Subject: **Phase I Environmental Site Assessment**
1520 West San Carlos Street
San Jose, California 95126
AEI Project No. 443358
Client Reference No. Project Number #21-082

Dear Shannon George:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or TGolino@aeiconsultants.com.

Sincerely,

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1520 West San Carlos Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	1520 West San Carlos Street, San Jose, Santa Clara County, California 95126
Additional Addresses	1500, 1510, 1518, 1522, 1524, 1526 and 1528 West San Carlos Street 309, 315, 325 and 329 South Willard Avenue
Historical Address	1300 Stevens Creek Road
Property ID (APN or Block/Lot)	277-18-021, 022, 023, 024, 025, 026
Location	Southern side of West San Carlos Street and western side of South Willard Avenue
Property Type	Retail - Free Standing and Residential
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	2.04/Assessor
Number of Buildings	14
Building Construction Date(s)/Source	Not provided/Assessor 1950 (329 South Willard); 1915 (325 South Willard); 1930 (315 South Willard); 1915 (309 South Willard); 1955 (1500 West San Carlos); 1948 (1520-1528 West San Carlos) / Historical Sanborn maps and aerial photographs
Building Square Footage (SF)/Source	16,991/Assessor
Number of Floors/Stories	1 and 2
Basement or Subgrade Area(s)	Yes; partial basement (residences)
Number of Units	20
Additional Improvements	Storage buildings (1500 and 1520-1528 West San Carlos Street), garages and sheds (residential properties) and landscaped areas
On-site Occupant(s)	AMC Auto Sales (1500 West San Carlos Street) Vacant unit (1520 West San Carlos Street) Ann's Beauty & Barber (1522 West San Carlos Street) Pinata's La Fiesta (1524 West San Carlos Street) Bravo Creative (1526 West San Carlos Street) Shipping X Net (1528 West San Carlos Street) Residential tenants (309, 315, 325 and 329 South Willard Avenue)
Current On-site Operations/Use	General residential, retail, office and auto sales, washing/ detailing uses

DRAFT

Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1915	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records
1915 to 1948	Unknown use/Data failure; refer to Section 1.6.1	City directories, aerial photograph, assessor records
1915 to 1940	Residential and vacant land	Sanborn map, city directories
1940 to 1948	Residential	City directories, aerial photograph, assessor records
1948 to Present	Residential, retail, office and auto sales lot (and possible auto repair)	Aerial photographs, city directories, site observations, Sanborn maps, agency records

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	West San Carlos Street followed by: Office building (1499 West San Carlos Street), North Willard Street and Buena Vista Midtown - residential (1535 West San Carlos Street)	1531 West San Carlos (former address) - CUPA Listings 1537 West San Carlos (former address) - CUPA Listings
East	South Willard Avenue followed by: Paved lot (1470 West San Carlos Street), single and multi-family residential buildings (326, 330, 332-348, 354 and 358 South Willard Avenue)	1470 West San Carlos Street - CUPA Listings, RCRA Non-Gen/NLR, EDR Historic Auto Stations, CERS, CERS Hazardous Waste 1478 West San Carlos Street (former address) - EDR Historic Auto Stations 1480 West San Carlos Street (former address) - CUPA Listings
South	Multi-family residential property (345 South Willard Avenue)	None identified
West	Multi-family residential properties (324 South Buena Vista Avenue and 1530 West San Carlos Street), vacant restaurant (1536 West San Carlos Street) and a billboard	None identified

DRAFT

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- One drain and associated sump/clarifier was observed at the vehicle washing/detailing area at the AMC Auto Sales property (1500 West San Carlos Street). The sump appeared to be concrete-lined, and were presumably associated with vehicle washing activities performed on site. This feature has the potential to act as a conduit to the subsurface of the subject property. As detailed in Section 3.0, historical vehicle sales and possible vehicle service operations have been conducted at the subject property from 1948 to Present with hazardous substances and petroleum products presumably utilized on site. Based on the long term use of the drain and clarifier system, the potential exists that a release oil, grease, or improperly disposed substances from these features may have resulted in an impact to the subsurface of the subject property.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

DRAFT

- According to AEI's client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/ occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI observed interior areas of the subject property buildings in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However, water stained and damaged ceiling material were observed in the 1520 and 1528 West San Carlos Street units. Based upon the planned demolition of the structure, no additional action appears warranted at this time.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 1520 West San Carlos Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Phase II subsurface investigation in the area of the drain and sump/clarifier at the 1500 West San Carlos Street property.
- Preparation of a Site Management Plan per applicable regulations as a part of the planned demolition of onsite structures and site redevelopment with mixed use buildings

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1520 West San Carlos Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

DRAFT

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- AEI was not permitted access to the interior of the residences on the subject property. In addition, AEI was not able to access the interior of storage buildings (1500 and 1520-1528 West San Carlos Street) and the interior of the 1526 West San Carlos Street unit. Due to the residential and retail nature of occupancy, the limited access is not expected to significantly alter the findings of this assessment.
- Due to the large volume of vehicles and equipment at the 315 South Willard Avenue property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.
- On July 19, 2021, San Jose Fire Department (SJFD) was contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. Due to the time frame of this assessment, records at the SJFD were not available for review. However, based on the quality of information obtained from other sources including SJBD and the EDR regulatory database report, this limitation is not expected to significantly alter the findings of this assessment.

DRAFT

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn fire insurance map from 1915 indicating that the subject property was developed with residences and out buildings. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, interviews

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use. AEI was not able to track the history of the subject property between the years 1915 and 1940 as none of the historical sources utilized as part of this assessment covered this time period. The 1915 Sanborn map identifies the subject property as residential and vacant land. The 1940 city directory indicates the subject property was occupied by residences. Thus, it is assumed that during this time period the subject property would have been residences, if not vacant land. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of

a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by David J. Powers & Associates on July 13, 2021. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of San Jose
Sewage Disposal/Treatment	City of San Jose

Utility source/system information listed in the table above is provided by Mr. Patrick Kallas, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed residential and commercial area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	West San Carlos Street followed by: Office building (1499 West San Carlos Street), North Willard Street and Buena Vista Midtown - residential (1535 West San Carlos Street)	1531 West San Carlos (former address) - CUPA Listings 1537 West San Carlos (former address) - CUPA Listings
East	South Willard Avenue followed by: Paved lot (1470 West San Carlos Street), single and multi-family residential buildings (326, 330, 332-348, 354 and 358 South Willard Avenue)	1470 West San Carlos Street - CUPA Listings, RCRA Non-Gen/NLR, EDR Historic Auto Stations, CERS, CERS Hazardous Waste 1478 West San Carlos Street (former address) - EDR Historic Auto Stations 1480 West San Carlos Street (former address) - CUPA Listings
South	Multi-family residential property (345 South Willard Avenue)	None identified
West	Multi-family residential properties (324 South Buena Vista Avenue and 1530 West San Carlos Street), vacant restaurant (1536 West San Carlos Street) and a billboard	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 Physical Setting

Geologic Unit: Description/Source	Marine sedimentary and alluvial deposits of the Cenozoic era/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land - Newpark Complex with 0-2% slopes - moderately well drained silty clay loam and fine sandy loam with a depth of 79 inches; parent material described as alluvium derived from metamorphic and sedimentary rock and/or

DRAFT

	alluvium derived from metavolcanics; urban land index identified 70% urban land with Newpark and minor components on the remaining 30% of the site area/USDA Soil Survey
Groundwater Flow Direction/Source	Northeast/Topographic map interpretation
Estimated Depth to Groundwater/ Source	20 feet bgs/SLR's April 2021 Removal Action Completion Report for 333 Page Street, San Jose, California (located approximately 300 feet east of the subject property)
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1915	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records
1915 to 1948	Unknown use/Data failure; refer to Section 1.6.1	City directories, aerial photograph, assessor records
1915 to 1940	Residential and vacant land	Sanborn map, city directories
1940 to 1948	Residential	City directories, aerial photograph, assessor records
1948 to Present	Residential, retail, office and auto sales lot (and possible auto repair)	Aerial photographs, city directories, site observations, Sanborn maps, agency records

The following historical addresses were associated with the subject property: 1500, 1510, 1518, 1522, 1524, 1526 and 1528 West San Carlos Street; 309, 315, 325 and 329 South Willard Avenue; and 1300 Stevens Creek Road. These addresses were also researched as part of this assessment.

