-site hotel portfolio acquisition for a private investment group*

*68-site healthcare portfolio acquisition for a national REIT*

*50-site country club/golf course portfolio acquisition for a private investment group*

### Energy and Water Efficiency

*Energy Efficiency & Water-use consulting for a national property owner that operates and manages 30 retail and office centers on the West Coast and Texas*

### Affiliations

National Association of Real Estate Investment Trusts (NAREIT)

International Council of Shopping Centers (ICSC)

U.S Green Building Council (USGBC)

Society of Industrial and Office Realtors, San Diego County (SIOR)

National Association of Industrial & Office Parks, Southern California (NAIOP)

San Diego Habitat Conservancy, Board of Directors. 2010 - 2014

### Speaking

*Bisnow Conference, Panel Moderator, La Jolla, CA, October 2014.* Moderated panel on Southern California Real Estate Trends.

*Globestreet, ICSC Western States Conference, San Diego, CA May 2013.* Video interview regarding retail real estate trends and due diligence.

**Publications**

*Shopping Centers Today*, 2010. Authored article on LEED applications for shopping centers and retail assets.
