Project Description: (please use a separate page if necessary)

This project uses grant funds approved by the California Legislature to initiate activities that are designed to restore salmon and steelhead trout habitat. The 2023 Fisheries Restoration Grant Program MND project activities occur in watersheds that have been subjected to significant levels of logging, road building, mining, grazing, and other activities that have reduced the quality and quantity of stream habitat available for native anadromous fish.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