The former automobile sales and possible automotive repair uses of the subject property is of potential environmental concern. Refer to Section 7.1.2 for a further discussion.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the ERIS collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1948	Developed with residential-type buildings.	NORTH: Roadway followed by vacant land and a residential-type building EAST: Roadway followed by residential and commercial-type buildings SOUTH: Residential WEST: Residential

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
1954	Developed with a commercial-type building, residential-type buildings and paved lot.	NORTH: Roadway followed by residential and commercial-type buildings EAST: No significant changes SOUTH: No significant changes WEST: Residential and commercial
1960	No significant changes	NORTH: Roadway followed by residential and commercial-type buildings EAST: Roadway followed by a paved lot with vehicles and residential-type buildings SOUTH: No significant changes WEST: Residential and commercial
1970	No significant changes	NORTH: No significant changes EAST: No significant changes visible SOUTH: No significant changes WEST: No significant changes visible
1980	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Residential-type buildings, paved lot and commercial-type building
1993	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes visible
2005	No significant changes	NORTH: Roadway followed by vacant land and small commercial-type buildings EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
2014, 2018*	No significant changes	NORTH: Roadway followed by an apartment complex and commercial-type building EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

DRAFT

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

* Due to copyright restrictions, copies of the aerial photographs reviewed are not included in the appendices, but can be viewed online at historicaerials.com and through Google Earth.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1915	The subject property is depicted as developed with residences and out buildings.	NORTH: Stevens Creek Road followed by residences and a road EAST: Roadway followed by vacant land and residences SOUTH: Residences and out buildings WEST: Residential and vacant land
1950	The subject property is depicted as developed with five stores, small office building, residences and out buildings.	NORTH: West San Carlos Street followed by a garment factory/photo finishing building, residences and a road EAST: Roadway followed by a used auto sales lot, office and residences SOUTH: No significant changes depicted WEST: Residential
1956	The subject property is depicted as developed with five stores, small office building, auto sales lot, residences and out buildings.	NORTH: West San Carlos Street followed by a carpenter shop, residences, office and a road EAST: No significant changes depicted SOUTH: No significant changes depicted WEST: Residential and a store
1966	The subject property is depicted as currently developed with six stores, apartment building, auto sales lot, residences and out buildings.	NORTH: West San Carlos Street followed by a restaurant and store, auto laundry, office and a road EAST: No significant changes depicted SOUTH: No significant changes depicted WEST: Residential and a restaurant

The former automobile sales and possible automotive repair uses of the subject property is of potential environmental concern. Refer to Section 7.1.2 for a further discussion.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1940 to 2014. The first listing for the subject property appeared in 1940. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1940	1520 West San Carlos – Residential

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The former automobile sales and possible automotive repair uses of the subject property is of potential environmental concern. Refer to Section 7.1.2 for a further discussion.

DRAFT

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Environmental Health Department (SCCEHD)	July 19, 2021	Website and Email	Ms. Melissa Belloso	No records on file

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
State Water Resources Control Board (SWRCB)	July 19, 2021	Website	GeoTracker	No records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Fire Department (SJFD)	July 19, 2021	Email	Ms. Loretta Worthy	Response pending, refer to Section 1.5

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Building Department (SJBD)	July 19, 2021	Website	Staff	Records discussed below

The subject property file included numerous electrical, plumbing and mechanical permits, construction permits, HVAC permits, window replacement permits, interior improvement permits, and open permits associated with planned site redevelopment. Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the SJBD.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Planning Department (SJPD)	July 19, 2021	Website and Telephone	Staff	No evidence indicating the existence of AULs on file for the subject property

DRAFT

4.5 ASSESSOR'S OFFICE

Current Owner	Not provided

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	July 19, 2021	Website	N/A	Records discussed below
CA DTSC EnviroStor	July 19, 2021	Website	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	July 19, 2021	Website	Rochele Henderson	No records on file
Santa Clara Valley Water District (SCVWD)	July 19, 2021	Website	N/A	No well or historic solvent records were on file.

HWTS Records

HWTS identified the following records for the subject property:

- Yankee Engineuity (1520 A West San Carlos) - this site is listed as an inactive hazardous waste transporter facility as of June 1, 1997. No manifest records were included in HWTS.
- Yankee Engineuity (1520 A West San Carlos) - this site is listed as an inactive hazardous waste transporter facility as of June 30, 2005. No manifest records were included in HWTS.

No additional records for the subject property were included in the HWTS database.

DRAFT

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	July 19, 2021	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	July 19, 2021	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

	documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Chau's Automotive
Address	1470 West San Carlos Street
Distance & Direction	Adjoining to the east
Hydrologic Position	Cross-gradient
Databases Listed	CUPA Listings, RCRA Non-Gen/NLR, EDR Historic Auto Stations, CERS, CERS Hazardous Waste
Comments	The CUPA database indicated that this site is a registered Hazardous Material Business Plan and waste oil generator facility. The RCRA database indicated that this site is a registered non-generator of hazardous waste with no reported violations. The EDR Historic Auto Stations indicated that this site was occupied by an auto repair shop from 2000 to 2009. The CERS databases indicated that this site is a registered hazardous waste generator and chemical storage facility with reported violations. There are no records associated with any hazardous substance spill/release incidents at this site. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Olde Towne Auto Sales & Lease
Address	1480 West San Carlos Street
Distance & Direction	Adjoining to the east
Hydrologic Position	Cross-gradient
Databases Listed	CUPA Listings
Comments	The CUPA database indicated that this site is a registered hazardous waste generator facility. There are no records associated with any hazardous substance spill/release incidents at this site. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Multiple
Address	1470 West San Carlos Street
Distance & Direction	Adjoining to the east
Hydrologic Position	Cross-gradient
Databases Listed	EDR Historic Auto Stations
Comments	The EDR Historic Auto Stations database identified multiple former auto repair tenants at the 1470 West San Carlos property in 1955, 1966 and from 1975 to 1998. There are no records associated with any hazardous substance spill/

DRAFT

	release incidents at this site. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Not provided	N/A	N/A	Not provided	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. Patrick Kallas, David J. Powers & Associates	July 19, 2021	Email	Not provided	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No

DRAFT

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No
Additional information provided:		Mr. Kallas arranged for AEI to access the interior of the retail building and auto sales facility, but indicated that the interior of the residences should not be accessed per client request. Mr. Kallas did not accompany AEI during the onsite reconnaissance.

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)	Information not provided

DRAFT

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

DRAFT

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	July 23, 2021
AEI Site Assessor(s)	Christopher Olsen
Property Escort(s)/ Relationship(s) to Property	None
Units/Areas Observed	Interior areas: AEI accessed the interior of retail unit #'s 1520, 1522, 1524 and 1528 West San Carlos Street, AMC Auto Sales office and a shed Exterior areas: All exterior areas were accessed
Area(s) not accessed and reason(s)	Interior areas: Interior of the residences, with the exception of a partial view in vacant apartment units (325 South Willard); storage buildings (1500 and 1520-1528 West San Carlos) Exterior areas: None Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	Numerous parked vehicles and equipment were observed at the 315 South Willard Avenue property, which prevented AEI from observing the ground surface in several areas. Refer to Section 1.5 for discussion of limiting condition(s).

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)

DRAFT

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pole-Mounted	1	PG&E	Post-1977	No	No
Subsurface	1	PG&E	Post-1977	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.1.2 Drains, Sumps, and Clarifiers

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

One drain and associated sump/clarifier was observed at the vehicle washing/detailing area at the AMC Auto Sales property (1500 West San Carlos Street). The sump appeared to be concrete-lined, and were presumably associated with vehicle washing activities performed on site. This feature has the potential to act as a conduit to the subsurface of the subject property. As detailed in Section 3.0, historical vehicle sales and possible vehicle service operations have been conducted at the subject property from 1948 to Present with hazardous substances and petroleum products presumably utilized on site. Based on the long term use of the drain and

DRAFT

clarifier system, he potential exists that a release oil, grease, or improperly disposed substances from these features may have resulted in an impact to the subsurface of the subject property.
(Return to Section 3.0)

7.1.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.4 Other

Cleaning supplies and detergents are stored in kitchens and storage rooms of the commercial units. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformers

Multiple pole-mounted and subsurface transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to AEI's client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

DRAFT

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building(s), there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall,

DRAFT

wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However, water stained and damaged ceiling material were observed in the 1520 and 1528 West San Carlos Street units. Based upon the planned demolition of the structure, no additional action appears warranted at this time.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

DRAFT

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 21 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 4 CPS-SLIC sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 42 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

DRAFT

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

CERS Description: Hazardous Waste Generator

CERS:
Name: CHAU'S AUTOMOTIVE
Address: 1470 W SAN CARLOS ST
City,State,Zip: SAN JOSE, CA 95126
Site ID: 18090
CERS ID: 10345936
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 18090
Site Name: CHAU'S AUTOMOTIVE
Violation Date: 08-22-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/17/2018. The following containers were not properly marked: 2x used oil rolling carts (no markings), 2x 55 gallon used oil containers (labels complete, but not attached to the drums), and the 15 gallon paper filter drum (no markings). Ensure all hazardous waste containers are properly labeled as described below. Extra labels were provided during the inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 18090
Site Name: CHAU'S AUTOMOTIVE
Violation Date: 08-22-2018
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 09/17/2018. Submit a complete Hazardous Materials Business Plan and pay the fee when invoiced. Ensure fees are paid annually.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 18090
Site Name: CHAU'S AUTOMOTIVE
Violation Date: 08-22-2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 09/17/2018. Observed pickup receipts for 3/2018 and 12/2015 but the facility could not locate receipts for 2016 or 2017. Facility stated the filters are picked up annually. Ensure all used oil filter receipts are kept for a minimum of three years.

CHAU'S AUTOMOTIVE (Continued) **S123098113**

Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	18090
Site Name:	CHAU'S AUTOMOTIVE
Violation Date:	08-22-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 09/17/2018. The paper used oil filter drum did not have a proper lid. Obtain a lid or transfer the paper filters to a container with a lid. Ensure all hazardous waste containers are provided with an appropriate lid and kept closed except when adding or removing waste.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 09/17/2018. Facility stores hazardous materials in HMBP quantities (used oil- 2x55 gallons plus 2x 20 gallon rolling carts) but has not submitted an HMBP. Submit a complete HMBP to FrontCounter or CERS. Ensure the HMBP is updated annually. Contact our office for assistance with FrontCounter or CERS setup and/or training.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-22-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility is a light auto repair business. EPA ID# CAL000234730 is active. Facility is currently generating used oil, drained used oil filters, and paper used oil filters/oily debris. Shop rags are laundered and did not observe any saturated rags being accumulated. Observed emergency actions posting and properly maintained emergency equipment. Reviewed consolidated manifests for used oil and used oil filters. Used oil picked up every 1-3 months. Filters were stated to be picked up annually. Permit will be changed to Waste Oil Only (2201). NOTE: Site is slated for redevelopment. Please contact our office when you close the shop so we may close out your permits.

records for a minimum of three years.
Violation Notes: Returned to compliance on 09/28/2018. HMBP Emergency Response Training has not been conducted or logged. Template provided.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 432130
Site Name: EUROPEAN AUTO SERVICE
Violation Date: 09-27-2018
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Returned to compliance on 09/28/2018. Disposal records were unavailable for the used paper filters. Obtain a copy from your hazardous waste hauler, and moving forward, keep all disposal records for 3 years.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-27-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Joanne Tracey of HMCD to perform a routine Hazardous Materials Business Plan (HMBP) inspection. A walk-through of European Auto Service was conducted with owner, Ching Chau. The following hazardous materials were observed at or above HMBP State-reportable thresholds: 1) Used Oil: 2 x 55 gal drums + 3 x 15 gal rollers 2) Used Coolant: 1 x 55 gal drum 3) New Lubricating Oils: 195 gal Ar/CO2, new coolant, and used paper filters are below HMBP reporting threshold.

Eval General Type: Other/Unknown
Eval Date: 12-12-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On site to conduct a permit investigation at an auto repair shop. Suite 1 of 1585 W San Carlos St was formerly owned and operated by Quality Auto Repair. In June 2017, European Auto Service took over Suite 1. Quality Auto Repair still owns and operates Suite 2 of 1585 W San Carlos St. Walkthrough of building performed w/ owner Ching Chau. The following hazardous materials were observed: - 3 x 55 gal New Motor Oil (inside shop area) - 2 x 55 gal + approximately 5 x 15 gal used oil rollers of Used Motor Oil (in the back shed) - 1 x 55 gal Used Oil Filters (in the back shed) - 1 x 55 gal Used Coolant (in the back shed) Note that the back shed where the waste oil, oil filters, and coolant are stored in a shared storage area that is shared w/ Quality Auto Repair. Mr. Chau stated that New Coolant is bought in small quantities and not in bulk. Notes: - EPA ID: CAL000030692 is active - Owner Name: Ching Chau - Billing Address: same as site address - Email Address: [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Other Insecticides / Pesticide / Fumigants / Herbicides, Lead
Site History:	The Site consist of 3 sub]parcels, approximately 0.23 acres each (for a total of 0.72 acres) with single family homes, storage sheds and parking areas located in each of the parcels. Much of the Site is

DRAFT

PAGE STREET STUDIOS (Continued) **S127035048**

impacted with a combination of lead, arsenic, and pesticides. The Site is slated for redevelopment and will become an affordable housing complex. During development, approximately 750 cubic yards of impacted soil will be removed from the various areas of the Site impacted with contaminants above the remedial action objectives (RAOs). The soil impacted with elevated levels of metals and pesticides exceeding the residential thresholds will be removed from the Site and disposed of at an approved landfill. All excavations will be subject to confirmation sampling to confirm the removal of contamination.

Violations:
Site ID: 162260
Site Name: THUY G TRUONG DDS
Violation Date: 11-05-2015
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description: Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes: Facility generates waste glutaraldehyde and disposes of it down the drain without prior treatment. The waste glutaraldehyde must be properly managed as hazardous waste by neutralizing it with glycine prior to disposal down the drain or by disposing of it at an approved hazardous waste collection facility.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-05-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates 5-10 gallons of silver waste per year. Facility uses glutaraldehyde for cold sterilization. (See violation cited above for illegal disposal.) Facility does not use any chemicals for denture cleaning or stain removing. Reviewed receipts for silver waste pickup.

AUTOZONE #6243 (Continued) **S121771337**

Eval Notes:	On-site to conduct a hazardous waste inspection. Performed a facility walk-through with Venus Ochoa. Facility is an automotive parts retail store and a certified used oil collection center. Observed the following hazardous waste stored in the rear stockroom: -Used oil: 1 x 220 gallon tank -Waste absorbent: 1 x 55 gallon drum -Used oil filters: 1 x 30 gallon drum -Waste aerosols: 1 x 5 gallon bucket -Waste alkaline/bases: 1 x 5 gallon bucket -Waste acids: 1 x 5 gallon bucket -non-RCRA hazardous waste liquids: 1 x 5 gallon bucket -Waste reactives: 1 x 1 gallon bucket -Waste coolant: 1 x 5 gallon bucket Per Mr. Ochoa, a staff member performs a property walk-around once per morning to collect any garbage or hazardous waste that was illegally dumped during closing hours. Hazardous waste is taken to hazardous waste storage area in the rear stockroom and sorted. Any damaged or returned retail products are managed as hazardous waste, and placed in 5 gallon buckets that [Truncated]

Eval Notes:	On-site to conduct a hazardous materials business plan (HMBP). Observed the following hazardous materials at or above HMBP reporting thresholds stored in the rear stockroom: -Used oil: 1 x app. 185 gallon lube cube (and small quantity of miscellaneous 1 qt-1 gal used oil containers) -1 x pallet of car batteries NOTES: -CERS ID: 10595560 -HMBP was submitted to CERS on 5/10/18 and was reviewed as complete. -HMBP training log is maintained via Autozone electronic training system.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-20-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. Facility is an automotive parts retail store and a certified used oil collection center (see comments below). Hazardous waste is generated on-site through the following ways: -According to Mr. Radillo, a staff person performs a walk-through of the front and rear parking lot 2-3 times per day to collect any hazardous waste that was illegally dumped after hours. Hazardous waste is taken to hazardous waste storage area in the rear stockroom for sorting or draining. -All non-saleable (damaged, returned, off-spec) merchandise is managed as hazardous waste, and is placed in 5 gallon containers that are designated by hazardous classification (flammables/aerosols, alkaline/bases, state regulated/toxics, acids, and reactives). A guidance document is posted above the buckets offering details on the process. -Spent absorbent is generated from clean-up of spills inside store or in parking lot. Observed the following [Truncated]

Address:	1201 PARK AV 2
City,State,Zip:	SAN JOSE, CA 95126
Site ID:	24764
CERS ID:	10344877
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	24764
Site Name:	DENTISTRY FOR CHILDREN
Violation Date:	05-25-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Facility currently has EpiPens containing epinephrine as the sole active ingredient. Facility has not plan in place for how to manage EpiPens when they become hazardous waste upon expiration. Facility uses gauze soaked in isopropyl alcohol to clean trays before disposing of gauze. During the inspection, one sample gauze was observed to release free liquids. Any gauze that releases free liquids at the point that it becomes a waste must be managed as a hazardous waste and must be accumulated in a closed, labeled container. Ensure that gauze is not allowed to dry out to avoid management as a hazardous waste.

	disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	EPA ID number CAL000231632 is currently inactive. Mr. Delgado was given DTSC form 1358 at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-25-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility generates waste photographic fixer and developer from x-ray processing. Facility has 1x5 gallon developer waste and 1x5 gallon fixer waste on-site in closed containers. Facility does not use cold sterile solutions (steam autoclave only). Ultrasonic bath uses enzymatic tablets. Surfaces are disinfected with non-saturated cavicide wipes and spray from spray bottles is used before expiration. Mr. Delgado was advised that any wipe saturated with cavicide or any expired cavicide must be managed as a hazardous waste. Facility does not generate hazardous waste from tooth whitening or tartar and stain removal. Amalgam is mailed back annually and lead bite wings are recycled by the company that takes fixer and developer waste (receipts reviewed). Facility does not dispense pharmaceuticals and disposes of lidocaine in accordance with medical waste management regulations. Facility has an up-to-date emergency posting, spill kit, and annually serviced fire [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DRAFT

BEACON #584 (Continued) **S104397014**

Site History: On august 1, 1986, a 550 gallon waste oil tank was removed. It was located behind the station building. Soil sample S-1 collected from below the UST detected 4.9 parts per million (ppm) total petroleum hydrocarbons. In 1991 three soil borings (SC-1, SC-2, and SC-3) were installed to approximately 50 feet below ground surface (bgs). The borings were installed as part of a real estate divestment investigation. Toluene was detected in every soil sample and benzene was detected in the sample collected from SC-2. The consultant theorized that the trace levels of contamination were due to laboratory cross contamination. In 1992, gasoline was reportedly flowing through cracks in the asphalt located between the pump island and the underground storage tanks (USTs). Piping tests determined that three piping runs were breached. Soil samples collected in the piping runs detected TPH-g up to 6,000 ppm. Soil sample collected from the vicinity of the USTs indicated TPH-g at concentrations up to 23,000 ppm. Due to these results, additional soil was excavated. Confirmation samples collected following the additional excavation detected up to 18,000 ppm TPH-g. The volume of soil excavated and it's final location is not described in the file. In March 1999 five soil borings were installed (B-1 through B-5) near the USTs and product islands to a depth of 40 feet bgs. Up to 390 ppm TPH-g was detected in soil samples. Grab groundwater samples were collected from borings B-2, B-3, B-4, and B-5. Up to 120,000 ppb TPH-g was detected. UP to 1,400 ppb benzene was detected. Up to 4,300 ppb MTBE was detected. On August 11, 1999 four soil borings (ABA-1, ABA-2, ABA-4, and ABA-5) were installed to depths of 35 to 40 feet bgs. Trace concentrations of hydrocarbons were detected in two of the borings. Up to 83 ppb TPH-g and 3.3 ppb benzene were detected in grab groundwater samples. In October 1999 three groundwater monitoring wells (MW-1 through MW-3) were installed to depths of approximately 50 feet bgs. TPH-g and benzene was not detected in groundwater samples. MTBE was detected in well MW-1 at a concentration of 33 ppb. Groundwater gradient was determined to be toward the southeast. In December 2001, three soil borings (ABA-6 through ABA-8) and one groundwater monitoring well (MW-4) were installed. Low levels of fuel related compounds were reported in soil samples. In March 2003 groundwater monitoring well MW-5 was installed near the USTs to a depth of approximately 60 feet bgs. On September 28 and 29, 2005 six soil vapor extraction wells were installed. The wells were completed to a depth of approximately 30 feet bgs. In December 2005, soil vapor pilot tests were performed (performed on December 8, 9, 12, and 13) on four of the extraction wells (VEW-1, VEW-2, VEW-3, and VEW-4). These wells are screened between 10 and 30 feet bgs. The SVE pilot tests removed approximately 9.1 pounds of TPH-g and 0.008 pounds of benzene.

RB Case Number:	10-069
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E18E01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The Site is located in a commercial and residential neighborhood southwest of downtown San Jose, approximately one-half mile west-southwest from the Guadelupe River. The site is currently occupied by an auto sales facility. The site is surrounded on the east, south, and west by commercial/retail properties and on the northeast by residential properties. The site is zoned for commercial use. Four gasoline underground storage tanks (USTs) (Tanks A through

DRAFT

JOHN'S TUNE-UP (Continued) **S101309272**

D on attached Site figures) and one waste oil underground storage tank (UST) were removed from the site in mid-1987. Soil samples collected beneath the removed USTs showed no significant hydrocarbon impacts except below Tank A. In September of 1987, Balch Petroleum, Inc. excavated contaminated soil beneath Tank A to a depth of 21 feet below ground surface (bgs). Over 130 cubic yards of petroleum hydrocarbon affected soils were removed and aerated on-site for approximately four to six weeks. In December of 1987, the aerated soil was re-tested and backfilled into the UST excavation pit. Several subsurface investigations were conducted at the site between 1990 and 2006. These investigations, which included the drilling and sampling of at least 20 soil borings and the installation of seven groundwater monitoring wells (MW-1 through MW-7), have shown hydrocarbon impacts on the upgradient (south-southeast) side of the former USTs, and minimal hydrocarbon impacts downgradient from the former USTs. An air sparge and soil vapor extraction (AS/SVE) remediation system was installed on the Site in early 2002, and operated from April 2002 to March 2004. Follow-up quarterly groundwater monitoring of site wells, along with two limited subsurface investigations in May 2005 and April 2006, showed limited downgradient residual hydrocarbon impacts on the Site. On March 27, 2007, ARS submitted a Closure Request Report to the Santa Clara County Department of Environmental Health (SCCDEH). This report included a Site Conceptual Model that posited the following key elements: # The vast majority of hydrocarbon impacts encountered in soil and groundwater beneath the Site do not appear to have originated on the project site, but rather from the gas station formerly located approximately 85 feet south from the Site at 1298 W. San Carlos Street (see Figure 3). Soil sampling at 15 feet in depth beneath the removed Site USTs in 1987 showed significant hydrocarbon releases only beneath one of the USTs (Tank A in Site figures). Also, of all the soil samples collected during UST removal activities and in subsequent borings and wells, the only significant hydrocarbon impacts in soils at 15 feet in depth are in these samples below Tank A. On the other hand, soils at about 25 to 30 feet in depth are hydrocarbon impacted over a wide area, both north (downgradient) and south (upgradient) from the former Site USTs. # Shallow soils beneath the site generally consist of low permeability silt- and claydominated layers down to about 38 feet in depth, followed by high permeability sandand gravel-dominated layers down to at least 85 feet in depth (see Figure 4). Thin sand and gravel interbeds which are present in the upper silt/clay zone include a fairly continuous thin sand layer from approximately 18 to 22 feet in depth, and another fairly continuous sand and gravel layer from about 33 to 35 feet in depth. Historically, groundwater has been encountered in both the thin sand at 33 to 35 feet in depth, and in the deeper and thicker sand layer below 38 feet in depth. Soil hydrocarbon impacts are most prevalent in soils above the current groundwater table in a silt and clay layer at about 25 to 30 feet in depth, and not in the shallower sand and gravel layer at about 18 to 22 feet in depth or in the deeper sand and gravel layers. Groundwater hydrocarbon impacts have historically included: (1) Elevated hydrocarbon impacts in a shallower thin sand that appear to have migrated onto the project site from the former gas station at 1298 W. San Carlos Street; and (2) Low hydrocarbon impacts in the deeper, thicker sand and gravel layer, at about 38 feet to 58 feet in depth. These groundwater impacts appear to have originated from the former gas station at 1298

JOHN'S TUNE-UP (Continued) **S101309272**

W. San Carlos Street and which appear to have been reduced to current low levels by past site remediation activities. There are no human or environmental receptors in close proximity to the project site.
Results of a well survey conducted by ARS in June 2001 (Revised Final Corrective Action Plan, Johns Tune-Up, 1295 W. San Carlos Street, San Jose, California, ARS, June 11, 2001) showed no water supply wells within close proximity to the Site. In addition, there are no nearby surface water bodies and no sensitive environmental receptors. The Site is zoned for commercial use, and, given the lack of shallow hydrocarbon impacts, we would not expect residual hydrocarbon impacts beneath the site to pose a significant risk to either Site or adjacent property occupants. On February 14, 2008, a meeting was held at SCCDEH offices to discuss the closure request. Mr. Mamerto Jorvina of the SCCDEH indicated that, while the County agreed that significant hydrocarbons on the Site appear to have originated from the adjacent south former gas station property, the County will require some additional soil and groundwater sampling in the former Site UST source area prior to closure. On June 27, 2008, Gribi Associates submitted a workplan to conduct a soil boring investigation at the Site to provide additional soil and groundwater data necessary to evaluate the Site for regulatory closure. This workplan was approved by SCCDEH on December 2, 2008.

Comments: Site Certified. LUC placed on the property due to the elevated concentrations of chemicals of concern remaining at the Site. Site will require annual site inspections to ensure that the LUC is being followed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 06/23/2010
Comments: Based on the concentrations of the residual concentrations of the chemicals of concern at the Site, a deed restriction was placed on the Site restricting future land to commercial or less sensitive land uses.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Land Use Restriction Monitoring Report
Completed Date: 01/28/2011
Comments: Site owner completed annual Site inspection and submitted report as required by land use covenant. No violations reported.

Completed Date: 10/20/2017
Comments: DTSC, Mark Piros, email with Envirostor links to Land Use Covenant and certification form and letter in reply to email from Chris Maune, consultant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 11/12/2018
Comments: Email informed DTSC that the Site has a new owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/23/2009
Comments: DTSC determined that site characterization is adequate as future Site land use will remain commercial/industrial. There are concentrations of lead and total petroleum hydrocarbons above unrestricted land use (i.e. residential) screening levels. The Site Risk Assessment recommended that the Site be deed restricted and a Land Use Covenant between DTSC and the Site owner will be put in place.

Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 02/07/2020
Comments: The Department of Toxic Substances Control (DTSC) has reviewed the Land Use Covenant (LUC) Annual Inspection Report (Report) for Former West Coast Rebar at 1131 Auzerais Avenue, San Jose, dated February 3, 2020. As required by section 4.04 of the Land Use Covenant (LUC), a site inspection must be done to verify compliance with the LUC. The report documented that no prohibited uses, improvements, conditions or activities were being conducted or present on the property. DTSC has no comments and hereby approves the Report. The next Report should be submitted to DTSC no later than January 16, 2021.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 10/20/2017
Comments: DTSC, Mark Piros, email with Envirostor links to Land Use Covenant and certification form and letter in reply to email from Chris Maune, consultant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 11/12/2018
Comments: Email informed DTSC that the Site has a new owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/23/2009
Comments: DTSC determined that site characterization is adequate as future Site land use will remain commercial/industrial. There are concentrations of lead and total petroleum hydrocarbons above unrestricted land use (i.e. residential) screening levels. The Site Risk Assessment recommended that the Site be deed restricted and a Land Use Covenant between DTSC and the Site owner will be put in place.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 08/31/2015
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/30/2012
Comments: The property owner submitted a letter to DTSC documenting that the annual inspection to verify compliance with the Land Use Covenant had been performed. There were no prohibited uses, improvements, conditions or activities being conducted or present on the property in violation of the Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/20/2013
Comments: The owner as required by section 4.04 of the Land Use Covenant,

DRAFT

Completed Date: 02/07/2020
Comments: The Department of Toxic Substances Control (DTSC) has reviewed the Land Use Covenant (LUC) Annual Inspection Report (Report) for Former West Coast Rebar at 1131 Auzerais Avenue, San Jose, dated February 3, 2020. As required by section 4.04 of the Land Use Covenant (LUC), a site inspection must be done to verify compliance with the LUC. The report documented that no prohibited uses, improvements, conditions or activities were being conducted or present on the property. DTSC has no comments and hereby approves the Report. The next Report should be submitted to DTSC no later than January 16, 2021.

Comments: Laurel Grove Lane LP entered into a Voluntary Cleanup Agreement for DTSC to oversee a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 06/16/2016
Comments: Request for Agency Oversight Application.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/20/2017
Comments: DTSC reviewed several Phase I Environmental Site Assessment reports as well as Limited Soil Sampling and Analysis Reports prepared for the site. Organochlorine pesticides and metals were detected at relatively low concentrations in soil samples collected from the site in June 2016. Lead was detected in 8 soil samples at concentrations greater than DTSC's screening level for residential land use. The lead screening exceedances were localized and limited in extent, with most of the exceedances at 1.5 feet below ground surface (bgs), with one exceedance at 3 feet bgs. The lead-impacted soil was removed when excavation for the construction of an underground parking garage occurred. The lead- and arsenic-impacted soil was disposed at Republic Services Newby Island Landfill in Milpitas, California. DTSC concluded that no further action is required at the Site and that the planned residential development is acceptable.

DRAFT

LAUREL GROVE FAMILY APARTMENTS AND THE PARK AVE SENIOR APART (Continued) **S118757327**

Completed Document Type: Application
Completed Date: 06/16/2016
Comments: Request for Agency Oversight Application.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/20/2017
Comments: DTSC reviewed several Phase I Environmental Site Assessment reports as well as Limited Soil Sampling and Analysis Reports prepared for the site. Organochlorine pesticides and metals were detected at relatively low concentrations in soil samples collected from the site in June 2016. Lead was detected in 8 soil samples at concentrations greater than DTSC's screening level for residential land use. The lead screening exceedances were localized and limited in extent, with most of the exceedances at 1.5 feet below ground surface (bgs), with one exceedance at 3 feet bgs. The lead-impacted soil was removed when excavation for the construction of an underground parking garage occurred. The lead- and arsenic-impacted soil was disposed at Republic Services Newby Island Landfill in Milpitas, California. DTSC concluded that no further action is required at the Site and that the planned residential development is acceptable.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
TSCA SUBMITTER

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

DRAFT

REED AND GRAHAM INC (Continued) **1000182569**

Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 09/25/2015.

Facility did not update CERS with current Certification of Financial Responsibility (CFR) covering the updated insurance policy coverage dates (5/1/2015-2016). You do not need to wait for the insurance paperwork to return to update the CFR on CERS. Update the CFR with the new policy dates and upload to CERS within 30 days of signing the new policy. Updated CFR uploaded to CERS today. No further corrective actions required.

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Felix Ramirez (ICC-UT #5273934-UT expires 12/6/2014, VMI Tester #2517 expires 11/1/2013, and VR Level 4 #B34976 expires 2/13/2014) of Afforda-Test. Site consists of one tank and one dispenser. The tank and sump is monitored by a Veeder-Root TLS-300c. The panel showed "All Functions Normal" on arrival. The UDC is monitored by a float and chain. The annular (VR -420) and sump (VR -208) sensors were tested in water and provided audible and visible alarms. The sump sensor also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The Bravo float and chains functioned properly. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill bucket is direct-buried and was hydrostatically tested for one hour with no loss of liquid. Submit a copy of the Monitoring [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Felix Ramirez (certifications current) of Afforda-Test. Annular and sump sensors were tested in water and provided audible and visible alarms at the panel. The sump sensor also provided positive shutdown. Fail safe (sensor out and power out) also caused positive shutdown. The under dispenser containment float and chain operated as required. The VMI mechanical line leak detector was tested at the dispenser and functioned properly. The direct-buried spill bucket was tested with water for one hour with no loss of liquid. The emergency stop was tested and shut down the pump. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation. Tank and monitoring system information submitted to the California Environmental Reporting System (CERS) on 9/25/2015 is accurate as observed. NOTE: Your secondary containment testing [Truncated]

Eval Notes:	Conditionally Exempt (Specified Wastestream) unit handles oil and asphalt component-contaminated water from heavy equipment pressure washing. Separation is achieved through gravity settling and flocculation. Sludge is dewatered through gravity filtration and ambient temperature drying and then shipped as hazardous waste. Unit consists of two settling tanks and one flocculation clarifier and a gravity clarifier. NOTE: Facility has current Tiered Permitting information on file. Please submit the Tiered Permitting section on CERS using your documentation as a guide.

Eval Notes: On-site to observe UST secondary containment testing. All tests were completed by Service Technician Benjamin Duncan Jr. from Afford-a-Test. Mr. DuncanG s ICC Service Technician, State Tank Tester License and Caldwell tester certifications were verified to be current. Annular Space Test: The diesel tank (Trusco) annular was placed under 10-in of vacuum for 60-minutes with no loss of vacuum; PASS. Piping Sumps and UDC (Diesel): The piping sump (fiberglass, AO Smith) and UDC were filled with water 1-inch over the highest point of the secondary piping penetration. The liquid level was tested with a Caldwell Tester for 30-minutes with no loss of liquid; PASS. Secondary Containment Piping: The diesel secondary containment piping (fiberglass, AO Smith) was pressurized with nitrogen to 3-psig for 60-minutes with no loss of pressure; PASS. Provide a copy of todayG s Secondary Containment Test Report by 12/28/18 and ensure a copy is available on-site for future [Truncated]

Maintenance Supervisor for Reed & Graham, Inc. for a routine inspection of the Conditionally Exempt (Specified Wastestream) unit that handles oil and asphalt component-contaminated water from truck and heavy equipment pressure washing. Separation is achieved through gravity settling and flocculation. Sludge is dewatered through gravity filtration and ambient temperature drying and then shipped as hazardous waste. Water is discharged to San Jose sanitary sewer. Unit consists of two settling tanks, one flocculation clarifier and a gravity clarifier. Cleaning of equipment and trucks has reduced in recent years due to economic environment and changes in equipment/truck numbers. Treatment system access is controlled to only the maintenance employees that are trained and operate the system and the Safety Manager. Reviewed operating and inspection procedures, operating and inspection logs, and SJ-SC Water [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-26-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 4/20/2018 with facility walk through and document review and concluded today with report delivery. Also present during the walk through were Ruben Williams, Senior Hazardous Materials Specialist and Jonathan Blazo, Hazardous Materials Specialist II from HMCD. Facility is a hot mix asphalt and emulsion production facility. EPA ID# CAD009203100 is active. Recycling report submitted 4/13/2018 and reviewed. Facility recycles asphalt emulsions captured from drip pans and other working containers throughout the facility by returning it to the production process. Hazardous waste (used oil, used oil fliters etc.) is also generated from the maintenance of vehicles and equipment on site. Reviewed manifests and training records. Container and tank area inspections are being done at the proper intervals. Emergency procedures posted and emergency equipment available and properly maintained.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DRAFT

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 7/14/2021

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED – SCHEDULED PERSON OR ORGANIZATION AMENDATORY ENDORSEMENT

Policy Number: 1000638062201 **Effective Date:** 9/14/2020

Named Insured: All Environmental Inc.

This endorsement modifies the insurance coverage form(s) listed below that have been purchased by you and evidenced as such on the Declarations page. Please read the endorsement and respective policy(ies) carefully.

BUSINESS AUTO COVERAGE FORM
AUTO DEALERS COVERAGE FORM
MOTOR CARRIER COVERAGE FORM

SCHEDULE

Additional Insured(s):	**Where required under written contract**

It is hereby agreed that **SECTION II – COVERED AUTOS LIABILITY COVERAGE A. Coverage, 1. Who Is An Insured** of the Business Auto Coverage Form and Motor Carrier Coverage Form, and **SECTION I – COVERED AUTOS COVERAGES, D. Covered Autos Liability Coverage, 2. Who Is An Insured** of the Auto Dealers Coverage Form are amended to include the following:

Any person or organization, shown in the schedule above, to whom you become obligated to include as an additional insured under this policy, as a result of any contract or agreement you enter into which requires you to furnish insurance to that person or organization of the type provided by this policy, but only with respect to liability arising out of use of a covered "auto." However, the insurance provided will not exceed the lessor of:

(1) The coverage and/or limits of this policy; or

(2) The coverage and/or limits required by said contract or agreement.

All other terms and conditions of this policy remain unchanged.

Copyright © Starr Indemnity & Liability Company. All rights reserved.
Includes copyrighted material of Insurance Services Office, Inc., with its permission.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED – OWNERS, LESSEES OR CONTRACTORS – SCHEDULED PERSON OR ORGANIZATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s):	Location(s) Of Covered Operations
Where Required By Written Contract	Where Required By Written Contract
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:

1. Your acts or omissions; or

2. The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and

2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

C. With respect to the insurance afforded to these additional insureds, the following is added to **Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or

2. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

DRAFT

AGREEMENT FOR PROFESSIONAL SERVICES

This is an Agreement between DAVID J. POWERS & ASSOCIATES, INC. (hereinafter "CONSULTANT"), and AEI CONSULTANTS, (hereinafter "SUBCONSULTANT"), for professional services in connection with the project described below:

DRAFT

1. Project

1520 West San Carlos Street Project – Project Number #21-082

2. Scope of Services

Preparation of a Phase I ESA report as described in the scope of work in Attachment A.

3. Compensation

a. Basic Compensation

Compensation will be paid in an amount not to exceed $2,500, as a fixed fee, based on work completed.

b. Invoice Submission

Invoices are due by the 10th of each month (for work completed the previous month) and shall be submitted via email to apinvoices@davidjpowers.com. Invoices received after the 10th of each month may not be included in that month's billing cycle and could result in a payment delay. The David J. Powers & Associates, Inc. job number and project manager name shall be included on the invoice.

c. Method of Payment

CONSULTANT will reimburse SUBCONSULTANT upon receipt by CONSULTANT of payment from their client MV3 LLC.

4. Insurance

SUBCONSULTANT shall, throughout the duration of this Agreement, maintain insurance to cover SUBCONSULTANT (including its agents, representatives, subconsultants, and employees) in connection with the performance of services under this Agreement.

1871 The Alameda • Suite 200 • San José, CA 95126 • Tel: 408-248-3500 • Fax: 408-248-9641 • www.davidjpowers.com

Concurrently with the execution of this Agreement by SUBCONSULTANT, and prior to the commencement of any services, SUBCONSULTANT shall furnish written proof of insurance (certificates and endorsements) to the CONSULTANT for the marked minimum insurance levels:

☒ Commercial General Liability coverage in an amount not less than one million dollars ($1,000,000) per occurrence and two million dollars ($2,000,000) general aggregate for general liability, bodily injury, personal injury, and property damage.

☒ Automobile Liability coverage in an amount not less than one million dollars ($1,000,000) per accident for bodily injury and property damage.

☒ Workers' Compensation coverage as required by the State of California.

☒ Professional Liability coverage for damages that may be the result of errors, omissions, or negligent acts of SUBCONSULTANT in an amount not less than one million dollars ($1,000,000) per claim and annual aggregate.

General Liability and owned Automobile Liability insurance under this contract shall be endorsed to contain the following clause:

> "David J. Powers & Associates, Inc., its officials and employees are added as additional insured as respects the operations and activities of, and on behalf of, the named insured's performance under its contract with David J. Powers & Associates, Inc."

Please note our job number 21-082 on the insurance certificate(s) and have the certificate(s) emailed to: COI@davidjpowers.com.

5. General

a. SUBCONSULTANT is an independent contractor and all persons employed by SUBCONSULTANT in connection herewith shall be its employees and not employees of CONSULTANT in any respect.

b. SUBCONSULTANT shall comply with applicable local, state, and federal laws, rules and regulations and shall obtain all permits required for the work to be performed hereunder.

c. Should litigation occur between the two parties relating to the provisions of this Agreement, all litigation expenses, collection expenses, witness fees, court costs and reasonable attorney's fees shall be paid by the non-prevailing party to the prevailing party.

d. Work shall commence immediately upon execution of this Agreement.

e. In the event any provision of this Agreement shall be held to be invalid and unenforceable, the remaining provisions shall be valid and binding upon the parties. One or more waivers by either party of any provision, term, condition or covenant shall not be

Re: Proposal for Phase I ESA
1520 West San Carlos Street, San Jose, CA 95126

Dear Mr. Kallas:

In response to your request for technical reports for the above referenced site, AEI Consultants (AEI) is pleased to present this proposal with our attached Terms and Conditions to complete a Phase I ESA. AEI will follow the scopes of work as stated in the American Society for Testing and Materials (ASTM) to complete these technical requirements.

AEI understands the property consists of the following:

Property Description	
Property Type or Use	Retail - Free Standing
Purpose of Assessment	Equity: New Construction
Date of Construction	1948
Lender Name	NA
Number of Buildings / Stories	1 / 1
Number of Units	4
Gross Building Area / Land Area	7,130 / 0.37
Assessor Parcel Number's (APN)	277-18-021

Proposed Fees:
AEI will complete the below stated scopes of work for the following fees:

Requested	Service(s)	Fee per Service
☐	Phase I Environmental Site Assessment	$2,500.00

The total cost of the project will be adjusted based on the above selected services. If all services are selected, the total project will be $2,500.00.

Schedule:

The project will be completed within 15 working days of receiving the signed Authorization to Proceed. Due to the number of days allotted to complete this investigation, responses from some regulatory agencies may not be received prior to the report due date. As such, the report may contain limitations pertaining to the lack of agency responses to the Freedom of Information Act requests and/or records review.

Due to the ongoing cases of COVID-19, AEI is taking extra precautions during site visits to limit the interaction between our employees and occupants. For healthcare, senior living, medical office, assisted living and/or multifamily properties, AEI may not be able to view interior features or occupied areas of the subject property. Client should be aware that access limitations may apply. In addition, client should be aware that travel

Client Initials: _____ Date: _____

DRAFT

restrictions or lack of site access may affect our quoted turnaround time. Any delays will be communicated with our client as soon as possible.

If there have been any cases of COVID-19 reported at any of the properties we have scheduled site visits for, please be sure AEI is made aware. Our goal is the safety of our employees as well as the safety of your occupants. The turnaround time quoted is subject to staff availability and any access restrictions due to COVID-19.

Payment Terms and Deliverables:
An invoice for the full contract amount will be issued at the completion of the assessment. AEI will deliver one electronic final copy of each report. Hard copies of the reports are available upon request.

In the event that the client cancels the contract, then the client will be responsible for payment of incurred costs up to the cancellation notice date. If the project is placed on hold for longer than a 90-day period, AEI will cancel the project and the client will be responsible for incurred costs up to the hold date. Hold projects may be re-initiated at any time, and additional fees may apply.

Please review our proposal and if you have any questions, please do not hesitate to contact me. To initiate this contract, please sign the Authorization to Proceed, initial and date each page and return to AEI. Thank you for the opportunity to be of service.

Sincerely,

Tory Golino

Scope of Work

Phase I Environmental Site Assessment (ESA) ASTM E1527-13: The Phase I ESA will be performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). The Phase I ESA will be conducted under the charge of an Environmental Professional and will include the following:

- Site visit and walk-through of the property and structures, readily accessible interior common areas, and a representative sample of occupant spaces. Items such as current and past uses of the property and adjoining properties; property boundaries; observable topographic geologic, hydrogeologic conditions; structures or other improvements; roads; source and location of potable water; wells; surface water; potential hazardous substances and/or petroleum products; storage tanks; abnormal odors; pools of liquid; drums and containers; suspected fill materials; stain soil or pavement; stressed vegetation; solid waste; waste water discharges; floor drains, sumps or clarifiers; septic systems shall be noted as reasonably and visibly observed.
- Search of local, state, tribal and federal databases in accordance with current ASTM and AAI standard search distances.
- Contact local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.
- Site history and land use review, including reasonably ascertainable agency records, aerial photographs, historical city directories, fire insurance maps, and other applicable sources.
- Interviews with knowledgeable persons (i.e. past and present owners, property managers, tenants, neighbors), as available and open to interview, regarding the history, operations, waste management, and other environmental considerations for the property.
- Additional observations, though generally outside the scope of a Phase I ESA, but provided as a service to our clients unless otherwise instructed, include EPA-determined radon zone, visual inspection of asbestos-containing building materials, lead-based paint, and mold.
- AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.
- Report includes findings, opinions and conclusions, photographs, site map, historical sources, and qualifications in a manner consistent with standard practices.

Environmental Liens Search is not included in the Phase I ESA scope of work unless it is specifically requested.

DRAFT

TERMS AND CONDITIONS

1. **Billings, Payment and Credit.** The Client shall pay All Environmental Inc. d/b/a AEI Consultants (AEI) for the services (the "Services") performed in accordance with the prices set forth in the proposal to which these terms and conditions are attached (the "Proposal", and together with these terms and conditions the "Agreement"). Invoices shall be submitted in accordance with the Proposal. Payment of the AEI invoices shall be the primary, absolute and non-contingent obligation of the Client, and shall not be conditioned upon the closing of a loan transaction or any other event. PAYMENT IS DUE UPON RECEIPT. If AEI does not receive payment in full within thirty (30) calendar days of the date of the invoice, the account shall be deemed delinquent. Unpaid delinquent balances shall bear interest from the invoice date at one and one-half percent (1.5%) per month, or at the maximum lawful interest rate (whichever rate is less).
The Client shall be liable to AEI for all costs and expenses of collection of delinquent balances, including reasonable attorney and other fees, and court costs. Time is of the essence with respect to this provision. AEI's non-exercise of any rights or remedies, whether specified herein or as otherwise provided by law, shall not be deemed a waiver of any rights or remedies, nor preclude AEI from the future exercise of such rights or remedies. If a third party is accepting a Proposal as agent for the Client, such third party represents and warrants to AEI that it is legally authorized to bind the Client to the terms of the Agreement and guarantees payment for services.

2. **Right of Entry; Force Majeure.** The Client shall arrange for the right of entry to the subject property ("Site") by AEI, its agents, employees, consultants, contractors and subcontractors, for the purpose of performing all acts as may be reasonably necessary to complete the Services within the agreed scope of work. AEI may require that an authorized, knowledgeable representative of the Site owner be present at the Site as a condition of the performance of the Services and may require that Site personnel operate major building systems and equipment at the time the Services are performed. AEI's ability to comply with the schedule for performance described in the Proposal is contingent upon timely and complete Site access. AEI shall not be responsible for damages or delays in performance caused by force majeure, acts of God, events beyond the control of AEI, or events that could not have been reasonably foreseen and prevented.

3. **Documents/Samples.** All field notes, calculations, estimates and other documents, data or information prepared by or on behalf of AEI in connection with the performance of its Services (collectively, "Documents"), shall remain the sole property of AEI. All Documents prepared by AEI for the Client with respect to any Site shall be used solely for the intended purposes described in the Proposal, and solely with respect to the Site. Unless otherwise agreed, AEI shall retain all Documents for three (3) years following submission of AEI's report to the Client. In its sole discretion and without prior notice to the Client, AEI may dispose of all field samples within thirty (30) calendar days after submission of AEI's report to the Client.

4. **Matters Known to Client.** The Client, itself or through the Site owner, shall provide AEI with any and all information known to the Client, or suspected by the Client, which pertains to: (a) the existence or possible existence at, on, under or in the vicinity of the Site, any hazardous materials, pollutants, lead-based paint, radon or asbestos; (b) any conditions at, on, under or in the vicinity of the Site, which might represent a potential safety hazard or danger to human health or the environment; (c) any permit, manifest, title record, or other record of compliance or non-compliance with any federal, state or local laws, or court or administrative order or decrees; (d) any known or suspected deficiencies or adverse conditions associated with structures or other physical improvements on Site; or (e) any modifications or changes from the original plans and specifications of Site improvements which could affect the recommendations or conclusions reached by AEI in the performance of its Services.

5. **Preliminary Findings.** Preliminary findings (often referred to as "verbals") can be provided to the Client in order to quickly apprise them of **preliminary** data obtained as a result of AEI's visual observations at the project Site. They are not intended to be exhaustive or conclusive or to substitute for the final written report, as they do not include information obtained from a number of other important and necessary components of the overall assessment. AEI recommends against making any decisions based upon such limited, preliminary, verbal information.

6. PERFORMANCE STANDARDS. IN PERFORMING THE SERVICES, AEI SHALL EXERCISE THE DEGREE OF SKILL AND CARE NORMALLY EXERCISED BY CONSULTANTS IN THE SAME COMMUNITY PROVIDING THE SAME OR SIMILAR SERVICES FOR PROJECTS OF COMPARABLE SIZE, COMPLEXITY, BUDGET, SCHEDULE AND OTHER CHARACTERISTICS OF THE PROJECT (THE "STANDARD OF CARE"). EXCEPT AS SET FORTH IN THE IMMEDIATELY PRECEDING SENTENCE, AEI MAKES NO WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES OR ANY OF ITS ORAL OR WRITTEN REPORTS. CLIENT ACKNOWLEDGES AND AGREES THAT (I) THE SERVICES MAY REQUIRE JUDGMENTS TO BE MADE BY AEI THAT ARE BASED UPON LIMITED DATA RATHER THAN UPON SCIENTIFIC CERTAINTIES; (II) AEI'S APPROACH, RECOMMENDATIONS, AND ASSOCIATED COST ESTIMATES, IF ANY, ARE BASED ON INDUSTRY PRACTICES AND AVERAGES; (III) PROFESSIONAL OPINIONS ARE RENDERED WITH RESPECT TO OBSERVATIONS MADE AND DATA OBTAINED AT THE TIME OF ASSESSMENT; AND (IV) ULTIMATE OUTCOMES COULD BE INCONSISTENT WITH THE CONCLUSIONS, RESULTS AND PROJECTIONS OF AEI. ALL INFORMATION REGARDING OPERATIONS, PLANS, SPECIFICATIONS, CONDITIONS OR OTHER DATA WHICH IS PROVIDED TO AEI BY CLIENT, OWNERS OR THIRD PARTIES (INCLUDING WITHOUT LIMITATION, ANY POINT OF CONTACT AT THE SITE), IS DEEMED BY AEI TO BE CORRECT AND COMPLETE WITHOUT INDEPENDENT VERIFICATION. AEI ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION AND SHALL NOT BE LIABLE IF RELIANCE ON SUCH INFORMATION RESULTS IN INCORRECT CONCLUSIONS OR RESULTS.

7. INDEMNIFICATION AND LIMITATION OF LIABILITY. AEI AGREES TO INDEMNIFY AND HOLD HARMLESS (BUT NOT DEFEND) CLIENT, ITS DIRECTORS, OFFICERS AND EMPLOYEES AGAINST ANY LOSSES, LIABILITY, DAMAGES, COSTS AND EXPENSES TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS, ERRORS, OR OMISSIONS OF AEI, ITS EMPLOYEES, SUBCONTRACTORS OR ANYONE FOR WHOM AEI IS LEGALLY LIABLE, IN THE PERFORMANCE OF SERVICES HEREUNDER. IN NO EVENT SHALL AEI BE LIABLE FOR LATENT OR HIDDEN CONDITIONS, CONDITIONS NOT ACTUALLY OBSERVED BY AEI WITHIN THE LIMITED SCOPE OF WORK, THE POTENTIAL CONSEQUENCES OF OBSERVABLE CONDITIONS, CONDITIONS OF WHICH CLIENT HAD KNOWLEDGE OF AT THE TIME OF THE ASSESSMENT, OR ANY UNAUTHORIZED ASSIGNMENT OF OR RELIANCE UPON THE REPORTS. THE LIABILITY OF AEI, AND THAT OF ITS OFFICERS, DIRECTORS, EMPLOYEES, AGENTS AND SUBCONTRACTORS, TO CLIENT OR TO ANY THIRD PARTY CLAIMING BY OR THROUGH CLIENT, INCLUDING ANY COMPANY AFFILIATED WITH CLIENT, OR ANY OFFICER, DIRECTOR, EMPLOYEE, AGENT, SUBCONTRACTOR, SUCCESSOR, OR ASSIGN OF SUCH PARTIES, FOR ANY LOSSES, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY), RELATED TO THE SERVICES, THE AGREEMENT OR OTHERWISE, SHALL NOT EXCEED THE AGGREGATE SUM OF TWENTY-FIVE THOUSAND DOLLARS ($25,000.00). IN NO EVENT SHALL AEI BE LIABLE TO CLIENT FOR ANY EXEMPLARY, PUNITIVE, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) ARISING FROM OR IN ANY WAY CONNECTED WITH ITS PERFORMANCE OR FAILURE TO PERFORM UNDER THE AGREEMENT, EVEN IF THE AFFECTED PARTY HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

8. **Dispute Resolution.** This Agreement shall be governed by, subject to, and construed in accordance with the laws of the State of California. Any controversy, claim or action arising out of, or related to, this Agreement, the breach thereof, or the coverage of this arbitration provision may be settled by arbitration and will be based on the rules in effect on the date of delivery of demand for arbitration. The arbitrator(s) shall apply California substantive law to the proceedings, except to the extent Federal substantive law would apply to the claim. The arbitrator(s) shall prepare in writing and provide to the parties an award including actual findings and the reasons on which their decision is based. The arbitrator shall not have the power to commit errors of law or legal reasoning, and the award may be vacated or corrected on appeal to a court of competent jurisdiction for any such error. The arbitration of such issues, including the determination of the amount of any damages suffered by either party hereto by reason of the acts or omissions of the other, shall be to the exclusion of any court of law except for enforcement of an arbitrated award. The decision of the arbitrators, or a majority of them, shall be final and binding on both parties and their respective successors and assigns. If the arbitrators determine that a party has initiated a recovery action on a basis inconsistent with the provisions of this Agreement, the initiating party shall, without exception, be assessed all costs incurred by the responding party. Except as identified above, each party shall pay the fees of its own attorneys, and the expenses of its witnesses and all other expenses connected with the presentation of its case. The costs of the arbitration, including the cost of the record or transcripts thereof, if any, administrative fees, fees of the arbitrators, and all other fees and cost shall be borne as determined by the arbitrators.

9. **Reliance and Assignment. AEI'S WRITTEN REPORT SHALL CONTAIN AEI'S STANDARD RELIANCE LANGUAGE UNLESS ALTERNATE LANGUAGE HAS BEEN PRE-APPROVED BY AEI. IF NO PRE-APPROVED ALTERNATE LANGUAGE EXISTS, THE SERVICES, THE REPORTS AND OTHER RELATED WORK PRODUCT PROVIDED BY AEI MAY BE RELIED UPON BY THE CLIENT, ITS SUCCESSORS AND ASSIGNS WITH RESPECT TO A LOAN SECURED BY THE SITE, AND ANY RATING AGENCY RATING, OR ANY ISSUER OR PURCHASER OF, ANY SECURITY COLLATERALIZED OR OTHERWISE BACKED BY SUCH LOAN. NO OTHER PERSON OR ENTITY MAY RELY ON THE REPORT WITHOUT THE ADVANCE WRITTEN CONSENT OF AEI, AND NO OTHER THIRD PARTY BENEFICIARIES ARE INTENDED. EXCEPT AS DESCRIBED ABOVE, THE CLIENT SHALL NOT ASSIGN THE AGREEMENT, ANY REPORT OR ANY RELATED WORK PRODUCT, WITHOUT THE PRIOR WRITTEN CONSENT OF AEI. ANY UNAUTHORIZED REUSE OR REDISTRIBUTION OF AEI'S WORK PRODUCT OR REPORTS SHALL BE AT THE CLIENT'S AND RECIPIENT'S SOLE RISK, WITHOUT LIABILITY TO AEI. CLIENT WILL HOLD AEI HARMLESS FROM ANY AND ALL LIABILITY, OBLIGATION, COST AND EXPENSE ARISING FROM OR RELATED TO ANY UNAUTHORIZED DISTRIBUTION OR USE BY CLIENT OF AEI'S WORK PRODUCT OR REPORTS. AEI SHALL NOT ASSIGN ITS OBLIGATIONS UNDER THE PROPOSAL; HOWEVER, AEI MAY EMPLOY, BY SUBCONTRACT, SUITABLY TRAINED PERSONS OR ENTITIES ACCEPTABLE TO AEI TO PERFORM THE SERVICES.**

10. **Confidentiality.** AEI shall not disclose information regarding the Proposal, the Services or any Documents, except to the Client, employees, consultants, subcontractors, or other persons engaged by AEI to perform the Services, third parties designated by the Client (subject to the reliance limitations described herein), or as required by law. Notwithstanding the terms of this Section, AEI shall comply with all judicial orders, government directives, and laws, regulations and ordinances, regarding the reporting to appropriate public agencies of potential dangers to public health, safety or the environment.

11. **Miscellaneous.** AEI is an independent contractor of Client, and not Client's agent, employee or partner. The Agreement shall be governed by the laws of the State of California and the parties irrevocably consent to the jurisdiction of the courts of the State of California and of the United States District Court for the District of Northern California if a basis for federal jurisdiction exists. In the event a dispute relating to an AEI report results in litigation, and the claimant does not prevail at trial, then the claimant shall pay all costs incurred by AEI in the defense of the claim, including reasonable attorney's fees. Each provision of the Agreement shall be considered separable, and if, for any reason, any provision or provisions herein are determined to be invalid and contrary to any existing or future law, such invalidity shall not affect those portions of this Agreement that are valid. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, between the parties with respect to the Services to be provided pursuant to this Agreement. The provisions of the Agreement may only be modified by a written instrument signed by an authorized representative of each party.

12. **Hazardous Waste and Reporting.** The Client understands and agrees that human health and safety is a priority in implementing any investigation or assessment. AEI and Client agree that the discovery of hazardous materials, suspect hazardous materials or petroleum products, or unexpected conditions may constitute a change in the condition of the job Site mandating a renegotiation of the scope of work or termination of the project and may make it necessary for AEI to take immediate measures to protect human health and safety. AEI agrees to notify Client as soon as practicable if such materials are encountered. Client encourages AEI to take any and all measures, that in AEI's professional opinion, are justified to protect AEI's personnel and the public. Client agrees to waive any claim against AEI and to indemnify, defend and hold harmless AEI from any and all claims arising out of AEI's encountering unanticipated hazardous materials or suspected hazardous materials. Client agrees to compensate AEI for all costs associated with such an event based upon AEI's prevailing fee schedule.

13. **Utilities.** If AEI is expressly engaged to perform soil boring or other invasive testing, AEI shall not be responsible for damages to underground or aboveground utilities, for unmarked or mismarked utilities or other features, or for damage that occurs to such utilities or features. The Client is responsible for providing information to AEI regarding the location of intra-Site utilities. Client recognizes that the use of exploration equipment may unavoidably affect, alter or damage existing structures, vegetation and terrain at the Site. AEI, including subcontractors, will take reasonable precautions to limit damage. However, Client recognizes that such damage is inherent in the normal course of the contracted scope of work and the cost of the repair for any damages is not part of the contracted services. In the event of damage to the property as a result of such work and specifically stated above, Client will hold harmless, AEI, including subcontractors, for damage caused during the course of the agreed upon scope of work.

14. **Conflict of Interest.** To the best of AEI's knowledge, AEI has no actual, potential or apparent conflict of interest pertaining to this Agreement, except as has been previously disclosed to Client in writing, and AEI covenants and agrees that it shall promptly advise Client of any other actual, potential or apparent conflicts of interest, whether existing as of the execution date of this Agreement or arising in the future, upon discovering the same.

AUTHORIZATION TO PROCEED

Proposal for Phase I ESA

1520 West San Carlos Street, San Jose, CA 95126

Client Authorization and Billing Information:

I hereby accept the proposal and authorize AEI to proceed with the scope of work as described herein. AEI reserves the right to suspend or delay work for late payment. Should any project information change, I understand that additional fees may accrue and the due date may be extended. Should the agreement be terminated by either party upon written notice through no fault of the party initiating termination, compensation shall be paid for all services performed and expenses incurred to the date of termination.

DRAFT

Katie Hindt – Client Manager

B.A. – Environmental Studies, University of California, Santa Cruz

Registered Environmental Property Assessor (REPA) #528528

Ms. Hindt has over 10 years of experience in the environmental service industry and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase 1 Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Records Research with Risk Assessments, Regulatory Database Reviews and Historical Records Reviews. She has completed assessments on a variety of residential, agricultural, commercial and industrial sites. Ms. Hindt is familiar with all aspects of Due Diligence Property Assessments and the requirements of many reporting standards including, ASTM, AAI, HUD and client-specific formats.

Project experience for Ms. Hindt includes:

- Phase 1 Environmental Site Assessments (Phase 1 ESA)
- Environmental Transaction Screens (ETS)
- Environmental Transaction Analyses (ETA)
- Records Search with Risk Assessment (RSRA)
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup

As a Client Manager, Ms. Hindt provides senior author services and client management. Additional responsibilities include managing projects and staff mentorship.

In addition, prior to joining the environmental service industry, Ms. Hindt spent four years studying a broad range of environmental disciplines including: National environmental law, policy and economics, restoration ecology, California environmental history and California freshwater policy/issues.

DRAFT

Robert Callinan, P.G. – Associate Consultant

EDUCATION:

BS – Earth Science with a Geology Concentration, University of North Carolina at Charlotte, NC

REGISTRATIONS & CERTIFICATIONS:

Licensed Professional Geologist in North Carolina
Licensed Professional Geologist in Illinois

EXPERIENCE SUMMARY

Mr. Callinan has worked in the environmental industry since 1993. He is responsible for project management and completion of environmental site assessments ensuring compliance with the EPA's All Appropriate Inquiry, ASTM Standards and client required scopes of work, oversight of national client needs while also ensuring the accuracy, consistency and quality of services provided by AEI.

Mr. Callinan's project management experience has included:

- Completion of Phase I Environmental Assessments, Limited Phase II Environmental Site Assessments in conformance of ASTM, CMBS, Freddie Mac and Fannie Mae protocols.
- Developing scopes of work of Limited Phase II Environmental Assessments investigating for the presence of various contaminants for due diligence, and liability purposes. Interpreting assessment results and presenting findings to transaction stakeholders.
- Design and implement investigations during UST Removal projects, soil and groundwater investigations, and corrective action plans of various contaminants for compliance with regulatory agency requirements.
- Oversight and management of the production of due diligence products for small, and large commercial real estate portfolios transactions.

Mr. Callinan provides clients with effective communication of project updates and environmental concerns, develops cost effective investigative assessments to identify potential risks, and determines efficient resolutions that satisfy client requirements while proceeding to closing, and resolution of regulatory actions.
